Plants. Bids are being received under three schedules, as follows:

SCHEDULE 1

Claremont Pumping Plant

2 Pumping units, centrifugal pump, 1400 g p m; 250 h p, 1200 r p m motor, 3 phase, 60 cycles, complete.

2 Flanged gate valves for 200 lbs. working pressure, for suction of pump.

2 Flanged gate valves for 200 lbs. working pressure, for discharge of the pump.

2 Flanged check valves for 200 lbs. pressure for discharge of pump.

3 200 k v a, 6600 single phase, outdoor transformers.

15,000 volt, 400 ampere, triple pole, single throw outdoor type oil circuit breaker.

3 300 ampere, 15,000 volt, single pole, single throw, outdoor type disconnecting switches.

SCHEDULE 2

Pleasant Valley Pumping Plant

2 Pumping units, one horizontal shaft centrifugal pump, 1400 g p m at head of 360 ft. one 200 hp, 1200 r p m squirrel cage induction motor to operate on electric energy at 440 volts, 3 phase and 60 cycles, complete.

2 Flanged gate valves for 300 lbs. working pressure for suction of the pumps.

2 Flanged gate valves for 300 lbs. working pressure for discharge of the pumps.

2 Flanged check valves for 300 lbs. working pressure for discharge of the pumps.

15,000 volt, 300 ampere, triple pole, single throw, outdoor type oil circuit breaker.

3 300 ampere, 1500 volt, single pole, single throw, outdoor type disconnecting switches.

SCHEDULE 3

Vine Street Pumping Plant

3 Pumping units, each to consist of one horizontal shaft centrifugal pump, 1400 g p m at a head of 185 ft., one 100 h p, 1200 r p m squirrel cage induction motor to operate on electric energy at 440 volts, 3 phase and 60 cycles, complete.

3 Flanged gate valves for 150 lbs. working pressure for suction of the pumps.

3 Flanged gate valves for 150 lbs. working pressure for discharge of the pumps.

3 Flanged check valves for 150 lbs. working pressure for discharge of the pumps.

3 100 k v a, 6600 (11,000V) to 220-440 volts, single phase, distribution type, outdoor transformers.

15,000 volt, 400 ampere, triple pole

ORNAMENTAL WIRE AND IRON WORK

IRON WIRE Fence and Gates

TENNIS COURT ENCLOSURES WIRE SCREENS AND GUARDS

West Coast Wire & Iron Works

San Francisco, California

861-863 Howard Street

Telephone DOuglas 4397

Continuous operation since 1887

single throw, outdoor type oil circuit breakers.
3 300 ampere, 15,000 volt, single pole, single throw, outdoor type disconnecting switches.
Specifications obtainable from Secretary.

UKIAH, Mendocino County, Calif.—Pacific Telephone & Telegraph Co. will start construction at once on rebuilt line between Ukiah and Boonville involving new poles, wires and other equipment.

STOCKTON, San Joaquin Co., Cal.—Pacific Telephone & Telegraph Co. will spend \$135,000 in new equipment in connection with the Stockton-Merced long distance line, it is announced by H. C. Britton, district manager for the company.

Class "A" Portland cement concrete (structure); 125 cu. yds. Class "A" Portland cement concrete (pavement) 20,100 lbs. reinf. steel; 41,500 lbs. structural steel; 1 lot miscellaneous items of work.

STOCKTON, San Joaquin Co., Cal.—J. E. Fitzsimmons, Route 1, Box 80, Lodi, at \$9,780.50 awarded contract by county supervisors to construct Durham Ferry Bridge over San Joaquin river in Road District No. 3. Complete list of bids follows:

J. E. Fitzsimmons.....	\$ 9,780
L. Uhels.....	10,040
E. L. Stokes.....	10,215
M. A. Jenkins.....	10,567
Carl Nelson.....	10,995
Bundisen & Lauritzen.....	15,475

IMPERIAL COUNTY, Cal.—California State Department of Public Works, Division of Highways, au-

thorized by State Railroad Commission to construct a public highway at separated grades under the tracks of the San Diego and Arizona Railroad in the vicinity of Coyote Wells, Imperial County estimated cost \$20,-524.

OAKLAND, Cal.—Petition of Alameda County Supervisors seeking authorization to reconstruct the Bay Farm Island bridge will be considered by the U. S. War Department in San Francisco on March 12 at the U. S. Engineer's Office, Customhouse. The proposed bridge will have a swing draw span with a vertical clearance of 10 feet at high water or 18.6 feet at mean lower low water; and a horizontal clearance of 72 feet between the dolphins on the Alameda or north side of the center pier. There also will be a small fixed span for motor boats which will have a vertical clearance of 12 feet at high water, and 20.6 feet at mean low water and a horizontal clearance of 20 feet. Geo. A. Posey is county surveyor of Alameda County.

SISKIYOU COUNTY, Cal.—Jacobs & Pattiani, 337 17th St., Oakland, at \$71,548 awarded contract by State Highway Commission to construct a reinforced concrete bridge at Station 236+75.25 about 5 1/2 miles north of Yreka, consisting of one 200 ft. open spandrel arch span and three 40 ft. girder approach spans.

LOS ANGELES, Cal.—County Bridge Engineer W. D. Armstrong, Hall of Records, completes plans for new bridge to span Topanga Canyon about 2.5 miles from the mouth of the canyon. The proposed structure will be 520 ft. long and will have two primary arches with spans of 90 ft. each. The roadway will be 80 ft. above the canyon bed at its deepest point.

DREDGING, HARBOR WORKS & EXCAVATIONS

BAKERSFIELD, Kern Co., Calif.—C. W. Hartman Const. Co., Bakersfield, at 10c yds. awarded contract by Kern River District of Kern County for reinforcement of levee on east side of Chester Ave. and north side of Kern river. Complete list of bids follows:

Hartman Const. Co., Bakersfield.....	10 c
A. J. Peterson, Bakersfield.....	15 c
Lang Transportation Co., L. A.....	17.4c
Switzer Bros., Los Angeles.....	23 c
Carl Ingalls, Bakersfield.....	30 c
H. H. Jorgensen, Los Angeles.....	30 c

BULLARD-DAVIS, Inc.

SAN FRANCISCO 275 8th St.
MARKET 2322

LOS ANGELES 800 W. 11th St.
WEETMORE 4179

LONG BEACH, Calif.—Proposal for the extension of the San Pedro breakwater, 12,500 ft., will be considered this month by the river and harbor board at Washington, D. C. Estimated cost, \$6,897,000. Recommendations of modification of dredging plans for the entrance channel at Long Beach harbor, made by Col. T. M. Robins, U. S. district engineer at San Francisco, will probably be approved by the board. Previous proposals contemplated at 40-ft. depth, but Col. Robins recommends a 35-ft. depth.

SAN FRANCISCO—Associated Boat Industries of California and Capt. B. P. Lamb, Secretary of the City Park Commission, will seek a \$250,000 appropriation from the supervisors, for expansion of Yacht Harbor. According to Frederick Weddleton, secretary-manager of the association, the \$250,000 will be sufficient to raise a breakwater long enough to increase the present harbors capacity to 1000 boats. At present only 180 boats may be moored in the shelter.

IRRIGATION PROJECTS

TURLOCK, Stanislaus Co., Calif.—Until March 17, 4 P. M., bids will be received by Anna Sorensen, secretary, Turlock Irrigation District, for construction in Improvement District No. 26, involving approx. 19,000 sq. ft. 2-in. concrete canal lining with necessary main structures. This work is part of Schedule No. 3 between Blue Gum Ave. and Southern Pacific R. R. Bond of one-half the amount of the contract price required of the successful bidder. Cashier's or certified check 5% payable to district required with bid. Plans obtainable from secretary. R. V. Welkie is chief engineer for the district.

TURLOCK, Stanislaus Co., Calif.—Until March 17, 3 P. M., bids will be received by Anna Sorensen, secretary, Turlock Irrigation District, for construction in Improvement District No. 23, involving under:

SCHEDULE NO. 1

Section No. 1. Consisting of approximately 24,076 sq. ft. of 2-inch thick concrete canal lining.

Section No. 2. Consisting of approximately 71,806 sq. ft. of 2-inch thick concrete canal lining.

SCHEDULE NO. 2

Consisting of approximately 27 conc. structures, a total of 30.6 cu. yds. of concrete.

(Schedule No. 2 is to be paid for in cash by property owners benefited).

SCHEDULE NO. 3

Consisting of one Highway Siphon. Bond of one-half the contract price will be required of the successful bidder. Cashier's or certified check 5% payable to district required with bid. Plans obtainable from secretary. R. V. Welkie, chief engineer of district.

TRACY, San Joaquin Co., Cal.—Until March 19, 8 P. M., bids will be received by W. Schlossman, secretary, Banta-Carbena Irrigation District, under Contract No. 18, for excavation and distribution system improvements, involving:

- (1) 15,000 cu. yds. excavation.
- (2) Install 70 redwood drops and furnish lumber and material for same

(3) Install 14 timber turnouts and furnish lumber and material for same;
(4) One concrete turnout and furnish material for same;
(5) One 30-inch concrete pipe road-crossing and one 24-inch pipe road-crossing and furnish material for same;
(6) One metal flume, wooden sub-structure over main lift canal, material for this to be furnished by district.
Certified check 5% payable to President of Board of Directors of district required with bid. Plans obtainable from secretary.
See call for bids under official proposal section in this issue.

TURLOCK, Stanislaus Co., Calif.—Until March 17, 3 P. M., bids will be received by Anna Sorenson, secretary, Turlock Irrigation District, for construction in Improvement District No. 30, involving under:

- SCHEDULE No. 1**
Section No. 1. Consisting of approximately 800 lin. ft. of 24-in. low pressure concrete pipe either machine made or poured in place.
Section No. 2. Consisting of approximately 1½ cu. yds. of concrete in one intake structure with one 24-in. Calco side gate in place.
SCHEDULE No. 2
Section No. 1. Consisting of approximately 3200 lin. ft. of 16-in. reinforced high pressure concrete pipe in place.
Section No. 2. Consisting of approximately 20 16-inch reinforced stand pipes in place, a total of 38 lin. ft.
Section No. 3. Consisting of approximately 20 lin. ft. 16-in. metal drain pipe crossing in place with Day-on Union and concrete abutments.
Section No. 4. Consisting of approximately 6 cu. yds. of reinforced concrete in outlet structure and drain crossing.
Cashier's or certified check 5% payable to district required with bid. and in the amount of one-half of contract price required of successful bidder. Plans obtainable from secretary. R. V. Meikle is chief engineer or the district.

STREET LIGHTING SYSTEMS

PACIFIC GROVE, Monterey Co., Cal.—Due to protests, the city council has postponed hearings on the proposal to install ornamental street lighting systems in Central Ave. until March 3. One project involves the installation of 46 and another the installation of 17 single lamp standards.
G. G. Stuhbs, is city clerk.

NEWMAN, Stanislaus Co., Cal.—City trustees contemplate installation of electroliner system in Kern St. and South O and N Streets. Manufacturers will install standards from high property owners will select a sign.

FRESNO, Fresno Co., Calif.—City council declares intention (102-D) to

install lighting system in Fresno St. bet. O and Divisadero Sts.; Howard St. bet. Fresno and Divisadero Sts.; portions of Divisadero and Fresno Sts. Involving installation of 76 electroliners together with underground system. Standards of combination steel and cast iron, single lamp, 1911 Act. Hearing March 13. H. S. Foster, city clerk. A. M. Jensen, city engineer.

FRESNO, Fresno Co., Calif.—City council declares intention (101-D) to install lighting system in Stanislaus St. bet. Van Ness Ave. and point 75-ft. northeast of O St., in O St., from Stanislaus St. to point 125-ft. NW from Stanislaus St., and in portions of Blackstone Ave., involving installation of 137 standards together with underground system. Comb. steel and cast iron standards. 1911 Act. Hearing March 13. H. S. Foster, city clerk. A. M. Jensen, city engineer.

PORTERVILLE, Tulare Co., Cal.—City council is considering the installation of a modern electroliner system in the business district. The project has the backing of the Porterville Realty Board.

MACHINERY AND EQUIPMENT

SACRAMENTO, Cal. — Morrison Chevrolet Co., Sacramento, awarded contract by city to furnish two truck chassis for use of the City Park Department.

RENO, Nevada—City council plans to purchase an asphalt heating machine for use in improving streets.

OAKLAND, Cal.—Pacific Coast Engineering Co., at \$8,468 awarded contract by City Port Commission to furnish dredge hull and ladder pipe.

BERKELEY, Alameda Co., Cal.—Kleiber Motor Truck Co. at \$5044 submitted low bid to city council to furnish dump truck for street department. Complete list of bids, all taken under advisement, follow:

Kleiber Co.	\$5044
Sterling Motor Truck Co.	5400
Moreland Sales Corp.	5396
Auto-Car Sales & Service Corp.	9000

OAKLAND, Cal.—Until March 6, 12 noon, bids will be received by Frank C. Merritt, city clerk, to furnish and deliver one 1½-ton motor truck. Bond of 15% of contract price required of successful bidder. Specifications on file in office of clerk.

SAN FRANCISCO.—Until March 5, 2:30 P. M., bids will be received by Board of Public Works to furnish and deliver a portable gravel plant for the Coast Range Division of the Hetch Hetchy Water Supply System, under Contract No. 121. Bond in the sum of one-half the amount of the contract price required of the successful bidder. Certified check 10% payable to clerk of the Board of Supervisors required with bid. Spec. obtainable from

the Bureau of Engineering, 3rd floor, City Hall, on deposit of \$5, returnable. NOTE—Bids were previously set to be opened on this equipment Feb. 26.

- EUREKA, Humboldt Co., Cal.**—W. H. Pierce, superintendent of equipment, California State Highway Commission, will receive bids on March 10, 2 P. M., for the purchase of the following equipment no longer required by the commission:
- CHC 1309** Liberty cargo body truck.
" **1318** Standard truck chassis with cab.
" **1319** Standard truck chassis with cab.
" **2027** Liberty dump truck.
" **2349** G. M. C. truck chassis with cab.
" **2433** Ford Express Model T.
" **2484** Ford Express Model T.
" **2536** Ford Express Model T.
" **2350** G. M. C. 2-ton truck chassis with cab.
" **2353** G. M. C. 2-ton truck chassis with cab.
" **2354** G. M. C. 2-ton truck chassis with cab.
" **2584** Chevrolet 1-ton Screenslide truck.
" **2** Crusher, Acme rock.
" **112** Engine, Cadillac gas.
" **19** Grader, Austin Giant 8 ft.
" **53** Kettle, Tarrant Asph. Heating.
" **21** Loader, Mandt wagon
" **5** Pump Unit, 4x5-in. FM.
" **56** Pump unit, 4x5-in. FM type ZA.
" **57** Pump unit, 4x5-in. FM type ZA.
" **59** Pump unit, 3-inch, Gould Centrifugal.
" **67** Pump unit, 3-inch, Gould Centrifugal.
" **2** Roller, Case 12-ton steam, 3 wheel.
" **3** Roller, Buffalo Pitta 12-ton steam, 3 wheel.
" **2** Saw Drag, No. 2 Blue Break
" **12** Saw Drag, Diamond H, Falling attach.
" **3** Scraper, Bagley dragline, 1 yard.
" **8** Scraper, Bagley dragline, 2½ yard.
" **5** Spreader, 8 foot lime.
" **132** Engine, Cadillac gas.
" **7** Pump unit, 4x5-in. Gould.
" **12** Saw Rig, Portable, 20-in. saw frame.
" **14** Shovel, P. & H. gas, ¾ yd. cap.
" **9** Holst, Willamette-Yarder 4 drum steam.

Bidders may make offers for one or more items but must state price offered for each item. No lump sum bids will be considered.

All equipment may be inspected at Eureka, California, from 8:30 A. M. to 4:30 P. M. on any working day, except the following which may be inspected at Highway yards at Crescent City:

CHC 132 Engine, Cadillac, gas.
" **7** Pump unit, 4x5-in. Gould.
" **12** Saw Rig, portable, 20-inch
" **14** Shovel, P. & H. Gas, 4-yd. cap.

And the following which may be inspected at Elk Valley:

CHC 9 Holst, Willamette-Yarder, 4-drum steam.

Deliveries will be made as soon as approval of sale is obtained from the Department of Finance which usually takes one to two weeks. All bids should be addressed to W. H. Pierce, Superintendent of Equipment, Shop 1, Division of Highways, Eureka, Calif.

EUREKA, Humboldt Co., Cal.—W. H. Pierce, superintendent of equipment, California State Highway Commission, will receive bids March 10, 2 P. M., for the purchase of the following equipment no longer required by the commission:

Member Insurance Brokers' Exchange

FRED H. BOGGS
INSURANCE
490 GEARY STREET

Phone FRanklin 9400

San Francisco

CHC 1342 Standard truck chassis with cab.
 " 2 Elevator, 30 ft. bucket. :
 " 119 Engine, Cadillac Gas.
 " 133 Engine, Cadillac Gas.
 " 50 Kettle, Spearswell Asphalt Heating.
 " 9 Pump Unit, 3½x6 inch, Gould.
 " 1 Saw Rig, Portable C. H. & E.
 " 153 Trailer, Steel tired wagon.
 " 10 Lambert Steam Hoist 2 drum.

Bidders may make offers for one or more items but must state price offered for each item. No lump sum bids will be considered.

All equipment may be inspected at the Division of Highways yards at Willits, California, from 8:30 A. M. to 4:30 P. M. on any working day, except the Lambert Steam Hoist, 2 drum, CHC 10, which may be inspected at the Highway quarry at Laytonville.

Deliveries will be made as soon as approval of sale is obtained from the Department of Finance which usually takes one to two weeks. All bids should be addressed to W. H. Pierce, Superintendent of Equipment, Shop 1, Division of Highways, Eureka, Calif.

RAILROADS

SAN FRANCISCO.—Interstate Commerce Commission denies application of Western Pacific Railroad to construct its proposed line from San Francisco Bay District to Fresno. Company officials announce that a rehearing will be asked. The company has two other applications before the commission, one with the Great Northern Railway which provides that the latter road enter California and connect with the Western Pacific, the other for permission to construct a line from San Francisco to Redwood City, which would be connected with its main line at Niles via a bridge across San Francisco Bay.

STOCKTON. San Joaquin Co., Cal.—Southern Pacific Railroad has filed application with the Interstate Commerce Commission to construct a 4-mile spur from the intersection of Los Angeles Ave. and the Borden Highway in Stockton to a point on the east bank of the Burns Cut-Off. The purpose of the extension is to serve industries which will locate in that district because of Stockton's deep water project.

WINSLOW. Ariz.—Sharp & Fellows Contracting Co., Central Bldg., Los Angeles, has been awarded a contract on a yardage price basis for constructing 23 miles of secondary main line between Winslow and Joseph City, Arizona, for the Santa Fe Ry. The work will involve road-bed grading, construction of concrete foundations for the widening of two steel bridges and the construction of a number of timber bridges, culverts and headwalls.

HOLTVILLE. Imperial Co., Calif.—Southern Pacific Co. has filed applications with the Interstate Commerce Commission to build and operate 5.5 miles of railway between Sandia and Holtville. From Holtville the railway will use the Holton Interurban tracks into El Centro.

FRESNO. Fresno Co., Calif.—Santa Fe Railroad will improve crossings at Fresno St. and Ventura Ave. on main line, involving placing heavier rails, plank and concrete pavement; estimated cost \$11,500.

LOS ANGELES. Cal.—Until 2 P. M., March 3, bids will be received by the county supervisors for furnishing 4000 railway ties for the flood control department.

FIRE ALARM SYSTEMS

SAN MATEO. San Mateo Co., Cal.—Until March 3, 3 P. M., bids will be received by E. W. Foster, city clerk, to furnish material and construct Fire Alarm System. Certified check of 10% required. Plans on file with city clerk. See call for bids under official proposal section in this issue.

FIRE EQUIPMENT

GUADALUPE. San Luis Obispo Co., Cal.—Guadalupe Fire District has been organized and will spend \$4,144 in the purchase of fire fighting apparatus.

SAN BRUNO. San Mateo Co., Cal.—Fire Chief Jos. Senger contemplates purchase of resuscitating and inhalator devices for use of department.

SAN JOSE. Santa Clara Co., Cal.—Murray Rubber Co., Trenton, N. J., at \$1,660 awarded contract by city council to furnish 2,500-ft. 2½-inch fire hose. American Rubber Co., Oakland, at \$750 awarded contract to furnish 1,000-ft. of similar hose.

BLUE LAKE. Humboldt Co., Cal.—Fire Chief Loren De Motte authorized to purchase 200 ft. 1½-in. fire hose, two nozzles and a Siamese coupling. The material will probably be purchased in the open market.

MISCELLANEOUS SUPPLIES AND MATERIALS

BERKLEY. Alameda Co., Cal.—California Metal Enameling Co., 557 Market St., San Francisco, at \$654.46 submitted low bid to city council to furnish city with "street name" signs. Flexaml Sign Co., 901 E-Fourteenth St., Oakland, only other bidder at \$662. Taken under advisement.

RESERVOIRS AND DAMS

SAN DIEGO COUNTY. Cal.—Geo. W. Clemson, Los Angeles, files application with the State Department of Public Works, Division of Water Rights, for authorization to construct a dam in San Marcos Creek in San Diego County and divert 1239 acre feet of water a year for the irrigation of 800 acres of land. He proposes to erect a dam 38 feet high and 205 feet long. The irrigation system to be installed, exclusive of the dam, is estimated to cost \$10,000.

PIPE LINES, WELLS, ETC.

OAKLAND. Cal.—Pacific Coast Engineering Co., Foot of 14th St., Oakland, at \$8468 awarded contract by City Port Commission to furnish dredge and hull pipe.

SEWERS AND SEWAGE DISPOSAL PLANTS

STANISLAUS COUNTY. Calif.—J. City Engineer Harry Goodridge making surveys for 400 ft. storm sewer tunnel in the Cragmont slide area, just east of Cragmont Ave. near the Bret Hart road. Preliminary estimates place the cost at \$2680, exclusive of \$5000 to completely drain the slide area.

VALLEJO. Solano Co., Calif.—City Engineer T. D. Kilkenny is making surveys for sewer system in the north and east sections of the city to be financed by Sewer District No. 1, Solano county; will be from 18- to 36-in. dia. and will start at the extreme northern Vallejo city limits and empty into the bay at foot of Ryder St., So. Vallejo. Pumping plant will be included.

OROVILLE. Butte Co., Calif.—City Engineer S. J. Norris completing surveys for storm sewer extensions. Tentative plans will be submitted at the city council meeting on March 3.

SOUTH SAN FRANCISCO. San Mateo Co., Calif.—South San Francisco Land and Improvement Co. petitions city council to construct adequate sewers in industrial tract in Linden Ave., declaring that present conditions retard industrial growth.

CORONADO. San Diego Co., Calif.—The city council has voted to place on the April ballot a \$60,000 bond issue for constructing a modern sewage treatment plant. E. A. Ingham is manager of operations for the city.

PACIFIC GROVE. Monterey Co., Cal.—City council declares intention (3170) to improve Congress Ave. bet Sinex Ave. and south city limits and Sinex Ave. between alley extension to Park St. and Congress Ave., involving 6-in. vit. sanitary sewer, 4 brief manholes. 1911 Act. Bond Act 1915 Hearing March 20. W. G. Stubbs, city clerk.

SPARKS. Nevada.—Until March 24 bids will be received by city council to construct sewage disposal plant from plans of C. C. Kennedy, engineer, Call Bldg., San Francisco. Plan provide for new mains to eliminate pumping system. Plant will comprise retaining tank, concrete sludge digestion tank with sludge beds adjoining

MISCELLANEOUS CONSTRUCTION

LOS ANGELES, Calif.—Until 10 A. M., March 19, bids will be received by the board of public works for the construction of three tunnels and appurtenant work in connection with the Figueroa St. Extension, in accordance with plans prepared by Merrill Butler, chief bridge engineer, City Hall. The work involves construction of three concrete and tile lined tunnels through Elysian Park, the tunnels to be approx. 46.5 ft. in width by 28 ft. high, of semi-circular shape, of an aggregate length of 996 feet. There will be one 5-ft. walk with 1½-ft. curb on the opposite side. In addition to the tunnels, the job will include storm drain estimated at about \$30,000, retaining wall, and necessary walks and cement concrete paving. The cost is roughly estimated between \$700,000 and \$800,000. Project will involve: 351 ft. cross section No. 1, incl. tunnel excav.; 100 ft. cross section No. 2, incl. tunnel excav.; 45 ft. cross section No. 3, incl. tunnel excav.; 1521 sq. yds. white glazed tile surf., incl. plas. backing; 7349 sq. yds. plas. of tunnel arches; all light. fix. fixtures, metal standards, etc.; all portal walls and approach walls; storm drain and sanitary sewers; transformer vault and fiber conduit; pedestrian subway at Sta. 0 plus 74.89; pedestrian subway at Sta. 12 plus 80; 184,531 sq. ft. 8-in. corr. pave.; 1633 ft. heavy unplas. curb; 122 ft. light unplas. curb; 2613 ft. 21-in. special unplas. curb; 389 ft. 12-in. special unplas. curb; 221.47 ft. steel curb armor; 70,603 cu. yds. excav. unclass. outside of tunnels, not incl. struc. excav. below rdwy. or sidewalk subgrade; 22,444 sq. ft. one-course walk; 2456 ft. wire fence in place, incl. four gates; 2798 sq. ft. conc. pave. 6-in. thick; 671 sq. ft. 4-in. asph. conc. wearing surf.; 453 sq. ft. 4-in. conc. driveway; 6337 sq. ft. class AAA. resurf., oiled rdwy.; 224 ft. reinf. integral curb; 501 sq. ft. 6-in. conc. gutter.

Following items refer to Riverside Drive, South, north of North Portal of Tunnel No. 3:

Remove indicated portions of existing bridge; all steel reinf. in place; 439 cu. yds. class F conc.; 382 cu. yds. class C conc.; conc. hand rail; conc. lighting standard with lanterns, etc.; 3271 sq. ft. 8-in. asph. conc. pave.; 523 sq. ft. 3-in. asph. conc. wearing surface.

WATER WORKS

MARTINEZ, Contra Costa Co., Cal.—Construction will be started shortly by the California and Hawaiian Sugar

Corp., on a pipe line from Soscol wells over the Carquinez bridge to Crockett. The company proposes to pump 1,000,000 gals. daily to its Crockett refinery.

TURLOCK, Stanislaus Co., Calif.—City council has authorized installation of Pumping Station No. 6 near the intersection of Washington Street and Lateral No. 4.

ORANGE, Orange Co., Cal.—Until 1 P. M., March 4, bids will be received by the city council for furnishing 4,000 ft. 6-in. cast iron, class B or class 150 bell and spigot water pipe. Cert. check 10%. Paul E. Clark, city clerk.

WATSONVILLE, Santa Cruz Co., Cal.—Until March 11, 7:30 P. M., bids will be received by M. M. Swisher, city clerk, to construct a slow sand filter plant and appurtenances, reservoir lining and cover and other water works improvements, under the recently voted \$125,000 bond issue.

The project comprises the following principal features:

(1) A concrete slope and bottom, lining, concrete piers and wooden roof, together with certain piping, water measuring device and other improvements and at the two main distributing reservoirs at Freedom Village, approximately 2 miles west of north of the business district of Watsonville.

(2) A slow and filter plant having a nominal maximum capacity of 2.5 million gallons daily, embracing a sedimentation basin, 5 filter units, sand storage bin, filtered water basin, 50,000-gallon storage tank, head house, tool and storage houses, together with all piping and appurtenances, at and in the vicinity of Corralitos Village, approximately 7 miles west of north of the business district.

The following approximate quantities are involved in the above improvements:

6700 cubic yards of net excavation for structures;

2550 cubic yards of concrete, mostly reinforced;

212,500 feet, board measure, of lumber in roofs and elsewhere;

6000 linear feet of water and drain pipe ranging from 1-inch to 20-inches in size and of various materials.

In addition to the above there will be grading work and considerable other work of a miscellaneous nature.

Certified check of \$10,000 payable to the City Treasurer required with bid. Bond of 50% of the contract price will be required of the successful bidder.

Plans obtainable from H. B. Kitchen, city engineer, and from C. G. Hyde, consulting engineer, Berkeley, on deposit of \$25, returnable. Plans and specifications are on file in the

office of Daily Pacific Builder and may be inspected by those interested.

SAN MATEO, San Mateo Co., Cal.—Until March 3, 8 P. M., bids will be received by E. W. Foster, city clerk, for furnishing standard wrought steel pipe and fittings. Specifications on file in office of city clerk.

ST. HELENA, Napa Co., Calif.—Until March 11, 8 P. M., bids will be received by E. R. Palmer, town clerk, to replace certain water mains with bell and spigot cast iron pipe and fittings and to replace all household meter connections with new pipes and valves, together with new connections for future use, in Madrona Avenue, Adams and Spring Sts., Oak Ave. and Pope St. Plans obtainable from John A. Mitchell, town engineer.

OAKLAND, Calif.—Following bids taken under advisement by East Bay Municipal Utility District to furnish water pipe: "A" 5700 ft. 24-in. electric welded, sheet steel pipe, with ¼-inch walls and alternate proposals for 4,000 ft. of additional of similar pipe. 20-in. in diameter; or the same amount of cast iron pipe of the like size, under proposal "B" or "C".

Steel Tank & Pipe Co. of California, 1100 4th St., Berkeley, proposal A, \$22,116; B, \$11,000; total \$33,116.

Montague Pipe & Steel Co., San Francisco, A, \$23,484; B, \$12,920; total, \$36,404.

The U. S. Pipe & Foundry Co., of San Francisco, bid C, \$11,000.

The American Cast Iron Pipe Co., San Francisco, C, \$14,490.

FULLERTON, Orange Co., Calif.—Burns - McDonnell-Smith Engineering Corp., 422 Western Pacific Bldg., Los Angeles, has been retained by the city council to make a survey of the present city water system and to make recommendations as to future expansion. According to the contract, a written report will be filed with the council. C. A. Smith was named as consulting engineer.

HANFORD, King Co., Cal.—Byron Jackson Co., Sharon Bldg., San Francisco, at \$1,263 awarded contract by city council to furnish and install, complete, motor driven deep well pressure pump, together with motor, tank, switchboard and other accessories.

SALEM, Oregon.—C. Dudley DeVelbiss, 354 Hobart St., Oakland, Calif., at \$101,655 awarded contract by city council to construct filtration plant in connection with municipal water system. Filters will be in six units of 1,000,000-gals. capacity each.

NAPA, Napa Co., Cal.—Until March 3, bids will be received by city council to furnish and deliver two carloads of pipe for water system extensions. H. A. Harrold, city engineer.

STANISLAUS COUNTY, Cal.—J. M. de Souza, Rt. 3, Box 944, Modesto, files application with State Department of Public Works Division of Water Rights, Sacramento, seeking authorization to pump 10 cubic feet a second between March and October from the Tuolumne River to irrigate forty acres of land he owns in Stanislaus County. A 2,000-foot ditch and pump of 4500 gallons capacity he intends to install, would cost \$1500.

RICHVALE, Butte Co., Calif.—See "Factories and Warehouses," this issue. Sub-bids wanted for 50,000-gal. steel water tank and tower, etc.

The total cost of the improvements is placed at \$75,000 and provides for paving Main St. from 12th Street through the business section to Pit River bridge below Carlos St. E. E. Elliott is city clerk.

VALLEJO, Solano Co., Cal.—City Engineer T. D. Kilkenny completing plans to improve Lozier alley between Carolina and Florida Sts.

OFFICIAL PROPOSALS

STATE OF CALIFORNIA DEPARTMENT OF PUBLIC WORKS DIVISION OF HIGHWAYS NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the State Highway Engineer, Public Works Building, Sacramento, California, until 2 o'clock P. M. on March 19, 1930, at which time they will be publicly opened and read, for construction in accordance with the specifications therefor, to which special reference is made, of portions of State Highway, as follows:

Marin County, an overhead crossing over the tracks of the Northwestern Pacific Railroad at Forbes Station (IV-Mrn-1-A), consisting of one 46-foot steel beam span and 190 feet of timber trestle on pile bents.

San Bernardino County, between The Pass and two miles down Waterman Canyon (VII-ESD-43-A), about one and nine-tenths (1.9) miles in length, to be graded.

Proposal forms will be issued to only those Contractors who have furnished verified statement of experience and financial condition in accordance with the provisions of Chapter 644, Statutes 1929, and whose statements so furnished are satisfactory to the Department of Public Works. Bids will not be accepted from a Contractor to whom a proposal form has not been issued by the Department of Public Works.

Plans may be seen, and forms of proposal bonds, contract and specifications may be obtained at the said office, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, and at the office of the District Engineer of the district in which the work is situated. The District Engineers' offices are located at Eureka, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the district office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character and quantity of work to be done, with a represent-

ative of the Division of Highways. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the district office.

No bid will be received unless it is made on a blank form furnished by the State Highway Engineer. The special attention of prospective bidders is called to the "Proposal Requirements and Conditions" annexed to the blank form of proposal, for full directions as to bidding, etc.

The Department of Public Works reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

DEPARTMENT OF PUBLIC WORKS
DIVISION OF HIGHWAYS,

C. H. PURCELL,
State Highway Engineer.
Dated February 19, 1930.
(Feb. 24, March 3-10-17)

NOTICE TO CONTRACTORS

MECHANICAL WORK

SEALED BIDS will be received by Geo. B. McDougall, State Architect, Public Works Building, 11th and P Streets, Sacramento, California, up to 2 o'clock P. M., Tuesday, March 25, 1930, said bids thereon for said day to be publicly opened and read, for the installation and completion of the Mechanical Work for the Assembly Building, Chico, State Teachers' College, Chico, California, in accordance with plans and specifications therefor.

Mechanical Work includes Plumbing, Heating, Ventilating, and Electrical Work. Separate bids will be received for "Electrical Work" and for "Plumbing, Heating, and Ventilating Work." Combined bids will also be received covering all four branches of the work.

Plans and specifications are on file for examination in the office of the Division of Architecture, Public Works Building, Sacramento, California, and also at Room 1025 Associated Realty Building, Los Angeles, and at the principal California Cities Builders' Exchange Offices.

Plans, specifications and proposal forms may be secured by licensed contractors who have qualified or who will qualify by furnishing a verified statement of experience and financial condition as required by the provisions of Chapter 644, Statutes 1929, and whose statements so furnished are satisfactory to the Department of Public Works. Questionnaire forms may be secured from the Division of Architecture.

Bids will not be accepted from a Contractor to whom a proposal form has not been issued and all bids must be on proposal forms supplied by the State.

Requests for plans shall be accompanied by a deposit of twenty-five (\$25.00) dollars. Check shall be made payable to the Department of Public Works, Division of Architecture. Deposit will be returned upon receipt of the set in good condition, at Sacramento Office of the Division within 30 days after opening bids, otherwise it will be forfeited to the State.

All bids must be filed at the office of the State Architect on or before the time heretofore stated and in accordance with the "Rules for Bidding" accompanying the proposal form.

No bid will be considered unless cash, a bidder's bond made payable to the State of California or a certified check made payable to the "State Engineer, Department of Public Works," in the sum of at least ten per centum (10%) of the amount of the bid is enclosed with the bid.

The Division of Architecture, State

Department of Public Works, reserves the right to reject any or all bids and to waive any informality in any bid received.

NOTICE TO CONTRACTORS

GENERAL WORK

SEALED BIDS will be received by Geo. B. McDougall, State Architect, Public Works Building, 11th and P Streets, Sacramento, California, up to 2 o'clock P. M., Tuesday, March 25, 1930, thereafter or said day to be publicly opened and read for the erection and completion of the General Work for the Assembly Building, Chico State Teachers' College, Chico, California, in accordance with plans and specifications therefor.

The building is a two-story steel and concrete frame structure with balcony, brick and concrete walls, concrete floors and tile and composition roofs. The floor area is approximately 30,500 square feet with a seating capacity of approximately 1500.

Plans and specifications are on file for examination in the office of the Division of Architecture, Public Works Building, Sacramento, California, and also at Room 1025 Associated Realty Building, Los Angeles, and at the principal California Cities Builders' Exchange Offices.

Plans, specifications and proposal forms may be secured by licensed General Contractors who have qualified or who will qualify by furnishing a verified statement of experience and financial condition as required by the provisions of Chapter 644, Statutes 1929 and whose statements so furnished are satisfactory to the Department of Public Works. Questionnaire forms may be secured from the Division of Architecture.

Bids will not be accepted from a Contractor to whom a proposal form has not been issued and all bids must be on proposal forms supplied by the State.

Requests for plans shall be accompanied by deposit of twenty-five (\$25.00) dollars. Check shall be made payable to the Department of Public Works, Division of Architecture. Deposit will be returned upon receipt of the set in good condition, at Sacramento Office of the Division within 30 days after opening bids, otherwise it will be forfeited to the State.

All bids must be filed at the office of the State Architect on or before the time heretofore stated and in accordance with the "Rules for Bidding" accompanying the proposal form.

No bid will be considered unless cash, a bidder's bond made payable to the State of California or a certified check made payable to the "State Engineer, Department of Public Works," in the sum of at least ten per centum (10%) of the amount of the bid is enclosed with the bid.

The Division of Architecture, State Department of Public Works, reserves the right to reject any or all bids and to waive any informality in any bid received.

TEETH IN BUILDING CODES

Technical code committees appointed to make suggestions for redrafting the building code of New York City are making a determined effort to place effective enforcement provision in the revised code of that city, according to the monthly bulletin of the Pacific Coast Building Officials Conference.

The committee has suggested that there be a requirement calling for an affidavit to be filed with the plans when the plans are first submitted. This affidavit is to be signed by the architect and the engineer, stating that the plans conform to the code in every particular.

A further and more important requirement is suggested that before a certificate of occupancy is granted, an affidavit must be made out and signed to the effect that the building has been constructed in complete accordance with the plans on file.

FOR SALE

SLATE, tile roofing and general repairs. Established since 1926. going business. Reply to 4201 MISSION St. Telephone RAndolph 5982.

A "Pittsburg" Automatic Water Heater installed in the Home indicates high quality throughout.

Recommended and specified by all the leading architects, plumbers and builders.

Consider the high merit of the Pittsburg coupled with "Pittsburg Perfect Service."

"Hot water quick as a wink."

Pittsburg Water Heater Co.

Makers of "Pittsburg Automatic"—"Bungalow Automatic" Storage Systems and "Lyon" Tank Water Heaters.

STEEL REINFORCING BARS

Dependability of materials used is a prime requisite to the success of construction.

For twenty years Gunn, Carle & Co. has been able to guarantee STEEL REINFORCING installation service, without error—without complaint.

We shall be pleased to consult you, without obligation, regarding the construction problems in the field of Iron and Steel on jobs of any size.

Gunn, Carle & Co.

444 Market St., S. F.

Of The NEW
Daily Pacific Builder

The only daily construction newspaper affording complete coverage of the construction activities in Central and Northern California, featuring work contemplated, bids wanted, bids opened, contracts awarded, sub-bids wanted and sub-contracts let on all types of building construction, bridges, dams and harbor works, irrigation projects; machinery and equipment; water works and supplies business opportunities, building permits, building contracts, mechanics' liens, acceptances, etc., etc.

Keep informed on construction developments in Central and Northern California and the major projects in Southern California, the states of Oregon, Washington, Nevada and Arizona.

The new DAILY PACIFIC BUILDER will afford a service that serves—both in Quality and Quantity. You, as a member of the construction fraternity, should not be without it.

Subscription price \$1.50 per month, or \$15.00 a year, payable in advance.

BUILDING PROSPECTS CLOUDY COMPARATIVE FIGURES SHOW

Although the record of building contract awards for January was encouraging for the month, showing an increase of 2% over December for the first time in nine years, the figures of building permits issued during January do not afford so much encouragement as regards future building prospects. These permit figures reflect chiefly plans for residential construction in the smaller cities. The S. W. Straus figures of permits issued in 566 places were 46% lower in value than in January, 1929, and 17% lower than in December, 1929. Bradstreet's figures for 192 cities show a decrease of 9.2% from December and of 48.7% from last January. Dun's figures also show a total of building permits for January somewhat less than half the value of those issued in January, 1929. The total of New York City permits in January was about 30% larger than in December, but less than 1/2 as great as in January, 1929.

In contrast to these indications that lighter types of residential construction are lagging, the McGraw-Hill Construction Daily reports contemplated heavy construction operations of all classes, announced during January, amounting to \$624,502,000 as compared with \$550,120,000 in January, 1929. At the same time the Engineering News-Record figures show a total of heavy construction contract awards so far this year about 45% less than in the corresponding period of 1929.

It thus appears that while general construction under way showed improvement in January, prospective work declined, and heavy construction prospects improved though actual heavy construction under way was lagging.—(The Business Week).

KANSAS CITY BUILDING TRADES ON STRIKE

The Central Building Trades Council, representing all organized building crafts in Kansas City, Mo.; Kansas City, Kan., and Leavenworth, Kan., voted Feb. 28 to strike for a five-day week at the present five and one-half-day pay. Between 3,000 and 9,000 workmen are affected, and the strike will cause cessation of all building operations on which union labor is employed unless builders can establish the "open shop."

The workers had demanded a 12 1/2 per cent wage increase, while the Builders' Association (employers) had proposed to cut wages 10 per cent. The matter was placed in the hands of a Chamber of Commerce committee for arbitration. The committee on Feb. 28 recommended that wages be neither increased or decreased.

The trades council then voted a strike to enforce new demands—a shortening of the 44-hour week to 40 hours, eliminating the 4-hour work period on Saturday, with no decrease in wages.

MUNICIPAL WATER DEPARTMENT FOR S. F. CREATED

Final steps in setting up the legal machinery for the taking over by the city of San Francisco of the Spring Valley water system on March 3 were taken Feb. 26 when the Board of Supervisors approved the ordinance creating the municipal water department and Nelson A. Eckart, assistant City Engineer, was named as general manager of the utility at an annual salary of \$15,000.

Eckart's appointment was announced by the Board of Public Works, in whom the control of the operation and management of the Spring Valley water system is vested.

The ordinance approved by the Supervisors yesterday contains the following important features:

1. Control of management and operation vested in Board of Public Works.

2. Control of expenditures to rest with Board of Supervisors.

3. Budget for Spring Valley system to be made up by Board of Public Works on recommendation of General Manager Eckart, subject to Supervisors' approval.

4. Four hundred and fifty Spring Valley operating employees to be transferred to San Francisco civil service lists.

5. Wage scale of Board of Works for similar work to be paid Spring Valley employees.

6. All supplies, except emergency equipment, to be purchased by Bureau of Supplies.

7. Minimum depreciation fund and water extension reserve of \$554,000 to be set up annually from revenues.

8. Water rates to remain as at present for limited period.

9. Spring Valley employees to be classified under city rules later.

The \$15,000 salary fixed for General Manager Eckart is the same as that received by General Manager George Elliott of the Spring Valley Company under the present private management. It is also the same as the salary paid City Engineer O'Shaughnessy.

RIVERSIDE CEMENT COMPANY MAKES 1929 REPORT

Riverside Cement Company reports a net profit for the year ended December 31, 1929, of \$1,013,084, which is equal, after dividends on the first preferred and class A cumulative preferred, to 98 cents per share on 345,000 outstanding class B shares. Figures for the net were after depreciation and Federal taxes.

For the year gross profit totaled \$1,519,817, against which was charged \$382,002 for depletion and depreciation and \$123,730 as provision for Federal taxes.

Balance sheet as of the close of the year indicates assets at \$12,645,097, of which \$3,520,285 are current; current liabilities of \$455,141 and surplus \$2,289,037.

S. F. BUILDING SHOWS SLACK IN FEBRUARY

San Francisco building operations in the month of February involved an expenditure of \$1,144,062 as compared with \$2,314,112 for the corresponding period in 1929. January, 1930, operations involved an expenditure of \$1,431,933.

During February 495 building permits were issued as compared with 570 for February of 1929 and 610 for January, 1930.

The February operations are the lowest on record for that month since the year 1919, when the total registered \$355,377.

Following is a segregated report of the February, 1930, activities as compiled by John B. Leonard, superintendent of the Bureau of Building Inspection of the Department of Public Works:

Class	No. of Permits	Est. Cost
A	3	\$ 76,100
B	18	308,250
C	127	594,310
Frames	345	146,971
Alterations	2	18,431
Public Bldgs.		
TOTAL	495	\$1,144,062

CALIFORNIA RATES SECOND IN NATION'S BUILDING

California ranked second in the United States in volume of building permits issued during January, with a total of \$17,415,364. New York was first with \$34,805,226, and Ohio third with \$9,019,693, says the Pacific Coast edition of the Wall Street Journal.

Building permits issued in 566 representative cities and towns during the month showed a loss of 46 per cent from January, 1929, and a decline of 17 per cent from December, 1929; and December, in turn, had declined 19 per cent from November.

The total for January this year was \$127,685,004, compared with \$236,200,319 in January last year, and with \$153,717,819 in December, 1929. These figures do not include engineering projects. The total for the 25 cities that issued the largest number of permits during January was \$85,395,394, a decrease of 46 per cent from the January, 1929, volume of \$160,200,981, but a 9 per cent gain over the \$78,789,661 reported for December, 1929.

The first 12 states in value of permits issued rank in following order:

State—	No. of Cities	Volume of Permits
New York	44	\$34,805,226
California	69	17,415,364
Ohio	28	9,019,693
Illinois	49	6,992,189
Michigan	20	6,473,084
Washington	14	5,982,891
Texas	20	4,981,743
Massachusetts	26	4,710,742
Pennsylvania	18	4,398,590
New Jersey	37	4,019,343
Maryland	5	2,710,417
Wisconsin	19	2,227,760

BRINGING LEGAL REGULATION OF BUILDING FINANCE UP TO DATE

By J. W. Morin, Attorney of Pasadena, Calif.

Some patient professor in the Law Department of Harvard or Yale University, after a search of the statutes and decisions in courts of America for over one hundred fifty years, has discovered that the subject matter of the peoples law and litigation changes its content almost completely every thirty years. Those things which most concerned the legislatures and courts of 1900 have already passed into limbo in 1930. In other words the styles change in legislation more or less as they change in automobiles, in science and religion, ladies' hats and even, as we all know, the style changes in buildings.

The principle of the mechanics' lien law is found, I am told, in the legislation of 46 out of 48 states of the union, and in California we have had it some form ever since 1879. The principle upon which this peculiar legislation is based is that those who merge their labor and materials into an improvement on real property and in so doing, lose the identity of the thing they furnished beyond all other possibility of reclamation of the service or materials furnished, have a claim on the product of their labor and material, which we call a mechanics' lien.

In 1911 California passed the present act, under which business has operated, with little changes, for nearly 20 years. It seemed a fair and adequate scheme to meet all obvious problems at that time. It gave the owner the choice of either unlimited liability against his property for all labor and materials used in the improvement or the opportunity to limit his liability to the contract price, in case he filed, before the beginning of construction, his plans, his contract and a bond to laborers and materialmen equal to 50% of the contract price. This plan seemed in 1911 adequate because it was assumed that the owner had a valuable property interest in the real estate to protect and that he would exercise due diligence to protect it and would, therefore, file a 50% bond. The theory of the 1911 Act was that even the materialman who was careless could furnish his material without investigation and lay the burden of his bad credit method at the door of the owner and let the owner settle the bills either to protect his equity in the property or by making claim on the 50% surety bond.

Use of Surety Bond

It has been a common phenomenon of increasing occurrence, however, that more and more the owners have failed to avail themselves of the use of this surety bond and have taken a chance and built without the bond. It may not be realized, however, that in fact, by actual count, in Los Angeles County, for example, it has been found that 98% in number of the jobs have been built without the labor and material bond. This factor is present, of course, more particularly in what are known as smaller jobs, particularly those under \$10,000, but it is also a frequent situation in very large construction enterprises as well. The legislature afforded a complete and beautiful scheme for the protection of all in 1911 but made it optional if the people wished to use it, and as above indicated, 98% of the citizens turned their backs upon this logical

An address delivered at the 19th Annual Convention of the National Association of Builders' Exchanges, Palace Hotel, San Francisco.

scheme in the 1911 Act. It is as if the legislature had made a building code which was optional and 98% of the people had built their buildings without any compliance with the building code whatsoever, that is, without plans and specifications in accordance with accepted building practice. The result in either case is anarchy, legal anarchy in the case of mechanics' lien legislation and construction anarchy in case it had been optional whether one would or one would not follow a building code.

Upon an investigation in California, it has furthermore been found that the major assumption upon which the 1911 Act was based, that the owner has an equity in his property to protect, is no longer a safe assumption for quite generally in the great metropolitan centers comprising at least 3/5 of the population and wealth and enterprise of the great Southwest, the 100% financier has become the great pest of the building industry and the present statutes are entirely obsolete to deal with "these bright young men." The industry laws are as obsolete as a 19 year old battleship—you will at least have to elevate your guns if you are going to get that bird.

Of course, there are various legitimate risks that are inherent in building enterprises, as in all business, but whereas a well managed retail credit business will lose only 1% of 1% of its gross business through bad collections, the astonishing fact develops that in these active metropolitan centers about 5% of all building construction business by volume is affected by credit trouble to the extent of having liens and at least 1% of the accounts by volume is probably lost. The liens recorded in Los Angeles County alone for the year 1927 were 14,179 involving \$9,800,000, for the year 1928, were 11,053 in number, involving approximately \$8,000,000, and collections will lose only 1% of the volume of building activity, they are still 10,949, involving about \$5,500,000. To fully appreciate the significance of this handicap to the industry as a whole, one should realize that the net profit in the retail turnover in ordinary credit business is about 2%. On the other hand, here in the building business which is supposed to have the mechanics' lien law for its protection, there is a loss of 1% of the gross accounts, meaning a loss equal to one-half of the amount which should be its absolute net profit through liens, expenses, discounts, compromises and various deductions, besides an unmeasured more remote but larger loss through irritation and lack of confidence, particularly in its financing aspects.

If a citizen with some capital to loan shakes hands with a banker in Long Beach, Pasadena or Los Angeles and says that he has \$5000 to invest in a mortgage or trust deed or something else that is good, he is advised that he can buy public utility stock under the regulation of the State

Railroad Commission; he can buy industrial stock under the central and regulation of the State Corporation Commission and the rules of the Stock Exchange—does the banker advise him to put his money in a building loan without any regulation or protection whatsoever—no, the banker does not.

Dark Spots in Building Loan Finance

If a citizen has \$5000 to invest and he wants to take a chance on a building loan, all that he can depend upon is the recording system of California and a guarantee of title and unless the title company takes the responsibility of disbursing the funds, they will not guarantee that his building loan is and remains a first lien upon the property. In other words, regardless of the things shown on the record, there remain troublesome questions as to the physical condition of the property, watered paper, usurious paper, 100% financing and bogus paper which rise up plague the lender and most particularly the materialman and all who are concerned therewith and which present statutes totally fail to cover and the decisions do not help out the statutes to any great extent. These bad situations are due to the various dark spots or twilight zones wherein the rights of the man who furnished the loan for the building are in conflict and doubt in actual practice, if not in theory, with the rights of those who furnish the labor and material to build the building which was to be a part of the security for the loan. The Junior loans are a course the principal place for this problem.

In 1929 the legislature of California wisely saw fit to license and regulate the contractor who had been used to leaving his bag of troubles at the doorstep of the innocent owner, for the owner to take care of as best he could. The contractor is now subject to termination of his license for dumping his bag of troubles on the doorstep of the owner and for the first time in 75 years, we may now in 1929 if the law is studied and its provisions followed, stop the contractor who has done this once and the 1911 Act is therefore, brought up-to-date as far as the contractor is concerned.

Remember, however, that 98% of the jobs are being built without the 1911 surety bond provision and when 98% of the people do a thing the wrong and dangerous way, the writer believes that something should be done about it, for the damage that results from the mistake and ignorance, as well as the schemes of this 98%, are the worst problem facing the financial side of this industry today. In other words, the 1911 Act was invented to protect the owner and materialman but the act is utterly futile to protect the honest materialman and the honest purchaser of building finance paper during construction, unless he hires a corps of detectives to investigate each job and has a Philadelphia lawyer to interpret the facts which the detectives bring in from the investigation.

Now The Careless "Owner Builder"

It is now the schemer or visionary owner who has an ill-financed or half-baked building scheme who should be regulated by some rule that would require a disclosure in case of building

loans of the real ownership of the property, the real amount borrowed and from whom, what has been charged by way of commission, what has been paid out of the loan for acquiring title from the former owner what various old personal debts the borrower has paid out of the building loan funds for unrelated obligations and what money is left finally for the construction purposes and where it is. There are questions which our present title and recording laws by no means answer. They are merely a rap for the unwary, and it has been found by frequent systematic investigation and postmortems following upon a blown-up building enterprise that the amount of these irregular deductions from building finance loans are in most cases almost exactly equal to the shortage of money which, if it had not been short, due to these deductions, would have completed the building enterprise in good order.

There is no moral reason why a building loan fund during construction and until it has been paid out for legitimate expenses, should not be deemed a trust fund. The Supreme Court of California in December 1928, in *Smith vs. Anglo-California Trust Co.*, decided as between the owner of property and the lien claimants, that it was—although they refused to call it by that name. However, no such doctrine applies between the crooked lender and the building materialman and hence the crooked owner, with the aid of a wiley broker and a slippery so-called finance company are responsible for a good share of the 10,000,000 or thereabouts that is tied up each year in one county of California alone in bad building finance schemes.

There is absolutely no real regulation so far in the law on this situation. One must indeed swear on oath that mere chattel mortgage on an old second hand flivver is in good faith and without intent to hinder, delay or defraud; one must submit a permit before one can sell a share of stock in California—do business as a banker—sell bonds—engage in the building and loan business or record a subdivision; but one may dream a dream at night of a vast building scheme,

in the morning borrow a lot, put up a fictitious first, second and third paper encumbrance invite the world to participate in the offering, and a great portion of the citizens will bite.

Reform Program

You, Gentlemen, who attend the National Conventions of Builders Exchanges, are the leaders in your various communities, you do responsible work and you get paid for it with real money, and you work under favorable conditions even though you may not realize it. You do not need regulation. Neither the owners with whom you deal nor the persons who loan building funds to these owners may need regulation, but the people of the country look to you to lead in the cleaning up of a much needed reform program.

The recognizable fact is that the evils inherent in the present financing abuses of the building industry prey most upon the weak and ignorant and perhaps the incompetent citizens. It is not so much the big and legitimate business, so-called, that is immediately concerned but the effect of losses upon the little home owner and the persons concerned in the building of the little job are colossal. When it is realized that mechanics' liens run in number from 10,000 to 14,000 a year from one county alone and actually involve about one out of every five building permits issued, a notion of the wide prevalence of an unhealthy conditions is realized. No industry could stand such a load of manipulation and abuse and survive if it were not a fundamental industry which must struggle along that the common people may have roofs over their heads.

The ugly fact, is however, that whereas the great public service corporations expect to get their money for expansion on the payment of six or seven per cent at the outside and will not expand their programs if they pay more, the little home owner and the little contractor and the little material man and all the little people among the millions that are citizens who must and will live, are affected by ruling conditions where the money, for junior financing particularly, is manipulated so that in many in-

stances they pay from eight to sixteen per cent or more. These percentages may be normal in the case of rapidly depreciating property like automobiles and such chattels but there should be regulations discouraging a practice which puts the weaker classes of society, financing homes, in the impossible position of paying for the use of money a rate of interest which the carefully managed and directed big service corporation cannot and will not pay. The evils of which I speak thrive in the dark. They thrive because of the loopholes for manipulation existing under our present system whereby one may record instruments affecting real estate which do not speak the truth and then dispose of the funds derived thereby entirely without orderly regulation, which characterizes other forms of investment.

Every thinking member of this greatest of all industries known that this sort of situation breeds losses but most of all it breeds lack of confidence and discontent. If you wish the industry financed, can you afford to tolerate a condition where as a class you lose one-half of your net profits in turnover—where you cannot sell your building finance paper in competition with other products of American industry? The contractors are now regulated—turn now to the owners and smoke out the irresponsible so-called owner-promoter who is without a bona fide plan and without a bona fide property interest to protect.

Future Los Angeles business buildings will cover a much greater area than those built in the past, according to Col. W. A. Starrett, builder of many of New York City's largest skyscrapers, in a talk before Los Angeles architects, contractors, building owners and managers last week. Col. Starrett stated that the trend is towards buildings covering greater area because it is an economic loss for 20 owners to erect 20 buildings within one city block when they all serve the same purpose and their administration over a period of years is not as economical as that of one building combining all that space.

BIDS ASKED ON COUNTY DETENTION HOME

Reed and Corlett, Architects.

Cut Courtesy Monterey Peninsula Herald

Bids will be considered on March 10 by the Monterey County Supervisors to erect the new county detention home from plans prepared by Architects Reed and Corlett of Oakland. The structure will be of the Spanish type, concrete construction with stucco exterior, tile roof and windows set in deep casements.

It will contain two wings, one for boys and one for girls, which will be divided by matrons' offices. There will also be separate recreational yards for both sexes.

Although a fund of \$30,000 has been set aside for construction of the detention home, it is not expected that the entire sum will be used. Estimates place the probable cost of the building at between \$23,000 and \$25,000.

The home will be built on the county hospital grounds, about three miles northeast of Salinas.

THE OBSERVER

WHAT HE HEARS AND SEES ON HIS ROUNDS

The newer mode in architecture has brought about striking effects through greater simplicity. This is the belief of William C. Hays, professor of architecture at the University of California, who will inaugurate a course in "The Modern Home," beginning March 12 at the Extension building at 549 Powell street.

The course of ten lectures on all phases of the home is believed to be the first of its kind ever offered on the coast and is being sponsored by the university after requests from home owners and prospective builders in the bay region for such a series.

"People are beginning to design buildings with the thought in mind of the structure's particular function," says Professor Hays. "and are no longer accepting as a standard what has been done before. Each room in the modern home must present the maximum in convenience and practicability."

The architect believes that the manner of living in this decade, compared to past decades, has brought about a transformation in building homes. He says, "The average person spends far more time away from home than his grandparents did. Because of this decrease in the use of the home, the distribution of money into building should more than ever be carefully studied out. We no longer find the special parlor that used to form a part of every home."

Lecture topics in the course will include house plans, the site and the relation of the house to it, equipment, arrangement, interior and exterior design, styles of homes, what constitutes a good house, some consideration of the investment, and value to be considered when purchasing a house.

Professor Hays is one of the few architects on the Pacific Coast who has studied at the American Academy at Rome, doing so under the John Stewardson memorial traveling fellowship. He has been architect for a score of projects on the Pacific Coast, including the University of California Branch of the College of Agricultural group at Davis. He is architect of Giannini Hall, the newest addition to the agricultural group on the Berkeley campus.

Joseph Geiger, former president of the Geiger Iron Works of Stockton, who died last January, left an estate which is community property worth \$250,045 and the inheritance tax on it is \$2661, according to Joseph D. Malloy, a state inheritance tax appraiser. Included in the estate is 1491 shares of stock in the Geiger Iron Works that Mr. Geiger gave to his wife prior to his death.

H. C. Baumann, San Francisco architect, was given a judgment for \$2,880 against Steve Carusa of Pittsburgh by Superior Judge A. B. McKenzie in his claim for \$5,700 architect fees alleging that he had prepared plans for a \$160,000 six-story building which was to be erected in Pittsburgh for Carusa. Although the building was not constructed, Baumann demanded his fee, stating that he put in just as much work on the plans as he would have if the building had been built.

Believing that stability, especially in the building industry, is essential at this time, representatives of labor and the building industry in Seattle have agreed to continue the present labor agreement. This was the statement from James Murdock, president of the Seattle Chapter of Associated General Contractors, and George D. Early, secretary of the Building Trades Council. "It is the desire of all engaged in building construction to stimulate, foster and promote a building program in Seattle that will be the envy of the Pacific Coast," Murdock said.

Air rights for building purposes are coming into a prominent place in real estate practice in the larger cities, it was indicated in round table discussion on air right leases held during a session of the Brokers Division at the annual meeting of the National Association of Real Estate Boards in Phoenix, Ariz. Mark Levy, Chicago, chairman of the Division, pointed to the fact that in financing the building of the Merchandising Mart in Chicago, which will be the largest operating building in the country, not only had the loan been originally a bank loan but it had later been taken over by an insurance company. "Air right lease loans as insurance company loans are a new feature of real estate financing," Levy said. "The use of air rights in congested cities where accessibility is important is yet in its infancy." Levy stated, however, that in appraising the value of properties the fact that on any given site there has been built a structure the owner of which holds title or lease on the right to the air above the ground at a certain height does not increase in proportion the value of the adjacent land. The air right development intensifies the use and therefore the value of the first site, but that does not mean that it has increased the value of adjacent land which may never be so intensively developed.

Martin Judge Jr. & Co. of San Francisco, seeks authority of the State Department of Public Works, Division of Water Rights, to construct a concrete dam 600 feet long and 160 feet high in Indian Valley, Lake County, for storage of approximately 175,000 acre feet of water for industrial use in Contra Costa and Solano Counties. The storage and distribution system will cost approximately \$3,000,000. The application states the company plans to appropriate water from the north fork of Cache creek, Lake County, and distribute it to industrial concerns between Richmond and Antioch south of San Pablo and Suisun bays in Contra Costa County and to Benicia in Solano County.

Loans totaling \$231,800 on old and new dwellings in Los Angeles, San Francisco, San Mateo and Burlingame, Calif., were authorized at the last meeting of the Metropolitan Life Insurance Company real estate committee. The loans were placed through Mortgage Guarantee Co., Los Angeles. Loans on mortgages, authorized in the country at large at the same meeting amounted to \$2,199,301. Of this amount \$1,474,801 were city loans and \$724,500 were farm loans.

Advice to those concerned in construction and building industries that their present task, broadly speaking, is to survey the market as it stands, both as to supply and demand, and see where the demand for the commodity, which these interests have to dispose of, can be widened was given in a recent statement made by Robt P. Lamont, Secretary of Commerce, in discussing the present national plan for an advance in home building. Such advice is in line with the current opinion of real estate leaders expressed at the recent Phoenix meeting of the National Association of Real Estate Boards when Harry H. Culver, retiring president of that organization, and Leonard P. Reaume, incoming president, both emphasized that 1930 must be a year of action based on facts, which must be ascertained by means of thorough surveys of the local conditions of real estate supply and demand.

The peak of winter in California invariably brings less work. Men in the seasonal occupations of the country drift into the cities, and inclement weather affects some industries. The January placements by the State Employment Agencies totaled 7,731, as against 9,494 for December, a reduction of 1,763 or 18.6 per cent. Compared with January of 1929, last month's figure show another reduction, 7,731 to 7,320, or 19.7 per cent. The State Employment Agencies, according to Will J. French, director of the State Department of Industrial Relations, have placed 248,729 men and women from July 1, 1928, to January 31, 1930.

Wm. T. Whitmore, Oakland fireman, was suspended by C. C. Young, city commissioner of public health and safety, when it was found that he was working in his spare time as a carpenter. Civil service rules make it specific that no city employee may engage in any other pursuit than that in which he earns money.

California's highway development during January of this year have included construction involving an expenditure of more than \$5,000,000, according to Bert B. Meek, state director of public works. According to Meek, \$3,822,300 worth of work has been placed and contracts and bids are pending on other undertakings totaling \$2,855,300.

Effective March 5 the water lumber rate from the Pacific Northwest to Gulf of Mexico ports will be dropped from \$14 to \$12 a thousand, officers of the Luckenbach, Gulf-Pacific and Redwood lines announced. The rate will be effective for at least ninety days, with a possibility of it being continued. Lumber shippers were said to be surprised at the action, as the \$14 rate had been continued for a year at a meeting in Portland, December 2, of shipping and carrier men. Of the three companies announcing the cut, only the Luckenbach and Gulf-Pacific belong to the Gulf Conference. A fourth service to the gulf, the Trans-Marine, was withdrawn recently.

Reno, Nevada, city council has adopted an ordinance (No. 429) regulating the storage and handling of photographic and Ex-ray nitro-cellulose films and other explosive films.

J. S. Bailey and M. Nine, timber cruisers, are in Yreka to survey several timber tracts in northern Siskiyou county. If sufficient timber be located it is probable that the erection of a mill and box factory will be undertaken.

ALONG THE LINE

McEverlast, Inc., Los Angeles, Cal., has appointed O. A. Steller manager of its advertising department. Mr. Steller was formerly editor of the magazine Concrete.

John D. Finnigan, deputy plumbing inspector of Portland, Ore., for the past 20 years, has been appointed chief plumbing inspector to succeed Wm. Hey, former chief of the municipal plumbing bureau and a deputy inspector for the past 25 years, who recently died.

William H. Menn has been appointed a member of the Los Angeles Building and Safety Commission to succeed J. W. Toms, resigned. He is a member of the insurance firm of Menn & Van Kuick of Los Angeles.

Fred J. Maurer, general contractor of Eureka, died at his home in that city March 1, following a long illness. Maurer was a native of California, aged 67. He had lived in Eureka for the past seven years and in company with his son was active in construction work during that time.

Arthur Reginald Widdowson, Sacramento architect and a resident of the capitol city for the last seventeen years, died at his home in that city March 1, following a prolonged illness. He was fifty-one years of age. Widdowson, who has been connected with a San Francisco firm before coming to Sacramento, was widely known in Sacramento because of his specialization in the field of domestic architecture.

Papers in the suit for \$7,921.74, brought against the city of Vallejo by J. F. Collins, Stockton contractor, have been served on city officials. The suit represents the balance Collins claims is due for work performed on the Gordon Valley spillway two years ago.

Eugene N. Foss, representing the F. B. Sturtevant Company, manufacturers of tunnel ventilators and air coolers, is on the Pacific Coast to complete negotiations for the construction of a plant on a site already purchased in Berkeley.

By failure of the Fresno City Council to act in electing a successor to A. M. Jensen, city commissioner of public works, whose resignation is effective today, Frank Bantama, deputy commissioner of public works, will become head of the department until a new commissioner is selected by the council. Candidates for the position are Jean Vincenz and C. C. Alkenburgh Jr.

William P. Day, Financial Center bldg., San Francisco, has been granted provisional certificate to practice architecture in this state, it is announced by Albert J. Evers, secretary of the State Board of Architectural Examiners, Northern District.

According to an Associated Press dispatch from Paris, Jean Julien Leonard, painter, blinded in the war, as become a successful architect, specializing in the designing of homes. He dictates the technical details to a draftsman.

TRADE NOTES

U. S. Steel Corp. has purchased 208 acres of land adjoining the present plant in Pittsburg, Contra Costa County. This is the first definite indication that expansion of the Pittsburg plant is contemplated.

M. Allen and Paul Frank, painters and decorators of San Francisco, contemplate establishing permanent headquarters at Suisun, Calif. Temporary quarters have been opened in the Arlington Hotel Building.

Alpine Mill and Manufacturing Company of Stockton, has opened a branch at 163 West 11th St., Tracy, with Carl D. Salfeld in charge.

Millwork Institute of California has opened a branch office in the Blake Building, 9th and Broadway, Oakland. Main offices are maintained at 520 Sheldon Building, San Francisco.

Caldow Paint Co., of Oakland, is having plans prepared for a three-story factory and warehouse to be erected at 14th Ave. and E 14th St., Oakland. The company is now located at 1422 14th Ave., Oakland.

Worthington Pump and Machinery Corp., New York City, will be represented in California by a local company, Worthington Machinery Corp. of California, Ltd., with headquarters at Los Angeles and San Francisco. H. D. Cornell will be president of the new company and George W. Hawkins vice-president. Mr. Cornell was formerly president of the Worthington Machinery Corp. of Oklahoma and Mr. Hawkins has been director of sales of the parent company.

Herzog Electric & Engineering Co., Ltd., of San Francisco, capitalized for \$150,000, has been incorporated. Incorporators are: Katherine G. Herzog, J. C. Saffig, Edgar B. Doering, Charles P. Markley and Arthur Purdon.

D. J. Sullivan will operate from 622 Fifth Ave., San Francisco, under the trade name of The Steel Erection Co.

T. H. Davies and Co., one of the important sugar factors in Hawaii, and with numerous other connections in the business of the islands, announces the purchase of Allen and Robinson, one of the old established lumber and hardware firms of Honolulu. The purchase price was \$750,000.

Pacific Structural Welding Corporation has located factory and offices at 481 Fifth St., San Francisco. The company manufactures light structural steel and all welded steel bodies for light commercial trucks in addition to doing a general welding business. W. R. Maeder is secretary of the company.

George N. Ley was re-elected president of the Santa Cruz Lumber Company at the annual meeting of stockholders, Feb. 18. Other officers elected were: James R. Williamson, vice-president; James M. Maddock, secretary-treasurer, and Mr. Ley, Mr. Williamson, Samuel Leask, Sr., Walter Byrne and Jules Steen, directors. All of the directors are residents of Santa Cruz except Mr. Steen. The Santa Cruz Lumber Company cut more than 9,000,000 feet of lumber last year in its holdings on the upper San Lorenzo, near the San Mateo County line.

HERE — THERE — EVERYWHERE

Annual convention of the Northwest Electric Light and Power Association, Engineers' Division, will be held in Aberdeen, Wash., March 26, 27 and 28. It is announced by Edgar F. Pearson, chief electrical engineer of the Northwestern Electric Company. Headquarters will be maintained at the Morck Hotel. More than 200 hydro-electric and steam power plant engineers and their families will attend.

Preliminary plans for the annual convention of the International Association of City Managers to be held in San Francisco during the late summer were considered at a recent meeting of the City Managers' Association of Northern California in Berkeley. John N. Edy, city manager of Berkeley, is chairman of the committee in charge of arrangements.

Frank C. Bremer of Yuba City was elected president of the California Hardware & Implement Association at the thirtieth annual convention of the organization in San Francisco Feb. 20.

Day dreaming last summer while sitting on the front porch of his home at Marysville, Kansas, Charles C. McBurney conceived a machine to hang wall paper. Today his dream threatens to bring him wealth. Made from pieces of farm machinery in his barn, McBurney later put together a contrivance with which to fulfill his dream. After some experimenting, the machine was made to hang wall paper.

Sacramento builders have reached no agreement on the proposed five-day week, it was revealed following a meeting between directors of the Sacramento Builders' Exchange and officials of the Building Trades Council. No definite action is expected for two weeks.

Engineers' Club of Seattle, Wash., at its recent election chose the following officers to serve for the ensuing year: President, J. R. West, chief engineer, Port of Seattle; vice-president, W. F. Way, engineer with Henry & McFee, contractors; secretary, J. T. Dovey; treasurer, R. W. Pinke, assistant resident engineer, Northwestern Portland Cement Co.

Power Plant Engineering Company of Seattle, has become affiliated with the Petroleum Heat and Power Company of New York City, manufacturers of oil burners.

Headed by R. B. Wurltzer, the German American Building-Loan Association, has opened offices at 833 Market St., San Francisco, and will engage in a general building-loan and savings business.

A. F. Shepherd of Seattle, was elected vice-president of the International Society of Master Painters and Decorators of the U. S. and Canada at the recent convention of that body in Minneapolis. Shepherd will have under his jurisdiction all the councils of the several states comprising the Western zone.

The Window Muffler Co., Ltd., of San Francisco, has been incorporated. Incorporators are: D. K. McLean, E. McDevitt, E. A. Austin, D. C. Barrett and B. Bailey.

MONTGOMERY WARD SEES BIG HOME-BUILT HOME MARKET

Home building in 1930 promises to make record-breaking strides for Montgomery Ward and Co., as a result of the new cooperative financing plan that company recently put into effect for the erection of ready-cut dwellings and of the cooperation of local contractors and building tradesmen.

"The new Ward plan makes it possible for the family man to have his own home at a cost less than the rent he has been paying," said J. A. Webber, manager of the Wardway Ready-Cut Homes department recently, "and therein lies the biggest factor of the new home-building era. The plan fits snugly into the desire of President Hoover to stimulate building activities in 1930, and therefore has a very definite place in the economic scheme of things."

"Besides giving strength to the general economic fabric, the Ward plan operates directly for local building activity, for, wherever possible, our company urges the employment of local contractors and building tradesmen. The Wardway Ready-Cut Homes department has arranged for more than 400 sales offices throughout the nation, most of them being linked up with our chain stores. We have sales managers in many districts and they operate with competent and adequate corps of assistants to aid the prospective home owner in his selection of plans and to facilitate the completion of the job. Every economy consistent with perfect workmanship is practiced. Preference always is given to local contractors and building tradesmen, and at all times our company insists that the very best workmanship be put into the structure, which we turn over to the buyer complete in every respect. When we have done our part, we turn the key over to him and say 'Here is your home completely constructed.' Whenever desired, in the sections where we have sales offices, Ward's will have all the direct dealings with the contractors, thereby relieving the home buyer of all attention and loss of time incident to proper supervision. In a word, we assume the whole job, which is complete only when the building is in every way ready for occupancy."

"As to the Ward financing plan: Ward & Co. asks only that the prospective home-owner have his building lot free and clear of debt. The company lends up to 75 per cent of the full value of the building lot and the proposed home on a first mortgage, and assumes all details incidental to the building of the home. The owner has 15 years in which to pay for his home, his payments on principal, interest and financing charges being only \$8.44 a month per \$1000 loaned. This, to our knowledge, is the lowest charge now in effect by home builders."

"The prospective builder makes his selection from our very large list of architectural offerings in our catalogue, or from any other designs he may have in mind, and we do the rest. Our homes combine beauty with utility, and so extensive and diversified is our list to select from that we can meet the requirements of any family, large or small."

West Coast Wood Preserving Co., Seattle, Wash., has been organized to operate wood preserving plants of the J. M. Colman Co. and the Pacific Cresoiting Co. as a consolidated property. Officers of the new company are: President, Laurence J. Colman; vice-president, L. C. Henry; secretary-treasurer, A. D. Barrall; manager, H. E. Horrocks.

SEVEN BILLION DOLLARS FOR PROJECT IN 1930

A program calling for the expenditure of more than seven billion dollars in 1930 for public works and by public utilities and big industries, is beginning to pull American business out of a slump, according to Dr. John M. Gries, chief of the division of public construction of the Department of Commerce.

He reports that thus far in 1930, projects for expansion and improvements have proceeded as rapidly as figured when prospects were inventoried at the November Hoover conferences, He said:

Recent reports are encouraging. Electric light and power companies, representing 85 per cent of the industry, estimate their expenditures for new construction during the first quarter of 1930 at 10 per cent in excess of similar expenditures last year.

CO-OPERATION URGED

Closer co-operation among the various trades in the construction industry was stressed at a dinner meeting of architects, material dealers and contractors at Sacramento, Feb. 26. Leonard F. Starks of the architectural firm of Starks and Flanders, Sacramento, presided. The session was held under the auspices of the State Association of California Architects. Twenty-eight attended.

The principal speakers were J. J. Donovan, William Garren and Charles Roeth.

JUDGE WARNS CONTRACTORS ON SAFETY

A few months ago a San Francisco Judge refused to hold the owner of an unsafe elevator guilty because "he supplies my fraternal organization with refreshments." Recently Judge Dimick of Ventura County found a contractor guilty of working men in a ditch more than seven feet deep without bracing the side walls. He was sentenced to 30 days on the County Jail. As it was the first case in the County and the evidence showed the violation to be common, the Industrial Accident Commission's representative asked for a suspension of the sentence when the Judge gave a warning to all contractors that hereafter heavy jail sentences would be imposed if safety orders were treated with scorn.

CEMENT PRODUCTION CONTINUES TO SHOW DECLINE

American portland cement mills continue to show a decline in the ratio of operations to capacity as indicated by the figures for 12 months' period ending January 31. According to statistics released by the Bureau of Mines of the Department of Commerce the ratio of operations to capacity for the last 12 months was 65.5 per cent. The ratio percentage for 12 months ending January 31, 1929, was 71 per cent and has fallen from a maximum of 71.1 per cent for twelve months ending April 30 to 65.5 per cent for 12 months' period ending Jan. 31, 1930.

During the month 8,498,000 barrels were produced, 4,955,000 barrels were shipped, and stocks on hand at the end of the month were 25,094,000 barrels. Production for January, 1930, was 14 per cent less and shipments 13.2 per cent less than January, 1929. Stocks at the mills were 1.1 per cent higher than a year ago.

U. OF C. PROFESSOR TELLS OF EAST BAY DAM SETTLEMENT

In his first report of a survey of the Lafayette Dam of the Eastbay Municipal Utility District which settled some twenty-two feet recently, made to fellow geologists, Professor George D. Louderback, chairman of the department of geology at the University of California stated that no deep faulting occurred, and that the settling was merely a plastic displacement which could not have been anticipated by the engineers.

He gave his report before the Cordilleran Section of the Geological Society of America which met during the last week-end on the Berkeley campus of the University.

In a summary of his findings he said: "An earth embankment, built on a deep natural fill of alluvium when nearly completed and at a height of 120 feet, sagged down about 22 feet at its crest, spreading out chiefly down stream and raising a ridge of alluvium beyond the toe of the dam about 19 feet high. A series of test borings and pits were put down to determine the nature of deformation within the dam and in the foundation. While the surface expression showed cracks and scarp simulating faulting, it was found that these cracks closed up at moderate depth and that the deeper parts of the dam and alluvium had been deformed plastically. In the dam, this resulted in a profile of equilibrium for the clay core with lower than the original slopes. The deformation in the alluvium was confined to shallow layers which suffered a plastic displacement, the lateral movement downstream resulting in an up-welling in the form of a ridge. The deeper layers of the alluvium showed marked compression resulting in a comparatively symmetrical distribution of local water pressures."

The dam itself was of conservative type, which, by all calculations should have held. The movement is interpreted as a settling into more stable equilibrium with a broader base to the dam. If it is found necessary to place the dam in service, it is believed that slight additions to the height of soil of which it is composed will make it even stronger than the original plans called for.

SCRIPPS MAN TO HELP NAVY WITH PAINT RESEARCH

Prof. W. E. Allen has been named by Dr. T. Wayland Vaughan, director of the University of California Scripps Institution of Oceanography at La Jolla, Calif., to cooperate with the United States Navy in its research on paint to protect ships against marine growths. Professor Allen will be present in San Diego each month while conditions of growths are inspected.

According to word received by Director Vaughan from Rear Admiral C. V. Laws, commander of the Marine Island Navy Yard, paints that have been found fairly effective in preventing growth of animals and plants on ships' bottoms in Atlantic water are not so protective in the Pacific Ocean. Consequently, tests are being conducted on the Pacific Growth of the growth of fouling organisms, particularly barnacles.

The appointment of Professor Allen to assist in this work follows his research on similar problems. He has made special collections for Dr. W. I. Coe of Yale University in connection with studies at the institution place. These studies of Dr. Coe cover a period of about two years of collection from the pier at La Jolla and it is believed at the institution that the work will yield much information as soon as they are finished.

LUMBER RAILROAD PURCHASED BY S. C. LUMBER CO.

A logging railroad a mile and a half long, purchased by the Santa Cruz Lumber Company in the high Sierras, will be put in use in the Santa Cruz mountains where the company is cutting one of the last remaining tracts of redwood in central California.

The purchase was made by telephone, over which President George N. Ley and Secretary James M. Maddock, representing the Santa Cruz Co., conducted negotiations with the seller.

The former owners of the railroad was the Hume-Bennett Lumber Co. of Hume, Calif.

Rails, logging cars and a 40-ton locomotive will be installed by the company to reach a new stand of timber stumpage which it has just bought from the old Western Shore Company, a Middleton holding, on the headwaters of Pescadero creek, just across the line in San Mateo county.

The timber purchase has just been completed by President Hey from Timothy Hopkins, president of the Western Shore Company.

The logging road will run from the present mill site of the Santa Cruz Lumber Company in a general westerly direction. It is estimated by the officers of the company that the newly purchased timber stand will be sufficient to supply the mill with logs for six years. The company cut a little more than 9,000,000 board feet of lumber last year.

The timber in the newly acquired stand is similar to that in Santa Cruz county in which the company has been operating, being redwood with about six per cent pine.

HARDWOOD FLOOR AMENDMENT FOR BUILDING LAWS

San Francisco Board of Supervisors considering adoption of an ordinance to be known as Section 102-A of the Building Law which provides that hardwood floors must be laid on a sub-flooring of at least merchantable T and G pine flooring or pine boards not more than six inches in width and not less than seven-eighths of an inch thick, surfaced on one side and edge and laid as tightly as possible and to be double nailed on each floor joist to obtain a smooth and even surface. These conditions shall apply to hardwood floor construction in all types of buildings.

The proposed ordinance has already been passed to print by the supervisors.

ARCHITECTURAL LIGHTING MEET SET FOR NEW YORK CITY

A conference for architects to discuss methods and problems of commercial, industrial, and home lighting will be held March 12, 13, and 14th at the Westinghouse Lighting Institute, Grand Central Palace, New York City. Special problems concerning lighting in which architects are interested will also be treated. This Architectural Lighting Conference is sponsored by the Commercial and Industrial Committee of the National Electric Light Association.

The pressing use of light for utilitarian illumination and decorative purposes is bringing the architectural profession and the electrical industry into ever closer relationship. A mutual understanding and respect of the problems and aspirations of each as they affect the use of artificial light is the purpose of this conference. Each has ideals of service, the architect to his client, the electrical industry to the consumer of its product.

As the subject implies, architects and others interested are invited to

attend. In subject matter and detail this conference will be the most complete and instructive meeting of its kind ever held. Authoritative speakers will talk on subjects of interest.

MOTOR VEHICLE FUNDS NOT AVAILABLE FOR BONDS

Attorney General U. S. Webb recently informed District Attorney Brantley W. Dobbins of Solano County that motor vehicle funds apportioned to counties by the state cannot be used to pay the interest on the redemption of bonds issued by road improvement districts.

Webb declares the state motor vehicle act was not meant to authorize boards of supervisors to pay from county funds a liability imposed upon an improvement district that should be met by a special assessment tax.

BOND STRENGTH OF CLAYS IN MOLDING SAND

Molding sands consist of clay, silica sand, and water. The clay acts as a bond to hold the grains of sand together, so that the impression of the pattern in the molding sand will maintain its form or shape until the molten metal poured into the mold has solidified. The bond strength, or cohesiveness, of the molding sand depends largely upon the quantity and type of clay present.

The objects of the investigation reported in Bulletin No. 200 of the Engineering Experiment Station of the University of Illinois were (1) to determine the physical and chemical properties of a number of clays; (2) to compose the various clays for endurance of bond strength when used as bonds in molding sands under casting conditions; (3) to determine the thermal conductivity of molding sands and the effect of heat on clays and molding sands; and (4) to determine the effect of repeated heatings on the permeability of molding sands.

The bulletin contains a list of the clays tested and their sources, a description of the apparatus used, a discussion of the methods of testing, and the results obtained from the investigation.

Copies of Bulletin No. 200 may be obtained without charge by addressing the Engineering Experiment Station, Urbana, Illinois.

SCHUMACHER WALLBOARD CORP. LOSES ROYALTY SUIT

The Schumacher Wallboard Corporation is not entitled to recover \$8997.39 from the Buttonlath Mfg. Co. for royalties earned during 1928, according to a ruling at Los Angeles by Superior Judge Yankwich.

By an agreement the Buttonlath Co. was granted a license to make and sell plaster board on the payment of a royalty of one cent per square yard with a minimum guarantee of \$10,000. The Schumacher Corp. agreed not to manufacture or sell the plaster board to any other company in the same territory except on payment of the same royalty. It is asserted that four years later after the agreement was made that the Schumacher Corp. granted a license to the Klinch Lath Co. without having the firm pay any royalty. The following year, 1928, the Buttonlath Co. stopped manufacturing the product and paid as royalty only \$1002.62.

Judge Yankwich held that the undertaking to pay the minimum royalty and the undertaking not to give a license to another company in the same territory on more favorable conditions were concurrent and the breach of one excused the performance of the other.

PACIFIC SOUTHWEST CITIES PLAN MUCH CONSTRUCTION

Chamber of Commerce of Los Angeles has been advised that 15 municipalities in Los Angeles county will expend approximately \$14,000,000 for new construction during the current year. The expenditures contemplated follow:

Redondo, \$370,000, municipal purposes; Whittier, \$180,000, municipal purposes and \$1,020,000 by private interests; Torrance, \$534,000, municipal purposes and \$1,500,000 private interests; Compton, \$600,000, municipal purposes and \$2,245,000 private interests; Santa Monica, \$258,140, municipal improvements and \$3,300,000 proposed; Inglewood, \$629,000, municipal purposes; El Segundo, \$210,000, municipal purposes; Beverly Hills, \$1,088,950, municipal purposes; Gardena Valley, \$25,000, municipal purposes and \$50,000 by private interests; Covina, \$270,000, municipal purposes and \$60,000 by private interests. Unofficial estimates for municipal purposes; Azusa, \$500,000; Long Beach, \$500,000; South Gate, \$500,000; Tujunga, \$100,000; Monrovia, \$100,000. These municipal expenditures total \$9,165,990, and the amounts to be spent by private interests aggregate \$4,875,000.

NEW TRADE ASSOCIATION

The Cement Institute, a trade association of manufacturers of portland cement formed last November, has established general offices in New York City and district offices in Chicago and Kansas City. Luther G. McConnell is general manager, with George H. Reiter and Baxter D. MacLain managers of the Chicago and Kansas City offices. Activities of the Institute will include the collection and dissemination of information with respect to trade and commerce, involving credit information, contracts for immediate and future delivery, production, stocks on hand and shipments of clinker and portland cement, and tabulation of cloth sack returns. In addition, it is the institute's purpose to draw up a lawful plan for the general development and improvement of the industry. It has already formulated a code of ethics for the guidance of its members. Officers of the Institute are: President, Elaine S. Smith, president, Pennsylvania Dixie Cement Corporation; vice-president and treasurer, Morris Kind, president, Hercules Cement Corporation; vice-presidents, M. C. Monday, president, Hermitage Portland Cement Company, Charles Irvin, vice-president, Alpha Portland Cement Co., and J. A. Lehaney, vice-president and manager Lone Star Cement Company of Kansas.

CHICAGO PAINTERS GRANTED WAGE INCREASE

Eighteen thousand painters in Chicago, Ill., on March 8 were granted a \$1 a day increase. Their daily wage will be \$14, and they will continue to work a five-day week.

The increase was automatic, being the result of a clause in the union's contract with employers providing that painters receive as much as workers in any other trade.

Bricklayers, electricians, plasterers and steamfitters have been getting \$13.60 a day for some time. Other trades will go on a \$14 a day basis June 1. The painters' pay boost was made effective today as a compromise arrangement to offset the fact that they have not been getting the highest prevailing wage.

Building News Section

APARTMENTS

Plans Being Revised.

APARTMENTS Cost, \$50,000
BURLINGAME, San Mateo Co., Cal.
Carmelita St.

Three-story and basement frame and stucco apartment building (12 4- and 5-room apts.)

Owner—A. J. Mullin.
Architect—Russell Coleman, 1404 Broadway, Burlingame.

Contract Awarded.

APARTMENTS Cost, \$25,000
SAN BRUNO, San Mateo Co., Cal.
Two-story reinforced concrete apt. and stores.

Owner—H. Rubin, 624 San Mateo Ave. San Bruno.

Architect—Edwards and Schary, 605 Market St., San Francisco.

Contractor—Prosper Bou, San Bruno.

Contract Awarded.

APARTMENTS Cost, \$25,000
SAN BRUNO, San Mateo Co., Calif.
Two-story reinforced concrete apts.
Owner—H. Rubin, 624 San Mateo Ave., San Bruno.

Architect—Edwards and Schary, 605 Market St., San Francisco.

Contractor—Prosper Bou, San Bruno.

Plans Complete.

APARTMENTS Cost, \$175,000
SAN FRANCISCO, N Clay St. bet. Franklin and Gough Sts.

Six-story steel frame and reinforced concrete apts. (24 5- and 6-room apts.)

Owner and Builder—A. J. Falvey, Stanyan and Page Sts.

Architect—H. C. Baumann, 251 Kearny St.

Sub-bids will be taken shortly by owner.

Sub-Bids Being Taken.

APARTMENTS Cost, \$55,000
OAKLAND, Alameda Co., Cal. 421 Van Dyke Ave.

Three-story frame and stucco apartment building (2- and 3-rooms).

Owner and Builder—A. C. Nelson, 1821 6th Ave., Oakland.

Architect—Chester Treichel, American Bank Bldg., Oakland.

Plans Being Completed.

APARTMENTS Cost, \$75,000
SAN FRANCISCO, Cervantes & Scott Streets.

Three-story and basement frame and stucco apartments with tile roof (18 3- and 4-room apts.)

Owner and Builder—Ben. Lieberman, Scott and Prado Sts.

Architect—Irvine & Ebbets, Call Bldg.

Sub-bids will be taken in about 10 days. Will contain all modern conveniences, including steam heat, hot water system, etc.

Plans Complete.

APARTMENTS Cost, \$100,000
SAN MATEO, San Mateo Co., Calif.
Baywood Park.

Two- and three-story frame and stucco apartments.

Owner and Builder—Wm. MacIntosh, Williams Bldg., San Francisco.

Architect—Irvine & Ebbets, Call Bldg. San Francisco.

Sub-bids will be taken shortly.

Contract Awarded.

APARTMENTS Cost, \$65,000
OAKLAND, Alameda Co., Cal. West Athol Ave. S Haddon Road.

Three-story frame and stucco apts.

(69 rooms).

Owner—W. Richardson, San Leandro.
Architect—L. F. Hyde, 372 Hanover Ave., Oakland.

Contractor—J. Daneri, 6515 Raymond St., Oakland.

Preparing Plans.

APARTMENTS Cost, \$50,000
LOS ANGELES, Cal. Third and Serano Sts.

Six-story and basement Class A reinforced concrete apartments (105 apts.; 113x150 feet).

Owner—Withheld.
Architect—C. Waldo Powers, Insurance Exchange Bldg., Los Angeles

Working Drawings Being Prepared.

APARTMENTS Cost, \$65,000
SAN FRANCISCO, California and Joyce Streets.

Sixteen-story Class A steel frame and reinforced concrete apartments (300 rooms).

Owner and Builder—Marian Realty Co., 110 Sutter St., San Francisco

Architect—H. C. Baumann, 251 Kearny St., San Francisco.

Segregated Figures Being Taken By Architect.

APARTMENTS Cost, \$65,000
OAKLAND, Alameda Co., Cal. Piedmont Ave. near Ridgeway.

Three-story and basement frame and stucco apartments (24 2- and 3-room apts.)

Owner—Harry Schuster, 424 Curtis St., Berkeley.

Plans by Harry K. Jensen, 354 Hobart St., Oakland.

Segregated Figures Being Taken.

APARTMENTS Cost, \$85,000
OAKLAND, Alameda Co., Cal. Off Piedmont Ave. near Ridgeway.

Three-story frame and stucco apts. (30 2- and 3-room apts.)

Owner—A. Jensen.

Plans by Harry K. Jensen, 354 Hobart St., Oakland.

All bids are being received by the architect.

Plans Being Figured.

APARTMENTS Cost, \$150,000
OAKLAND, Alameda Co., Calif. 423 Wayne Ave.

Six-story reinforced concrete and steel apartments.

A Demonstration of the

SKILSAW PORTABLE ELECTRIC HAND SAW

Will solve your cutting problems.

BONDS

GARDEN GROVE, Orange Co., Cal.—Trustees of Garden Grove union high school district set March 25 to vote bonds of \$26,000 for gymnasium building.

SOUTH SAN FRANCISCO, San Mateo Co., Cal.—City defeats proposal to issue bonds of \$50,000 to finance construction of a municipal swimming pool. Edward & Schary, 605 Market St., San Francisco, architect.

JAMESTOWN, Tuolumne Co., Calif.—Jamestown School District selects site in North Main St. on which it is proposed to erect a new grammar school to replace structure destroyed by fire. Two bond elections held to provide funds for such a structure were defeated, due, it is reported, to the failure of the voters to approve of the school site.

SANTA ANA, Orange Co., Cal.—Santa Ana Board of Education called special election for March 27, to vote bonds of \$196,860 for Junior High School buildings in Santa Ana. Work involves plant to cost \$337,000 and for additions and changes to existing plant to cost \$159,860. Allison & Allison, 1005 California Reserve Bldg., Los Angeles, architects.

BRAWLEY, Imperial Co., Cal.—Trustees of Brawley School District called election April 25 to vote bonds of \$0,000 for four-room addition to East side school building and for new six-room building at K St. school site.

YOUNTVILLE, Napa Co., Cal.—Election will be held March 28 in Yountville School District to vote bonds of \$20,000 to finance erection of a new school building. Trustees of district are: Nellie Bornman, Walter Tonascia and Gladys Whitton.

LAKEPORT, Lake Co., Cal.—Election will be held March 27 in Lucerne school District to vote bonds of \$30,000 to finance erection of a new elementary school to contain 3-classes; frame construction with stucco exterior. Trustees of district are: Mrs. Alice Andrews, E. R. Purpouse and M. B. Elliott (clerk).

PHOENIX, Ariz.—Osborn school district, Maricopa county, voted bond issue of \$55,000 for school.

PRESCOTT, Ariz.—Bonds of \$200,000 voted by Prescott School District for additional school buildings. Program calls for additions at high school, seven-room elementary school building and improvements to other schools. Chris. Totten, Prescott, architect. Plans prepared and bids will be called for at once.

ONTARIO, San Bernardino Co., Cal.—Election of Chaffey Union High School District defeated bond issues for erection of Junior College Improvement to high school. It will be necessary to erect Junior College plant at this time and direct tax will be levied to defray cost estimated at \$250,000. Allison and Allison, California Reserve Bldg., Los Angeles, architects.

SANTA ANA, Orange Co., Cal.—Board of Education postponed date of bond election from March 27 to April 3. Bonds of \$196,860 will be voted for Frances Willard Junior High School plant and for additional facilities at Julia Lathrop Junior High school. Allison & Allison, Los Angeles, architects.

RESORT BLDG. Cost, \$350,000
TIJUANA, Mexico.
 Reinforced concrete resort building (to seat 2000; 205x135 feet).
 Owner—Tijuana Athletic Club, Tijuana, Mexico.
 Architect—Eugene M. Hoffman, Guyson Bldg., San Diego.
 Contractor—Wurster Constr. Co., 107 Architects' Bldg., Los Angeles.

OAKLAND, Cal.—Caldow Paint Co. 1422 14th Ave., Oakland, at \$1.15 per gallon awarded contract by city council to furnish and deliver traffic paint for period ending June 30.

BERKELEY, Alameda Co., Calif.—Until March 13, 11 A. M., new bid will be received by the Regents of the University of California, Berkeley for:

(a) Central Heating Plant Building
 (b) Utility Tunnel Connection, and
 (c) Combined proposals on items (a) and (b) on the campus of the University. Previous bids rejected, these being:

H. K. Henderson, 20 Avis Rd., Berkeley, (a) \$4,751; (b) \$5,060; (c) \$52,501.

Sullivan and Sullivan, Oakland, (a) \$49,850; (b) \$1,826; (c) \$54,350.
 Dinwiddie Const. Co., San Francisco (a) \$51,000.

Walter Sorensen, Oakland, (a) \$51,780.

J. W. Cobby & Son, San Francisco \$55,961.

Connor & Connor, Oakland, \$57,000
 F. J. Westlund, Oakland, \$57,297.
 C. D. De Velhiss, Oakland (a) \$59,112; (b) \$5,500; (c) \$64,312.

Plans obtainable from Cashier's Window at California Hall, Berkeley on deposit of \$25, returnable.

Plans Being Completed.

DEPT. Cost, \$119,500
STOCKTON, San Joaquin Co., Cal.
 Fireproof passenger and freight depot.
 Owner—Southern Pacific R. R. Co.
 65 Market St., San Francisco.
 Architect—Eng. Dept. of Owner.
 Bids will be taken for a general contract in about ten days.

Contract Awarded.

ADDITIONS Cost, (Unit A) \$457,858 (Unit B) \$415,000
LOS ANGELES, Cal. Exposition Park
 Additions to coliseum.
 Owner—City of Los Angeles.
 Architect—John and Donald Parkinson, Title Insurance Bldg., L. A.
 Contractor—Edwards, Wilder & Dixon
 Edwards & Wilder Bldg., Los Angeles.

The work will include the removal of the upper half of the structure and reconstructing of reinforced concrete, involving extensions at each end of peristyle, extending concrete girders, columns, foundation work and stairs below the upper surface of the concourse floor and underpinning of all tunnels and foundations.

Plans Being Figured—Bids Close Mar. 18, 12 Noon.

REPAIRS Cost, \$—
SAN FRANCISCO. Marina District.
 Repairs to Palace of Fine Arts.
 Owner—City and County of San Francisco (Park Commission, B. P. Lamb, secretary).
 Engineer—Henry D. Dewell, 55 New Montgomery St.

Bids are being received by the Board of Park Commissioners, B. P. Lamb, secretary, Park Lodge, Golden Gate Park. Certified check 10% payable to Board of Park Commissioners required with bid. Plans obtainable from engineer. Bond of 50% of contract price required of successful bidder.

HAYWARD, Alameda Co., Cal.—April 14 is date set by city council to vote bonds of \$75,000 to finance construction of a municipal swimming pool. Jesse B. Holly is city engineer.

SAN MATEO, San Mateo Co., Cal.—Guerin Bros., 2940 San Jose Ave., San Francisco, at \$470 awarded contract by city for grading East San Mateo Park at Monte Diablo Ave. and North Eldorado St. Following is a complete list of bids: Guerin Bros., \$470; Chas. Cruthers, \$530; Meyer Rosenberg, \$480; J. P. Lauder, \$565; Diamond Constr. Co., \$600; C. L. Jordan, \$625; M. M. Ball, \$700; L. J. Immel, \$750.

TALMADGE, Mendocino Co., Cal.—J. T. Thorpe, 417 Market St., San Francisco, at \$2,530 submitted lowest bid to State of California for constructing crematorium (furnace) at Mendocino State Hospital for the State of California. Plans prepared by Geo. W. McDougall, State Architect, Public Works Bldg., Sacramento.

Following is a complete list of the bids:
 J. T. Thorpe, \$2,530.
 J. N. J. Firebrick Const. Co., San Francisco, \$2,692.
 San Francisco Oven Co., San Francisco, \$3,995.
 Bids held under advisement.

SAN FRANCISCO.—C. B. Sovig, 248 Oak St., at \$12,972 submitted low bid to Board of Public Works to rehabilitate the Stockton street tunnel. The project involves waterproofing, lighting and general repairs. Complete list of bids follows:
 C. B. Sovig.....\$12,972
 J. Reilly.....15,981
 J. Treacy.....16,445
 L. Hansen.....16,550
 W. Cobby.....16,700
 Anderson.....16,850
 H. Mann.....17,480
 L. J. Cohn withdrew his bid just before the time set for opening.

SAN FRANCISCO—Link Belt-Meese and Gottfried Co., 3100 19th St., at \$44,612 submitted low bid to Board of Public Works to furnish and deliver a portable gravel plant for the Coast Range Division of the Hetch Hetchy Project, under Contract No. 121. Other bids were: Harron, Rickard and McCone, \$44,800; Bodinson Mfg. Co., \$44,997; Diamond Iron Works, \$64,644; Stephens-Adams Mfg. Co., \$49,972.

Project Postponed Indefinitely.
REMODEL DEPOT Cost, \$8,000
SACRAMENTO, Sacramento Co., Cal.
 Seventh and L Sts.
 Remodeling of present depot for de luxe stage depot.
 Owner—Southern Pacific Motor Transport Co., 9 Main Street, San Francisco.
 Architect—Eng. Dept. of Owner.

Plans Being Figured—Bids Close March 14.
ADMINISTRATION BLDG. Cost, \$—
TUCSON, Arizona. Municipal Airport.
 Administration building.
 Owner—City of Tucson.
 Architect—None.

BUSINESS OPPORTUNITIES

SAN FRANCISCO.—Names and addresses of the individuals or firms concerned in these opportunities will be furnished on request to the Business Opportunity Department of Daily Pacific Builder, 545-547 Mission St., Phone KEarny 1252:

D-3401—Local Representative. New York City. Advertising firm desirous of securing advertising man or small agency to contact with to secure as local representative.

D-3402—Agency. Helena, Montana. Party qualified to take charge of a branch office or agency not requiring too great technical knowledge interested in communicating with firm desiring agency in Montana.

D-3403—Manufacturers' Agent for Washing Machines. Detroit, Michigan. Eastern concern interested in securing manufacturers' agents that would be interested in handling industrial washing machines and ovens in San Francisco's territory.

D-3404—Representative for Vibrating Chairs. Chicago, Ill. Exclusive representative in San Francisco for vibrating chairs with sufficient means to purchase merchandise outright is desired by Chicago firm.

D-3405—Sales Engineer. Cincinnati, Ohio. Engineering firm desires sales engineer who would be interested in selling their line of electric brakes on a commission basis.

D-3406—State Agent. Los Angeles, Calif. Firm seeking state agent for stand for electrical iron, to be marketed for the first time in Northern California to be sold direct-to-consumer.

D-3407—Representation in Philadelphia. Philadelphia, Pa. Firm in Philadelphia is seeking manufacturer in San Francisco who desires representation to communicate with, the object in view of marketing their goods for them in the East.

D-3408—Manufacturers' Agent. Cleveland, Ohio. Ozone machine manufacturers anxious to secure manufacturers' agent in San Francisco who deals in electrical goods, to market their goods.

D-3409—Commission Salesmen. Freeport, Ill. Concern desires high grade commission salesmen or distributors who can sell their product to the jobbing trade on the Pacific Coast; their products consist of domestic and janitor mop sticks, camp stools, juvenile golf sets and brushes.

18083—Window Glass and Brushes. Roosendall, Netherlands. Party is offering window glass and all kinds of brushes.

18085—Agricultural Implements. San Francisco, Calif. French manufacturer of agricultural implements would like to get in touch with firms in San Francisco.

18086—Representation. Portland, Ore. Firm desires to act as representative for local houses that are interested in having their products introduced into European market.

18090—Salesman. Schmiedefeld, Ger. Party is anxious to secure a salesman on a commission basis, for his hydrometers.

18091—Representative. Milan, Italy. Society is asking for a list of active representatives for the sales of articles for bars, hotels, restaurants.

18093—Representation. San Francisco, Cal. Party connected with company having headquarters in Roumania and Budapest is in this country for the purpose of securing lines of radios and household goods for exclusive representation in the middle European countries.

18095—Survey Service. Kobe, Japan. Party with experience as a surveyor for the American and other consulates offers his services to local buyers of Japanese goods. References.

18099—Paints. Hello, Korea. Company is in the market for the following paints: 10 bbls. white, one bbl. black, 1 bbl. deep blue, 1 bbl. yellow, 1 bbl. red, 1 bbl. maroon color, 5 bbls. (boiler) mixture with paints.

19000—Ice Cream Freezers. Dairen, Manchuria. Railway concern is interested in receiving catalogs and price lists from manufacturers of ice cream freezers. Local bank reference.

19001—Lumber. Havana, Cuba. Party is desirous of purchasing pine, and other kinds of lumber and timber.

19002—Representation. Guatemala, C. A. Firm wishes to act as agent, both buying and selling, to take care of legal matters, etc., for local houses.

19008—Representation. Manila, P. I. Store wants to act as representative of firms desirous of exporting to the Philippines.

D-3411—Machine Shop. San Francisco, Calif. Party interested in disposing of machine shop.

D-3412—Representation. Milwaukee, Wis. Party in East interested in handling line of San Francisco manufacturer, as their representative.

D-3413—Distributors. Cambridge, Mass. Firm wishes distributor for high grade grease gun. A light machine which will handle the heaviest of greases and deliver a pressure of 9,000 pounds.

D-3414—Representation. Berkeley, Calif. Floor wash manufacturer wishes to get in touch with concern who would distribute his products along Pacific Coast states.

D-3416—Patent. Monterey Park, Cal. Owner of patent for piano interested in securing manufacturer who might be interested in purchasing of same.

D-3418—Patent. Seattle, Wash. Patent Owner of patents on new type three horsepower one cylinder stationary type engine desires to contact persons or firms desiring to acquire patent and manufacturing rights. Blue prints and demonstrations will be made available to interested parties.

LUMBERMEN INJURED

Jewel D. Lowe, 37, general manager of the Red River Lumber Company at Westwood, Calif., and G. L. Fullington, Kansas City, were injured, probably fatally, and T. A. Kemp, Kansas City was less seriously hurt in an automobile accident near St. Joseph, Mo., March 1. Their car swerved to avoid striking an unlighted car which emerged from a side road, and ran into a culvert. All three were thrown from the machine. Lowe suffered fractures of both upper and lower jawbones and his right arm.

Engineering News Section

BRIDGES

SAN CARLOS, San Mateo Co., Cal.—Town trustees will call an election shortly to vote bonds of \$15,000 to finance construction of five bridges over Pulgas Creek to link up the SW portion of the town where the new grammar school will be erected. The bridges will be constructed in Elm, Chestnut, Cedar and Arroyo Sts., and Stanford Lane.

MARTINEZ, Contra Costa Co., Cal.—City council petitioned to open Green St. as a cross town artery involving the construction of a bridge over Alhambra Creek.

OROVILLE, Butte Co., Cal.—T. H. Polk, Chico, at \$1,805.65 awarded contract by county supervisors to construct concrete bridge over Clear Creek near the Lewis place on Clark road. Complete list of bids follows:

T. H. Polk, Chico.....	\$1,805
W. L. Thompson, Orland.....	1,908
Wiggins & Kaiser, Oakland.....	1,377

CHICO, Butte Co., Cal.—T. H. Polk, Chico, at \$608 awarded contract by county supervisors to construct small concrete bridge over a slough near Lewis place on Clark road. Complete list of bids follows:

T. H. Polk, Chico.....	\$608
W. L. Thompson, Orland.....	643
Wiggins & Kaiser, Oakland.....	767

LONG BEACH, Calif.—Application has been made by the Department of Public Works, State of California, for War Department approval of plans of proposed bridge across the arm of Alamitos Bay, near the easterly boundary of City of Long Beach, and about 2000 feet northeasterly of the Pacific Electric railway track; the bridge to have a removable span 40 ft. wide (26.8 feet normal to channel), 7 feet clear height above mean high water and 11.8 feet above mean lower low water; and 15 additional spans of 19 ft. to center.

LONG BEACH, Cal.—City Manager G. L. Buck has announced that immediate construction of the Orange Ave.-Hill St. Viaduct has been made possible by agreement with the Pacific Electric Ry. Co. which is to pay \$62,000 of the cost of the structure. A county appropriation of \$75,000, and the city's contribution of \$28,000; makes up the estimated cost (\$165,000) of the proposed viaduct. City Manager Buck states that bids will be advertised for shortly.

LOS ANGELES, Calif.—Until 10 A. M., April 2, bids will be received by the board of public works for the construction of the Fourth street viaduct over the Los Angeles river and the tracks of the Santa Fe Ry and Union Pacific Ry. The proposed bridge will be a reinforced concrete viaduct consisting of a single arch 254 ft. in length over the river and girder and arch approaches, a total length of 2400 lin. ft., with a 600-ft. ramp to Mateo St. It will be 71 ft. wide over all, with two 5-ft. sidewalks, and a 56-ft. roadway. The work will involve: 48,000 cu. yds. class F concrete; 7,000,000 lbs. rein. steel; ornamental balustrade and hand rail; special design concrete lighting posts; storm drain in approaches.

HUMBOLDT COUNTY, Cal.—Fred J. Maurer, Eureka, at \$10,880 awarded contract by State Highway Commission to construct undergrade crossing under tracks of the Northwestern Pacific R. R. at Loleta, consisting of a 60-ft. deck plate girder span on concrete piers with pile foundations.

NAPA, Napa Co., Cal.—Until March 24, bids will be received by city council to widen Jefferson St. at street bridge; estimated cost \$4,700. Plans obtainable from City Engineer H. A. Harold.

DREDGING, HARBOR WORKS & EXCAVATIONS

RICHMOND, Contra Costa Co., Cal.—Fred C. Franks Contracting Co., 260 California St., San Francisco, at \$972 cu. yd. submitted low bid to U. S. Engineer Office, San Francisco, for dredging in Richmond Harbor, involving 156,000 cu. yds. Other bidders were: San Francisco Bridge Co., \$1002; American Dredging Co., \$102; Hydraulic Dredging Co., \$1025. Taken under advisement.

SACRAMENTO, Cal.—Following are three low bids received by U. S. Engineer Office, Sacramento, for suction dredging approximately 1,772,000 cu. yds. of material in New York Slough and Suisun Bay:

Longview Dredging Co. Oakland.....	\$,089
Hydraulic Dredging Co.....	\$,089
San Francisco Bridge Co.....	\$,095

Bids taken under advisement.

SAN DIEGO, Cal.—An expenditure of \$756,000 this year for enlarging the anchorage channel, widening and deepening the bar, San Diego Harbor, has been recommended by Maj. Gen. Lytle Brown, chief of army engineers, and Maj. W. H. Lanagan, district engineer. The widening and deepening of the channel, making it 40 ft. deep and 800 ft. wide, would involve 1,800,000 cu. yds. of material. Other proposed work involves 1,290,000 cu. yds. dredging. If appropriations are made, this work will start shortly after July 1.

ELLENSBURG, Wash.—Until April 16, bids will be received by U. S. Bureau of Reclamation, Ellensburg, to construct approximately six additional miles of the High Line Canal, Kittitas Project, between the Milwaukee Crossing in the Park District to Wippel Creek on the edge of the Big Badger Pocket area. The specifications include the construction of the Johnson creek siphon and also the 3470 feet tunnel near Wippel creek. The canal itself will be 18 feet in width at the upper end. The specifications call for excavation of approximately 118,000 cubic yards of material the placing of 3400 cubic yards of concrete and the placing of 54,000 pounds of reinforcing steel. There will also be the placing of 2600 linear feet of precast concrete pipe from 18 to 72 inches in diameter. Johnson creek siphon is really two siphons joined together by a short tunnel. It is to be of lock joint 72-inch concrete pipe, made in the government plant in Ellensburg. This will be 1500 feet in length. The largest tunnel will be 3470 feet in length and will be 6.7 feet in diameter. Construction work stops

in section 33 of range 17 north, and 20 east. This is on the edge of the Badger Pocket district. Plans obtainable from above office.

SACRAMENTO, Calif.—Until March 12, 10 A. M., bids will be received by Harry W. Hall, county clerk, to construct a ferry slip on Lower Andrus Island near the Golden State Cannery. Certified check 10% payable to Chairman of Board of Supervisors required with bid. Plans obtainable from County Engineer Chas. Deterding, Jr.

RICHMOND, Contra Costa Co., Cal.—Berkeley Waterfront Co. and Blair S. Shuman have filed application with the U. S. War Department seeking authorization to create an industrial tract on the Richmond Inner Harbor, containing more than 241 acres and having a deep water frontage of approximately one mile. The applicants seek authorization to do the necessary dredging and filling, which will involve approximately 1,170,000 cu. yds.

STREET LIGHTING SYSTEMS

TRACY, San Joaquin Co., Cal.—Until March 11, 8 P. M., bids will be received by George L. Ferlichs, city clerk (131) to install ornamental street lighting system, comprising 63 single light standards, together with underground system, in 11th St. bet. west boundary of West Park subdivision and East St. 1911 Act. Bond Act 1915. Certified check 10% payable to city required with bid. Plans on file in office of clerk. E. T. A. Bertlett, city engineer.

BAKERSFIELD, Kern Co., Cal.—City council declares intention to install 68 electrolier standards together with underground system in 17th St. bet. K St. and Union Ave. Standards of Union Metal Mig. Co's. design No. 1851. (Improvement District No. 601). 1911 Act. Bond Act 1915. Hearing March 17. V. Van Riper, city clerk. W. D. Clarke, city manager.

MACHINERY AND EQUIPMENT

SEASFOOT, Sonoma Co., Cal.—Until March 14, 7:30 P. M., bids will be received by J. B. Bridgeford, Clerk, Analy Union High School District, to furnish one or more school bus chassis, capacity of bus body to be 42 pupils. Bidder requested to state allowance to be made for either or both busses now owned by the district. Bids will also be considered for one or more school bus bodies to be built complete on chassis to be furnished by the district. Further information obtainable from clerk.

BERKELEY, Alameda Co., Cal.—Kleiber Motor Truck Co., San Francisco, at \$5044 awarded contract by city council to furnish and deliver 5-ton truck for use of street department.

SAN FRANCISCO—Link Belt-Meese and Gottfried Co., 3100 15th St., at \$44,612 submitted low bid to Board of Public Works to furnish and deliver a portable gravel plant for the Coas Range Division of the Hetch Hetchy

Project, under Contract No. 121. Other bids were: Harmon, Rickard and McCone, \$44,500; Bodinson Mfg. Co., \$44,987; Diamond Iron Works, \$64,644; Stephens-Adams Mfg. Co., \$49,972.

TAFT, Kern Co., Cal.—Until March 25, 7 P. M., bids will be received by H. E. O'Brien, clerk, Taft Union High School District, to furnish shop equipment for high school. Certified check 5% payable to clerk of district required with bid. Specifications on file in office of clerk and obtainable from W. H. Weeks, architect, 111 Sutter St., San Francisco.

RAILROADS

LOS ANGELES, Cal.—The Los Angeles Railway has announced a program of street car line and bus line extensions during the next two years at an estimated cost of \$1,300,000. J. Ogden Marsh is the chief engineer.

FIRE ALARM SYSTEMS

RED BLUFF, Tehama Co., Calif.—City will call election shortly to vote bonds of \$2,100 to finance extensions to fire alarm system.

SAN MATEO, San Mateo Co., Cal.—Universal Tool and Manufacturing Co., San Francisco, at \$870 awarded contract by city council to furnish alarm boxes and register in connection with fire alarm system. Other units of the system will be installed by Atlas Electric Co., San Francisco, at \$991.65. Batteries, motor generator and battery charger will be purchased in the open market by City Manager E. P. Wilsey.

FIRE EQUIPMENT

BURLINGAME, San Mateo Co., Cal.—Seagrave Co. at \$10,000 awarded contract by city council to furnish and deliver a new fire truck with ladders.

PIPE LINES, WELLS, ETC.

SAN JACINTO, Riverside Co., Cal.—Until March 7, bids will be received by the city council for drilling an 8-in. well about 220 ft. deep and for furnishing casing.

SOUTH PASADENA, Cal.—Until 2 P. M., March 12, bids will be received by the city council for drilling a water well, settling casing, etc., in accordance with specifications on file at the office of the city engineer. Nettie E. Hewitt, city clerk. The date, originally set for March 1, has been extended as shown above.

SEWERS AND SEWAGE DISPOSAL PLANTS

SAN JACINTO, Riverside Co., Cal.—Until March 7, bids will be received or furnishing two deep well turbine pumps and two electric motors. Geo. Rover, city clerk.

GUSTINE, Merced Co., Calif.—City to bond \$20,000 to finance extensions to sewer system.

LOS ANGELES, Cal.—Until 2:45 P. M., March 12, bids will be received by Sanitation District No. 8, room 2 Law Bldg., 130 N. Broadway, for furnishing equipment for a sewage pumping plant as follows:

One 4-in. horizontal centrifugal sewage pump with closed two port impeller, capable of delivering approximately 400 gallons of raw sewage per minute against a minimum head of 18-in. or a maximum head of 20-ft., with direct connecting motor, capable of

operating under the conditions imposed.

One 6-in. horizontal centrifugal sewage pump with closed two port impeller, capable of delivering approximately 800 gallons of raw sewage per minute against a minimum head of 18-in. or a maximum head of 20-ft., with direct connecting motor, capable of operating under the conditions imposed.

All prices are to include delivery of such equipment at the plant site at the intersection of Wilmington Ave. and Wilmington St. in Los Angeles County. Bidders may bid on any or all items and separate contracts may be entered into for each item. Each bidder shall indicate date of delivery of each item of equipment bid on. Certified check or bond, 10%. Plans may be obtained from the office of the chief engineer, A. K. Warren, 202 Law Bldg., 139 N. Broadway. A. S. Soule is the secretary.

SANTA CRUZ, Santa Cruz Co., Cal.—Thompson Bros., Santa Cruz, at \$17,023.75 awarded contract by city council (455-C) to improve Walnut Ave. bet. Chestnut and Pacific Aves., involving cement concrete paving; concrete curbs, walks, driveway approaches, catchbasins, pipe drains, storm water manhole; br. manhole; vit. clay pipe sewer laterals; 20 2-light Marbelite electrolier standards with underground system.

BERKELEY, Alameda Co., Calif.—Oakland Sewer Const. Co., at \$7,095.84 awarded contract by City to extend existing sanitary sewer laterals; construct 12-in., 15-in. and 18-in. storm sewers; manholes; fill pavement depressions, etc., in Primrose Ave. 1911 Act. Following is a complete list of bids:

Oakland Sewer Const. Co.	\$ 7,095
Meyer Rosenberg, S. F.	7,214
A. G. Raich, S. F.	8,429
De Golyer & Bruce	8,833
Diamond Const. Co.	8,975
F. C. McGaw	9,192
Fay Imp Co., San Francisco	10,890

FRESNO, Fresno Co., Calif.—City council declared intention (new proceedings) No. 103-D, to construct 6-in. vit. clay pipe sewer in alley in Roeding Addn., including 3 cement conc. manholes with c. i. covers; 4-in. on 6-in. wyes. 1911 Act. Bond Act 1915. H. S. Foster, city clerk. Frank Rantsma, acting city engineer. Hearing March 20th.

OROVILLE, Butte Co., Calif.—City Engineer S. J. Norris estimates cost of storm sewers at \$28,086 in addition to \$12,000 for extending Pomona Ave. sewer from Myers St. to Dry creek. The estimates include \$5,340 for extension of the Oroville levee. Other recommendations included in the estimates are: Sewer along Western Pacific railroad cut from Baldwin Ave. to Bridge St., \$6,700; sewer on Myers St. from High to Robinson, \$1,230; sewer on First Ave. from Safford to Montgomery St., \$506; sewer on Robinson St. from Marysville Road westward 400 ft., \$2,160; sewer on First Ave. from Safford to Broderick St., \$630; sewer on Geage Ave. from Lincoln St. to 160 ft. west of Yeatch St., \$2,314; sewer on Washington St. from the Bechtel tract to Mitchell Ave., \$630, and a sewer on Broderick St. from Second Ave. to the Boston Machine Shop, \$5,576.

LOS ANGELES, Cal.—C. E. Arnold, chief storm drain engineer of Los Angeles County, is completing plans for drainage system in Drainage District No. 29, covering Sherman and vicinity, embracing approximately 1261 acres of drainage area. Outlets will be provided by hooking up with Storm Drain District No. 11 at three

points, viz.: In Dohney Drive, in San Vicente Blvd. and Beverly Blvd., and in the La Cienega storm drain. A hearing has been set for March 10. The work will involve approximate quantities as follows:

3000 cu. yds. excav.
2237 cu. yds. class A concrete;
40 cu. yds. class B concrete;
45 cu. yds. class C concrete;
257,745 lbs. reinf. steel;
10 catchbasins No. 1;
7 catchbasins No. 2;
1 catchbasin No. 3;
11 catchbasins No. 8, with one grating;
13 catchbasins No. 8, with 2 gratings;
2 catchbasins No. 3, with 3 gratings
5 catchbasins No. 3, with 2 gratings;

3 special structures, No. 6;
18 catchbasins (with aprons), No. 1;
8 catchbasins (with aprons), No. 2;
3 catchbasins (with aprons), No. 3;
26 catchbasins (with aprons), No. 2, one grating;
15 catchbasins (with aprons), No. 8, with two gratings;
10 catchbasins (with aprons), No. 8, with three gratings;
2 catchbasins (with aprons), No. 8, with one grating;
5 catchbasins (with aprons), No. 9, with two gratings;
11 manholes (standard and special), No. 1;
54 manholes (standard and special), No. 2;
3 sanitary sewer manholes;
4 sanitary sewer manholes, special;
12 standard junction structures No. 1;
30 sanitary sewer chimney pipes;

Reinf. centrifugally spun concrete pipe, standard weight—1194 ft. 18-in.; 2591 ft. 21-in.; 2529 ft. 24-in.; 1327 ft. 27-in.; 2451 ft. 30-in.; 1221 ft. 33-in.; 3101 ft. 36-in.; 1124 ft. 39-in.; 994 ft. 42-in.; 584 ft. 45-in.; 915 ft. 48-in.; 356 ft. 51-in.; 90 ft. 54-in.; 608 ft. 57-in.; 686 ft. 66-in.; 888 ft. 72-in.

Special A reinforced concrete centrifugally spun pipe—180 ft. 27-in.; 260 ft. 30-in.; 436 ft. 36-in.; 329 ft. 48-in.; 1086 ft. 54-in.; 476 ft. 66-in.; 528 ft. 72-in.

Special B reinforced concrete centrifugally spun—30 ft. 27-in.; 68 ft. 36-in.; 271 ft. 72-in.

Plain cement pipe—91 ft. 6-in.; 1244 ft. 12-in.; 1593 ft. 15-in.; 1183 ft. 18-in.; 9 ft. 21-in.

Vitrified clay sewer pipe—1750 ft. 10-in.; 6 ft. 8-in.; 50 ft. 6-in.

FRESNO, Fresno Co., Cal.—Due to irregularities, city council cancels proceedings to construct 6-in. vit. sewer in alleys in Roeding's Addition, and new proceedings will be started. The protests will be heard about March 20.

BERKELEY, Alameda Co., Calif.—Superior Judge T. W. Harris has been asked to dismiss a petition filed by the North Berkeley Taxpayers' Association for a temporary restraining order to prevent construction of a \$350,000 storm sewer project in the Cragmont and Thousand Oaks district of Berkeley. The suit was directed at city officials of Berkeley in an effort to prevent creation of a special assessment district. Frank Cornish, attorney for the association, announced his intention of dropping the injunction plea while Earl Sinclair, Berkeley city attorney, declared he would demand formal dismissal of the proceedings. The protesters took legal steps to halt the proposed assessments after holding numerous mass meetings. They contended that the storm waters could be adequately taken care of by the San Pablo and Cordornices creeks.

CORONADO, Los Angeles Co., Cal.—A \$60,000 sewer bond issue will be placed in the April 14th ballot. Funds will be used to construct additions to the present sewer system.

LAGUNA BEACH, Orange Co., Cal.—A. J. Stead, city engineer, is preparing plans for a sewer system with disposal and outfall to serve a city area of 1100 acres. The work proposed involves: 22,000 ft. of main sewer; disposal plant, 2 pumping plants and 3,000-ft. outfall. Work will be under the 1911 Act and 1915 Bond Act. J. B. Lippincott, Petroleum Securities Bldg., Los Angeles, is the consulting engineer.

WATER WORKS

SAN MATEO, San Mateo Co., Cal.—Richmond Sanitary Co., 290 Division St., San Francisco, at \$535.62 awarded contract by city council to furnish and install pipe in East Park. VENTURA, Ventura Co., Cal.—The County Supervisors will probably ask for bids within the next few weeks for the paving of the highway between Simi and Moorpark. Est. cost, \$30,000. C. W. Petit, county surveyor.

SAN RAFAEL, Marin Co., Cal.—
 County supervisors petitioned to improve roads in the Nicasio district. Referred to County Surveyor Rodney Messner for report.

OFFICIAL PROPOSALS

STATE OF CALIFORNIA DEPARTMENT OF PUBLIC WORKS

DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the State Highway Engineer, Public Works Building, Sacramento, California, until 2 o'clock P. M. on March 26, 1930, at which time they will be publicly opened and read, for construction in accordance with the specifications therefor, to which special reference is made, of portions of State Highway, as follows:

Glenn County, between Logandale and Willows (H-1-Gle-7-A), about five and two-tenths (5.2) miles in length, to be paved with Portland cement concrete.

Proposal forms will be issued to only those Contractors who have furnished verified statement of experience and financial condition in accordance with the provisions of Chapter 644, Statutes 1929, and whose statements so furnished are satisfactory to the Department of Public Works. Bids will not be accepted

from a Contractor to whom a proposal form has not been issued by the Department of Public Works.
 Plans may be seen and forms of proposal, bonds, contract and specifications may be obtained at the said office, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, and at the office of the District Engineer of the district in which the work is situated. The District Engineers' offices are located at Eureka, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the district office will be available to accompany prospective bidders for an inspection of the work herein contemplated and Contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Division of Highways. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the district office.

No bid will be received unless it is made on a blank form furnished by the State Highway Engineer. The special attention of prospective bidders is called to the "Proposal Requirement and Conditions" annexed to the blank form of proposal, for full direction: as to bidding, etc.

The Department of Public Works reserves the right to reject any or all bids or to accept the bid deemed to be the best interests of the State.
 DEPARTMENT OF PUBLIC WORKS
 DIVISION OF HIGHWAYS
 C. H. FURCELL,
 State Highway Engineer

Dated February 26, 1930.

ADVERTISEMENT FOR BIDS

Subject to conditions prescribed by the undersigned, sealed bids are invited for (a) The Central Heating Plant Building; (b) The Utility Tunnel Connection, and (c) combined proposals on items (a) and (b), on the campus of the University of California, Berkeley, California. No bid will be received after 11:00 A. M. Monday, February 24, 1930; the right to reject any and all bids is reserved. For full information apply at Cashier's Window, California Hall, University of California, Berkeley. A deposit of \$100.00 is required for each set of Drawings and Specifications for item (a), a deposit of \$25.00 is required for each set of Drawings and Specifications for item (b).
 THE REGENTS OF THE UNIVERSITY OF CALIFORNIA

LUMBER FOR JAPAN

Two hundred forty million board feet of Russian lumber will be imported into Japan in 1930, if a preliminary agreement between the Soviet and Japanese governments recently reported to the lumber division of the Department of Commerce Assistant Trade Commissioner Howard B. Titus, of Tokyo, is consummated. The agreement, according to Mr. Titus, calls for the sale of 75 per cent of this lumber through one of the largest lumber concerns in Japan, and the balance by the Soviet Government. The Japanese firm will advance 70 per cent of the current market price when the lumber is shipped and will pay the balance after it is sold. This new agreement, according to advices, supersedes the former agreement between the Japanese government and another Japanese firm.

JAPAN'S IMPORTS OF RUSSIAN LUMBER INCREASED MATERIALLY

Two hundred forty million board feet of Russian lumber will be imported into Japan in 1930, if a preliminary agreement between the Soviet and Japanese governments recently reported to the lumber division of the Department of Commerce by Assistant Trade Commissioner Howard B. Titus, of Tokyo, is consummated.

The agreement, according to Mr. Titus, calls for the sale of 75 per cent of this lumber through one of the largest lumber concerns in Japan, and the balance by the Soviet Government. The Japanese firm will advance 70 per cent of the current market price when the lumber is shipped, and will pay the balance after it is sold. This new agreement, according to advices, supersedes the former agreement between the Japanese government and another Japanese firm.

anese government and another Japanese firm.

Mr. Titus also reports that the Soviet Government is said to have sold 12,000,000 board feet of white aspen for match stock in Japan, delivery of this stock to start after April 1.

While the exact figures on imports of Siberian softwoods into Japan for 1929 are not yet available, preliminary reports show that, including aspen, these imports are less than those of 1928—199,361,280 board feet. These reports also indicate that if present negotiations are successful, these imports will show an increase in 1930 of 41,000,000 board feet over 1928.

Japanese importation of softwoods from Asiatic Russia, according to Japanese official figures, rose from 112,226,000 board feet in 1926 to 196,990,000 board feet in 1927. Imports of aspen in 1926 and 1927 were approximately the same. According to trade figures, imports of aspen into Kobe, Japan, by a prominent lumber company, increased from 16,770,000 board feet in 1927 to 18,012,000 board feet in 1928, and in the first half of 1929, amounted to 9,666,000 board feet.

ASK PREQUALIFICATION ACT IN STATE OF MASSACHUSETTS

A bill calling for the prequalifying of all bidders on public work in the State of Massachusetts has been presented to the legislature of that state. This bill provides that public official may require all persons bidding public work to fill out a questionnaire and a financial statement containing complete information about the financial statement containing complete information about their financial ability and experience in performing such type work. The right to disregard any bid submitted in case the bidder does not satisfactorily qualify will rest with the state board if the bill is enacted.

A "Pittsburg" Automatic Water Heater installed in the Home indicates high quality throughout.

Recommended and specified by all the leading architects, plumbers and builders.

Consider the high merit of the Pittsburg coupled with "Pittsburg Perfect Service."

"Hot water quick as a wink."

CIVIL ENGINEERS URGED TO MAKE REGISTRATIONS

Civil engineers throughout California are being urged by Donald M. Baker, president of the state board of registration for civil engineers, to lose no time in filing their applications with the board of examination and license. Under the new law, which became effective August 14, 1929, all persons engaged in civil engineering work in California must be licensed.

The board announces that approximately 2,800 application blanks have already been mailed out to civil engineers, but that there will be between 4,500 and 5,000 such blanks mailed out by the board before the work of examining and licensing all persons subject to the law is completed.

Under the law, application for examination and registration as a civil engineer must be made to the board in a prescribed form, accompanied with a fee of \$15. The application must contain satisfactory evidence that the applicant is of good character at least 25 years old, and has been engaged in the practice of civil engineering for at least six years and during that period had responsible charge of engineering work as a subordinate to a civil engineer for at least one year. Graduation from an engineering school or college approved by the board shall count as four years of practice and each year of study completed without graduation, in an engineering school or college approved by the board, shall count as one-half year of practice.

The board is a unit of the state department of professional and vocational standards, of which James F. Collins is director, and is composed of Donald M. Baker, Los Angeles, president; H. J. Brunner, San Francisco, vice-president, and Albert Givans, Sacramento, secretary. Applications and correspondence should be directed to 29 State Capitol, Sacramento.

PRESENT NEW AMENDMENT TO PORTLAND LICENSE LAW

An amendment of the ordinance regulating contractors, so that there will be no requirement except that of a license, has been presented to the City Council of Portland, Oregon. The amendment eliminates the bond of \$500 formerly required, which caused a storm of protest from the industry, and makes it possible for those bonds to be canceled. Also, it does away with the classification of contractors, which brought about a virtual war between the contractors and the sub-contractors. A new board, consisting of four building contractors and one other man prominent in the construction industry, is provided for so. Two of the new board will be holders of residences, two men handling bigger projects, and the fifth will be selected from a list to be made up by the other four, and all will be named by the mayor.

CONSTRUCTION PROGRAM TAKING DEFINITE SHAPE

The outlook for construction activity in 1930 is gradually taking definite shape, according to E. J. Harding, assistant general manager of the Associated General Contractors of America. "Our statistical data now indicates boom activities in highway, public improvement and all other classes of engineering construction," he states. "The first indication of an acceleration of building activity is now at hand and relates to non-residential construction. Prospects for residential work are still indefinite with no specific indications of revival yet at hand."

The favorable outlook for engineering construction is based on several indicators, according to Mr. Harding. The increased sale of state and municipal bond issues during December, 1929, and January, 1930, presents a combined total for such bond sales that has never exceeded but once by any similar combined total.

A further indicator is seen in the recent increase in federal aid appropriations for state highways, which increase of \$50,000,000 annually should result, when matched with state money, in an increase of more than \$100,000,000 for such work during 1930.

Reports on contemplated work as compiled by the F. W. Dodge Corporation show that engineering construction on the boards from January 1 and February 7 is 183 per cent greater in valuation than during the same period in 1929. These figures relate to projects being planned by engineers which have not reached the contract award stage.

Engineering construction contract awards for this year up to February 7 show an increase over last year of 68 per cent. This is seen by the contractors' association as a tribute to the manner in which federal, state and local governmental agencies have expedited plans for construction in response to President Hoover's appeal after the stock market decline.

The first indication of an acceleration in private building operations is now visible in the reports of contemplated work in the non-residential field up to February 7. These are 39 per cent greater in valuation than similar reports in 1929 and are seen as a very hopeful augury for the future although the volume of contract awards has not yet been increased for this class of work which is still behind last year.

While the volume of current construction activities as measured by shipments of basic materials is seven points below February of last year the general outlook is seen as much improved with the exception of the residential construction field where both contemplated work and contract awards are approximately 45 per cent off.

U. C. ENGINEERS TO BE GUESTS OF A. S. C. E. IN APRIL

Members of the University of California student chapter of the American Society of Civil Engineers will be guests of that organization on the evening of April 22, the day preceding the three days' session of the society in Sacramento. The meeting of the civil engineers is for the regular spring quarterly program, and some 300 members of the society are expected to attend, according to T. E. Stanton, president of the Sacramento chapter.

At the meeting with the students, the board of directors of the American Society of Civil Engineers will discuss with them their problems and will endeavor to render them assistance in their work.

Among the notable men who are expected to attend the session in Sacramento on April 23, 24 and 25, is Dr. Elwood Mead, emeritus professor of rural institutions at the University of California, now director of the reclamation bureau of the Interior Department of the United States. Reclamation has been one of the chief topics of discussion among the engineers for several years and it is probable it will occupy a large part of the program.

The irrigation section, too, is planning to take a considerable part of the program. Fred Scoby of Berkeley, in the United States Department of Agriculture has charge of this part of the meeting's activities.

ENGINEERING COUNCIL ORGANIZES FOR 1930

Administrative officers to carry out plans for national activity in public affairs during 1930 have been announced by the American Engineering Council. Gardner S. Williams, of Ann Arbor, Mich., has been named acting president of the Council. He will occupy the office until the return from a trip around the world of Carl E. Grunsky, of San Francisco, former head of the American Society of Civil Engineers, who has been elected president for a two-year term, succeeding Arthur W. Berresford, of New York. Mr. Williams is a former professor in the University of Michigan, a vice-president of the Council, and chairman of its committees on government reorganization and on flood control. He is the representative on the council of the Detroit Engineering Society.

New members of the Administrative Board, the governing body of the Council, which represent the civil engineering field are: American Society of Civil Engineers—H. S. Crocker, Denver, Colo.; A. J. Dyer, Nashville, Tenn.; Anson Marston, Iowa State College; Frank M. Williams, Albany, N. Y. American Institute of Consulting Engineers—Edwin F. Wendt, Washington.

SUCCESSFUL METHODS TO CONSTRUCT LOW COST ROADS

TOLD BY U. S. ROAD BUREAU

In a report just issued by the United States Bureau of Public Roads, giving the results of investigations made under the auspices of a joint committee of engineers and technologists, representing the Bureau and The Asphalt Institute, — the letter acting for the asphalt industry, — methods of constructing low cost roads in South-eastern states are cited as having produced successful wearing surfaces at low cost, capable of carrying light and medium traffic and usable throughout the year. The investigations of the joint committee which were made during 1929 will continue during 1930 in relation to these and other types of low cost surfacing, under the chairmanship of H. S. Fairbank, head of the Research Committee, U. S. Bureau of Public Roads, and J. E. Pennybacker, managing director of The Asphalt Institute.

Types of road surfaces in South Carolina and Florida, covered by the studies in 1929, consist of sand-clay mixtures and topsoil roads applicable to large areas of the United States where sand and clay are in sufficient proximity to permit the construction of mixed sand-clay bases, or where the topsoil from cultivated fields is available for the same purpose. These types are not only adaptable to the solution of the farm-to-market road surfacing problem but, in some instances, they are already serving as links in the Federal Aid Highway System where the traffic is of light or medium character. Exceptional economies effected in their construction and maintenance, and the fact that the many miles of the types now in service are carrying traffic that averages more than one thousand motor vehicles per day, afford data in the report for the use of highway officials and engineers that is of timely value at present in view of the wide spread and increasing demand for paving the roads in the back country areas.

The report issued by the Bureau of Public Roads summarizes the important findings of the investigators as follows:

1. It is clearly apparent from this investigation that in localities where sand-clay and topsoil roads have been found of value, surface treatment fills a definite need in the economic development of a well-planned highway system by offering a nonskid surface which is exceptionally easy riding, low in first cost, reasonable in maintenance cost, and one that can be constructed with a minimum of inconvenience to traffic. It has the advantage of making maximum use of local material.

2. South Carolina and Florida each have hundreds of miles of this type that have been in service from three months to four years and are successfully carrying traffic which in some instances is in excess of 2000 vehicles per day. There are a great many miles over three years of age on which the traffic has averaged more than 1000 vehicles per day.

3. Construction and maintenance costs naturally vary with local conditions. The following figures show a normal range of cost for work of this character to date:

- (a) Construction costs per mile: Sand-clay or topsoil base, 20 feet wide and 6 inches uniform thickness, complete \$1500 to \$3000. Priming material and heavy application with cover, complete \$1800 to \$2500.

- (b) Seal coat treatment, complete \$500 to \$1000.

- (b) Maintenance costs per mile per month: Surface treatment only... \$15 to \$60. Shoulders and ditches... 15 to 50.

- Second year—Surface treatment only... 5 to 20. Shoulders and ditches... 0 to 20.

4. Important subgrade requirements are as follows: (a) The subgrade should be composed of stable soil, even though to meet this requirement it is necessary to remove from the grade existing unsatisfactory soils and replace them with stable soil.

- (b) The subgrade should be constructed in layers of not more than 12 inches, thoroughly compacted by contractor's equipment or by hydraulic jetting, and machining and shaping should be continuous under traffic.

- (c) The grade line should be laid to keep the surface well above the ground level and, in so far as practical, to take full advantage of natural drainage.

5. Details of especial importance with regard to sand-clay and topsoil base are as follows:

- (a) Base materials should be selected only after examination to determine their suitability for use.

- (b) The compacted depth of base course should not be less than six inches at any point over the areas to be surface treated.

- (c) The base should be constructed two to three feet wider than the area to be surface treated or else should be supported at the edge by planks or other curbs.

- (d) The crown of the sand-clay or topsoil base should not exceed ¼ inch to the foot.

- (e) After thorough mixing the base should be compacted by traffic for a period of not less than one month accompanied by frequent blading and shaping. This traffic should be so distributed by regulating measures as to obtain uniform compaction over the full width of road.

- (f) When the sand-clay or topsoil does not contain an appreciable quantity of mineral particles of approximately ¼ inch diameter it is recommended that a stabilizing layer of pea gravel or similar material be worked into the surface of the base when preparing it for surface treatment.

6. Bituminous priming material should be applied only upon a smooth, thoroughly bonded and well swept base. The priming material should possess high penetrating and fairly rapid hardening properties so as to be absorbed by the base without leaving a sticky mat. Cold application tars and asphalt cements cut back with a kerosene type of distillate appear best adapted for such purpose. Wherever possible traffic should be barred from the road after sweeping preparatory to priming

and until compaction of the bituminous wearing course has been effected. The priming material should uniformly cover the surface of the base but there should not be an excess so as to require a mineral cover prior to application of the heavy asphaltic material.

7. The heavy asphaltic material should not be applied within twenty-four hours after the surface has been treated with priming material. A soft asphalt cement of from 150 to 300 penetration is to be preferred to a softer or less viscous hot oil. It should be uniformly distributed at a temperature of 275° to 325° F. when the air temperature is not lower than 50° F. and immediately covered with coarse mineral aggregate. It is important to exercise extreme care in uniformly distributing the coarse aggregate before and during compaction in order to secure a smooth riding surface. Coarse aggregate should preferably consist of hard, broken fragments of stone or slag from ¾ to 1½ inch in diameter. Un-crushed gravel and sand are not desirable for use as mineral cover. The bituminous mat should be approximately ¾ inch in compacted thickness, and should be rolled with a tandem roller until thoroughly bonded. Cover material should not be applied in excessive amount, as overloading the bituminous mat will greatly reduce its life.

8. Application of a seal coat should be deferred until the condition of the surface treatment indicates its immediate need, except where climatic conditions are such as to create this condition during the winter months, in which case the seal coat should be applied before the first winter of service. Bituminous material for seal coat should be preferably an asphalt cement cut-back with a gasoline type of distillate. The mineral cover should consist of ½ to 1½ inch stone or slag chips.

9. Retreatment with soft asphalt cement and a coarse mineral cover should be made whenever reinforcement or thickening of the bituminous mat is required and when patching becomes so extensive as to make resurfacing economical.

10. General maintenance should be under the patrol system and patches should be made promptly as required, with care to maintain a smooth riding surface. The material and methods used for constructing patches should duplicate as closely as possible materials and methods used in original construction. Maintenance should include prompt repairs to shoulders and ditches when needed.

Portland Cement Association has issued a booklet on "Vaulted Concrete Sidewalks" which contains detailed drawings of such construction. The material in the booklet tells clearly how the strong, durable, watertight concrete demanded by vaulted concrete sidewalks may be obtained. Stress is placed upon the fundamental requirements for making good concrete.

RIGHTS OF PROPERTY OWNERS

By HARRY C. WESTOVER, Attorney-at-Law

This is the sixth of series of articles in the California Mechanics' Lien Law, prepared by Harry C. Westover, attorney at law of Santa Ana. Other articles will be published in these columns from time to time.—Editor.

Section 1192 of the California Code of Civil Procedure provides: "Every building or other work of improvement constructed, altered or repaired upon any land with the knowledge of the owner or of any person having or claiming any estate therein and the work or labor done or materials furnished with the knowledge of the owner or person having or claiming any estate in the land shall be held to have been constructed, performed or furnished at the instance of such owner or person having or claiming any estate therein and such interest owned or claimed shall be subject to any lien filed unless such owner or person having or claiming any estate therein shall within ten days after he shall have obtained knowledge of such construction, alteration or repair or work or labor, give notice that he will not be responsible for the same by posting a notice in writing in that effect in some conspicuous place upon the property and shall also within the same period file for record a verified copy of said notice in the office of the County Recorder of the said county in which said property or some part thereof is situated." Section 1193 of the CCP provides in part: "It shall be lawful for the owner to protect himself against any failure of the contractor to perform his contract and make full payment for all work done and materials furnished thereunder by executing a bond or other security as he may deem necessary."

Under the peculiar wording of the statute property owners have a right to protect their property in any way they see fit and if he so desires such property owner can require a contractor to put up a bond or other security that he (the contractor) will perform his contract as specified and also pay all bills for labor performed or materials furnished upon the work or improvement. If an owner does not wish to require a bond from the contractor, or some other security then the owner waives the right of having such security and thereupon assumes the responsibility, of seeing that all claims against the property for labor performed or materials furnished are paid when due.

Section 1193 of CCP provides for a statutory bond to be filed with the plans and specifications but the owner can take any sort of security which he may desire to protect himself from the failure of the contractor to pay labor and material bills.

Under Section 1192 of CCP it is specifically provided that every building or other work of improvement is deemed to have been constructed or work performed at the instance of the owner unless the owner file the notice of non-responsibility as set forth in said section. If an owner has knowledge of work that is being done on his property and fails to give notice as prescribed in Sec. 1192 his property will be held for the work of improvement, regardless of whether the owner authorized the work. If the work is done and the owner has knowledge of the work then it is imperative that the owner immediately give notice that he will not be responsible for such

work. A property owner who either fails to demand from the contractor a bond, or protect himself in some other way, or a property owner who after having knowledge that work is being done upon his property fails to give the notice of non-responsibility as required in Section 1192 of CCP should not be allowed to complain if afterwards he discovers that all bills for work and labor performed and materials furnished have not been paid and is later called on to make payment. A property owner who is negligent or careless has no reason to complain of the operation of the lien law and if he assumes added responsibility he should not be allowed to complain of the unjustness of the lien law if later he has to pay for labor and material bills.

The question of notice of non-responsibility usually arises in instances where the owner has leased his property and the lessee then erects a building upon the property or repairs and improves or remodels the building that is existing on the property at the time of leasing. A provision in a lease that improvements made upon the premises by the lessee are to be paid by the lessee and not by the lessor, does not remove the requirement of the owner of giving the notice of non-responsibility and such a provision in a lease is sufficient of itself to give constructive notice or knowledge of the intended work, to the lessor or owner so that the owner or lessor must file the notice of non-responsibility.

A landlord's knowledge when making a lease for a brief period that the lessee will add to, alter and repair existing buildings as shown by a clause in the lease allowing removal of the improvements unless they would be injurious to existing structures is sufficient to put him on notice as to the actual improvements made and charge him with the duty of giving notice of non-liability. Evans vs. Judson 52 Pac 585.

It is possible that a building may be constructed entirely without the knowledge of the owner and in such a case a notice of non-responsibility may be filed upon the building even though the building might be completed at the time the notice is filed.

The owner has ten days after he has received knowledge of the work or improvement in which to file the notice of non-responsibility and if the owner did not have notice until after the building was completed the ten-day period would not commence until the owner had received notice of such improvement.

Sec. 1192 provides that the notice must be in writing and posted in some conspicuous place upon the property within ten days after the owner has received notice of the work of improvement and that a verified copy of such notice be filed within the same period in the office of the County Recorder of the county in which the property is situated.

The notice must contain a description of the property effected thereby sufficient for identification with the name and the nature of the title or interest of the person giving the notice. The name of the purchaser under the contract if any, or lessee if known, must be given in the notice.

As in other phases of the Mechanics' Lien Law the question often arises as to when the period commences to run. The owner has ten days after which

he has received notice in which to file and post the notice of non-responsibility.

Notice of non-responsibility may be posted within the statutory period after construction has been actually begun by a lessee notwithstanding the fact that the owner had knowledge of the intention to construct before the commencement thereof. Birch vs. Magic Tea Co. 73 Pac 238.

The notice of non-responsibility may be effectually given within ten days after the owner has obtained knowledge of the actual commencement of the work though as lessor in a lease stipulation for the improvement he had previous knowledge of the intended construction. 17 Cal Jur 98.

The term "conspicuous place" has received several interpretations by the court. It is the duty of the owner or of his agent to see that the notice is placed in a conspicuous place. The notice should be placed where it could be readily seen. Where notice was posted on front of a building bordering on a public street and position was such that it could easily be observed on entering the building the conspicuousness of the place was commended. Marshall vs. Candell 80 Ely 552. A notice posted in little recess on a partition wall several feet back from the street where it could not be easily seen was not posted in a conspicuous place and knowledge by a claimant of such posting as furnishing materials will not relieve the owner's property from liability.

REFRIGERATORS' EFFICIENCY TO BE GIVEN TEST

A constant temperature room, the principal use of which will be to test the efficiency of refrigeration boxes, is to be installed in the Agricultural Engineering Building at the Branch of the College of Agriculture, University of California, at Davis. Plans are being drawn by Prof. B. D. Moses, of the Agricultural Engineering Division and J. R. Tavernetti, field engineer and for the California Committee on the Relation of Electricity to Agriculture.

The room, which will be a permanent installment for whatever uses it may later be required, will be about 10 feet square and 10 feet in height. Temperatures of from 30 to 110 degrees Fahrenheit will be possible; any desired temperature to be maintained without fluctuation for as long a period as desired.

The walls of the room will be insulated with five inches of rock cork. Inside there will be a false floor and ceiling, and a false rear wall. The cooling and heating elements will be behind this rear wall. Two ventilating fans are to be installed. One will draw air from the outside under the false floor and past the heater or cooler; the other will reverse the current, driving air out. The temperature will be maintained, however, with the least possible movement of the air.

With a constant temperature in the room, it will be possible to measure the loss of heat through the walls of the refrigeration boxes tested, and thus to determine the efficiency of their insulation. Economy of operation in the use of current for refrigeration, also will be measured. Construction of the room will begin in the near future and it is planned to start tests as soon as the room itself has been tested thoroughly.

OPEN BRANCH OFFICE

Anaconda Wire and Cable Co. of California, with factory and headquarters in New York City, has established a branch office in San Francisco at 360 Ninth St. A complete stock of all types of insulated wire is carried.

THE OBSERVER

WHAT HE HEARS AND SEES ON HIS ROUNDS

The United States Supreme Court has dismissed the appeal of C. L. Crawford of Mendocino County who attempted to prevent the organization of the Golden Gate Bridge and Highway District in the construction of a \$30,000,000 suspension bridge over Golden Gate Strait. Proceedings are now under way to call an election to vote bonds to finance the project.

While attempts are being made by various municipalities about the bay area to keep business within the home grounds, steps are being taken to "sell" the bay region as a unit to manufacturers of the country. The plan is being worked out by representatives of the nine counties of the San Francisco Bay area. Graph-illustrated studies of the bay region, prepared for distribution, present this area as the hub of foreign markets of the Pacific Ocean, and a rich, concentrated market of more than 1,500,000 population. They represent the Pacific Slope as a market of more than 12,000,000 persons, excelling in standard of living and commodity demand any groups or divisions of States, according to L. O. Head, vice president of the San Francisco Chamber of Commerce and chairman of the nine counties committee.

Assailing the city manager form of municipal government, Judge D. T. Elcke, former mayor of Stockton, told a joint meeting of the Oakland Union Labor and Building Trades Councils that it is the "worst any city could adopt." Judge Elcke attributed what he said was a 75 per cent increase in Stockton's taxes over a period of five years to that form of government and urged that cities now functioning under such a rule amend their charters to obtain a different system.

German steel mills have begun to export the new "ST 42" high-tensile-strength rust-resisting structural steel. The new type has been adopted by the German Bureau of Standards as the standard steel for all construction work. It contains a little less than 0.20 per cent copper to make it rust resisting. The specifications call for a tensile strength of at least 52 kg. per square centimeter (74,000 lb. per square inch). All the newer bridges in Germany are being constructed with the new type of steel.

Northwestern railroads which proposed last May to reduce lumber rates on shipments to Texas from northwestern territory are held to have been justified by an Interstate Commerce Commission decision. The northwestern carriers propose to reduce the charges on principal varieties of lumber from Oregon, Washington, Idaho and Montana to a large number of Texas points and to some in Oklahoma, by amounts ranging from 7½ to 15 cents per 100 pounds. Protests by California and southwestern lumber interests resulted in an order of suspension, which was dissolved. Though there is keen competition to the Texas territory, the commission ruled that the reduction was "not unreasonable or unduly prejudicial." The suspension order was set aside as of March 1 and the carriers will be permitted to make the revised schedules effective at once.

The six-hour day in all industries is the cure for the unemployment question throughout the United States, according to A. F. Whitney, president of the International Brotherhood of Railroad Trainmen, who recently addressed the Commonwealth Club of San Francisco. Whitney estimates that 4,000,000 men are out of work throughout the country. This condition, he said, is brought about by the development of machinery in industry. An adjustment is now necessary, and should consist of shorter hours of work without reduction in wages, according to Whitney.

A bill to reform the practices of building and loan associations has been approved by the state senate of New Jersey. The bill provides that the State banking commissioner would be empowered to take over an unsafe or delinquent organization without resort to the courts, and the wilful spreading of false or malicious gossip concerning an association would be made a misdemeanor. Losses from sales of property bought through foreclosure would be distributed among all shareholders, and companies would be limited in the amount invested in their lands and buildings to 5 per cent of their assets, that amount to include any mortgages on the property. A fund equal to 10 per cent of the average dues for three preceding years would be placed in a liquid fund to meet withdrawals and other demands.

J. R. Shields, city building inspector of Sacramento, under a resolution of the city commissioners will refuse to issue a building permit to any person not holding a contractor's license in accordance with the state law. No building permits have knowingly been issued contrary to the resolution with the result that practically all contractors working in the capital city are licensed by the state.

America now has 4785 skyscrapers ten stories or more in height. There are 384 buildings more than twenty stories high. Population of these buildings is sufficient, according to the C. A. Dunham Company, heating engineers, to make up about 4000 small towns. "New York has slightly over half of the skyscrapers of ten stories or more, with Chicago an easy second," it is said. "Los Angeles, Detroit, Philadelphia and Boston follow in order."

The East Bay Cities gained 147 new families moving in from outside places during the last month, according to the current report to the Board of Directors by Frank W. Hanna, Chief Engineer and General Manager of the East Bay Municipal Utility District. Of these, one hundred and three located in Oakland, twenty-five in Berkeley, thirteen in Alameda, and six in Richmond.

PERMIT FEE REDUCED

An ordinance lowering minor building permits from \$10 to \$1 has been passed by the City Council of Baltimore, Md. The price reduction will effect permits for alterations or additions when the cost of the work does not exceed \$200.

ALONG THE LINE

George F. Nicholson, harbor engineer for the city of Los Angeles, will leave for Washington, D. C., March 20 to attend the hearing of the U. S. Army Board of Engineers to consider Los Angeles port dredging projects. Major McGlone, Long Beach harbor engineer, will also attend the hearing.

J. M. Hotchkiss of Hobbs, Wall & Co., San Francisco, was re-elected president of the California Redwood Association. L. C. Hammond was re-elected vice-president and R. F. Hammett was reappointed secretary-manager.

David Salfeld, architect, builder and developer of El Dorado Heights in Stockton, died in that city March 7. Salfeld operated the Alpine Mill and Manufacturing Company of Stockton. He was a native of Keyesport, Ill. In 1880 he worked in the offices of San Francisco architects. In 1915 he moved to Stockton where he continued in business up to the time of his death.

Oscar T. Martin, secretary of the Santa Clara District Building Trades Council, is conferring with city and county officials of Santa Clara county in an effort to get public building programs under way as a solution for the unemployment situation.

Thomas W. Phipps, an engineer 1421 Superior Ave., Sheboygan, Wis., seeks employment on the Pacific Coast. He has considerable experience on highway and railroad construction.

Edward von Geldern has announced his candidacy for the office of county surveyor of Sutter County. He served one term in the office some years ago.

TOKYO LUMBER MARKET IS STEADY ATTACHE REPORTS

The Tokyo lumber market is steady, demand is normal and arrivals of shipments are light, a cable from Halleck A. Butts, Commercial Attache, to the Lumber Division of the U. S. Department of Commerce, says.

Stocks on hand at the present time total 29 million feet, and include the following: 7 million feet of large and medium Douglas fir squares, 5 million feet of cedar logs, 3 million feet of piling, 3 million feet of hemlock squares, 2 million feet of Douglas fir fitches.

Imports of lumber into the Tokyo market from February 1 to February 21 total 16 million feet including the following: 8 million feet of Douglas fir large and medium squares, 2 million feet of red cedar logs, 1 million feet of hemlock logs, and 1 million feet of fir fitches.

WANTS SALES AGENT

Steel Tank & Pipe Co. (Box 1899, Station F), Portland, Ore., seeks a sales agent to represent that organization in the sale of West Coast Steel Heating Boilers in the Central and Northern California section. Those applying for this agency must be financially responsible and established with a good line of heating specialties. Communicate with the company direct if you are interested.

CREDIT AGAIN OPENING FOR SOUND REAL ESTATE INVESTMENT

A definite turn from the "tight" condition on financing which all business experienced following the stock market break and during the preceding months of high call money is already observable in the field of real estate, according to reports made to the National Association of Real Estate Boards from its mortgage councillors in seventy-five cities.

The market for good real estate mortgages, however, is clearly shown by the reports still to be larger than he supply of funds available through insurance company loans, building and loan association funds and mortgage loan institutions, the large channels of building financing.

To get an accurate measure of what change there may have been in the last few months the Association sent out telegrams to the men selected as its mortgage councillors in various cities of the country and asked them, "Is the real estate credit situation any easier in your community now than it was two or three months ago?"

Replies From 104 Cities

Telegraphic replies were received from 104 cities of which 63 reported that there has been improvement in the credit situation. The degree of improvement noted varied all the way from a slight easement to a decidedly improved situation. Thirty-three observers reported that the situation as it was unchanged in their communities. Eight state that the situation in their cities has become more acute. "Slightly easier" is the phrase occurring most frequently in the reports. "Greatly improved," "Satisfactory," "Steadily improving" also occur; and local spots of new activity are found in reports from all sections.

Projects Must Be Well Planned

The reports clearly show a growing feeling of necessity for discrimination between well-conceived definitely purchased projects and poorly conceived, unsound or speculative ones.

The attitude is in line with the position of the National Association of Real Estate Boards that an accurate survey of what types of structures are currently needed in a city should be the basis for building programs.

A revival of residential mortgage loan activity is indicated in a number of the reports. Investment institutions are showing a strong preference for residential loans where the house is to be occupied by the owner as a home.

Show Differences in Sectional Reports
Sectional differences in general credit conditions are observable. The North Central and Pacific Coast States report the most generally satisfactory supply of mortgage money.

In the New England section, where 15 replies indicate a somewhat easier situation, eight reported approximately the same situation as two or three months ago.

In the east north central section 14 replies gave reports of a better credit situation. In this section there were eight reports that the situation was the same, and three that credit was tighter.

In the southern Atlantic section 6 replies indicated an improvement in the situation. Nine cities report a situation the same as for some months past.

In the east south central section three of the reports were of improvement, and one report of conditions worse than three months ago.

In the west south central section 6 replies were of a definitely easier credit situation, and four of an unchanged condition.

In the mountain section two replies were of an improved condition, two of a condition not as easy as sometime ago.

In the Pacific section 16 replies were of readier investment funds. In this section there were four reports of a stationary condition and one of a less satisfactory condition.

The general Canadian situation is indicated to be slightly easier but on the whole little changed.

5. Types of Bracing—"Herringbone" bracing has little value. "Herringbone" bracing consists of a series of pieces let in obliquely between studs in a generally horizontal plane. It is sometimes wrongly referred to as fire-stopping. It was found that it increases the stiffness of a horizontally sheathed panel only 30% and adds only 1% to the strength. But 2x4 braces cut in between the studs obliquely across the panel from the upper corners to the sill increased the stiffness 60% and the strength 40%. On the other hand, the important discovery was made that 1x1" strips let into the faces of the studs beneath horizontal sheathing increased the stiffness from 2 1/4 to 4 times and the strength about 3 1/2 times. For uses such as in farm buildings, airplane hangars and small garages, where sheathing is omitted and the siding is applied horizontally, the let in bracing strips offer far the best assurance of stiffness and strength.

6. Effect of Wall Openings—Window and door openings closely spaced reduce the stiffness of horizontally sheathed walls 70% and their strength 20%. Diagonally sheathed walls lose 63% in stiffness and 50% in strength, but are still much better than horizontal walls without openings.

7. Effect on Lath and Plaster—Plaster on wood lath makes a wall 90% stiffer, and about half as strong as though diagonally sheathed.

A full report of the tests, and of results secured, is obtainable from the National Lumber Manufacturers Association, Transportation Bldg., Washington, D. C.

SEVEN ARCHITECTS SEEK VALLEJO SCHOOL JOB

Seven architects have had conferences with the Vallejo Board of Education seeking a commission to prepare plans for the proposed new junior high school to be erected in that city. A bond issue for approximately \$230,000 is contemplated to finance the structure.

Architects seeking selection on the project are W. H. Weeks, San Francisco; A. O. Johnson, Berkeley; J. J. Donovan and Howard Schroder of Oakland; Coffman, Sahlberg & Stafford, Sacramento; Chas. E. Perry, Vallejo, and Davis-Pearce Co., Stockton.

ENGINEERS ELECT

J. W. De Souza was elected president of the Northwestern Society of Highway Engineers at the annual banquet of that organization in Portland, Oregon, March 1. H. S. Wall was chosen first vice-president; J. S. Sawyer, second vice-president; W. D. Clarke, third vice-president; W. A. Reeves, secretary; C. C. Reiter, treasurer; R. H. Baldock, J. H. Scott, H. A. Hunt, E. A. Collin, Oscar Cutler, O. R. Dinsmore and B. Glenn, directors. Past presidents of the organization are W. A. Schwarz, G. S. Paxson and L. P. Campbell. The latter is the retiring president.

CONCRETE ROADS BECOMING POPULAR IN EUROPE

Concrete roads are becoming increasingly popular in Europe. In 1926 the total mileage of continental highways constructed of this material was only about 300 miles, while in 1929 approximately 3000 miles were built. A further increase is expected during 1930.

BUILDING STRENGTHS ARE REVEALED BY FOREST SERVICE

Do three nails in each board make a nail stronger and more rigid than two nails?

This is one of the questions that the Forest Products Laboratory—U. S. Forest Service—has answered through tests made with nearly 50 frame wall studs of full one-story height and 12 1/2 feet long. These walls were braced with 2x4's at the customary 6' spacing; the sole plate was bolted to a fixed base and pressure was applied horizontally at the top plate in the plane of the wall surface. End tests, corresponding to the corner studs of the house, were built up in the usual way with three 2x4's.

The answer to the above question is at three or four nails instead of two. In 1x8" horizontal sheathing improve the wall but little; but they add from 30 to 100% to the stiffness of a diagonally sheathed wall.

A third nail placed in the middle of board between two other nails adds more resistance to twisting than if it were the only nail.

An inner pair of nails between an outside pair does not resist twisting much as the outside pair.

Other results of these tests are:

1. Inclination of Sheathing—Ordinary stud and plate walls, sheathed diagonally, are 4 to 7 times as stiff and 7 to 8 times as strong as if horizontally sheathed.

2. Size of Nails—Ten-penny nails instead of eights for horizontal sheathing increase stiffness 50% and strength 40%. Larger nails do not improve diagonal sheathing.

3. Effect of Matching—Side and end-matching sheathing is as stiff and strong as sheathing which butts over the studs. Relatively few builders have had experience with side and end-matched roofing and sheathing boards, which are just becoming commercially available. It was found that walls thus sheathed are as strong and as rigid as when the boards are butted over the studs. They also are cheaper to build.

4. Effect of Green Lumber—A wall horizontally sheathed with green lumber and allowed to become air dry before testing lost about 50% in stiffness and 30% in strength as compared to a dry sheathed panel.

HERE — THERE — EVERYWHERE

Tacoma Section, American Society of Civil Engineers, has been granted a charter and has elected the following officers for 1930: President, J. L. Stannard, chief engineer of public utilities, city of Tacoma; vice-president, Homer O. Blair, consulting engineer; secretary-treasurer, Julian A. Arnston, senior engineer, city of Tacoma.

Workmen's compensation is now lawful in all but three of the 48 states of the United States. Compensation totaling \$32,000,000 was alone paid to employees in the state of New York for injuries sustained in employment during the year ended June 30, 1929. This amounted to \$100,426 industrial accidents.

W. L. Howe, secretary of the Builders' Exchange of Santa Clara county, will represent that organization at the State Builders' Exchange Conference to be held at Long Beach, March 21. President P. M. Sanford will preside at the convention and James F. Collins will outline the functions of the contractors' license law. The Hotel Virginia will be convention headquarters. A trip to Catalina Island will be made.

The Fiftieth Anniversary of The American Society of Mechanical Engineers will be celebrated in April in Washington, in Hoboken, and in New York. It will bring together the leading engineering prophets of the world, who will talk on the social and economic problems of their respective countries and point the way toward the future.

Annual banquet and entertainment of the Modesto Chapter, American Association of Engineers, will be held in the I. O. O. F. Hall, Modesto, Mar. 28, it is announced by M. H. Crews, president of the Chapter.

TRADE NOTES

Increased activities in the manufacturing department of Devlin, Dray and Co., of Fresno, dealers in electric refrigeration, gas stoves and furnace heating, has caused the company to least new quarters for that branch of the business at 1220 H St., Fresno. The retail store will continue to operate from 1314 Fulton St.

Rankin Sheet Metal Works has opened shop and office quarters at 918 Main St., Santa Clara. Floyd Rankin is proprietor.

Claus Sheet Metal Works on March 8 opened new and enlarged quarters at 614 Florida St., Vallejo. Louis J. and Eugene F. Claus have operated the business in Vallejo for the past nine years.

Central California Roads Co., of Dover, Del., capitalized for \$150,000, has filed articles of incorporation in Oakland. Directors are: Raymond A. Kirchner, Raymond Cockston, and Harold Bradley, all of New York City.

BUILDING EXPENDITURE ON PACIFIC COAST \$19,789,006 IN FEBRUARY—WASHINGTON LEADS

Los Angeles Leads California Cities With \$3,897,064 Total in February As Compared With \$9,480,160 in February, 1929—Oakland Reports \$1,315,300 and San Francisco \$1,144,062—Reno, Nevada, Reports Increase With \$122,500, as Compared With \$83,450 in February, 1929

TRADE LITERATURE

Chicago Mill & Lumber Co., 111 West Washington St., Chicago, Ill., has just issued an insulating data book for architects on subjects pertaining to the use and construction of Weatherwood, the new insulating board that is being placed on the market. This book includes various specifications which cover numerous examples of the use of the board in the building field. Copies will be furnished on request without charge.

A photo-electric cell with an amplifier is now sold as a unit by the Westinghouse Electric & Manufacturing Company. The photo-electric cell, often called the "electric eye," is a light-sensitive device. When light falls upon it, voltage having been applied to the cathode, a current passes by means of electron emission from the cathode to the anode. This current is very small, but, when amplified, operates commercial relays. Leaflet 20456, describing this apparatus in detail, may be obtained from the Westinghouse Company upon request.

OPENS BRANCH OFFICES

The Alloys Co., subsidiary of the Merrill Co., engineers, 343 Sansome St., San Francisco, has opened branch offices and sales quarters in the Maritime Bldg., Seattle. A complete stock of S. & J. plumbing materials, manufactured by the Shand & Judd Co., Inc., of Berkeley, Calif., will be carried for distribution through the recognized wholesale plumbing supply houses of Seattle and all other jobbing points in Washington and Oregon. The line consists of fire hose racks, metal cabinets, flush valves, floor and roof drains, closet bends, cleanouts and covers, swimming pool drains, cast brass split and solid ceiling and wall flanges, and other materials. I. B. Pelton, of 25 years' experience in building lines, is to be manager for the firm at Seattle.

PACIFIC COAST AGGREGATES PROTESTS FREIGHT RATES

Pacific Coast Aggregates, Inc., of San Francisco, has filed a complaint with the Railroad Commission against Southern Pacific Company and The Western Pacific Company alleging that defendants are collecting excessive charges for the transportation of crushed rock, sand and gravel from Eliot on the lines of Southern Pacific to industries served by Western Pacific at Oakland and San Francisco, and asking the Commission to issue its order requiring defendants to cease the collection of such unreasonable charges, and to award complainant reparation.

KLAMATH FALLS TO SECURE NEW INDUSTRY

Carl F. Gerlinger, Dallas, Ore., president of the Klamath Locomotive and Machine Works, a newly formed corporation, announces plans for the immediate erection of a plant at Klamath Falls, Ore., to involve an expenditure of \$500,000.

Erection of eight buildings to house a complete locomotive, machine and mill supply store is contemplated. The plant will employ about sixty men.

Among the articles to be manufactured will be the Gerlinger lumber carlers, used extensively in the mills at Klamath Falls; Pacific spark arresters, used in locomotives and centrifugal water pumps.

19023—Floor and Wall Tile. Dallas, Texas. Party is inquiring for the name of a firm or individual importing Japanese floor and wall tile.

19026—Fire Screens, Etc. Jackson, Miss. Firm wants to communicate with importers handling Japanese fire screens, etc.

19029—Agricultural Implements and Machinery, Etc. Sao Paulo, Brazil. Import-export company is desirous of communicating with exporters of agricultural implements, dairy machines, stilling plants for rice, beans, etc., oils and varnishes. Sao Paulo reference.

D-3419 Sales Representative. San Francisco, Calif. Adequately financed party desires to contract with local manufacturers of limited means looking toward establishing business relations as sales representative in this territory.

D-3420 Representation. Pueblo, Colorado. Advertising company desires to contact young man open to include representing them here as a part of his own business or full time,

with view of developing into a branch office.

D-3424 Exclusive Distributor or Jobber. Jacksonville, Florida. Manufacturers of radiator cleaner desires party to be exclusive distributor or jobber for the State of California.

D-3425 Waste Dealer. New York City. Large exporter of film and other celluloid scrap materials are interested in securing a representative type of individual or established waste dealer, who will act in the capacity of agent, visiting the various large manufacturers in this territory and securing offerings of surplus and waste materials resulting from manufacturing operations.

HYDRAULIC CLEANING SYSTEM FOR HOMES PERFECTED

Using the principle of hydraulic pressure to create the vacuum, and with installation of individual outlets in various rooms, a Los Angeles man has developed a new type of cleaning apparatus for homes, apartment houses and garages, which is just being introduced with many novel features of interest to the housewife as well as the architects and builders.

Stationary vacuum cleaning plants for large office buildings and elsewhere have been in operation before, with various types of rotary suction motors employed, but this is the first time in which ordinary city water supply is used, not only to create the vacuum in the system, but also to carry off the waste and dust collected thru the tubes directly to the sewage.

In the installation itself, which goes in the basement, no moving parts are used, only a simple water jet which uses the incoming water from the regular house line to create a vacuum and then to carry off the waste. At the cleaning end of the system, which can be plugged in anywhere that an outlet is installed in a wall or baseboard, there is also no moving part nor bag to collect dust. A light hose, with double-swivelled nozzle, enables the operator to clean easily under

furniture and in difficult corners. A glass compartment near the handle enables the operator to watch the dust passing thru and tell when the object is thoroughly clean.

Claimed for the revolutionary device is low operation cost, using only water at average pressure, no upkeep for motor repairs, silence in operation, lightness of weight, and chiefly, the sanitation feature of direct disposal in to the sewage line of all dust and dirt collected.

GENERAL CONTRACTORS OF S. F. ELECT OFFICERS

A. H. Bergstrom was re-elected president of the General Contractors of San Francisco at the annual dinner-meeting of that organization at the Elks Club, February 22. John Monk was elected first vice-president. H. H. Hilp, second vice-president and J. S. Malloch, treasurer.

C. J. Dixon was re-appointed secretary.

Three new members were elected to the board of directors, these being H. H. Hilp, J. Martinelli and Chas. L. Taylor. Other members on the board are: A. H. Bergstrom, John Monk, J. S. Malloch and N. F. Nielsen.

Three suits to collect \$9000 in "penalty payments" have been filed in superior court at Oakland by H. W. Webber of the Webber Const. Company against W. L. Ballenger. Webber charges Ballenger made him pay usurious interest on loans totaling \$25,000. In the three complaints Webber alleges Ballenger not only made him pay 7 per cent interest, but also made him pay a "bonus" of \$2500, bringing interest beyond 12 per cent a year. He asks three times the total in excess of the principal sum in his favor under the right given by the usury statute.

Henry Girola of San Francisco, president of the Italian Investment Corp., announces that the Italian National Building and Loan Association, a subsidiary company, will open a branch office in Sacramento in the immediate future.

BRIDGES

REDWOOD CITY, San Mateo Co., Cal.—Redwood City Trustees will file application with the U. S. War Department seeking authorization to construct a bridge over Redwood Creek at Bradford street. C. L. Dimmitt is city engineer.

SANTA BARBARA, Calif.—Until 10 A. M., April 7, bids will be received by the county supervisors to construct reinforced bridge over Maria Ygnacia creek on Conover Road in the 3rd road district. Cert. check 10%. Plans obtainable from county surveyor, O. H. O'Neill, on deposit of \$5. D. F. Hunt, clerk.

PLACERVILLE, El Dorado Co., Cal.—Hector Williamson, Placerville, at \$2,750 awarded contract by county supervisors to construct concrete girder slab bridge over Carson creek near Clarksville, and at \$2,200 for a similar structure at Darlington's, over Weber creek; at \$1,850 for a similar structure over Dry creek at Spanish Flat and a \$1,200 for a concrete slab bridge over North Weber creek at Pleasant Valley road.

OROVILLE, Butte Co., Cal.—City council has authorized Western Pacific Railroad to construct a new concrete bridge over Huntton St.

SONORA, Tuolumne Co., Cal.—Swanson & Chance, Turlock, at \$2,258.81 awarded contract by county supervisors to construct reinforced concrete, slab type bridge over Curtis creek in town of Soulsbyville; one span, 22 ft. wide. Complete list of bids follow:

Swanson & Chance, Turlock.....	\$2258
Nelson Bros., Escalon.....	2516
George Rock, Stockton.....	2645
Whitney & Lyon, Jamestown.....	2737
W. C. Colley, Berkeley.....	2767
Wiggins & Kaiser, Oakland.....	2776

NEWPORT BEACH, Orange Co., Cal.—The city council has been informed that the proposed overhead crossing near The Arches cannot be built because practically all of the improvement is outside of the city limits. A bond issue of \$195,000 has been discussed. A new plan proposes to have the cost assessed against the state, county, and Southern Pacific Railway.

SAN JOAQUIN COUNTY, Cal.—Jacobs & Pattiani, 37 17th St., Oakland, at \$48,375, submitted low bid to State Highway Commission to construct four reinforced concrete girder bridges between Lodi and Stockton; one across Calaveras river, consisting of three 34-ft. spans; one across Mosher creek, consisting of three 27-ft. spans; one across Bear creek, consisting of three 30-ft. spans, and one across Live Oak creek, consisting of two 30-ft. spans. Project involves: 1750 cu. yds. rdwy. excav. (detours); 2515 cu. yds. struc. excav.; detour bridges, complete; remove existing bridges; 275 tons crushed gravel or stone (detour surfacing); 1468 cu. yds. class A cem. conc.; 31 cu. yds. class E cem. conc.; 240,000 lbs. reinf. steel; 1540 lbs. phosphor bronze expan. plates; 1 lot miscellaneous items or work. Complete list of bids follows:

Jacobs & Pattiani, 37 17th St., Oakland.....	\$48,375
J. F. Knapp, Oakland.....	\$49,823
Frederickson & Watson Con. Co., Oakland.....	\$50,056
George J. Ulrich Con. Co., Modesto.....	\$51,903
M. J. Bevanda & Son, Stockton.....	\$56,722
M. B. McGowan, San Francisco.....	\$56,726
Bodenhamer Con. Co., San Diego.....	\$60,797
N. M. Ball, Porterville.....	\$64,914

Bids held under advisement.

SALINAS, Monterey Co., Cal.—Until March 28, 10 A. M., bids will be received by C. E. Joy, county clerk, to construct three reinforced concrete bridges—one at Castrovilla and two on the Salinas-Watsonville road between Castrovilla and Salinas in Supervisor District No. 1. Plans obtainable from County Surveyor Howard Cozzens.

STOCKTON, San Joaquin Co., Cal.—Until March 31, 11 A. M., bids will be received by Eugene D. Graham, county clerk, to furnish and install motor drive on present drawbridge over Grant Line Canal on Tracy Rd. Certified check 10% payable to Chairman of the Board of Supervisors required with bid. Specifications obtainable from County Surveyor Julius Manthey.

DREDGING, HARBOR WORKS & EXCAVATIONS

NEWPORT BEACH, Orange Co., Cal.—City Eng. R. L. Patterson is preparing plans for dredging completely around Balboa Island to provide a new channel. J. A. Beck has announced that he will expend about \$100,000 for private dredging on the north side of the island.

TRACY, San Joaquin Co., Cal.—Holly Sugar Co., according to announcement of G. J. Daly, general superintendent, will expend \$100,000 in improvements during coming six months which will include enlargement of the canal and construction of a turning basin, etc.

SAN MATEO COUNTY, Cal.—Franks Contracting Co., 260 California St., San Francisco, at 3½c cu. yd. submitted low bid to San Francisco Park Commissioners for sand fill in lagoon at Sharp Park, San Mateo County, involving approximately 350,000 cu. yd. Hensly Tibbitts Co., San Francisco, only other bidder at 34½c cu. yd. Taken under advisement.

TURLOCK, Stanislaus Co., Cal.—Aldrin & Anderson, Turlock, at \$22,064.39 awarded contract by Turlock Irrigation District for miscellaneous construction in Improvement Districts Nos. 19 and 40.

In District No. 19, the work involves under Schedule No. 1, (section a) 74,883 sq. ft. 2-in. concrete canal lining and under (section b) 33,147 sq. ft. 2-in. conc. canal lining; under Schedule No. 2, two construct approximately 100 concrete structures, involving at total of 107.6 cubic yards of concrete.

In District No. 40, the work involves under Schedule No. 1 (sectional), 48,

088 sq. ft. 2-in. conc. canal lining, (section b) 14,850 sq. ft. do; (section c) 1860 sq. ft. do; (section d) 14,350 sq. ft. do; (section e) 14,680 sq. ft. do and under Schedule No. 2, construct 253 lin. ft. concrete lining to be raised approx. 6 inches; under Schedule No. 3, construct 971 lin. ft. 24-in. dia. concrete pipe and under Schedule No. 4, construct 23 concrete structures, involving 24.36 cu. yds. concrete.

TURLOCK, Stanislaus Co., Cal.—Ed. Erickson, Turlock, at \$3815 awarded contract by Turlock Irrigation District for construction in Improvement District No. 28, involving under Schedule No. 1, 38,977 sq. ft. 2-in. concrete canal lining; construct approx. 12 concrete structures, involving 13.55 cu. yds. concrete and construct one wooden bridge, involving 832 B. F. M. lumber.

TURLOCK, Stanislaus Co., Cal.—Until March 31, 2 P. M., bids will be received by Anna Sorensen, secretary, Turlock Irrigation District, for construction in Improvement District No. 54, involving under:

SCHEDULE No. 1

Section No. 1. 27940.5 square feet of 2-inch thick concrete canal lining.

NOTE.—Schedule No. 2 is to be paid for in cash by property owners benefited.

SCHEDULE No. 2

Approximately 7 concrete structures, a total of 9 cubic yards of concrete.

Certified or cashier's check 5% payable to district required with bid. Plans on file in office of secretary. R. V. Meikle, chief engineer for district.

STREET LIGHTING SYSTEMS

PORTERVILLE, Tulare Co., Cal.—Petitions are being circulated for presentation to the city council seeking installation of an electrolux system in Main St. from Olive to Morton St. Project has the endorsement of civic organizations.

HUNTINGTON BEACH, Cal.—City Engineer Merwin Rossen is preparing a comprehensive lighting program for the East Side. Plans and estimates will be presented to the city council March 17.

MACHINERY AND EQUIPMENT

HAWTHORNE, Nevada—Until March 25, 10 A. M., new bids will be received by Bureau of Supplies and Accounts, Navy Department, Washington, D. C., to furnish hydraulic lifting device for trucks at Naval Ammunition Depot at Hawthorne, Nevada. Specifications obtainable from above office or from Navy Purchasing Office, 100 Harrison St., San Francisco.

STOCKTON, San Joaquin Co., Cal.—Until March 31, bids will be received by Eugene Graham, county clerk, to construct Middle River ferry boat, approaches for the ferry and motorizing the Grant Line drawbridge. Specifications on file in office of clerk.

LONG BEACH, Cal.—Until 2:30 P. M., March 21, bids will be received by the city manager for furnishing and delivering to the city of Long Beach, f. o. b. car or truck at any pier or dock in Los Angeles-Long Beach harbor selected by the contractor, within 90 days from date of award of contract therefor, one 300,000-lb vertical screw power testing machine, three rotating reversed screw type and other material as specified in and in accordance with Special Specifications No. C-474, City of Long Beach. G. L. Buck, city manager.

STOCKTON, San Joaquin Co., Cal.—Until March 31, 11 A. M., bids will be received by Eugene D. Graham, county clerk, to build ferry boat to be delivered to the county at Middle River Station.

Certified check 10% payable to Chairman of the Board of Supervisors required with bid. Specifications obtainable from County Surveyor Julius Manthey.

HAWTHORNE, Nevada—Plans are being completed by the Bureau of Yards and Docks, Navy Department, Washington, D. C., under Specification No. 6111, for laundry equipment for the Naval Ammunition Depot at Hawthorne. The work consists of furnishing and installing laundry equipment, including a washer, extractor, tumbler, ironer, presses, ironing boards etc. complete and ready and specifications may be obtained from the District Public Works Officer, Room 513, 100 Harrison Street, San Francisco, California, upon deposit of \$10, check or postal money order payable to the Chief of the Bureau of Yards and Docks.

OAKLAND, Cal.—Until March 19, 5:30 P. M., bids will be received by John H. Kimball, secretary, East Bay Municipal Utility District, 512 16th St., to furnish one 200-ampere portable, gasoline engine driven electric stable are welder complete with accessories. Specifications obtainable from above.

MADERA, Madera Co., Cal.—County supervisors order purchase of two Moreland and one Reo fire truck for use in county fire control.

BAKERSFIELD, Kern Co., Calif.—Until March 17, 5 P. M., bids will be received by V. Van Ripper, city clerk, to furnish and deliver one track-laying type tractor. Certified check 10% required with bid. Further information obtainable from city clerk.

BAKERSFIELD, Kern Co., Calif.—Until March 17, 5 P. M., bids will be received by V. Van Ripper, city clerk, to furnish and deliver one small automobile for City Building Department. Certified check 10% required with bid. Further information obtainable from clerk.

PORTLAND, Ore.—Until March 17, 10:30 A. M., bids will be received by Multnomah County Commissioners, Clay S. Morse, chairman of board, to furnish:

- Two 4-yard dump trucks.
- One truck for District No. 2.
- One truck for District No. 4.
- One truck and trailer with tank for penetration macadam work.
- One 4-cylinder gas roller.

Certified check or bond of 10% required with bid. Further information obtainable from County Roadmaster, 601 Courthouse, Portland.

OAKLAND, Cal.—Until March 19, 5:30 P. M., bids will be received by John H. Kimball, secretary, East Bay Municipal Utility District, 512 16th

St., to furnish one air compressor, driven by 4-cylinder heavy duty gasoline engine guaranteed to deliver 265 actual cubic feet of air per minute at 100 lbs. pressure. Completely equipped, and with air cleaner and oil filter. Specifications obtainable from above.

OAKLAND, Cal.—Dailey Motor Co., 4717 East 14th St., Oakland, at \$1142.50 submitted low bid to city council to furnish a 6-cylinder motor truck for city pound. Other bids, all taken under advisement, were: Cochran & Celli, \$1147; H. D. Knudsen Co., \$1150.

FIRE ALARM SYSTEMS

SALINAS, Monterey Co., Cal.—Until March 17, 7:30 P. M., bids will be received by M. R. Keef, city clerk, to furnish and install traffic signals at Main and Sausal Sts., Main and San Luis and North Main and Market Sts. Certified check 10% required with bid. Specifications on file in office of clerk.

FIRE EQUIPMENT

HAYWARD, Alameda Co., Cal.—Petitions are being circulated seeking election to vote bonds of \$15,000 to finance purchase of a third fire engine.

PASO ROBLES, San Luis Obispo Co., Cal.—Fire Chief Elmer Bollinger urges city council to purchase additional fire fighting equipment including a high pressure pumping unit.

SAN ANSELMO, Marin Co., Cal.—American Rubber Co. at \$1.30 per ft. awarded contract by city trustees to furnish 1200' ft. of Crackerjack fire hose.

MISCELLANEOUS SUPPLIES AND MATERIALS

SONORA, Tuolumne Co., Cal.—Until May 6, bids will be received by county supervisors to furnish and deliver fuel oil for county courthouse and county hospital. Further information obtainable from county clerk at Sonora.

FRESNO, Fresno Co., Cal.—Until April 10, 5 P. M., (to be opened 8 P. M.) bids will be received by L. L. Smith, secretary, Board of Education, 2425 Fresno St., to furnish supplies and equipment as required by school departments. Lists of materials and equipment desired obtainable from secretary.

VALLEJO, Solano Co., Cal.—Until March 25, 4 P. M., bids will be received by Elmer L. Cave, secretary, Board of Education, to furnish and deliver school supplies, fuel, school furniture and apparatus. Certified check 5% payable to F. O. Hara, president of Bd. of Educ. required with bid. Specifications and further information obtainable from secretary.

RESERVOIRS AND DAMS

SAN JOSE, Santa Clara Co., Cal.—San Jose Realty Board petitions city council to take steps to construct a water storage reservoir to conserve flood waters of the Penitencia Creek for use in Alum Rock Park and to prevent future losses of storm waters. The board urges that \$50,000 available from the un-used portion of the out-fall sewer bond issue be available as part payment for such a project. Wm. Popp is city engineer.

VENTURA, Ventura Co., Cal.—Until 11 A. M., April 1, bids will be rec. by the county supervisors to construct

water storage reservoir in Ventura County Water Works District No. 1, at Aloorpark, Cash Contract No. 665, involving: 900 cu. yds. excav.; 5640 sq. ft. Gunite lining; 8.5 cu. yds. concrete curb and footings; 3000 ft. B.M. lumber; 49 squares roofing; 120 sq. ft. screen; 100 lin. ft. 6-in. drain pipe; 60 lin. ft. 6-in. cast iron pipe; one 6-in. hub end gate valve. Plans obtainable from county surveyor, Chas. W. Pett. Cert. check 10%. L. E. Hallowell, clerk.

MENLO PARK, San Mateo Co., Cal.—Until March 27, 11 A. M., bids will be received by Bear Gulch Water Co., Menlo Park, to construct a reinforced concrete reservoir and appurtenances on property of the company, near Woodside, San Mateo County. Plans obtainable from Room 220, California Hall, University of California, Berkeley, on deposit of \$25, returnable. Robert G. Sprout of the University of California is secretary and general manager of the Beach Gulch Water Company.

PIPE LINES, WELLS, ETC.

EUREKA, Humboldt Co., Cal.—Until March 18, 5 P. M., bids will be received by John Griffith, City Superintendent of Public Works, 524 D St., to drill, case and cement well or wells, 3 ft. in diameter and an approximate depth of 70 ft. at Broadway and Hawthorne Sts. Bids shall cover cost of entire work of drilling and installing casings. Casings will be furnished by city. Bids on unit cost per foot depth. Further information obtainable from above.

CENTERVILLE, Alameda Co., Cal.—Pacific Gas & Electric Co. has authorized construction of 1360 ft. of 2-in. high pressure natural gas main in Cherry road and vicinity.

EUREKA, Humboldt Co., Cal.—City Clerk A. Walter Kiddell will ask bids at once to drill well at Broadway and Hawthorne Sts. Will be approximately 70 ft. in depth and 35 inches diameter. Bids will probably be opened March 18. Further information obtainable from clerk.

SEWERS AND SEWAGE DISPOSAL PLANTS

HAWTHORNE, Nevada.—See "Government Work and Supplies," this issue. Contract awarded to Thos. Hawerty Co., Los Angeles, for street lighting, sewage disposal system, paving, etc.

SEBASTOPOL, Sonoma Co., Cal.—City Engineer C. E. Muller is completing plans and bids will be asked shortly by the city council to construct sewage disposal plant for which bonds of \$32,000 were recently voted.

LOLETA, Humboldt Co., Cal.—Election will be held April 22 in Loleta to organize sanitary district. After organization an election will be called to vote bonds to finance construction of a sewer system.

MADERA, Madera Co., Cal.—City council sets April 14 as date to vote bonds of \$20,000 to finance extension to sewer system in southeast and southern sections of the city. Jas. Wakefield is city clerk.

BENICIA, Solano Co., Cal.—City council has authorized a survey to determine cost of sewers to serve East N St. The line will run south on 4th St. to L thence west to connect with the present sewer.

VENTURA, Ventura Co., Cal.—Until 11 A. M., April 1, bids will be rec. by the county supervisors to construct concrete sewer pipe 24-in. in dia. and 2100 ft. long with catchbasins and incidentals (First Storm Drain), Cash Contract No. 664, involving: 2100 ft. 24-in., 120 ft. 12-in., 30 ft. 18-in., and 20 ft. 20-in. reinf. conc. pipe; 1200 cu. yds. excav.; 25 cu. yds. struc. steel; 1700 lbs. reinf. steel; 530 lbs. angle iron; 9 catchbasin frames and covers, etc. Plans obtainable from county surveyor Chas. W. Petit. Cert. check 10%. L. E. Hallowell, clerk of the board.

LONG BEACH, Cal.—At the meeting County Sanitation District No. 3 on March 12, Mayor Hauge will ask that the proposed \$3,400,000 sewer bond election, originally set for April 1, be postponed. He asks for a few months' more for preparation.

SANTA CRUZ, Santa Cruz Co., Cal.—City Engineer Lloyd Bowman preparing plans for sewage and drainage system in area comprising 1400 acres, including Sequel and Capitola. A district will be formed to finance the work. The area to be included has in it now 1038 residences of which 523 are said to be occupied permanently.

MISCELLANEOUS CONSTRUCTION

SANTA ANA, Orange Co., Cal.—Southern Counties Gas Co. is planning to construct on East Pine St., adjacent to the railway tracks, two gas containers, each to have a capacity of 1,000,000 cu. ft. C. E. Rutledge, local manager. Work will start within the next few weeks. The cost is estimated at \$150,000.

WATER WORKS

STRATHMORE, Tulare Co., Calif.—Bradford Machinery Co., Porterville, at \$230 submitted low bid to Strathmore Public Utility District, to construct pumping plant. Complete list of bids, all taken under advisement, follows:

Bradford Machinery Co., Porterville	\$2,320
Peerless Pump Co., Los Angeles	2,715
Villemin and Job Machine W'ks., Porterville	2,735
Pomona Pump Co., Porterville	2,732
Stausfield & McKnight, Lindsay	3,096

ANACORTES, Wash.—City will hold election April 22 to vote bonds of \$400,000 to finance construction of a municipal water system. The project will involve the laying of 12 miles of a 20-in. main from Skagit river to an equalizing reservoir. It also calls for the laying of 11,000 ft. of 16-in. industrial main from a filtration plant to the industrial district of the city. An auxiliary pump station will be installed at Whistle lake.

LONG BEACH, Cal.—The city council has called a \$4,450,000 water bond election for May 13. Of the total, \$1,100,000 will be expended for transmission mains, wells, pumps, pump houses, collecting cisterns, etc. The balance of the issue will be used for purchase of reservoir sites and water-heating plants.

VENTURA, Ventura Co., Cal.—City Engineer D. C. McMillan is completing a survey of the city water system preparatory to extending the system north of the oil fields to serve the Frazer Tract, the Smith Tract and the Likens subdivision. It is probable that he will recommend construction of a reservoir to serve this area.

TACOMA, Wash.—American Concrete Pipe Co., Tacoma, at \$120,604

awarded contract by City Board of Contracts to furnish 16,045 ft. 42-in. concrete pipe for connecting line for four wells to be bored this year for municipal water department.

SAN ANSELMO, Marin Co., Cal.—City trustees accept bid of Marin Municipal Water District to install 45 fire hydrants for \$2546.80.

PALO ALTO, Santa Clara Co., Cal.—Western Well Works, at \$13,300 awarded contract by city council to drill well and construct pumping plant on Municipal Park site in South Palo Alto.

BIGGS, Butte Co., Cal.—City trustees propose to replace present wooden water tanks with steel tanks or to rebuild the present wooden tanks to make them suitable for further use. J. B. Johnson, city engineer.

CLOVERDALE, Sonoma Co., Cal.—City will call special election to vote on question of using \$15,000 now in the city treasury to improve the municipal water system. The \$15,000 is available from a bond issued several years ago to pave West St.

TURLOCK, Stanislaus Co., Calif.—Until April 1, 7:30 P. M., bids will be received by A. P. Ferguson, city clerk, to furnish

500 ft. 6-in. class B c. i. bell and spigot pipe, Amer. Water Works Assn. standard or equal;
800 ft. 8-in. cast iron, bell and spigot pipe, Amer. Water Works Assn. standard or equal.

Certified check 10% required with bid. Bids to be f.o.b. Turlock.

SHAFTER, Kern Co., Cal.—Petitions are being circulated requesting Public Utilities Board to call an election to vote bonds to finance extensions to water system in addition to providing a steel tank and tower in connection therewith.

WATSONVILLE, Santa Cruz Co., Cal.—Grant Miner, Jr., 505 Emerson St., Palo Alto, submitted low bid to the city council to construct a slow sand filter plant and appurtenances, reservoir lining and cover and other water works improvements, the project comprising the following principal features:

A concrete slope and bottom, lining, concrete piers and wooden roof, together with certain piping, water measuring device and other improvements and at the two main distributing reservoirs at Freedom Village, approximately 2 miles west of north of the business district of Watsonville.

A slow and filter plant having a

nominal maximum capacity of 2.5 million gallons daily, embracing a sedimentation basin, 5 filter units, sand storage bin, filtered water basin, 50,000-gallon storage tank, head house, tool and storage houses, together with all piping and appurtenances, at and in the vicinity of Corralitos Village, approximately 7 miles west of north of the business district.

The following approximate quantities are involved in the above improvements: 6700 cu. yds. of net excavation for structures; 2550 cu. yds. of concrete, mostly reinforced; 212,500 ft. b.m., of lumber in roofs and elsewhere; 6000 lin. ft. of water and drain pipe ranging from 1 inch to 20 inches in size and of various materials.

In addition to the above there will be grading work and considerable other work of a miscellaneous nature.

Following is a complete list of bids received, (a) being total bid for items 1 and 2; (b) total for items 1 and 3; (c) total for items 1 and 4, and (d) total for items 1 and 5.
Grant Miner, Palo Alto, (a) \$116,924; (b) \$116,658; (c) \$115,110; (d) \$114,744.

Frederickson and Watson, Oakland, (a) \$123,980; (b) \$122,080; (c) \$121,170; (d) \$119,270.

McDonald & Kahn, San Francisco, (a) \$124,800; (b) \$124,434; (c) \$122,637; (d) \$122,271.

Pelix Butte Const. Co., San Francisco, (a) \$129,538; (b) \$129,015; (c) \$126,206; (d) \$125,633.

Granite Const. Co., Watsonville, (a) \$129,775; (b) \$126,825; (c) \$128,300; (d) \$125,350.

A. F. Anderson, (a) \$130,548; (b) \$125,069; (c) \$128,523; (d) \$123,046.

Rocca and Coletti, San Rafael, (a) \$133,151; (b) \$128,924; (c) \$132,362; (d) \$128,135.

J. Cobby and Son, San Francisco, (a) \$134,921; (b) \$130,913; (c) \$137,041; (d) \$132,763.

Jas. L. McLaughlin, San Francisco, (a) \$145,299; (b) \$142,595; (c) \$144,830; (d) \$142,126.

C. D. DeVelbiss, Oakland, (a) \$166,137; (b) \$162,730; (c) \$163,982; (d) \$160,575.

Bids of C. A. Bruce and Son and M. H. Sjoberg and Son not totaled. All bids were taken under advisement. H. B. Kitchen is city engineer and G. H. Hyde, Berkeley, is consulting engineer on the project.

SAN FRANCISCO—Until March 18, 10 A. M., under Schedule No. 928-30-218, bids will be received by Quartermaster Supply Officer, General Depot, Fort Mason, to furnish and deliver: 500 ft. ½-inch and 500 ft. ¾-in. wrought iron pipe, welded, galvanized, Type A, standard weight, in commercial lengths, threaded, ends to be protected with couplings or one coupling and one thread protector. Further information obtainable from above.

Hall, county clerk, to plant lawn in area fronting Sacramento County Hospital from Stockton Blvd., bounded by the driveway, also small area between buildings and front driveway, outside of area staked for foundation plantings.

Cert. check 10% payable to Chairman of the Board of Supervisors required with bid. Plans obtainable from County Engineer Chas. Deterding, Jr.

STREETS AND HIGHWAYS

SUNNYVALE, Santa Clara Co., Cal.—Western Roads, Inc., 28th and Poplar Sts., Oakland, at approx. \$40,000 submitted lone bid to city council (304) to improve portions of McKinley Ave., Carroll St., Iowa Ave., etc., involving grading; 2-in. Warrentite-Bit surface pavement on 3-in. asph. conc. base; cem. conc. curbs, gutters, driveways; 4-in. cem. conc. pipe house sewer laterals; ¾-in. galv. water main service connections. Taken under advisement.

SANTA ROSA, Sonoma Co., Calif.—Smith and Sylva, Santa Rosa, at \$29,439 awarded contract by county supervisors to pave with concrete 1.8 miles of Healdsburg-Forestville Highway.

SACRAMENTO, Cal.—City council declares intention (2300) to improve alley bet. C and D Sts., Alhambra Blvd. and 32nd St., involving c. i. drains; vit. sewers; conc. manhole; 1-in. water main connections; grading; hyd. conc. pavement. 1911 Act. Bond Act 1915. Hearing March 27. H. G. Denton, city clerk. B. C. Clark, city engineer.

SACRAMENTO, Cal.—City council declares intention (2299) to improve alley bet. D and E Sts., 10th and 11th Sts., involving c. i. drains; vit. pipe sewers; 1-in. water main connections; grading; hyd. conc. pavement. 1911 Act. Bond Act 1915. Hearing March 27. H. G. Denton, city clerk. B. C. Clark, city engineer.

FRESNO, Fresno Co., Cal.—Riverdale residents have filed protests with the county supervisors against the use of "But-U-mels" patent pavement in Mount Whitney Avenue in Riverdale. The pavement is proposed

by Chris P. Jensen, county surveyor, which, the engineer claims, will save 50% in cost.

HAWTHORNE, Nevada—See "Government Work and Supplies" this issue. Contract awarded to Thomas Haverly Co., Los Angeles, for street lighting, sewage disposal system, paving, etc.

SALINAS, Monterey Co., Cal.—P. L. Burr and J. Sutherland, 320 Market St., San Francisco, at \$10,003.12 awarded contract by county supervisors to construct a portion of the Arroyo Seco Road from point near Grubers to point near Abbotts Lake, in Supervisor District No. 3, involving: (1) 52,000 cu. yds. excavation without class and without overhaul; (2) 600 lin. ft. 12-in. corr. iron culverts; (3) 80 lin. ft. 18-in. corr. iron culverts; (4) 132 lin. ft. 24-in. corr. iron culverts.

FRESNO, Fresno Co., Cal.—County supervisors order construction of Mendota-Coalinga road; estimated cost \$9000. Chris P. Jensen, county surveyor.

SAN DIEGO, Cal.—Until 11 A. M., March 25, bids will be received by the public works officer 11th Naval District San Diego to improve airplane runway at the naval operating base (air station) involving treatment of a portion of an oiled runway located adjacent to the southwest of the warming-up platform at the west beach hangars. The strip to be treated is 200 ft. wide by 415 ft. long. Specifications No. 6134.

OROVILLE, Butte Co., Cal.—County supervisors contemplate joining with counties of Lassen, Tehama, Siskiyou, Modoc, Shasta and Plumas in a highway district to build roads to Lassen National Park.

SALINAS, Monterey Co., Cal.—County Supervisors reject lone bid of Granite Construction Co., Watsonville, at \$67,270.60 to construct concrete pavement on Monterey-Carmel Rd., from Monterey city limits to a point on the Hutton Road opposite Ocean Ave. in Supervisor District No. 5, involving: 29,766 sq. yds. subgrade for pave.; 5809 c. yds. Class A Portland cement concrete (pavement); 152,674 lbs. reinforcing steel (pavement). New bids will be asked. Howard Cozzens is county surveyor.

OAKLAND, Cal.—Until March 17, 4:30 P. M., bids will be received by G. B. Hegardt, secretary, City Port Commission, 424 Oakland Bank Bldg.,

for surface pavement on Apron Wharf at west side of Transit Shed No. 2, Outer Harbor Terminal. Bond in full amount of contract price required of the successful bidder. Specifications obtainable from secretary on deposit of \$5, returnable.

SAN JOAQUIN COUNTY, Cal.—T. M. Morgan Paving Co., Los Angeles, at \$251,562, submitted low bid to State Highway Commission March 12, to grade and pave with cem. conc. 6.3 miles bet. Cherokee Station and Harney Lane. Project involves: remove 436 trees; 47,800 cu. yds. rdwy. excav. without class.; 33,400 cu. yds. imp. borrow; 34,500 cu. yds. imp. selected material; 44,200 sta. yds. overhaul; 2000 cu. yds. struc. excav.; 9200 cu. yds. salvaged macadam (subbase and borders); 2000 tons untreated crushed gravel or stone surfacing; 100 M gals. water applied to surf.; 19,840 sq. yds. subgrade for pave.; 1610 cu. yds. cushion course; 61 cu. yds. class A cem. conc. (struc.); 15,000 cu. yds. class A cem. conc. (pave.); 383,000 lbs. bar reinf. steel (pave. and struc.); 222 lin. ft. 12-in., 214 lin. ft. 18-in., 1003 lin. ft. 24-in. and 20 lin. ft. 30-in. corr. metal pipe; 1339 lin. ft. corrugated metal pipe (clean and relay); 240 lin. ft. solid timber guard rail; 4.6 mi. new property fences; 9.2 mi. moving and reset property fences; move and reset 21 cen. headwalls; 2180 bbls. fuel oil (shoulders); 362 sta. finish rdwy.; 77 monuments. The state will fur. corr. metal pipe, drainage gates and cast steel frames and covers for drop inlets. Following is a complete list of the bids:

T. M. Morgan Paving Co., Los Angeles	\$251,562
Frederickson & Watson & Frederickson Bros., Oakland	\$259,003
C. C. W. Wood, Stockton	\$259,573
M. J. Bevanda, Stockton	\$264,893
J. F. Knapp, Oakland	\$269,845
Hanrahan Co. San Francisco	\$272,805
Isbell Const. Co., Fresno	\$290,120
Heafey Moore Co., Oakland	\$314,383

Bids held under advisement.

OROVILLE, Butte Co., Cal.—C. W. Wood, Stockton, at approximately \$40,000, has private contract for paving, curbs, gutters and walks in a 20-acre residential area known as the Beech Tract, owned by W. A. Bechtel and Mrs. Georgian Ward. S. J. Norris, city engineer of Oroville, is engineer for the work.

KING CITY, Monterey Co., Cal.—Until March 26, 5 P. M., (to be opened 8 P. M.), bids will be received by city council to pave 25 blocks of streets with 5-in. concrete; concrete curbs, culverts and catchbasins. Streets to be improved include Pearl St., First to San Lorenzo; Ellis St., 1st to San Lorenzo; Vanderhurn and Lynn, four blocks north to city limits; the following streets bet. Ellis and Lynn and bet. Bassett and Pearl: First, Second, Third, Russ, San Lorenzo. Plans on file in office of clerk, Howard Cozzens, engineer, Courthouse, Salinas.

Menalto Ave. and Willow road; portions of James, Garden, Cloud Sts., Carmel Ave., etc., involving grading; combined hyd. cem. conc. curbs and gutters; walks; 3-in. asph. conc. surface on 4-in. waterbound macadam base; cem. conc. pipe storm water sewer; br. catchbasins; 4-in. vit. pipe lateral sewers in Menalto Park. 1911 Act. Co. Imp. Act 1921. Hearing March 24. Elizabeth M. Kneese, county clerk. Geo. A. Kneese, county surveyor.

OFFICIAL PROPOSALS

NOTICE TO CONTRACTORS

General Work

SEALED BIDS will be received by Geo. B. McDougall, State Architect, Public Works Building, 11th and P Streets, Sacramento, California, up to 2 o'clock P. M., Tuesday, April 8, 1930, thereafter on said day to be publicly opened and read for the erection and completion of the General Work for the Armory Building, California National Guard, Long Beach, California, in accordance with plans and specifications therefor.

The building is a two story steel and concrete frame structure with concrete walls and floors, steel and wood roof construction, and tile and composition roofs. Floor area is approximately 21,265 square feet. Alternate bids are required for a garage addition.

Plans and specifications are on file for examination in the office of the Division of Architecture, Public Works Building, Sacramento, and also at

Room 1025 Associated Realty Building, Los Angeles, and at the principal California Cities Builders' Exchange Offices.

Plans, specifications, and proposal forms may be secured by licensed Contractors who have qualified or who will qualify by furnishing a verified statement of experience and financial condition as required by the provisions of Chapter 644, Statutes 1929, and whose statements so furnished are satisfactory to the Department of Public Works. Questionnaire forms may be secured from the Division of Architecture.

Bids will not be accepted from a Contractor to whom a proposal form has not been issued and all bids must be on proposal forms supplied by the State.

Requests for plans shall be accompanied by a deposit of twenty-five (\$25.00) dollars. Check shall be made payable to the Department of Public Works, Division of Architecture. Deposit will be returned upon receipt of the set in good condition, at Sacramento Office of the Division within 30 days after opening bids, otherwise it will be forfeited to the State.

All bids must be filed at the office of the State Architect on or before the time heretofore stated and in accordance with the "Rules for Bidding" accompanying the proposal form.

No bid will be considered unless cash, a bidder's bond made payable to the State of California, or a certified check made payable to the "State Engineer, Department of Public Works," in the sum of at least ten per centum (10%) of the amount of the bid is enclosed with the bid.

The Division of Architecture, State Department of Public Works, reserves the right to reject any or all bids and to waive any informality in any bid received.

State Architect.
B. B. MEEK,
Director of Public Works.

STATE OF CALIFORNIA

DEPARTMENT OF PUBLIC WORKS

DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the State Highway Engineer, Public Works Building, Sacramento, California, until 2 o'clock P. M. on March 26, 1930, at which time they will be publicly opened and read, for construction in accordance with the specifications therefor, to which special reference is made, of portions of State Highway, as follows:

Glenn County, between Logandale and Willows (H-1-Gle-7-A), about five and two-tenths (5.2) miles in length, to be paved with Portland cement concrete.

Proposal forms will be issued to only those Contractors who have furnished verified statement of experience and financial condition in accordance with the provisions of Chapter 644, Statutes 1929, and whose statements so furnished are satisfactory to the Department of Public Works. Bids will not be accepted from a Contractor to whom a proposal form has not been issued by the Department of Public Works.

Plans may be seen and forms of pro-

posal, bonds, contract and specifications may be obtained at the said office, and they may be seen at the office of the District Engineers at Los Angeles and San Francisco, and at the office of the District Engineer of the district in which the work is situated. The District Engineers' offices are located at Eureka, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the district office will be available to accompany prospective bidders for an inspection of the work herein contemplated and Contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Division of Highways. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the district office.

No bid will be received unless it is made on a blank form furnished by the State Highway Engineer. The special attention of prospective bidders is called to the "Proposal Requirements and Conditions" annexed to the blank form of proposal, for full directions as to bidding, etc.

The Department of Public Works reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

DEPARTMENT OF PUBLIC WORKS,
DIVISION OF HIGHWAYS.

C. H. PURCELL,

State Highway Engineer.

Dated February 26, 1930.

FERGUSON COMPANY TAKES OVER DEVORE COMPANY

The H. K. Ferguson Company, international engineers and builders, with headquarters in Cleveland, reports that it has taken over the DeVore Company of Toledo, Ohio, for many years specialists in glass plant and paper mill layout and design. H. C. Van Tine, president of The DeVore Company, will join The H. K. Ferguson Company about April 1 as contract engineer and consultant in the design of glass and paper factories. For 15 years The DeVore Company handled the design of all plants in the United States and Canada for the Libbey Owens Company and for a similar period served The Mid-West Box Company, and its successor, the Container Corp. of America.

The proposed public building program is the brightest ray of sunshine in the outlook for the cement companies for 1930. R. B. Henderson, president of Pacific Portland Cement Co., informed stockholders of the company at their annual meeting March 7. Henderson's report showed that the volume of cement and plaster business during the year was disappointing as a result of the nation-wide reduction in consumption of 3.7 per cent as compared to 1928. However, the company was enabled to earn \$5 a share on the common stock after paying preferred dividends through economies effected during the year, particularly in manufacturing. Henderson emphasized the fact that the company's cash position is stronger than it has been for a number of years with the ratio of current assets 9 to 1 of current liabilities. All officers and directors of the company were re-elected without change.

Tulare, Calif., finds that the city form of government pays it recently gave the city manager a raise from \$3,000 to \$3,600 a year.

A "Pittsburg" Automatic Water Heater installed in the Home indicates high quality throughout.

Recommended and specified by all the leading architects, plumbers and builders.

Consider the high merit of the "Pittsburg" coupled with "Pittsburg Perfect Service."

"Hot water quick as a wink."

Pittsburg Water Heater Co.

Makers of "Pittsburg Automatic"—"Bungalow Automatic" Storage Systems and "Lyon" Tank Water Heaters.

STEEL REINFORCING BARS

Dependability of materials used is a prime requisite to the success of construction.

For twenty years Gunn, Carle & Co. has been able to guarantee STEEL REINFORCING installation service, without error—without complaint.

We shall be pleased to consult you, without obligation, regarding the construction problems in the field of Iron and Steel on jobs of any size.

Gunn, Carle & Co.

444 Market St., S. F.

Send For a Sample Copy
Of The NEW
Daily Pacific Builder

The only daily construction newspaper affording complete coverage of the construction activities in Central and Northern California, featuring work contemplated, bids wanted, bids opened, contracts awarded, sub-bids wanted and sub-contracts let on all types of building construction, bridges, dams and harbor works, irrigation projects; machinery and equipment; water works and supplies business opportunities, building permits, building contracts, mechanics' liens, acceptances, etc., etc.

Keep informed on construction developments in Central and Northern California and the major projects in Southern California, the states of Oregon, Washington, Nevada and Arizona.

The new DAILY PACIFIC BUILDER will afford a service that serves—both in Quality and Quantity. You, as a member of the construction fraternity, should not be without it.

Subscription price \$1.50 per month, or \$15.00 a year, payable in advance.

FINANCIAL COMEBACK TO AID BUILDING SAYS LAMONT

Robert P. Lamont, Secretary of Commerce, announces that the lower interest rates on money throughout the country should permit an important speeding up during the next few months in new construction, which he said already had been stimulated by the "remarkable co-operation" from the states.

The commerce secretary asserted the high interest rates during the last year has been one of the major factors in slowing down construction and added that while the rate had dropped in New York, the easier money conditions have not yet reached throughout the country.

This condition could not be worked out in 24 hours, Lamont said, but the situation is gradually loosening and construction during the spring should be greatly aided by the easier money.

The secretary pointed out that the states and governors have been pushing public construction and have been aided by the government wherever possible.

The State of Ohio was cited by Lamont as one of the states which has gone farthest in its efforts to offset the depression following the stock market crash. Ohio, he said, has let approximately \$3,000,000 in road contracts since December, during a period when road construction ordinarily is at a standstill in that section.

The secretary added that 86 county committees composed of laborers, manufacturers, merchants, bankers and others have been formed in that state to stimulate private enterprise. Lamont also said his department was working toward a constant check of the number of unemployed. The unemployment census to be taken next month, he explained, will be used as a basis on which figures can be kept up to date.

ADVISORY BOARD IS PLAN OF NEW YORK BUILDERS

Plans for a permanent advisory board and a fact-finding commission to study and assist in adjusting contract difficulties and disputes of all kinds in the building industry have been presented to the New York Building Congress by Robert D. Kohn, president of the Congress, and S. F. Voorhees, past-president.

The proposed plan is the outcome of a series of conferences held with leaders in all branches of the construction industry over a period of months, and is the outgrowth of a temporary fact-finding committee established last spring following the difficulties arising from the threatened lock-out and strike involved in the electrical trade situation.

The mass of testimony given to the fact-finding committee indicated that better methods of adjusting trade and labor disputes were badly needed.

U. S. STEEL UNFILLED TONNAGE INCREASED

Unfilled tonnage of U. S. Steel Corporation on February 23, amounted to 4,479,748 tons, against 4,468,716 tons on January 31, 4,417,193 tons on December 31 and 4,144,341 tons on February 28, 1929.

Increase of 11,038 tons in backlogs of U. S. Steel Corporation brought total to highest level since January, 1926. Although the gain was comparatively small, it marked sixth consecutive month in which an increase was reported and was particularly encouraging to those in the industry who have been forecasting a "good average year" for steel manufacturers during 1930.

Prior to the publication of statement considerable uncertainty existed as to just what would be shown, with majority of the observers looking for a decrease, but, as a result of month-end adjustment and other factors, it was possible to report the gain.

Despite falling off in operations in some steel centers during the week just past, it is felt in trade circles that, on the whole, both operations and bookings and earnings of leading companies, at least, in the initial half of this year, will be favorably comparable with similar periods of normal years.

OAKLAND PLUMBERS REQUEST MUNICIPAL FEE REDUCTIONS

Complaining against the financial burden imposed upon them because of the license and bond regulations in the Oakland plumbing ordinances, a delegation of master and journeyman plumbers visited Commissioner C. C. Young, asking that these financial burdens be either lessened or abolished.

A master plumber must pay a license of \$50 per annum. In addition to this, every master plumber must deposit a \$100 cash bond with the city to guarantee his prompt payment of all licenses fees, fees on individual jobs, and all such minor costs, as well as guarantee that all work shall be done in compliance with the law. A journeyman plumber pays only a \$2.50 a year license.

The master plumbers pointed out that it costs them \$150 to do business in Oakland, in addition to their regular business overhead. They asserted that other cities, generally, do not impose such a heavy financial burden on plumbers, and they asked relief.

Young told them he would hold a conference with the other commissioners to see whether it would be possible to alter the ordinance so that the \$50 fee, at least, might be reduced.

STOCKTON PORT COMMISSION TO BE CREATED

A special election will probably be called in Stockton this fall for the creation of a Stockton Port Commission. J. LeRoy Johnson, city attorney, has started preparation of an ordinance providing for the commission.

Civic leaders have recognized for many years that a non-political body to conduct the affairs of the \$6,000,000 port after it is constructed, is more desirable than any other form of management, according to A. M. Robertson, secretary-manager of the Stockton Chamber of Commerce.

In anticipation of formation of the port commission, city officials and civic leaders have been studying the formation and methods of the Oakland Port Commission.

STOCKTON BUILDERS ELECT

Louis S. Peletz was elected president of the Stockton Builders' Exchange at the annual election March 4. Other officers are: Jack Scott, vice-president; John Pengelly, treasurer, and Earl M. Lewis, secretary. Peletz was honored recently by being elected a member of the board of directors of the national association at the San Francisco convention.

New directors are: Peletz, Scott, Lewis, J. F. Ecker, Ernest Sieler, Pengelly, Bart Cavanaugh, William F. O'Keefe, James McIntosh, Don Meek and W. T. Gibson (by agreement).

CALAVERAS CEMENT COMPANY HAS GOOD YEAR

Net earnings of Calaveras Cement Company for 1929 amounted to \$524,853, which is equivalent to \$23.23 per share on the preferred and equal to \$2.98 a share on the common after income tax allowance and preferred dividends.

Earnings available to the common stock was \$367,080, of which \$17,948 was profits from sale of capital assets. This nonrecurring profit was equivalent to 19 cents per share of common stock, and earnings from operations were equivalent to \$2.75 per share of common stock.

The balance sheet as of December 31, 1929, shows the ratio of current liabilities to be 6.8 to 1, and cash and call loans alone are 3.5 times current liabilities consist only of estimated Federal income tax for the year, and dividend payable January 15, 1930.

Capital assets are being depreciated rapidly. The statement shows total land, buildings, machinery and equipment carried at \$1,664,000. This is 19 per cent less than the figures as of March 31, 1929, which were published in connection with the issuing of these securities to the public.

During the year, capital surplus was practically doubled, increasing from \$366,309 to \$739,028.

CERTIFIED INSPECTION AIM OF BUILDING LAW ORDINANCE

An ordinance providing for the inspection in addition and supplement of the San Francisco Department of certified building inspectors, Supervisors by John B. Leonard, sup Inspector.

Such inspectors would be employed salary to be paid by the owner or his the progress of the work would be sub Municipal Bureau of Building Inspection which also provides that the building certified inspectors and their qualification made.

Applicants for certificates to open new ordinance, must have at least experience and will be required to take or both.

The proposed ordinance, as sub lished herewith:

PROVIDING FOR THE ESTABLISHMENT OF A SYSTEM OF CERTIFIED BUILDING AND CONSTRUCTION; PRESCRIBING QUALIFICATIONS, DUTIES AND TRIALS OF INSPECTORS; AND PROVIDING A PENALTY FOR VIOLATION THEREOF.

Be it ordained by the people of the City and County of San Francisco, as follows

Section 1. There is hereby established a system of building inspection in addition and supplementary to that now in effect, through and by means of certified building inspectors who are hereinafter defined.

Section 2. A certified building inspector must be employed on a full or part time basis as the conditions may demand for the purpose of inspection, and he shall inspect the construction of all structural portions of any building, or any building construction work, to be executed or performed under the jurisdiction of the Board of Public Works through its Bureau of Building Inspection in the City and County of San Francisco at a salary or wage to be paid by the owner or his architect or his engineer.

Section 3. Such inspector shall inspect the construction of all structural portions of buildings, including steel, reinforced concrete, concrete, masonry, and other structural portions, all piling, foundations and retaining walls, performed under the jurisdiction of the Board of Public Works, through its Bureau of Building Inspection in the City and County of San Francisco, and report the result thereof to the Superintendent of the Bureau of Building Inspection.

Section 4. The structural portion of a building shall be understood to be the load carrying elements as designated by the Superintendent of the Bureau of Building Inspection. The portions of timber frame structures wherein the size of the timber members are specifically designated in an ordinance shall not be included in this requirement.

Section 5. He shall report to the Superintendent of the Bureau of Building Inspection at such times and in such manner as said Superintendent directs, and shall conduct any investigations into the structural portions of the buildings, necessary for the observance of the structural features as set forth in the Building Laws.

Section 6. A certified Inspector shall be one to whom the Board of Public Works, through the Superintendent of

the Bureau of Building Inspection, has issued a certificate stating the type or types of construction on which he may be engaged or employed, and he shall not be engaged or employed, or accept employment on any type of construction other than that for which his certificate qualifies him.

Section 7. A list of certified inspectors and their qualifications, from which selection shall be made, shall be posted in a conspicuous place in the business office of the Bureau of Building Inspection in the City Hall. Testing laboratories employing certified inspectors and using only certified inspectors for this service may be named in the posted list.

Section 8. All applicants for a certificate must have at least five years practical construction experience and file with their application to the Superintendent of the Bureau of Building Inspection a written statement of their experience, training, and evidence of good character. A graduate of the college of engineering of a recognized university shall be given two years experience credit for his collegiate work. Applicants shall be required by the Superintendent of the Bureau of Building Inspection to show by either oral or written examination or both, conducted under rules of the Board of Public Works, their qualifications for the performance of the duties of a certified inspector. The Board of Public Works may appoint examining boards, which boards may consist of members nominated by leading industrial, commercial and technical organizations of San Francisco. Upon the recommendation of the examining boards and the Superintendent of the Bureau of Building Inspection, the Board of Public Works shall direct the issuance of a certificate.

Section 9. Every applicant shall pay to the Cashier of the Board of Public Works the sum of Ten (\$10.00) Dollars, and shall submit evidence of such payment to the Superintendent of the Bureau of Building Inspection with his application. This money shall be used for the establishment of a system of building inspection to that of the Bureau of Building Inspection of Public Works through the Board of Public Works.

ed on a full or part time basis at a architect or engineer. Reports on mitted to the Superintendent of the tion, under the proposed ordinance, bureau files contain a list of the cations from which selections might be

ate as "certified" inspectors, under the five years practical construction experience an oral or written examination

mitted to the supervisors, is pub-

forthwith become the property of the City and County of San Francisco. All certified inspectors shall be at all times subject to the rules and regulations of the Board of Public Works.

Section 10.—If at any time an inspector is found incompetent, negligent, dishonest, recalcitrant, or derelict in his duties in the judgment of the Superintendent of the Bureau of Building Inspection, said Superintendent may suspend him for a period not longer than ninety (90) days, and

during such suspension he shall not be eligible for employment as certified inspector in the City and County of San Francisco. His certificate may be revoked by the Board of Public Works after a fair and impartial hearing given to him after at least five (5) days' notice in writing. The trial of any such certified inspector shall be conducted under rules prescribed by said Board of Public Works.

Section 11. The City and County of San Francisco shall not be or become liable for the incompetence, neglect, dishonesty, carelessness or dereliction of duty of any certified inspector.

Section 12. If any part or provision of this ordinance is adjudged void or unlawful for any reason whatsoever, such part or provision may be disregarded and shall in nowise interfere with or affect the other provisions of the ordinance.

Section 13. This ordinance shall take effect thirty (30) days from date of passage.

Section 14. Any person, firm, association or corporation violating any of the provisions of this ordinance shall be guilty of a misdemeanor and upon conviction thereof shall be punished by a fine not to exceed Five Hundred (\$500.00) Dollars or by imprisonment in the County Jail for not more than six (6) months or by both such fine and imprisonment.

SIMPLIFIED PRACTICE BECOMING RECOGNIZED IN INDUSTRY

Simplified Practice in the manufacturing industry and general business in California is becoming recognized not only as a basic factor of efficiency but one of great economic saving, according to Chas. M. Gunn, chairman of the Simplified Practice Committee of the California State Chamber of Commerce.

"California business men," states Gunn, "are now taking advantage of the opportunities offered by the United States Department of Commerce to bring about simplified practice in industry. We are fortunate in California that we are organized through our State Chamber of Commerce to coordinate the different agencies in obtaining greater efficiency and reducing costs, both production and distribution, therefore greatly benefiting the public. One item of the many important ones upon which our committee is now working, illustrates very forcefully the economic saving to California industry which we are endeavoring to bring about through this cooperative work. If we had 200 of our leading firms in California using a simplified invoice we would bring about a savings to business of our state of approximately three-quarters of a million dollars each year. When our committee has gained headway upon all its projects of simplified practice the savings to California will no doubt run to many millions of dollars each year.

Industries represented at a recent meeting of the committee included: Hardware, bank supplies, structural steel, lumber, masonry, foundries, reinforced steel, warehouse, wooden shipping containers, electrical and purchasing agents.

The work in each of the groups is set up in definite objectives to be carried out during the year and is to receive state wide adoption through the State Chamber of Commerce, according to the Chairman.

UNLIMITED COMPETITION IS OUTSTANDING EVIL OF INDUSTRY

Unrestrained competition is an evil of the building industry, according to C. Herrick Hammond of Chicago, president of the American Institute of Architects, who in a recent statement urged closer industrial relations between architects and contractors to eliminate waste, and to promote higher standards.

"The prevailing system in this country of selecting a contractor by competitive bidding often fails to accomplish the very result for which such competitions are held, namely, to secure the best contractor to do the work," Hammond declared.

"When competitive bids are taken on an important building, general contractors are selected to bid, and as far as the architect is concerned an effort is made to select men as near equal in standing and qualifications as possible.

"But other contractors, not invited, bring about all the pressure and influence that they can organize to secure an opportunity to bid, thereby increasing the number beyond the desires of the architect and beyond the number which would give each bidder a reasonable chance to win. Worst of all, they inject into the list men who may not be properly qualified to do the work if they do get the job.

"Unrestrained competition in the building industry is an evil. Many evils of the industry are the result of the unfair competition that comes about through the necessity of accepting bids from contractors of unequal standing and ability; this is a problem that must be solved by the contractors.

"I believe, and most architects, I am sure, would agree with me, that the ideal way to build a building is to select a contractor, who by his experience, his ability as a builder, his organization, his equipment, and his financial standing is best qualified.

The building operation is thus put in the hands of the architect and contractor, both working in a professional capacity for the best interest of the owner.

"In this case, the builder, the architect and the owner may all join in the effort to secure a standard of work, a speed of construction and an economy of cost which is rarely possible when the general contractor is secured by competitive bidding and the award made to the lowest bidder.

"At one time in Chicago a survey and estimate was made as to just how much competitive bidding cost the building industry. This estimate resulted in showing that an average three per cent was the cost of this system of securing estimates and selecting a general contractor. Last year the total cost of buildings erected in the Chicago district was over \$300,000,000, which multiplied by three per cent makes the enormous sum of approximately \$10,000,000 as the cost of estimating in Chicago for that year.

"As each contractor only secures a small proportion of the contracts on which he makes estimates, a great portion of this expense is wasted but at the same time is added to the overhead expense of each concern involved. This overhead expense is paid for by every owner in the city who erects a building. This lays a heavy tax on the owner.

"A large portion of this waste may be eliminated if an agreement can be reached between architects and contractors to use the quantity survey system in cities large enough to warrant the establishment of such survey bureaus, in accordance with a report and recommendation on quantity survey by the joint committee of the American Institute of Architects, the Associated General Contractors of America, and the American Engineering Council."

KILN-DRYING METHODS CUT SEASONING LOSSES

Improved kiln-drying methods for southern pine, worked out by the Forest Products Laboratory of the Forest Service, are recommended as a means of reducing seasoning losses and increasing forest yields, the U. S. Department of Agriculture announces. A survey of seasoning practice and degrade made by the Southern Pine Association and the Forest Products Laboratory showed that actual drying losses were much greater than had been supposed. In 1922, the annual loss from kiln-drying degrade suffered by the southern yellow pine industry approached \$10,000,000.

Since 1922 conditions have improved at a number of mills. Kilns have been modified, temperature-control and humidity-control apparatus has been installed, and the managers have learned how to keep drying losses under better control. In many mills, however, conditions are about as in 1922 and seasoning losses are still high.

Technical Bulletin No. 165-T, "The Kiln Drying of Southern Yellow Pine Lumber," has just been issued by the U. S. Department of Agriculture. This bulletin explains fundamental principles of kiln drying southern yellow pine and reports surveys and experiments, describes types of kilns for seasoning, details of kiln operation, methods of handling stock before and after kiln drying, and dry-kiln construction and maintenance. Copies may be had, free of charge, while the supply lasts, by writing to the U. S. Department of Agriculture, Washington, D. C.

KERN RIVER ROCK COMPANY TO OPERATE AT BAKERSFIELD

C. W. Hartman, general contractor of Bakersfield, announces plans to establish a new rock producing plant on the Kern river and the purchase of the plant formerly owned by Force, Curigan and McLeod, highway contractors, located on Cottonwood creek.

The new plant, near completion at the base of China grade on the Kern river, will have a capacity of 300 tons a day, Hartman announces. The plant is located on a 40-acre tract leased from the Kern County Land Company.

The plant on Cottonwood creek, established by Force, Curigan & McLeod for the construction of the new highway to the Kern canyons, is located 10 miles from Bakersfield on 160 acres leased from the Olesse estate.

The deposit of rock has been approved and accepted by the state, 68,000 tons being used on the one job just completed.

The rock to be produced through the new plant is of highest grade and compares with the northern rock in strength and quality, according to Hartman. At present virtually all the rock used in the Kern county section is brought from the Northern section of the state, Hartman says, which necessitates a high price due to freight charges.

The business will be incorporated under the name of Kern River Rock Company and will be operated independently of the general contracting business carried on by Hartman.

The various types of window casements manufactured by the Crittall Casement Window Company of Detroit, Michigan, are described in a very well-illustrated catalogue of 68 pages which is being circulated by the manufacturer. Illustrations include photographs of installations and hardware, with detailed sketches of the casements following the specifications,

CONSTRUCTION INDUSTRIES CREDIT BUREAU IS ESTABLISHED FOR. S. F.

As the result of an investigation by a special committee appointed by the San Francisco Association of Credit Men, this city is to have a Construction Industries Credit Bureau to operate as a unit of the association.

The committee was appointed to investigate the needs, if any, of the construction industry of San Francisco and vicinity for organization and co-operative regulation in their credit operations.

The committee held numerous meetings and went thoroughly into the problem and found an urgent need for credit co-operation in the fields investigated.

The purposes for which the Bureau was created may be cited as follows:

1. To protect and encourage the Construction Industries of San Francisco in relation to all matters of credit.

2. To establish and maintain uniformity in commercial usages, insofar as they relate to questions of credit.
3. To establish and maintain sound credit practices throughout the industry.

4. To avoid and adjust controversies or misunderstandings between members and others.

5. To foster allied group credit meetings and to solicit, compile, record and disseminate among its members information respecting the financial credit standing and re-

sponsibility of corporations, firms and individuals engaged in any commercial, industrial or financial enterprise.

The Bureau will be divided into different departments or divisions. The following general divisions will be immediately established:

- a. Financial.
- b. Manufacturing and Producing.
- c. Distribution.
- d. Contracting.

The general plan and set-up of the Construction Industries Credit Bureau has been modeled after the approved plan of the National Association of Credit Men, which is now being operated by many Associations affiliated with the National System. The major features of the service provided for will include credit interchange reports, construction reports and monthly credit period reports.

A manager for the bureau has been employed and the association anticipates that within the next sixty days the bureau will be in a position to give prompt and efficient service to those interested in the building construction fraternity.

Members of the special committee, upon whose recommendation the bureau was established, are F. H. Eichler, Chairman; R. H. Ohea, C. S. Tripler, C. C. Hill, R. E. Hackett, O. H. Peterson, D. I. Bosschart, ex-officio.

THE OBSERVER

WHAT HE HEARS AND SEES ON HIS ROUNDS

Roofs instead of streets are being used for the storage of automobiles in Seattle, Wash. The city authorities are encouraging this movement and expect to have many such roof garages within a few years. The idea might profitably be transferred to other cities where congestion is acute.

A contract for the delivery of 1,560,000 board feet of logs between April 1 and November 31, 1930, has been signed by a Japanese match stick firm with the Soviet Government. This contract, according to Assistant Trade Commissioner H. B. Titus, reporting to the Lumber Division of the Department of Commerce, calls for 10 per cent cash at the time of signing the contract, 20 per cent at the time of loading in Vladivostok, and the remaining 70 per cent upon delivery.

Directors of both the Bethlehem Steel Corporation and the Youngstown Sheet & Tube Company have approved the merger of the two companies into a new thousand million dollar steel corporation. It is announced by E. G. Grace, president of the Bethlehem. Grace said that the directors of the Bethlehem had authorized an agreement to acquire the Youngstown corporation on the basis of one and one-third shares of Bethlehem for each share of Youngstown common.

According to a report submitted to the city trustees, the Roseville, Calif., electric lighting department brought in \$31,226.50 during the fiscal year ending June 30, 1929, during which time \$13,500 was transferred to other funds from the electric receipts. A larger sum has been transferred to date this year, \$33,500 having been loaned to other funds. The net earnings from the electric light department, the report showed, were \$32,060.

A site for the new state hospital for mental cases will be selected within the next few weeks, according to Earl Jensen, state director of institutions. The cost of the proposed building is more than \$3,500,000. The special committee in charge of choosing a suitable 1000-acre location in Southern California is composed of B. B. Meek, director of public works; Lyman King, state director of state finances; Mrs. Carrie Bryant and W. P. Story.

George Perry Griffith, Jr., vice-president and general manager of the Griffith Company, paving contractor, died suddenly March 10 at his home in Beverly Hills, aged 33 years. Heart disease was the cause. Mr. Griffith was born at Scranton, Pa., and after coming to California attended the University of California at Berkeley. He entered business with his father, the late George P. Griffith, who was identified for many years with the Fairchild-Gilmore-Wilton Company. When Mr. Griffith, Sr., succeeded to control of that company he changed the name to the Griffith Company. The son became vice-president and general manager of the company at his father's death two years ago.

Forty-one elevators costing \$1,000,000 will be installed in the new Starr Building in Cincinnati by the Westinghouse Elevator Company, according to William H. Patterson, central district manager. The building will be 45 stories in height and will cost \$30,000,000. The elevator installation is unusual in that the building will contain office space, a 750-room hotel, a 650-car parking garage and a department store. Six express elevators comparing favorably with the fastest in the world will be installed with a speed of 900 feet a minute. All of the passenger elevators will be of the latest design with automatic leveling and safety devices. The garage will have three car elevators of 10,000 pounds capacity and a freight elevator capable of lifting 25,000 pounds.

American portland cement mills show practically no improvement in the ratio of operations to capacity as indicated by the figures for the 12 months' period ending February 28. According to statistics released by the Bureau of Mines of the Department of Commerce the ratio of operations to capacity for the last twelve months was 65.6 per cent. The ratio percentage for 12 months' period ending February 28, 1929, was 71.0 per cent. The ratio percentage was at a maximum of 71.1 per cent for the 12 months' period ending April 30, 1929, and compares with the ratio percentage of 65.6 per cent for the 12 months' period ending February 28, 1930. During the month 8,162,000 barrels were produced, 7,012,000 barrels were shipped, and stocks on hand at the end of the month were 23,231,000. Production in February, 1930, was 4.2 per cent less and shipments 23.7 per cent more than February, 1929. Stocks at the mills were 5.5 per cent less than a year ago.

The special session of the Utah state legislature has voted down a proposal of Governor George H. Dern to make it lawful for the state authorities to use inmate labor in the construction of state buildings. There was a bitter contest over the bill that had been introduced at the suggestion of the governor. The plan was opposed by the labor unions of the state, who have several friends in the legislature. Governor Dern had suggested the use of inmate labor in the construction of a new building at the State Mental Hospital in Provo, to cost a large sum.

Under the leadership of Robert E. Dannenberg, station agent for the Southern Pacific Railway at Felton, Santa Cruz County, fourteen children have established a forestry project that is profitable in dollars and cents as well as in educational values. In spite of the fact that Dannenberg has a 12-hour job he finds time to add to the beauty of his home by planting more shade and fruit trees and planting more flowers and shrubs. Before starting the forestry club, Dannenberg had under his guidance an agricultural club for Felton boys and girls.

What are the salaries of engineers in the machinery industries? What positions do engineers hold in these industries? What are the salary expectations at a given age? There are some of the questions which the Machine Shop Practice Division of The American Society of Mechanical Engineers, asked itself. In order to find answers to them, a well-known engineering method was followed—the Division ascertained the facts. The results are reported in the March issue of Mechanical Engineering. The salaries run all the way from \$1200 to \$50,000, and the jobs from that of apprentice to that of chairman of a board of directors. An interesting feature of the returns is that the average salaries by ages increase with age up to 70 years, after which there is a slight drooping off.

Samuel Merrill, 77, founder of the Morrison-Merrill Lumber Co., former Mayor of Cheyenne, Wyo., and Wyoming State Legislator, died in a Portland, Ore., hospital March 14 following a major operation. Merrill, who formerly resided at Salt Lake City, where the Morrison-Merrill Company maintained headquarters, lived in retirement in Spokane. He was well known on the Pacific Coast for his lumber activities.

San Francisco marine authorities are strongly in favor of the proposed extension of the harbor pierhead lines from 800 to 1200 feet. In support of the efforts of the State Board of Harbor Commissioners to obtain approval of the Board of Army Engineers for the project, the directors of the Junior Chamber of Commerce sent forward a resolution of recommendation. The extension planned would nearly double the docking space on the San Francisco waterfront and provide continuing construction probably totaling millions of dollars, according to the argument of the Junior chamber.

February wholesale prices of standard plumbing fixtures for a six-room house, as collected by the U. S. Department of Commerce from reports of twelve representative manufacturers and wholesalers, were \$102.83 as compared with \$100.55 in January and \$98.41 in February, 1929.

About 1000 men are expected to be given work when the Madera Sugar Pine Lumber Company starts mills in the mountains near Madera during the next few weeks and cuts approximately 50,000,000 feet of timber. About 700 men are to be used in the mountain work and 300 at the Madera plant. About \$1,750,000 will be expended during the year for labor and supplies.

Construction is being rushed on the \$3,000,000 plant of the Pickering Lumber Company at Alturas. W. C. Garrett, resident manager for the Pickering interests, cannot set a definite date upon which the big mill will start operations.

The California Art Tile Corporation reported a net of \$10,529 for the first quarter of the fiscal year ended Dec. 31, 1929. The company's year ends September 30. Dividends of \$9994 were paid from earnings in the first quarter and the balance was added to surplus, which totaled \$23,826 as of December 31.

At the annual meeting of stockholders of the Calaveras Cement Company to be held in San Francisco on April 2, five directors will be chosen to succeed those whose terms expire, it is announced by W. Schnauffer, Jr., secretary of the company.

ALONG THE LINE

W. E. Wentworth has been named an assistant engineer in connection with the Gordon Valley water project of the city of Vallejo. Wentworth was formerly connected with the Spring Valley Water Company and the Western Pipe and Steel Co.

S. C. Smithwick, Seattle engineer, has joined the staff of the Portland Cement Association and will have charge of the Spokane district which comprises the Inland Empire and northern Idaho. For the past ten years, Smithwick has been associated with the city engineer's office in Seattle. Frank Barrett is district manager for the association at Seattle.

Salary increases for nineteen members of his staff are recommended by M. M. O'Shaughnessy, San Francisco city engineer, in a communication sent to the Board of Public Works. The increases would amount to \$820 a year. Among the proposals were a raise for Assistant City Engineer C. E. Healy from \$550 to \$650 a month. The Works Board took the matter under advisement.

Fred J. Klaus of Berkeley has been named city engineer of Sacramento to succeed Bayliss Clark, resigned. The appointment was made by James S. Dean, Sacramento architect, who was recently appointed city manager. The new city engineer will assume office April 1 at a salary of \$6000 a year. Mr. Klaus was recently associated with the East Bay Water Company and was in charge of designing and construction of the San Pablo and Upper San Leandro water projects.

C. C. Jarman, active in the Fresno Labor Council and the Carpenters' Union of that city for several years, has been appointed building inspector by the Fresno City Council. Jarman fills the vacancy caused by the death of James Anton. Eight candidates took the examination for the position.

Richard Irvine and P. Ebbets, architects formerly operating under the firm name of Irvine & Ebbets, have dissolved partnership. Mr. Irvine will continue the offices in the Call Building. Mr. Ebbets will open new offices in the Hobart Building.

W. R. Yelland, Oakland architect, will shortly leave for a cruise around the world. He will be accompanied by Mrs. Yelland. The tour, to extend over a period of four months, will take the travelers to Japan, Singapore, India ports and various cities of interest in Europe.

Ninth annual meeting of the Pacific Coast Building Officials' Conference will be held at Long Beach, Calif., September 29 to October 4. Headquarters will be maintained at the Virginia Hotel.

Reno, Nevada, city council expects to spend \$719,947 on municipal maintenance this year, including \$298,299 for a sewage disposal plant. It is planned to issue bonds to finance the sewage project.

HERE—THERE—
EVERYWHERE

At a meeting in Palo Alto last Tuesday night officials of cities between San Francisco and San Jose, a resolution was endorsed in principle to place an initiative enabling act on the ballot in November to authorize the legislature to issue bonds to provide state aid for cities and counties in abolishing grade crossings. The measure will be taken up with southern California communities to secure their support in the passage of the bill.

The building trades strike, which caused virtual cessation of work on construction projects in Kansas City ended March 11. All of the 3000 union craftsmen returned to work under an agreement providing the establishment of the demanded five-day week and a daily wage increase effective next July 1 and an identical increase six months later.

San Mateo city council has adopted an ordinance (No. 333) providing for the issuance of permits in connection with electrical installations and covering regulation of electrical appliances and equipment.

County officials of Los Angeles are considering the adoption of an ordinance to compel tourists to make a full stop at all grade crossings within the county limits. The proposal was made by Supervisor Shaw after San Gabriel authorities asked that some action be taken to protect motorists at grade crossings in that city. The proposed ordinance has been referred to the County Counsel for an opinion on the legal points involved.

J. D. Tennant, vice-president of the Long-Bell Lumber Co., in charge of western operations, was re-elected president of the West Coast Lumbermen's Association. This will make his third year at the head of the organization. He was president of the West Coast Trade Extension Bureau for three years. Col. W. B. Greeley continues as secretary-manager.

Oakland city council has passed an ordinance to print making certain technical changes in a number of existing municipal ordinances, governing changes for installing gas appliances. The principal item is where coal or oil furnaces are changed to the gas-burning type.

At the annual banquet-meeting of the Fresno Builders' Exchange held last Monday evening the following were elected directors to serve for the ensuing year: Roy Martin, D. E. Moore, M. W. Hancock, A. M. Goeddel, C. E. McCallin, M. E. Summers, C. M. Loper, A. G. Rohr, T. H. Curry, O. H. Carter and J. G. Teeple.

Julius J. Jacobs will operate from 1338 Mission Street, San Francisco, under the firm name of California Plumbing Supply Co.

John D. Finnigan, newly appointed chief of the City Plumbing Division of Portland, Ore., seeks revision of the municipal plumbing code to bring it up to date. Journeymen and wholesalers favor the revision and declare there is need for revision of the fixtures and materials features of the measure and also need to simplify the code so it can be more easily understood.

TRADE LITERATURE

Wrought Iron Record is the title of a new trade magazine being published by the Wrought Iron Research Association of Pittsburgh, Pa.

"The value of any paint can be determined only by experience. An efficient paint cannot be invented and compounded merely by theoretical reasoning. Paint making, as well as painting, is an art and not a science," says A. H. Sabin in "Structural Metal Painting," a 75-page pocket-size booklet issued by the National Lead Co., New York City. The principal contents of the booklet consist of an analysis of various corrosion factors, discussions of such technical considerations as pigments and oil proportions, descriptions of types of paint and of methods of estimating areas and costs, of mixing, and of writing specifications.

A non-technical presentation of the methods to predetermine the daylighting and airtightness of industrial buildings in advance of construction is given in two 24-page booklets, "Industrial Daylighting" and "Industrial Airtightness," recently published by the Detroit Steel Products Company of Detroit, Michigan. The booklets are sure to prove valuable to architects and designers of the various types of industrial buildings, as they are the results of seven years' experimentation on the part of Detroit Steel Products Company research engineers working with the Department of Engineering Research at the University of Michigan.

A 16-page catalogue showing the complete line of Advance Terrazzo Surfacing Machines has been published by the Advance Machine Company of Minneapolis, Minnesota. Illustrations and descriptions, with complete specifications of the various types of floor surfacers, are presented.

A 12-page catalogue showing the De Walt Wonder Worker with its tools and attachments has recently been issued by the De Walt Products Corporation of Leola, Pennsylvania. The various uses of the "Wonder Worker" with proper attachments, such as cutters and protectors, are fully illustrated. The last two pages of the booklet are devoted to machinery and attachments manufactured by the De Walt Products Corporation.

TRADE NOTES

Nottingham Heating and Ventilating Co., with main offices at 1523 Market St., Oakland, will establish a permanent branch office in San Jose. The San Jose branch will operate under the name of San Jose Heating and Ventilating Company. Headquarters will be maintained at the San Jose Builders' Exchange.

Construction has been started on a new plant for the Old Mission Tile Company at San Pablo, Contra Costa County. The plant will utilize clay found in the vicinity. The company will be managed and supervised by F. A. Mero of the Master Craft Tile Co. of Richmond.

ROAD CLOSED OR OPEN IS ALWAYS A HIGHWAY

A decision of interest to highway contractors was handed down by the district court of appeals in the case of State Treasurer Johnson and State Controller Riley vs. George H. Oswald and John P. Oswald, partners, operating as Oswald Bros. Paying Co.

A refund of taxes paid on gasoline used to operate tractors on a section of state highway under construction was involved. It was contended by the contractors that the road was not a highway within the meaning of the state motor vehicle act because it was under construction and not open to traffic; hence they should not pay the tax on gasoline used to operate construction machinery or equipment thereon.

The contractors' contention was upheld by the superior court, but its ruling was reversed by the court of appeals, which held that the tractor was a motor vehicle and that a highway, whether open or closed to traffic, was a highway within the meaning of the motor vehicle act.

FRESNO MATERIAL DEALERS ELECT OFFICERS

E. L. Smith and E. M. Einstein were elected directors of the Fresno Building Material Dealers' Association at the annual banquet-meeting of that organization at the Hotel Fresno, last Monday. They succeeded L. L. Walker and K. T. Craycroft.

Other directors chosen were H. L. Adler, E. L. Lord and C. M. Wilson. The annual reports of President Lord, Secretary L. J. Allen and Frank I. Robertson, assistant secretary, were presented. The directors will meet shortly to elect officers.

SOUTH AFRICAN PORT DRAWS HEAVILY ON U. S. FOR LUMBER

United States stood third among those countries exporting lumber to the port of Durban, South Africa in 1929, according to a report to the lumber division of the Department of Commerce from Consul Gaston Smith.

Total lumber imports into Durban were 57,812 short tons. North European imports were highest with 39,618 short tons, Archangel second with 3865 short tons, and the United States third with 3779 short tons.

While considerable American lumber is consumed in the city proper, most of the imports were destined for the hinterland, which is a rich agricultural country. There are also important mining districts, the mines in which use American Douglas fir and Southern pine timbers.

LOS ANGELES VOTES APRIL 29 ON \$38,800,000 WATER BONDS

Development of the water resources of Los Angeles, by the issuance of bonds to the amount of \$38,800,000 will be voted upon at a special election to be held April 29, according to a decision of the city council. Proceeds of the bond issue would be used for the following purposes: Purchase of Mono and Owens river watershed lands and water rights, including Mono basin, Long Valley, Round Valley and Owens Valley town and ranch properties, \$17,181,000; water development expense, including diversion from Mono and necessary added facilities for pumping in Owens Valley, \$10,390,000; enlargement of the present aqueduct, \$600,000; additional local storage capacity, \$7,500,000; new distribution facilities, \$3,219,000.

SOUTH AFRICA TO TREAT ITS OWN RAILROAD TIES

Further supplies of domestically-manufactured ties will soon be available for South African railroads, through the creation of a new manufacturing and treating plant at George, Cape Province, says a report from DuVoyne G. Clark, Assistant Trade Commissioner, Johannesburg, South Africa, to the Lumber Division of the Department of Commerce.

Many carloads of ties are loaded and shipped from George each year, the report states, and the expansion of this trade has been the stimulus for the erection of the new plant.

The timber to be used in the plant will be drawn from what is known as the Knysna district of the Cape Province. The woods to be used are known as the real yellow wood (Podocarpus Thunbergii) and the common yellow-wood (Podocarpus elongata).

The -w plant will produce from 200,000 to 300,000 ties annually and will supply ties for the new railroad lines now under construction. South Africa is not an important market for American ties.

JAPANESE EXPORTS OF BOX SHOOKS, LUMBER, INCREASE

Exports of box shooks and lumber from the Nagoya, Japan district in the last quarter of 1929, which amounted in value to \$605,219, were slightly greater than for the corresponding period of 1928, Consul A. R. Preston reports to the Lumber Division of the Department of Commerce.

The exports of these products to British India increased from \$271,660 in 1928 to \$308,429 in 1929. Exports to Hongkong and the Straits Settlements fell off perceptibly. Box shooks and lumber exports from the Nagoya District to the Dutch East Indies increased \$23,000 in 1929 over the same period for 1928.

Nagoya, it is pointed out, is the center of the box-making industry in Japan. Box exporters of the district are organized into a central association, the members of which work in close co-operation. This organization maintains a buying department which purchases co-operatively supplies needed by the trade.

The principal wood used by the box shook trade in this district is Hondo pine which is grown locally.

WOOD PRODUCTS IMPORT FROM B. C. INCREASE IN FEBRUARY OVER 1929

Exporters of wood products to the United States during February, 1930, from the Province of British Columbia, Canada, showed a considerable increase in lumber, shingles, and poles, and a decrease in logs, as compared with the same month in 1929, according to a wire from Consul General Ely E. Palmer, Vancouver, B. C., to the lumber division of the Department of Commerce.

Lumber imports from this province during February 1930 were 47,511,000 board feet as compared with 29,660,000 board feet in 1929. Shingle exports during February 1930 were 108,665,000 as compared with 91,830,000 in 1929. Poles to the amount of 548,160,000 linear feet were imported in 1930 as compared with 391,006,000 linear feet in 1929. Logs fell off from 11,338,000 board feet in 1929 to 2,564,000 in 1930.

BUILDING-LOAN ASSOCIATIONS REPORT ADVANCES

The first quarter of 1930 will show tremendous advances made by building and loan associations, according to reports received from various sections of the State by J. M. Abbott, president, California Building - Loan League. As these funds are largely loaned on homes, the ample money now available for financing should prove a stimulating influence on real estate and make conditions generally more prosperous.

Resources of these Institutions increased 325 per cent during the past five years and now total \$477,266,115, according to Mr. Abbott. There are 247 associations and 60 branches operating in the State, compared with 147 in 1924. During the five year period, the number of investors increased from 116,000 to 438,000.

A questionnaire of information on loans has just been tabulated by Building and Loan Commissioner Chas. A. Whitmore. The returns reveal that on September 30th, last, there were in force in this state 114,290 definite contract loans aggregating \$335,000,000, and 10,888 flat loans amounting to \$68,800,000. The flat loans were 17% of the grand total of loans in force which was \$403,800,000.

The returns showed that 113,185 California homes were being financed through building and loan associations, the aggregate amounting to \$2315,000,000. These home loans were on the books at an average of \$2500 each.

California associations have out \$194 loans on apartments, aggregating \$58,206,000, or an average loan of \$18,000, and 3381 loans on business property aggregating \$39,500,000, or an average of \$12,000.

Seventy per cent of these that answered the Commissioner's questionnaire favor the following schedule of interest rates; no interest unless an investment is allowed to remain within an association three months and then interest as follows: After three months, 4%; after six months, 5%; after one year, 6%.

BRIDGE DESIGN COMPETITION IS ANNOUNCED

With the purpose of encouraging more beautiful designs of steel bridges from an engineering point of view, the American Institute of Steel Construction offers three cash prizes of \$500, \$250 and \$100 for the designs placed first, second and third in a competition open to bonafide registered students of structural engineering in recognized technical schools of the United States and Canada.

The jury of Award will consist of three consulting bridge engineers of national reputation and two nationally-known architects.

The competition will consist of preliminary designs prepared within a period of nine hours under the supervision of a professor or instructor at the competitor's school. From these preliminary designs the Jury will select ten drawings for final development. These final drawings must be delivered to the Institute in ample time to be in the hands of the Jury for final judgment on the date indicated.

The subject of the design is a steel arch bridge.

Further information regarding the competition is available from the Executive Offices of the American Institute of Steel Construction, 200 Madison Ave., New York City.

DATA ON REAL ESTATE LOAN POLICIES OF LIFE INS. FIRMS

The third annual outline of the real estate loan policies of 103 leading life insurance companies in the United States and Canada has been issued by the National Association of Real Estate Boards and is to be sent shortly to the members of its Brokers Division and its Mortgage and Finance Division. These 103 reports are statements of the presidents of the life insurance companies represented.

The subject included in the outline of the insurance companies' loan preferences are: type of property on which loans are made, length of term of the loans, amortization requirements, prepayment privileges, the practice statements companies follow in making appraisals of property, the territory in which loans are made, the maximum amount loaned and the maximum percentage of the value of the property loaned.

Single Unit Dwelling Popular With Insurance Companies

Of the 103 companies reporting, 8 cover with their loans all the usual types of properties. Where loans are made only on specific types of property, the single unit family dwelling takes precedence over every other kind of real estate; 102 of the companies are willing to loan on family homes.

Farm lands are listed among the loan preferences of 63 companies. Six companies loaning on farm lands have in certain details, changed their policies in granting farm lands loans. Two of the companies confine their loans to farm lands only.

Next to the family home in popularity with the life insurance companies for loans is the commercial building; 33 companies loan on commercial buildings. Duplex dwellings are a close second to commercial buildings, with 32 companies favoring the duplex dwelling as security for a loan. Next in favor come the two-apartment building on which 72 companies loan. Combination apartment and store buildings are taken as loan securities by 59 companies. Large apartment buildings are loaned on by 52 companies. Industrial property is now included in the types of property on which 15 of the companies make loans.

Certain types of property not standard for large insurance company loans are included in various reports. Five companies state their willingness to loan on churches, and the following types of properties have a place in loan preferences in at least one report in the data: church property, ranches and plantations, hospitals,

country clubs, unimproved city property and Masonic temples and lodge property.

Sometimes Loan for 20 Years

Length of time of loans varies greatly with the companies. The shortest period is three years, which is not uncommon for loans on single unit dwellings, while the longest periods reported were 20-year loans which are given by two companies on farms and by one company on Masonic temples.

The size of the loans, whether calculated on the percentage of the value of the property given as security or on a maximum sum basis, likewise varies greatly. In general companies are willing to lend 50% of the assessed value of the property, but in some instances they report loans given for only 30% of the assessed value, while in two reports the companies state their willingness to lend as high as 66 2/3% of the value of a single unit dwelling, and one company follows the policy of lending 66 2/3% of the assessed value in the case of loans on commercial buildings. Figured in terms of maximum sums ready to be loaned, few companies loan sums smaller than around \$3,000 to \$5,000; the largest sums reported by companies definitely limiting the amount of money to be loaned were listed by two companies loaning on commercial buildings, both of whom will lend \$500,000 on this type of property. Many reports do not contain definite figures as to the maximum amount loaned.

Appraisal Policies Vary

By far the majority for the companies use both their own and independent appraisers in deciding on the valuation of property on which they are asked to loan; 67 companies reported such a plan; 31 companies use their own appraisers only, and 5 companies use only independent appraisers. One company makes the following statement in answer to the question on methods of ascertaining property values: "On dwelling loans we require appraisal by realty boards associated with the National Association of Real Estate Boards."

Pre-payment privileges are the rule with a great majority of the companies. Only six companies refuse to allow pre-payment privileges under any conditions.

In general no very radical changes are seen in the current real estate loan policies of the life insurance companies from the policies reported a year ago.

the past few days has shown considerable improvement. Funds have been put out recently from New York and its suburbs on a conservative basis. The situation in the Philadelphia district is improving.

"It is with special interest that we are watching building and loan associations," says Mr. Turck, "because they play such a large part in home construction and renovating finance. The increasing supply of funds flowing into these channels at this time, particularly in the Eastern district, is a most interesting reflection. The Railroad Co-operative Building and Loan Association, with assets of \$35,000,000 has just made seven building loans which are the first group they have made since October 23rd.

"The general tendency seems to be to pay courteous attention to applications which represent real value and for loans involving betterments and renovation to property. Careful examination of data would indicate that the better classes of people seeking mortgage loans are active at this time and will benefit by filing applications so that their cases may receive consideration as surplus funds come into the mortgage market."

It was the sense of industrialists meeting with President Hoover after the stock market recession, as well as of the National Business Survey Conference, that a speeding up of construction, repairs, replacements, etc., would serve as one of the most important stabilizing influences in the business situation. The Building Survey Conference was organized in January to carry out this purpose. It brings together for the first time all of the units in the building and construction field.

The work of the conference is under the general direction of a representative executive committee. Particular phases of it are dealt with by special committees among which are the following:

Building & Loan Committee, Ernest A. Hale (chairman), president, United States League of Building & Loan Associations.

Statistical Committee, Thomas F. Holden (chairman) vice-president in charge of statistics, F. W. Dodge Co.

Trade Publications Committee, F. W. Feiker (chairman), managing director, Associated Business Papers, Inc.

Special Home Financial Committee, M. E. Nelson (chairman) president, Long-Well Lumber Company, Inc. Architects' Committee, E. J. Russell (chairman), president, American Institute of Architects.

Radio Committee, Frank A. Arnold (chairman) National Broadcasting Co.

Real Estate Committee, (Leonard P. Reaume (chairman) president, National Association of Real Estate Boards.

The following appointments have been made to the Executive Committee: R. B. White, representing important lumber interests; A. C. Pearson, chairman of the board, United Business Publishers; Wm. A. Starrett, president of Starrett Bros., Inc.; Geo. A. Wilson of Breed, Abbott & Morgan, New York City.

CREDIT CONDITIONS PAVING WAY FOR INCREASED CONSTRUCTION

Indications that credit is resuming its flow in normal channels in larger volume, paving the way for increased activity in the construction field, are disclosed in a survey made by the National Building Survey Conference under the direction of the chairman, Fenton B. Turck, vice-president of the American Radiator Company, according to word from Washington.

The survey, in which banks, building and loan associations, insurance and mortgage companies cooperated, shows that building mortgage conditions on the West Coast are now favorable, money being available in sufficient quantity for prudent residential, renovating and business building loans. The rate varies from 5 1/2 to 7% on a basis of 60% valuation.

In the districts surrounding Cin-

cinnati, Cleveland, St. Louis and St. Paul, there has been a particular pick-up during the past week in the mortgage market, with many loans being favorably negotiated at the present time.

There is a slight improvement in the situation in New England and a considerable optimistic attitude has developed in that section regarding the immediate future of the mortgage money market. No favorable change has been noted in the situation in the districts surrounding Chicago, Detroit, Pittsburgh and Indianapolis. This also applies to certain spotty conditions in the South, including Atlanta, where sufficient funds have not been received to enable them to enter the mortgage market in a noticeable manner. The Baltimore district in

The Crescent City Investment Company, suing the Durite Asphalt Company, demands \$150,000 for alleged failure to carry out a contract for street work in an extension development near Crescent City, and an additional \$100,000 for alleged loss in value of adjoining property. The complaint alleges the paving contract was entered into last July and that the defendants were to arrange for the financing of Del Norte County bonds necessary for the work. This was not done, it is alleged, and an effort was made in December to cancel the agreement.

REDUCED TRADING CHARACTERIZES AUSTRALIAN LUMBER MARKETS

Generally reduced trading activities characterized the lumber market of New South Wales during 1929, although conditions in Queensland were comparatively better, Trade Commissioner Charles F. Baldwin of Sydney, reports to the Lumber Division of the U. S. Department of Commerce.

In New South Wales, Mr. Baldwin reports, imports were generally greater than in 1928, and he stresses the fact that there was an increased demand for American lumber in Queensland.

Financial stringency, and the resulting reduction in speculative building, were the causes ascribed for the falling off in the demand for lumber.

The competitive position of American lumber was little changed, although tariff increases near the end of the year are expected to restrict materially the trade in American lines, particularly plywood and box shooks. At the present time the trade is fearful of further tariff increases on imported softwoods and it is rumored that higher duties will be declared in March.

Agitation in Queensland in favor of stimulating the demand for domestic softwoods resulted in an announcement by the Queensland Railways Department that in the future sawn timber not produced within the Commonwealth should be charged "A" class rates (those applying to carload lots) plus 25 per cent, subject to minimum charges specified in the by-laws; and also that portable wooden houses, including ready-to-erect houses, and the whole material for a house, such as bath, tank, etc., com-

prising any timber not produced within the Commonwealth, should be charged "A" class rates, plus 50 per cent and be subject to the minimum charges provided for in the by-laws.

The lumber trade for the early part of January, was very quiet. Trade Commissioner Baldwin reports, although there was some resumption of demand following the holiday season. It is the general opinion that the import trade for 1930 will be considerably lower than in 1929.

STATE-OWNED CEMENT PLANT PROPOSED FOR W. VIRGINIA

State-owned cement plants are suggested by the State Auditor, Edgar C. Lawson, in a letter to the West Virginia State Board of Control, following a charge by the board's secretary, Bonner H. Hill, that the Portland Cement Association has increased the price of cement 25 cents a bag on the eve of letting a contract for the construction of the State Capitol's main wing.

Lawson said that the establishment of plants in four or five counties where vast deposits of limestone are available would make the venture "highly economical and plausible," and would provide an outlet for congested conditions at the State prison at Moundsville by using convicts for the necessary labor.

"It is estimated," Lawson said in his letter to the board of control, "that 50,000 bags of cement will be used in the new capitol, and between 100,000 and 150,000 will be used this year by the State road commission in the construction of our public highways. Based on the 25 cent per bag increase alone, this would mean a saving of at least \$50,000, and with prison labor employed it is my opinion that be-

tween \$50,000 and \$75,000 could be saved the taxpayers, inasmuch as the cost of production would be substantially curtailed.

"I am fully aware that the cry will go up that West Virginia should not enter into trade competition, but I believe the facts in this instance justify the ends. Whenever any corporation, whether it be a cement manufacturing one or otherwise, enjoys what practically amounts to a monopoly and apparently knowing that the State would require large supplies of its products, orders a substantial increase in the price of its product over night I believe the State is justified in using whatever means is at its disposal to cope with the situation," Lawson stated.

HYDRO-ELECTRIC PROJECT PLANNED IN NORTHWEST

Plans for a \$6,000,000 hydro-electric power development have been revealed by an application filed recently with the Washington state hydraulics office in Olympia for appropriation of 350 sec.-ft. of water from the Sauk River Skagit County, and for use of Sauk Lake as a reservoir, by the Pacific Development Company, of Olympia. Lars Langloie, Olympia hydraulics engineer, is president of the company and R. K. Tiffany, former state hydraulics supervisor, is consulting engineer. A concrete dam 220 ft. high and 1200 ft. long is to impound 38,000 acre-ft. of water in Sauk Lake reservoir, while a fall of 185 ft. is to be used in developing 73,580 theoretical horsepower of electric energy.

Sugarmen Iron & Metal Co., Ltd. of San Francisco has been incorporated. Directors are: I. E. Sugarmen, S. Fox and Louis H. Brownstone.

C., for surface condenser, air ejector, condensate pump, motor driven exciter set, switchboard panels and instruments at Puget Sound, Wash. Deposit of \$5 required for plans obtainable from Bureau.

ELLENBURG, Wash.—Until April 16, under Specification No. 507, bids will be received by the U. S. Bureau of Reclamation, Ellensburg, to furnish labor and materials and all work for the construction of earthwork, tunnels, and structures on division No. 3 of the North Branch Canal, Kittitas division, Yakima project, Wash. The work is located near Kittitas, Wash., a station on the Chicago, Milwaukee, St. Paul, and Pacific Railroad. Work will include 118,000 cu. yds. excavation, 8000 cu. yd. back fill about structures, 3400 cu. yds. concrete, placing 84,000 lbs. reinforced bars, laying 2600 lin. ft. of 18 to 72-in. precast concrete pipe, furnishing and erecting 43 M ft. b. m. timbering in tunnels, installing 8800 lbs. gates, gate lifts, structural steel, and other metal work. Specifications obtainable from above office.

HAWTHORNE, Nevada.—Until April 9, under Specification No. 6111, bids will be received by Bureau of Yards and Docks, Navy Department, Washington, D. C., for laundry equipment, washer, extractor tumbler ironer, presses, ironing boards, etc., at the naval ammunition depot, Hawthorne, Nevada; deposit of \$10 required for plans obtainable from above.

SAN FRANCISCO.—Until March 28, 10 A. M., under Schedule No. 928-30-227, bids will be received by Quarter-

master Supply Officer, General Depot, Fort Mason, to furnish and deliver 200 gals. paint drier; 85 gals. brown enamel primer; 255 gals. spar water resisting, spar varnish; patch, weld, rivet and clean interior of 40 steel drums, 38 of 50 to 55-gal. capacity, 1 of 72-gal. capacity and 1 of 100-gal. capacity. Further information obtainable from above.

SAN FRANCISCO.—Until April 7, 10 A. M., under Schedule No. 928-30-224, bids will be received by Quartermaster Supply Officer, General Depot, Fort Mason, to furnish 270 wrought metal hose clamps for 4-ply, 120 of 1½-in. brass equal to "Sherman" and 150 2-in. steel galvanized, equal to "Allen"; 10 sets couplings for 4-ply steam hose, cast brass; 18 wattour meters, 60-cycle, alternating current, 25 ampere, 110-115 volts, 2-wire with metal cover; miscellaneous packings; 500 porcelain electric key sockets; 100 double pole knife switches; 600 lbs. annunciator wire; 6,000 ft. rubber covered copper wire. Further information obtainable from above.

WASHINGTON, D. C.—Bids are being received by Bureau of Supplies & Accounts, Navy Department, Washington, D. C., to furnish and deliver miscellaneous supplies and equipment as noted in the following schedules, further information being available from the Navy Purchasing Officer, 100 Harrison St., San Francisco:

Bids Open April 1
Sch. 3042, Mare Island, 8,000 gals. raw tung oil.

Sch. 3047, Mare Island, 4 arc welding sets, motor-driven.

Sch. 3043, New York or San Francisco, 21 motor-driven engine lathes.

Sch. 3052, San Francisco, 2 motor trucks.

Sch. 3054, Mare Island, 1 steel forging, propeller shaft, 26,250 lbs.

Sch. 3057, Puget Sound, 77,000 ft. lighting and power cable, 18,000 ft. interior communication cable.

Sch. 3065, Norfolk, 100,000 rubber gaskets; Mare Island, 50,000 do.

PEARL HARBOR, T. H.—As previously reported, R. S. Chase, 987 Waiman St., Honolulu, T. H., at \$25,500 submitted low bid to Bureau of Yards and Docks, Navy Department, under Specification No. 8921 for extension of motor testing building at the naval operating base (air station), Pearl Harbor, T. H. Work includes earthwork, concrete, steel and iron work, tubular steel and hollow metal doors, steel windows, roofing and sheet metal work, woodwork, hardware, glazing, painting and electric lighting. Complete list of bids follows:
R. S. Chase, 987 Waiman St., Honolulu, T. H., item 1, \$25,500.

John Hansen Honolulu, T. H., \$26,392.

H. A. R. Austin, 313 A. & B. Bldg., Honolulu, T. H., \$26,950.

W. H. Walker, 821 Pilokoi St., Honolulu, T. H., \$27,231.

J. L. Young Engineering Co., Ltd., 1750 Young St., Honolulu, T. H., \$27,400.

Ames-Will, Ltd., Room 18, Pier 9, Honolulu, T. H., \$28,689.

Bitulthnic Paving Co. 854 Kaahumanu St., Honolulu, T. H., \$31,700.

Marks Constr. Co., Aloha Tower, Honolulu, T. H., \$33,000.

Yosuke Ando, 1303 Beretania St., Honolulu, T. H., \$37,628.

STOCKTON, San Joaquin Co., Cal.—Longview Dredge Co., First National Bank Bldg., Oakland, at \$689 cu. yd. awarded contract by U. S. Engineer Office, California Fruit Bldg., Sacramento, for dredging 1,772,000 cu. yds. of material from New York Slough and Suisun Bay.

SEATTLE, Wash.—As previously reported, Fitton & Livergreen, Coleman Bldg., Seattle, at \$178,700 submitted low bid to Bureau of Yards and Docks, Navy Department, Washington, D. C., under Specification No. 6053, to erect shop building, approximately 260 by 100 ft., and one-story storehouse, approximately 200 by 100 ft., having concrete foundations and floors, steel framing, brick and hollow tile walls, and built-up roofing, and a concrete seaplane runway at the naval air station, Seattle. Complete list of bids follows:
1, work complete; 2, storehouse only; 3, engine and overhaul shop; 4, seaplane runway:

Fitton & Livergreen, Coleman Bldg., Seattle, (1) \$178,700; (2) \$51,000; (3) \$123,000; (4) \$13,000.

Cristman & Snyder, Smith Tower, Seattle, (1) \$180,610; (2) \$52,733; (3) \$121,314.

Commercial Constr. Co., Arcade Bldg., Seattle, (1) \$184,869; (2) \$54,949; (3) \$123,991; (4) \$11,542.

W. T. Butler Central Bldg., Seattle, (1) \$186,129; (2) \$55,191; (3) \$124,753; (4) \$15,007.

W. B. Erskine, 4521 Corliss Ave., Seattle, (1) \$186,250; (2) \$514,114; (3) \$126,854; (4) \$7983.

Hendrickson-Alstrom Constr. Co., Securities Bldg., Seattle, (1) \$188,100; (2) \$52,490; (3) \$125,990; (4) \$15,920.

Halstrom & Halstrom Leary Bldg., Seattle, (1) \$191,841; (2) \$52,844; (3) \$124,357; (4) \$15,000.

Warrack Constr. Co., McDowell Bldg., Seattle, (1) \$195,198; (2) \$55,035; (3) \$131,500; (4) \$14,468.

West Coast Constr. Co., Lloyd Bldg., Seattle, (1) \$195,850; (2) \$53,406; (3) \$129,560; (4) \$13,400.

Western Constr. Co., Seaboard Bldg., Seattle, (1) \$198,325; (2) \$55,460; (3) \$132,675; (4) \$12,633.

E. A. Francis Constr. Co. Inc., Thompson Bldg., Seattle, (1) \$198,361; (2) \$56,587; (3) \$132,257; (4) \$55,171.

Johnson Bros., 1716 E. 66th St., Seattle, (1) \$201,500; (2) \$55,315; (3) \$132,647; (4) \$17,100.

Pacific States Constr. Co., Lloyd Bldg., Seattle, (1) \$202,105; (2) \$60,250; (3) \$138,740; (4) \$18,460.

Jenkins-Kaufman Thompson Bldg., Seattle, (1) \$202,250; (2) \$60,670; (3) \$129,580; (4) \$12,000.

J. W. Bailey Constr. Co., Empire Bldg., Seattle, (1) \$204,250; (2) \$57,175; (3) \$128,296; (4) \$20,579.

W. P. Thurston 4th and Bird Sts., Richmond, Va., (1) \$214,000; (2) \$75,000; (3) \$150,000; (4) \$30,000.

Syllaasen & Sando Arcade Bldg., Seattle, (1) \$217,161; (2) \$58,038; (3) \$139,380; (4) \$19,743.

Halbauer-La Bahn, Inc., 844 Rush St., Chicago, (1) \$218,148; (2) \$58,822; (3) \$145,041; (4) \$14,285.

SACRAMENTO, Cal.—U. S. Engineer Office, Calif. Fruit Bldg., Sacramento, rejects bids to remove from the San Joaquin river, across from Antioch, hulks of two burned freighters.

Chris Lauritzen of Antioch was low bidder in offers ranging from \$9155 to \$18,000.

SACRAMENTO, Cal.—Until March 25, 11 A. M., under Order No. 1780-1621, bids will be received by U. S. Engineer Office, California Fruit Bldg., to furnish and deliver one roll of tracing cloth, best grade, 42 inches wide by 24 yards long No. 150, "Excelsior," Keuffel & Esser Co., Cat. or equal.

SACRAMENTO, Cal.—Until April 1, 11 A. M., under Order No. 1692-1585, bids will be received by U. S. Engineer Office, California Fruit Bldg., Sacramento, to furnish and deliver one mo-

tor-generator electric arc welding set, for two individual welding circuits, each with a capacity of 400 amperes, variable voltage and the equipment necessary for two operators. Further information obtainable from above office.

HALLS AND SOCIETY BUILDINGS

MODESTO, Stanislaus Co., Calif.—Until March 26, 7:30 P. M., bids will be received by H. E. Gragg, city clerk, to erect two frame clubhouse buildings. Certified check 10% payable to Mayor required with bid. Plans on file in office of City Engineer Frank Rossi.

Plans Being Figured.
BUILDING Cost, \$400,000
OAKLAND, Alameda Co., Cal. Location Withheld.
Six-story and basement Class C steel frame and concrete building.
Owner—Salvation Army.
Architect—Douglas Stone, 62 West-ern Power Bldg., Oakland.

Plans To Be Prepared.
MEMORIAL BLDG. Cost, \$65,000
EMERYVILLE, Alameda Co., Cal.
Two-story and basement Class C Veterans' Memorial Building.
Owner—County of Alameda.
Architect—Not Yet Selected.

Bids To Be Taken March 17—To Be Opened March 26.
LODGE BLDG. Cost, \$75,000
SAN FRANCISCO, Valencia St. near Market St.
Three-story and basement reinforced concrete and steel lodge building (50x165-ft.).
Owner—Independent Order of Foresters.
Architect—Harold Stoner, 1481 Burlingame Ave., Burlingame.

Preliminary Plans Prepared.
STORE & LODGE Cost, \$—
GILROY, Santa Clara Co., Calif. N. Monterey St.
Two-story concrete store and lodge building (190x55-ft.).
Owner—Mainero Bros., Gilroy.
Architect—Not Selected.
Lessee—Elks Club (2nd story).
Lessee—B. Barshinger (1st story).
Preliminary plans have been prepared by Albert Roller, Crocker First National Bank, San Francisco.

FORTUNA, Humboldt Co., Calif.—County supervisors reject bids to erect American Legion Memorial Building at Fortuna. Plans will be revised and new bids asked. Newton Ackerman, architect, 102 W. Fourth St., Eureka.

ARCATA, Humboldt Co., Calif.—County supervisors reject bids to erect American Legion Memorial Bldg. at Arcata. Plans will be revised and new bids asked. Newton Ackerman, architect, 102 W. 4th St., Eureka.

Additional Sub-Contracts Awarded.
CLUB Contract price, \$237,000
SACRAMENTO, Sacramento Co., Cal. Ninth and M Sts., facing Capitol Square.
Four-story reinforced concrete club.
Owner—Sutter Club.
Architect—Dean and Dean, California State Life Bldg., Sacramento, and Stark & Flanders, Oschner Bldg., Sacramento, associated.
Contractor—George D. Huddutt, Inc., 1915 S. St., Sacramento.
Elevators—Spencer Elevator Co., 166 7th St., San Francisco.
Glazing—W. P. Fuller & Co., 301 Mission St., San Francisco.
Painting—Wilcolon and Wilson, 1724 34th St., Sacramento.
As previously reported, tile and mar-

ble awarded to H. P. Fischer Tile & Marble Co., 1219 J St., Sacramento; mill work to Friend & Terry, 2nd and S St., Sacramento; steel sash to Michel & Pfeffer Iron Works, Harrison and Tenth Sts., San Francisco; heating and ventilating to Latourrette-Fical Co., 907 Front St., Sacramento; plumbing and electric work to Luppen & Hawley, 3216 J St., Sacramento; concrete piles to Raymond Concrete Co., Hunter-Dulin Bldg., San Francisco.

HOSPITALS

Plans Completed.
ADDITIONS Cost, \$30,000
SAN LUIS OBISPO, San Luis Obispo Co., Calif.

Additions to hospital (Class C brick construction).

Owner—Dr. Gallup & Mugler, San Luis Obispo.
Architect—Miller & Warneke, Financial Center Bldg., Oakland.

In all probability the contract for this work will be awarded to W. J. Smith, 1115 Higuera St., San Luis Obispo.

Bids Being Taken.
HOSPITAL Cost, \$200,000
TUCSON, Arizona.

One-story concrete modern hospital.
Owner—Southern Pacific R. R. Co., 65 Market St., San Francisco.

Architect—A. I. Coffey and Martin J. Rist, Phelan Bldg., San Francisco.

ATWATER, Merced Co., Cal.—Dr. W. C. Cotton associated with local interests proposes the erection of a modern plant in Atwater to cost \$85,000, including equipment.

To Be Done By Day's Work By Owner
ALTERATIONS Cost, Approx. \$15,000
ELDRIDGE, Sonoma Co., Cal.
Alterations and additions to State Home.

Owner—State of California.
Architect—Geo. B. McDougall State Architect, Public Works Bldg., Sacramento.

WHITTIER Los Angeles Co., Cal.—Until March 24, 7:30 P. M., bids will be received by Debbie E. Allen, city clerk, for one Alpine sun lamp, 110 volts alternating current on movable floor stand, complete with transformer, lamp socket attachment plug leads and two pair of goggles. Further information obtainable from Cora A. Mathis, superintendent of the Murphy Memorial Hospital, East Bailey St. Certified check for 10%.

Preparing Working Drawings.
ADDITION Cost, \$150,000
REDWOOD CITY, San Mateo County, Cal. County Hospital Grounds at Eureka.

Wing addition to county hospital.
Owner—County of San Mateo, Elizabeth M. Keese, county clerk.
Architect—Will H. Toepke, Cal Bldg., San Francisco.

SANTA BARBARA, Cal.—Until 10 A. M., April 7, bids will be received by Board of Supervisors of Santa Barbara County for furnishings for new nurses' home building at county hospital. Cost, \$7000.

Leland & Haley, engineers, 58 Sutter St., San Francisco. Newton Ackerman, architect, 102 W. 4th St., Eureka.

Complete list of bids, all taken under advisement, follows:

Mercer-Fraser Co.....\$14,400

Scott Co., San Francisco.....16,567

George C. Bell, Oakland.....17,190

EUREKA, Humboldt Co., Cal.—Mercer-Fraser Co., Eureka, at \$6,900 awarded contract by county supervisors to construct connecting corridor between Detention Home and new county hospital. Dolson Electric Shop, Eureka, awarded contract for wiring. Newton Ackerman, architect, 102 W. 4th St., Eureka.

Plans Being Completed.
LABORATORY Cost, \$20,000
SAN FRANCISCO. Sutter and Scott Streets.

One-story brick laboratory bldg.
Owner—Mt. Zion Hospital, premises.
Architect—Arthur Brown, Junior, 251 Kearny St.

Plans will be ready for bids in about ten days. Previously reported that project would be of frame and stucco construction.

EUREKA, Humboldt Co., Cal.—W. J. Steeves, 2303 Union St., Eureka, at \$7,977 awarded contract by county supervisors to erect two new tuber-

cular cottages and a school cottage at the county hospital grounds. Newton Ackerman, architect, 102 W 4th St., Eureka.

EUREKA. Humboldt Co., Cal.—County supervisors reject bids for new steam line in connection with county hospital plant in course of construction and new bids will be asked at once. Mercer-Fraser Co., Eureka, was low bidder at \$14,400. New bids have been ordered called under revised specifications. Newton Ackerman, 102 W 4th St., Eureka, architect. Plans on file in office of clerk and obtainable from architect.

HOTELS

Sub-Bids Being Taken.
HOTEL Cost, \$1,500,000
SAN DIEGO, San Diego Co., Cal.
Point Loma.
Nine-story and double basement Class A reinforced concrete hotel (260x 200 feet).
Owner—Leon Reich, 434 North Colorado St., Los Angeles.
Architect—Wm. H. Kraemer, 3923 W. Sixth St., Los Angeles.
Contractor—Hart Bros. Constr. Co., 3921 W. Sixth St., Los Angeles.

Preliminary Plans Being Prepared.
HOTEL Cost, \$200,000
SONORA, Tuolumne Co., Cal. Location not selected.
Four-story concrete class C hotel (100 rooms, each with shower and bath)
Owner—Edwards & Schary, et al.
Architect—Edwards and Schary, 605 Market St., San Francisco.

Planned.
HOTEL Cost, \$2,500,000
LOS ANGELES, Cal. Head of Vine Street.
Seven-story Class A hotel (300 guest rooms).
Owner—Hollywood Ritz-Carlton Holding Company.
Architect—Gordon B. Kaufmann, 610 Union Bank Bldg., Los Angeles.

Preparing Working Drawings.
HOTEL Cost, \$500,000
EUREKA, Humboldt Co., Cal. NW 4th and F Sts.
Eight- or nine-story 200-room modern hotel building.
Owner—Pickwick Co. (Ed. Thompson, 5th and Mission Sts., San Francisco, in charge).
Architect—O'Brien Bros. and W. D. Feugh, 315 Montgomery St., San Francisco.

As previously reported, soundings are being made by Mercer-Fraser Co., Eureka. Plans will be ready for bids in two weeks.
(3577) 1st report Aug. 12; 7th, Jan. 9, 1930. i0

ICE AND COLD STORAGE PLANTS

Plans Being Prepared.
COOLING PLANT Cost, \$75,000
ORANGE, Orange Co., Cal.
Three-story reinforced concrete pre-cooling plant (70x80-ft.).
Owner—Consolidated Orange Growers, Engineers—Gay Eng. Corp., 2650 Santa Fe Ave., Los Angeles.
Note—Additional expenditure, approximately \$50,000, for ice equipment to be made later.

Preparing Plans.
MFG. PLANT Cost \$30,000
(Including equipment)
COACHELLA, Riverside Co., Cal.
One-story reinforced concrete ice mfg. plant.
Owner—Imperial Ice & Development Company.
Engineers—Gay Eng. Corp., 2650 Santa Fe Ave., Los Angeles.

Contract Awarded.
STORAGE PLANT Cost, \$—
COACHELLA, Riverside Co., Cal.
Reinforced concrete ice and cold storage plant (50 tons per day capacity).
Owner—Imperial Ice & Development Company.
Architect—None.
Contractor—Gay Engineering Co., 2650 Santa Fe Ave., Los Angeles.

Plans Being Prepared—To Be Done By Day's Work.
ADDITION Cost, \$300,000
TACOMA, Washington.
Four-story concrete and hollow tile cold storage plant addition (165x 130-ft.)
Owner—City of Tacoma.
Engineer—Engineering Dept., Tacoma City Port Commission, George W. Osgood, manager.

POWER PLANTS

FRESNO, Fresno Co., Cal.—San Joaquin Light & Power Co., Fresno, has announced immediate plans for power plant construction totaling \$500,000 and more, not including a steam plant for which plans are being prepared. Work has been commenced on the following:
Substation at Camden, near Riverdale, to cost \$105,000.
Substation at Biola, to cost \$96,000.

San Joaquin Lumber Company of Stockton has been admitted to membership in the Associated Leaders of Lumber & Fuel Dealers of America. It is announced by W. H. Falconbury, president of the company.

BETHLEHEM STEEL NET INCOME DOUBLED IN YEAR

Net income of the Bethlehem Steel Corporation, which recently acquired three plants on the Pacific coast, was \$42,242,950 in 1929, or more than double the income during 1928, according to the annual report to stockholders issued by Charles M. Schwab, chairman of the board of directors. This net was arrived at after allowing more than \$11,000,000 for interest charges, and more than \$14,000,000 for depreciation and depletion.

Gross sales for the year were also far above those of 1928, Chairman Schwab reported. Sales in 1929 totaled \$342,516,207 and the gross orders booked amounted to \$369,536,888, or more than \$80,000,000 in excess of 1928.

After provision was made for preferred stock dividends of \$7,000,000 and common stock dividends of \$15,600,000, the surplus amounted to \$13,642,950. Earnings on preferred dividends were equivalent to \$19.50 per share on the 1,800,000 shares of common stock outstanding at the beginning of the year and \$15.50 per share on the average number of shares of common stock outstanding during the year.

Between December 31, 1928, and February 1, 1930, Bethlehem paid or retired by purchase or redemption \$33,569,977 of its funded debt out of \$199,421,172 outstanding at the end of 1928.

Current assets of the company, as of December 31, 1929, were \$228,171,775, as against current liabilities of \$48,926,119, or a ratio of 4.6 to 1.

RUSSIAN COMPETITION REDUCES SWEDISH LUMBER PROFITS

Competition from abroad, particularly from Russia, resulted in a reduction of prices on lumber manufactured in Sweden in 1929, according to a report from Consul H. C. Struve to the Lumber Division of the Department of Commerce. Mills preferred to reduce prices rather than to keep the lumber in stock for future sales.

Russian competition was encountered, not only in foreign markets, but also in shipments of pulpwood from Russia into Swedish districts which already have an ample local supply of timber for the industries existing there at present. Inasmuch as lumber and pulp operations are usually carried on by the same concerns, this latter phase of Russian competition is of vital importance to the Swedish lumber industry.

According to Consul Struve, Swedish lumber shipments during 1929 were larger but prices were lower than since 1915.

ENGINEERS MEET IN DETROIT JUNE 9 TO 12

The Professional Divisions of The American Society of Mechanical Engineers have developed a splendid technical program for the Detroit Semi-Annual Meeting, to be held at the Book-Cadillac Hotel, June 9 to 12.

The program will contain twenty-one technical sessions. The Divisions that have planned sessions are the following:

Applied Mechanics, Machine Shop Practice, Printing Industries on paper and pulp, Wood Industries, Management, Materials Handling, and Aeronautics, with a symposium on "Air Transportation."

Engineering News Section

BRIDGES

REDWOOD CITY, San Mateo Co., Calif.—April 14 is date set by city council to construct culverts in various sections of the city.
W. A. Price, city clerk. C. L. Dimmitt, city engineer.

REDWOOD CITY, San Mateo Co., Calif.—April 14 is date set by city council to vote bonds of \$34,000 to finance construction of concrete bridges within the city limits.
W. A. Price, city clerk. C. L. Dimmitt, city engineer.

SAN JOAQUIN COUNTY, Cal.—Jacobs & Pottiani, 337 17th St., Oakland, at \$48,875, awarded contract by state Highway Commission to construct four reinforced concrete girder bridges between Lodi and Stockton: one across Calaveras river, consisting of three 34-ft. spans; one across Mother creek, consisting of three 27-ft. spans; one across Bear creek, consisting of three 30-ft. spans, and one across Live Oak creek, consisting of two 30-ft. spans. Project involves: 750 cu. yds. rdwy. excav. (detours); 115 cu. yds. struc. excav.; detour ridges, complete; remove existing bridges; 275 tons crusher gravel on road (detour surfacing); 1468 cu. yds. class A cem. conc.; 31 cu. yds. class E lin. conc.; 240,000 lbs. reinf. steel; 140 lbs. phosphor bronze expansion lugs; 1 lot miscellaneous items of ork.

SAN JOSE, Santa Clara Co., Cal.—City Engineer Wm. Popp making surveys for four bridges to be constructed during the current year, two in ark Ave., one over Los Gatos creek and another over Guadalupe creek. Third structure will link West Virginia St. and Home St. and the fourth will replace a wooden structure over uadalupe creek in Auzerals St.

MARTINEZ, Contra Costa Co., Cal.—Bids will be asked at once by county supervisors to construct concrete iver in Buchanan St. in vicinity high school at Pittsburg; estimated st \$2,625. R. R. Arnold, county suror.

MARIN COUNTY, Calif.—Following is received March 19 by State Highway Commission to construct an oved road crossing over the tracks of the Northwestern Pacific Ry. at Forbes ildon, consisting of one 46-ft. steel m span, and 190-ft. timber trestle pple bents:
cca & Coletti, San Rafael.....\$16,170
T. Howe, Santa Rosa.....17,052
L. Proctor, Santa Rosa.....17,919
B. McGowan, San Francisco 19,725
derickson-Watson Co., Oak-land.....19,963
aly-Thibault Const. Co., San Francisco.....21,365

DREDGING, HARBOR WORKS & EXCAVATIONS

TOCKTON, San Joaquin Co., Cal.—Longview Dredging Co., First Natl Bank Bldg., Oakland, at \$0.89 yd. awarded contract by U. S. Engineer Office, California Fruit r., Sacramento, for dredging 1,000 cu. yds. of material from New rk Slough and Suisun Bay.

ELLENBURG, Wash.—See "Government Work and Supplies," this issue. Bids wanted for earthwork, tunnels and structures in connection with North Branch Canal, Kittitas Division, Yakima project.

SAN DIEGO, Cal.—City Manager F. M. Lockwood has reported to the city council that a bulkhead on the Mission Beach frontage of Mission Bay and a dam at the inlet of the bay would cost approx. \$286,000. The bulkhead cost alone would be \$180,600. The dam would provide sufficient depth to float small craft on the bay at all times. The proposed bulkhead would be of reinforced concrete piling, with six-foot walls and balustrade, and built in two sections, viz.: north section, 6000 ft. long, costing \$114,000; and the south section, 500 ft. long costing \$66,600.

IRRIGATION PROJECTS

NYSSA, Ore.—Owyhee Irrigation District, bids opened March 11, report the following as low bidders in connection with concrete-lined tunnels, roads and distributing system of the Owyhee project in Oregon and Idaho: First alternate schedules 1 to 4, no awards made.

Schedule No. 5, F. E. Connolly, San Francisco, \$982,566.

Schedules 6 and 7, J. F. Shea Co., Portland, \$1,569,911.20.

Schedule 8, S. Magoffin Co., North Vancouver, B. C., \$530,684.

Schedule 9, General Constr. Co., Seattle \$7916.

Eleven bids were submitted.

The work involves furnishing labor and materials and performing all work for the construction of concrete-lined tunnels and roads for the distribution system of the Owyhee project, Oregon and Idaho. The work is located near Nyssa, Ore., on the Oregon Short Line Railroad. The work consists of the construction of 2 14-ft. by 0-in. diameter tunnel, 13,722 ft. long, and a 9 ft. by 4 in. diameter tunnel, 33,307 feet long; or a 16 ft. by 7 in. diameter tunnel 13,722 ft. long, and a 9 ft. by 3 in. diameter tunnel 21,920 ft. long, and appurtenant roads and structures. The principal items and the maximum quantities involved are as follows: (1) 280,000 cu. yds. of all classes of tunnel excavation; (2) 114,000 cu. yds. of all classes of excavation other than tunnel excavation; (3) 23,000 tons of concrete in tunnel lining; (4) 1600 cu. yds. of pressure grouting; (5) laying 600 lin. ft. of 12-in. and 18-in. corrugated metal pipe; (6) constructing 52,000 lin. ft. of tunnel and outlet closed drains; (7) furnishing and erecting 330 M ft. b. m. timbering in tunnels; (8) furnishing and erecting 209,000 pounds structural steel in tunnels.

TURLOCK, Stanislaus Co., Calif.—Until Apr. 7, 3 P. M., bids will be rec. by Anna M. Sorensen, secretary, Turlock Irrigation District, for construction in Improvement District No. 3-A, involving:

Schedule No. 1.

Section No. 1. Consisting of approximately 32,344 sq. ft. of 2-inch thick concrete canal lining.

Schedule No. 2.

Consisting of approximately 40 lin.

ft. of reinforced 30-in. diameter concrete pipe.

Certified check 5% payable to district required with bid. Plans obtainable from R. V. Meikle, chief engineer.

YUBA City, Sutter Co., Cal.—Engineer Milo Williams has submitted preliminary estimates of cost to committee seeking formation of the Sutter Irrigation District, comprising 22,000 acres in the peach belt: (costs noted are based "per acre")

Main canal, carrying 275 to 300 second feet.....	\$10.40
Concrete pipe lines to each owner	22.55
Rights of way.....	3.60
Overflow reservoirs	2.00
Drainage outlet	1.00
Auxiliary pump, Feather river.....	3.00
Pumping plants on canal.....	2.60

Total

Plus 10 per cent for engineering, management, attorney fees and other expenses.....\$ 4.52

Grand total

STREET LIGHTING SYSTEMS

TRACY, San Joaquin County, Cal.—Butte Electric & Manufacturing Co., 555 Folsom St., San Francisco, at \$11,955 awarded contract by city council (31) to install ornamental street lighting system, comprising 63 single light standards, together with underground system, in 11th St., bet. west boundary of West Park subdivision and East St.

SAN FRANCISCO.—Board of Supervisors by a vote of 12 to 4 authorize that one-third of the 700 lighting standards to be installed along new boulevards shall be manufactured of concrete and two-thirds of metal. Open specifications will be prepared by City Engineer M. M. O'Shaughnessy, providing for five types of standards as follows: Cast iron, concrete, bronze and concrete, all steel and taper tube metal.

REDWOOD CITY, San Mateo Co., Cal.—Petitions are being circulated for presentation to the city council for single-lamp electroliter standards in Brewster, Broadway and Hopkins Sts., as far west as Jeter St. Proceedings have already been started by the city council for extension of the electroliter system (2-light standards) in Broadway and Brewster Sts., west of El Camino Real as far as Birch St. C. L. Dimmitt is city engineer.

MACHINERY AND EQUIPMENT

SELMA, Fresno Co., Cal.—Trustees of the Selma Union High School District will provide funds in the 1930-31 budget to finance purchase of additional equipment for the school shop departments.

SACRAMENTO, Cal.—H. V. Carter Co., Sacramento, at \$744.40 awarded contract by city council to furnish tractor for use on municipal golf course.

SAN FRANCISCO—Until March 31, 3 P. M., bids will be received by Leonard S. Leavy, city purchasing agent, 270 City Hall, under Proposal No. 570, to furnish and deliver 200 rolled steel car wheels, diameter 34 inches, for Municipal Railway System. Specifications and further information obtainable from city purchasing agent.

SAN FRANCISCO—Link Belt-Meesse and Gottfried Co., 3100 19th St., at \$44,612 awarded contract by Board of Public Works to furnish and deliver a portable gravel plant for the Coast Range Division of the Hetch Hetchy Project, under Contract No. 121.

HAWTHORNE, Nevada—Until April 9, under Specification No. 6111, bids will be received by Bureau of Yards and Docks, Navy Department, Washington, D. C., for laundry equipment, washer, extractor tumbler ironer, presses, ironing boards, etc., at the naval ammunition depot, Hawthorne, Nevada; deposit of \$10 required for plans obtainable from above.

SIERRA MADRE, Los Angeles Co., Cal.—Until 5 P. M., March 31, bids will be received by the city council for gasoline motor-driven truck having a capacity of $\frac{1}{2}$ tons, four speed transmission (4 forward and 1 reverse), four wheel mechanical brakes; spiral bevel gear rear axle; dual rear wheels; provision for power take off; 13 $\frac{1}{2}$ -in. wheel base; stake body and closed cab; over all chassis dimensions of 74 $\frac{1}{2}$ inches by 18 $\frac{1}{2}$ inches. Specifications obtainable from E. A. Green, city clerk.

SACRAMENTO, Cal.—Until April 1, 11 A. M., under Order No. 1692-1685, bids will be received by U. S. Engineer Office, California Fruit Bldg., Sacramento, to furnish and deliver one motor-generator electric arc welding set, for two individual welding circuits, each with a capacity of 400 amperes, variable voltage and the equipment necessary for two operators. Further information obtainable from above office.

OAKLAND, Cal.—J. E. French Co., Oakland, awarded contract by East Bay Municipal Utility District to furnish one 1 $\frac{1}{2}$ -ton Dodge Bros. truck chassis.

VALLEJO, Solano Co., Cal.—Until March 29, 11 A. M., bids will be received by Alf. E. Edgcombe, city clerk, to furnish two light trucks with pick-up bodies, delivered to Municipal Corporation Yard. Cert. check 10% payable to city required with bid. Specifications obtainable from T. D. Kikenny, city engineer.

RAILROADS

SAN FRANCISCO—Until March 31, 3 P. M., bids will be received by Leonard S. Leavy, city purchasing agent, 270 City Hall, under Proposal No. 570, to furnish and deliver 200 rolled steel car wheels, diameter 34 inches, for Municipal Railway System. Specifications and further information obtainable from city purchasing agent.

STOCKTON, San Joaquin Co., Cal.—Southern Pacific R. R. has filed application with Interstate Commerce Commission seeking authorization to construct an extension of the line at the intersection of Los Angeles Ave. and the Borden Highway near the west city limits of Stockton westerly to the east bank of Burn's Cut-off, a distance of 3.693 miles.

HOLTVILLE, Imperial Co., Cal.—Southern Pacific Co. will start work about April 15 on construction of the rail extension from Sandia to Holtville. The present line will be extended three miles, paralleling the paved highway between these points. Rails to be laid include 80 and 90-lb. stock. Estimated cost, about \$200,000. A crew of 150 men will be used.

FIRE ALARM SYSTEMS

OAKLAND, Cal.—Until March 27, 12 noon, bids will be received by Frank C. Merritt, city clerk, to furnish and install combined automatic and manual telephone switchboard for fire alarms at central station. Est. cost \$8500. Plans on file in office of clerk.

SALINAS, Monterey Co., Cal.—Acme Traffic Signal Co., Los Angeles, at \$4,349 submitted only bid to city council to furnish and install traffic signals at Main and Sausal Sts., Main and San Luis and North Main and Market Sts. Taken under advisement until April 7. Howard Cozzens, city engineer.

FIRE EQUIPMENT

CARMEL, Monterey Co., Cal.—Election will be held April 14 to vote bonds of \$15,000 to finance purchase of motor fire engine and other equipment for municipal fire department.

MISCELLANEOUS SUPPLIES AND MATERIALS

SAUSALITO, Marin Co., Cal.—Until April 7, 8 P. M., bids will be received by W. Z. Tiffany, city clerk, to furnish street signs and standards, involving 127 standards complete and 248 porcelain enamel street signs. Certified check 10% payable to Town required with bid. Specifications on file in office of clerk.

BERKELEY, Alameda Co., Cal.—Until March 31, 8 P. M., bids will be received by Clara F. Andrews, secretary, Board of Education, 2325 Milvia St., to furnish and deliver school supplies for school year 1930-31. Specifications obtainable from secretary.

SAN FRANCISCO—Until April 21, 3 P. M., under Proposal No. 564, bids will be received by Leonard S. Leavy, city purchasing agent, 270 City Hall, to furnish under Class 7, hardware and castings and under Class 11, lumber, as required by the city from time to time during the semi-annual term commencing July 1 and ending Dec. 31, 1930. Specifications and further information obtainable from above.

SAN FRANCISCO—Until April 7, 3 P. M., bids will be received by Leonard S. Leavy, city purchasing agent, 270 City Hall, to furnish and deliver as may be ordered during the tri-annual term commencing May 1 and ending August 31, 1930: linseed oil, shellac, turpentine, lead, litharge, mineral brown and putty. Specifications and further information obtainable from above.

SAN JOSE, Santa Clara Co., Cal.—Until April 8, 8 P. M., bids will be received by Walter L. Bachrodt, secretary, Board of Education, to furnish and deliver not less than one carload of chainlink fencing material. Specifications obtainable from secretary.

BAKERSFIELD, Kern Co., Cal.—Until April 10, 730 P. M., bids will be received by Florence E. Porter, Secretary, Bakersfield School District, to furnish supplies for school year ending June 30, 1931. Specifications obtainable from secretary at 1660 K St., Bakersfield.

SANTA ANA, Orange Co., Cal.—Until 730 P. M., March 31, bids will be received by the city council for the furnishing of the following cast iron water pipe:

- (1) 15,000 lin. ft. of 4-in. diameter cast iron pipe;
- (2) 11,100 lin. ft. of 6-in. diameter cast iron pipe;
- (3) 4500 lin. ft. of 8-in. diameter cast iron pipe;
- (4) 3000 lin. ft. of 10-in. diameter cast iron pipe;
- (5) 6300 lin. ft. of 12-in. diameter cast iron pipe.

Certified check or bond, 10%. E. L. Vegely, city clerk.

RESERVOIRS AND DAMS

ANTIOCH, Contra Costa Co., Cal.—Until March 31, 8 P. M., bids will be received by J. E. McElheney, town clerk, to enlarge municipal reservoir 2 $\frac{1}{2}$ miles south of Antioch. Certify check 10% payable to Town Clerk required with bid. Plans on file in office of clerk. E. L. O'Hara, city eng.

PIPE LINES, WELLS, ETC.

CALIFORNIA—Coast Counties Gas & Electric Co. has withdrawn application filed with State Railroad Commission seeking authorization to construct a natural gas transmission line from Kettleman Hills oil field to Richmond, Contra Costa County.

WILMINGTON, Los Angeles Co., Cal.—Southern Counties Gas Co. will start work at once on a gas main to serve Wilmington and Terminal Island, in the neighborhood of the Fox plant. Estimated cost, \$32,000.

SAN FRANCISCO

SAN LUIS OBISPO, Cal.—Producers Pipe Line Co. has started construction of a pipe line from the Kern County oil fields to Port San Luis paralleling its present line which was built 20 years ago. The work will cost about \$1,000,000. The Producer's Pipe Line Co. is owned by the Union Oil Co.

SEWERS AND SEWAGE DISPOSAL PLANTS

REDWOOD CITY, San Mateo Co., Calif.—April 14 is date set by city council to vote bonds of \$5,000 to finance construction of storm sewers in various streets.

FRESNO, Fresno Co., Cal.—Until April 4, 2 P. M., bids will be received by D. M. Barnwell, county clerk, to construct sewer connecting Fresno County General Hospital with city sewer system, involving: 8926 ft. 12-in. and 334 ft. 6-in. sewer pipe and 15 manholes. Certified check 10% payable to Chairman of Board of Supervisors required with bid. Plans obtainable from County Surveyor Chris. P. Jensen, Holland Bldg., Fresno.

SAN FRANCISCO.—Bureau of Engineering of the Department of Public Works is preparing plans for the following sewer projects to be financed from bond issue funds:

College Hill tunnel sewer, extending from the Mission viaduct to Valencia and Army Sts., \$300,000.

Fillmore Street main sewer, section "B" to be laid in 10th and Fell Sts. from Harrison St. to Van Ness Ave., \$105,000.

Fillmore St. main sewer, section "D," extending from Laguna and Grove Sts. to Turk and Steiner Sts., \$30,000.

Fillmore St. main sewer, section "C," extending from Fell Street and Van Ness Ave. to Laguna and Grove Sts., \$80,000.

Geary street and 23rd Ave. sewer, extending from 27th Ave. and Geary St. to 23rd Ave. and Lake St., \$71,000.

STEKE, Contra Costa Co., Cal.—Until March 27, 8:30 P. M., bids will be received by John Sandvick, secretary, Stege Sanitary District, to construct sewers in Block M of Berkeley Park, under Improvement Plan No. 11, involving:

- 311 ft. 6-inch vitrified sewer pipe;
- 52 ft. 4-inch vitrified sewer pipe;
- 2 manholes;
- 2 lampholes.

Certified check 10% payable to district required with bid. Plans obtainable from Ross L. Calfee, district engineer, 322 Arlington Ave., Berkeley.

CARPINTERIA, Santa Barbara Co., Cal.—F. L. Johnson, consulting engi-

neer, 23 W. Figueroa St., Santa Barbara, has announced that bids will be asked within the next few weeks for the construction of the Carpinteria sewer system. Bids will probably be asked for in three contracts, viz.: Laying of the sewer mains and collecting systems, another for the ocean outfall and the third for the pumping plant and sump. The ocean outfall will be 2500 ft. in length. Bids will probably be asked separately for the sewer pipe. The total estimated cost is \$90,000.

SEBASTOPOL, Sonoma Co., Cal.—Until April 7, bids will be received by city council to construct sewage disposal plant for which bonds of \$22,000 have been voted to finance. Plans obtainable from C. E. Mueller, city engineer.

GALT, Sacramento Co., Cal.—Until March 29, bids will be received by Galt Sanitary District to construct sewer system, pumping plant and sewage disposal works. Plans obtainable from the secretary at the district at Galt.

WATER WORKS

NODESTO, Stanislaus Co., Calif.—Until March 26, 7:30 P. M., bids will be received by H. E. Gragg, city clerk to furnish and deliver:

- 1,125 ft. 2-in. galv. pipe;
- 105 ft. 2½-in. galv. pipe;
- 155 ft. 1½-in. galv. pipe;
- 265 ft. 1¼-in. galv. pipe;
- 580 ft. 1-in. galv. pipe;
- 1,800 ft. ½-in. galv. pipe.

Bids will also be considered for a miscellaneous supply of fittings as more fully described in the official proposal.

Certified check 10% payable to May. or of city required with bid. Frank Rossi, city engineer.

CALISTOGA, Napa Co., Cal.—Town trustees have taken under advisement prices offered on 4-in. pipe and fire hydrants. Those submitting prices were: Peerless Plumbing Supply Co., Tay-Holbrook, Inc., Crane Co., and Grinnel Co. of the Pacific.

ARCADIA, Cal.—At an election March 11 the city rejected a proposal to issue bonds of \$200,000 to finance water improvements and extensions to system.

ST. HELENA, Napa Co., Calif.—De Golyer and Bruce, Federal Telegraph Bldg., Oakland, at \$3,109 submitted low bid to the town trustees to replace certain water mains with bell and spigot cast iron pipe and fittings and to replace all household meter connections with new pipes and valves, together with new connections for future uses, in Madrona Ave., Adams

and Spring Sts., Oak Ave. and Pope St. Other bids: Harry Thoren, St. Helena, \$3,619; F. Myers, Richmond, \$4,735. Taken under advisement.

Wane c. i. pipe at \$1,432.35.

FRESNO, Fresno Co., Cal.—E. W. Redmond has been awarded a contract by the county supervisors at 35c ft. to install 4500 ft. of water piping at the Wish-1-Ah Sanitarium near Aubrey.

ORLAND, Glenn Co., Cal.—Until April 7, 8 P. M., bids will be received by E. W. Parlin, town clerk, to furnish and deliver f. o. b. Orland:

- 100 ft. cast iron 6-in. soil pipe;
- 770 ft. cast iron 4-in., 12 or 18 ft. lengths;
- 5 4-in. cast iron gate valves.

- 1 cross cast iron 8x8x4x4;
- 2 3-in. cast iron plugs;
- 3 4-in. cast iron tees;
- 3 Greenburg 4-in. hydrants with 24-in. burries;
- 1 4-in. plug topped for 2½-in. pipe.

Early delivery is desired. Further information obtainable from clerk.

PLAYGROUNDS & PARKS

MARYSVILLE, Yuba Co., Calif.—Yuba-Sutter Post, American Legion, plans to grade 6-acre area for playground purposes. It is proposed to start the improvements this month.

STREETS AND HIGHWAYS

MONTEREY, Monterey Co., Cal.—Until April 1, 7 P. M., bids will be received by Clyde A. Dorsey, city clerk (2940) to improve Camino Bienvenida and Via Mirada, involving 2½-inch asphalt conc. pave on existing macadam base and Copa Del Oro, involving grading; 2½-in. asphalt conc. base pave, with 1½-in. asphalt conc. surface, conc. curbs and gutters, 5 catchbasins with 12-in. pipe connections. 1911 Act. Bond Act 1915. Cert. check 10% payable to city required with bid. Plans on file in office of clerk.

SALINAS, Monterey Co., Cal.—Until March 23, 10 A. M., bids will be received by C. F. Joy, county clerk, to construct Salinas-Monterey road from Salinas to Hilltown, in Supervisor District No. 2. Plans obtainable from County Surveyor Howard Cozens.

SALINAS, Monterey Co., Cal.—Until March 23, 10 A. M., bids will be received by C. F. Joy, county clerk, to grade and surface portions of San Miguel Canyon road in Supervisor District No. 1. Plans obtainable from County Surveyor Howard Cozens.

MARTINEZ, Contra Costa Co., Cal.—Until March 29, 10 A. M., bid will be received by R. L. Boyer, clerk, Alhambra Union High School District, to grade school site for Martinez Junior High School in the Brown Tract. Certified check 10% payable to clerk of district required with bid. Specifications obtainable from R. R. Arnold, county surveyor at Martinez.

REDWOOD CITY, San Mateo Co., Calif.—April 14 is date set by city council to vote bonds of \$9,000 to finance opening and paving of Warwick Street.

ANAHEIM, Orange Co., Cal.—Until 8 P. M., April 8, bids will be received by the city council to improve South Palm St. from West Broadway to Vermont Ave., involving 6-in. asphalt conc. pavement, curb, walk, gutter, 6-inch class A conc. driveways and approaches, corr. iron pipe water ways, gas service lines, etc. 1911 Act. Edw. B. Merritt, city clerk, E. P. Hapgood, city eng. Est. cost \$43,000.

STANDARD WIRING SPECIFICATIONS ARE PROPOSED

Maintaining that a majority of new buildings are inadequately wired for electricity and that usual wiring specifications do not allow for even a 5-year growth in lighting practice, the electrical industry is at work on a program of closer cooperation between architects and power companies.

Initial step will be the distribution of suggested wiring specifications for the guidance of architects, drawn up by the National Electric Light Association with the aid of the American Institute of Architects. In addition, several power companies are developing "lighting service departments" staffed with illuminating engineers to advise local architects. Additional cost of installing N.E.L.A. specifications is placed at about 1% of average building's cost. Sponsors claim that this move should eliminate money waste in altering wiring circuits after a building is completed. Many of New York's skyscrapers, they claim, have been found inadequately wired even before occupancy and tenants have demanded thousands of dollars' worth of alterations before moving in.

A "Pittsburg" Automatic Water Heater installed in the Home indicates high quality throughout.

Recommended and specified by all the leading architects, plumbers and builders.

Consider the high merit of the Pittsburg coupled with "Pittsburg Perfect Service."

"Hot water quick as a wink."

Pittsburg Water Heater Co.

Makers of "Pittsburg Automatic"—"Bungalow Automatic"

Storage Systems and "Lyon" Tank Water Heaters.

Of The NEW
Daily Pacific Builder

The only daily construction newspaper affording complete coverage of the construction activities in Central and Northern California, featuring work contemplated, bids wanted, bids opened, contracts awarded, sub-bids wanted and sub-contracts let on all types of building construction, bridges, dams and harbor works, irrigation projects; machinery and equipment; water works and supplies business opportunities, building permits, building contracts, mechanics' liens, acceptances, etc., etc.

Keep informed on construction developments in Central and Northern California and the major projects in Southern California, the states of Oregon, Washington, Nevada and Arizona.

The new DAILY PACIFIC BUILDER will afford a service that serves—both in Quality and Quantity. You, as a member of the construction fraternity, should not be without it.

Subscription price \$1.50 per month, or \$15.00 a year, payable in advance.

ADVERTISING AND WORK HELD TONIC FOR 1930

"The lesson of advertising to business in 1930 is work. Do not advertise if you are not ready to work, to accept the business rewards that good advertising brings. Do not advertise if you want to let your business remain stationary or grow smaller."

This was the gist of an economic survey address delivered before 500 members of the San Francisco Advertising Club by Louis Wiley, business manager of the New York Times.

Wiley referred to the recent stock market debacle by declaring that "business during 1929 turned a corner."

"That's putting it mildly," he said. "We were going too fast when we turned that corner, with the usual results. Whether business was trying to pass the stock market on the road or the stock market was trying to pass business is unimportant. The accident has taken place and our prosperity machine has slowed down temporarily."

Wiley pointed out that "advertising is a fundamental part of the power machine business."

"It is more than just the accelerator," he said. "It is part of the driving force, of the controls, of the steering, of the shock absorbing system, even of the design."

Advertising must and will do its share in returning the country to a normal condition, he believed.

"Advertising has new worlds to conquer," he said. "We do not yet know all the profitable possibilities of this amazing aid to business."

Wiley declared that 33,000,000 copies of newspapers are sold every 24 hours.

"If you are ready to go ahead, to achieve that rate of progress which is prosperity, well planned advertising is the tonic," he advised. "That is the message of advertising in 1930—work and advertise, advertise and work, and prosper."

MACDONALD RE-ELECTED PRESIDENT OF BUILDING TRADES

Frank C. MacDonald of San Francisco, was re-elected president of the California State Building Trades Council at the annual convention of that body held in Sacramento. MacDonald has just completed his eighth term as president of the council, and he was re-elected without opposition. He was vice-president ten years before being elevated to his present post.

Other officers were re-elected as follows: M. F. Connors of Sacramento, first vice-president; James A. Gray of Oakland, second vice-president; J. J. Swanson, secretary-treasurer. Fred Huss was elected a member of the executive board to succeed C. E. Jarman, resigned.

Resolutions were adopted by the convention advocating the adoption of the day working week and recommending the establishment of a \$5 a day minimum wage on state public works. Oakland was selected as the 1931 convention city.

RESEARCH LABORATORY ESTABLISHED BY LUMBER INTERESTS

Additional facilities for searching out data that will be helpful in the manufacturing and marketing of lumber have been set up by the National Lumber Manufacturers Association through the establishment of its own National Lumber Laboratory. This laboratory will occupy space in one of the science buildings on the campus of the Catholic University of America, in Washington, D. C., and will supplement the co-operative assistance now furnished by the Forest Products Laboratory of the U. S. Forest Service and special co-operative investigations made with other laboratories from time to time.

Although the new research unit will be under the direction of the National Lumber Manufacturers Association engineering department, it is planned to attach the technical faculty and student body of the University full and frequent opportunity for observing the progress of and assisting in the work. The NLMA staff will have the advantage of consultation with the chemistry, physics and engineering faculties of the University. This arrangement not only takes advantage of the facilities available of a great university particularly strong in its technical curricula, located within easy reach of the National Association's administrative offices, but it is expected to facilitate dissemination of the results of the research—the University having a high scholastic standing.

CONTRACTORS ARE HELD LIABLE FOR STRAY DYNAMITE CAPS

Dynamite caps left by contractors in the basement of a school building during the school term constituted an attractive nuisance, according to a decision of the Court of Appeals of Kentucky.

The plaintiff, an eight-year-old boy, with some of his schoolmates, had been told to gather up bottles, paper and other refuse around the new building, the court explains in its opinion. They found the dynamite caps in the basement, were attracted by their bright and shiny appearance and put some of them in their pockets.

The plaintiff was injured by the explosion which took place when he placed a cap on a rock and struck it with another rock. The circumstances were such that the defendant contractors might have anticipated that the small children would be attracted by the caps and injured thereby, the court found. It held against the defendants on their contention that the plaintiff was a trespasser and could not recover because of instructions from teachers to keep out of the basement.

ELIMINATION OF LOSSES AIM OF CREDIT BUREAU

Stopping losses for material men and sub-contractors is the sole purpose of the Material Dealers' Credit Association of San Francisco, according to J. E. Higgins, manager of the association.

"In analyzing the speculative conditions that exist in San Francisco," states Mr. Higgins, "we find there is a variation in every building under construction. The important thing before extending credit is not only knowing the general credit references as to the contractor's responsibility, but to know how the building is being financed."

"This association is in a position to give, at a very nominal cost this important information. Our credit compilation not only includes the financial and credit responsibility of the general contractor but also compiles the approximate cost of construction of each building, the valuation of the lot and the mortgages against the property."

"In this way we are in a position to show our members the difference between cost of construction of that specific building. In the event that the contractor or owner is in no position to show that he has sufficient resources to take care of this deficiency we will assist in getting secured order on the mortgage company guaranteeing them payment of their labor and material."

The Material Dealers' Credit Association has offices at 564 Market St.

LOS ANGELES TO HAVE FIRST COUNTY BUILDING CODE

Under plans announced by County Counsel Everett Mattson, Los Angeles county is to have the first county building code law in the United States.

The new code will regulate construction work in all unincorporated districts. The code, when completed, will be the result of five years of cumulative work of the county architect, fire warden, health, planning and mechanical engineering departments to furnish materials for a basis for the code.

Karl Muck, county architect, presented a tentative outline of the proposed regulation before the county board of supervisors for preliminary approval as to the general plan, which will be included in three general ordinances, covering plumbing, electrical wiring and building, giving the county jurisdiction equivalent to the supervision now exercised by incorporated cities.

Strictly fireproof buildings will be named class A, semi-fireproof as class B; class C structures of lower fireproof rating, with class D for residences, in accord with the county's pioneer zoning ordinance enacted in 1927, and will also include supervision of garages and other structures.

CONTRACT AND BOND FEATURES OF CALIF. MECHANICS' LIEN LAW

By HARRY C. WESTOVER, Attorney-at-Law

The Mechanics' Lien Law of the State of California provides that it shall be lawful for the owner of property to protect himself against any failure of the contractor to perform his contract and make full payment for all work done and materials furnished, by exacting a bond or other surety which he may deem necessary.

Owners of property can assure themselves that they will not be called upon to pay more than the contract price agreed upon with the contractor by requiring a bond and filing the contract and bond with the County Recorder of the county in which the property is located before the work is commenced. Sec. 1183 of the California C.C.P. provides for the filing of the contract and bond.

The filing of the original contract between the owner and the contractor or modification of such contract in the office of the County Recorder where the property is situated before the office of the County Recorder of the county where the property is situated before commencement of the work, to an amount not less than 50% of the contract price named in such contract which bond shall in addition to any conditions for the performance of the contract be also conditioned for the payment in full of the claims of all persons performing labor upon or furnishing materials to be used in such work and shall also by its terms be made to inure to the benefit of any and all persons who furnish labor and/or materials on the work described in the contract, so as to give such persons a right of action to recover upon said bond in any suit brought to foreclose liens, or in a separate suit brought on said bond, then the court must, where it would be equitable so to do, restrict the recovery under such liens to an aggregate amount equal to the amount found to be due from the owner to the contractor and render judgment against the contractor and his sureties on said bond for any deficiency or difference there may remain between said amount so found to be due to the contractor and the whole amount found to be due to claimants for such labor or materials, or both.

The owner by requiring a bond from the contractor as described above and by filing the original contract with the bond in the office of the County Recorder of the county in which the property is located can make sure that he will not be called upon to pay a greater sum than the sum as specified in the contract. The filing of the statutory bond does not do away with liens. The bond is substituted for the building and lien claimants can effect collection not from the sale of the building but rather from the bond or bondsman.

The same section provides also that no change or alteration of the work or modification of a contract between the owner and contractor nor release or attempted rescission of such contract or of such bond nor any conditions contained in said contract shall attempt to limit the right of recovery under said contract of laborers and materialmen nor any fraud practiced by other persons other than lien claimants shall release or exonerate any of the surety or sureties upon such a bond. Such bonds will be construed more strongly against the surety and in favor of all persons for whose benefit such a bond is given and in no event will a surety be released from liability to laborers or

This is the eighth of a series of articles prepared for these columns by Harry C. Westover, attorney, of Santa Ana, on the California Mechanics' Lien Law. Other articles will be published from time to time.—Editor.

materialmen for whose benefit such bond is given by reason of a breach of contract between the owner and contractor but the sole condition of recovery on the part of any such person furnishing labor or materials is that such labor or materials has been used or consumed in, or has contributed to the work of improvement to which said bond refers.

If the contract and bond have been filed with the County Recorder of the county in which the property is located no change, alteration, or modification between the owner and the contractor shall effect the rights of lien claimants under the bond.

It is needless to say that contracts between owners and contractors should be reduced to writing otherwise they could not be recorded as required by the lien law. It is not necessary that large detailed drawings made in the course of the work for the guidance of workmen, should be attached to or made a part of the contract. The contract must be signed.

A building contract is not invalid because it does not describe the property to be improved, there being no such requirement in the statute and a mistaken description inserted in the contract as filed does not stop the owner from contesting the validity of liens, the claims of which have followed the description.

The contract and bond must be filed before the work is commenced. The duty of filing the contract and bond rests both upon the owner and upon the contractor. Work of a trivial nature done on the same day although a few hours before the building contract was filed will not avoid the contract. Plans and specifications referred to in the building contract and in accordance with work to be done must be filed with the contract. The original plans and specifications must be filed. In the case of San Francisco Lumber Company vs. O'Neil 52 Pac. 723 a blue print of the original plans and specifications was filed for record. The statute makes no provision of the filing of the copy of the contract or any part of it and the court held "the plans and drawings are as much a part of the contract as the stipulations themselves." Where there are two contracts covering improvements only referring to a separate set of plans and specifications the appropriate set must be properly signed and filed with each contract.

Where the contract and bond are not filed for record as prescribed the validity of the contract is not affected as between the owner and the contractor but the contract price as specified in the contract, no longer effects the issue of the owner's liability of lien claimants, other than the contractor. Where the owner requires the contractor to provide a bond and then does not see to it that the original contract and the bond is filed as required before the commencement of the work, the owner cannot insist that lien claimants look to the bond or bondsman for the satisfaction of their claims. If the con-

tract and bond is not filed in time then lien claimants have a right to hold the building for the amount of all claims.

The statutory provision providing for a bond and the filing of the bond and the contract before the work is commenced, was written for the benefit of property owners. By insisting upon their rights, property owners can be assured that they will not be called upon to pay more than the price as agreed upon in the contract and if the amount of the claim exceeds the amount of the contract price then the owner, after the bond and contract is filed properly, can insist that judgment be taken against the bondsman, but if the contract is not filed in time judgment can be taken against the property.

The only penalty which is imposed because of the non-filing of the contract and bond is the penalty against the property owner, if the bond and contract are filed as required the property is not subject to lien rights for the entire amount due but only for the amount due the contractor but if the contract and bond are not filed when required then the property is subject to all liens found irrespective of the amount which may be due the contractor.

The purpose in requiring a bond to accompany the building contract is to create an additional fund or security for the satisfaction of lien claimants.

It is the duty of the owner to exact the bond from the contractor and file it with the contract and if he fails to do so there is imposed upon the owner the penalty of paying all liens to the extent of the value of work and materials furnished. The failure to file the bond properly destroys its effect as a protection to the owner against liens for the full value of the work done and materials furnished.

The bond as set out in Section 1183 must contain the following provisions:

First: It must be for 50% of the amount of the contract price.

Second: It must provide for payment in full of claims of all persons performing labor or materials on the work.

Third: It must inure to the benefit of all persons performing labor or furnishing materials.

Fourth: It must provide that such persons may bring a separate action on the bond or join the bondsman in a suit to foreclose upon said lien.

GRIDLEY REFUSES TO ACCEPT SEWER PROJECT

Acting upon the recommendation of Norton Ware, city engineer, the city trustees of Gridley, Calif., refuse to accept sewer extension work from the Mathews Construction Company, contractors, as completed.

Ware claims one extension line laid to the extent of 50 per cent of its carrying capacity and says the line is faulty in its jointing and will either have to be repaired or replaced.

The council has advised the contractors no further extension of line will be granted and that all repair and replacement work would be carried to its completion and acceptance of the council under the supervision of an inspector at a cost to the city of \$8 a day.

RESIDENTIAL BUILDING SHOWS INCREASE DURING FEBRUARY

The total estimated cost of all building operations for which permits were issued during February in 290 cities of 25,000 population or over was \$108,513,996, while the January permits totaled \$113,335,288. This is a decrease of 4.3 per cent. However, considering the relative number of days in each month, the daily average for February is above the average for January.

Permits issued for new residential buildings during February showed an increase of 18 per cent over those issued during January in these 290 cities.

There were 8,753 families provided for in the new dwellings which will be erected under the February permits, compared with 6,972 families provided for in the new dwellings for which permits were issued in January. This is an increase of 26 per cent in February, compared with January.

Nonresidential buildings were the only class of building to decrease, comparing the February with the January permits. The decrease in this class of building was 19.4 per cent. Additions, alterations and repairs showed an increase of 4.4 per cent in February over January.

The table below shows the estimated cost of the new residential buildings, new nonresidential buildings, the total building operations (including alterations and repairs), and the number of families provided for in 290 identical cities during January and February by geographic divisions.

Increases were shown in new residential building operations in all of the seven districts except the New England States and the South Atlantic States. In the West North Central States the increase as shown by February permits over January permits for this class of building was over 100 per cent.

Increase in total building operations were registered in the New England States, the East North Central States, the West North Central States, and the South Central States. In new nonresidential buildings four geographical divisions registered decreases and three increases, comparing February with January permits. Permits issued for additions, alterations and repairs during February showed increases over those issued during January in four divisions and decreases in three divisions.

Table 1. Estimated cost of new residential buildings, new nonresidential buildings, and total building operations in 290 cities of the United States having a population of 25,000 or over, by geographic divisions.

Geographic Division	Estimated Cost		New Residential Buildings Families provided for in new dwelling houses			
	Jan., 1930	Feb., 1930	Jan., 1930	Feb., 1930	Jan., 1930	Feb., 1930

PAVING MATERIAL MADE FROM CLAY AT COLLEGE

According to an Associated Press dispatch from the Pennsylvania State College, road paving in slabs eight feet by 20 feet may be made from common clay deposits in a process developed by Prof. Joseph B. Shaw, head of the ceramics department of the college.

Shaw's method completely reverses the usual clay products manufacturing processes. Instead of forming the object first and then firing it, Professor Shaw fires the clay and then presses or rolls into shape.

Cracking or warping is prevented by sending the product through a furnace to eliminate strains. The process permits the incorporation of reinforcing iron, heretofore impossible because heat firing the clay burned up the iron.

Professor Shaw has been able to stamp out sides for small houses in single pieces and made bricks of light weight and high insulating properties. The discovery is the result of a request of Senator Pine of Oklahoma for a road building material "harder than concrete and cheaper than macadam."

BERGER HEADQUARTERS MOVED TO LOS ANGELES

Western headquarters of the Berger Manufacturing Company of Canton, Ohio, has been moved from San Francisco to 2455 Hunter St., Los Angeles, with A. S. Tiedeman remaining as manager. The San Francisco office will be maintained as a branch with E. A. Reichert in charge. T. M. Hughes, formerly manager of the Los Angeles office, has returned to the Eastern office of the company.

The Berger Manufacturing Company recently consolidated with the Republic Iron & Steel Co., making it the third largest organization of its kind in the United States, according to Mr. Tiedeman. The company is also a subsidiary of the Central Alloy Steel Company of Canton.

UNIFORM BUILDING CODE IN EFFECT IN LONG BEACH

Long Beach now has a uniform building code, the new measure having gone into effect March 10. Long Beach was the seventieth city to adopt the uniform code prepared by the Pacific Coast Building Officials' Conference. According to C. D. Wallis Jr., chief building inspector of Long Beach, at least 90 per cent of the text of the code has been retained. Some changes were necessary to meet conditions in Long Beach and these include the changes intended for the 1930 edition of the conference code.

Since the new code was passed by Council, Chief Inspector Wallis has conducted classes regularly for the benefit of the ten inspectors of the department, going over the code thoroughly with them. Long Beach has had two previous building ordinances, the first being adopted in 1913 and the second in 1924.

MIDDLETON, TIMBERMAN, PASSES

H. L. Middleton, lumber man, died at his home in Boulder Creek, March 19. He was born in Healdsburg, Oct. 4, 1859, and for the past several years was an invalid. In 1882 he settled in Santa Cruz county and became a partner in the Cunningham Lumber Company at Felton. He moved the company operations to Boulder Creek in 1895.

QUANTITY SURVEYORS' INSTITUTE TO MEET AT ST. LOUIS

The fifth annual convention of the American Institute of Quantity Surveyors will be held at St. Louis April 14, 15, and 16, 1930.

Among the addresses scheduled are the following:

Ralf Toensfeldt, manager G. E. Wells, Inc., "The Quantity Surveyor's Status in Relation to the Owner."
Wm. MacDonald, Wm. MacDonald Construction Co., (a) "The Quantity Surveyor and the Contractor," (b) "Estimating Companies and Priced Surveys."

Benjamin F. Thomas, Jr., consulting engineer, "Quantity Survey in Relation to Electrical and Mechanical Engineering."

Paul Soemann, secretary St. Louis Chapter, A. S. H. & V. E., "Quantity Survey in Relation to Heating and Ventilating."

Louis La Beaume, director St. Louis Chapter A. I. A., La Beaume & Klein, architects, (a) "The Architect's Re-

lation to the Building Industry," (b) "The Economical Value of Quantity Surveying."

Wm. T. Trueblood, president St. Louis A. I. A., W. T. Trueblood and H. K. Graf, architects, "Co-operation of Architect and Quantity Surveyor."

Wm. F. Itner, former architect of St. Louis Board of Education, "Modern Professional Practice in Relation to School Buildings."

Wm. C. E. Decker, "Highlights in Quantity Surveying."

Discussion, "Uniform Methods," led by C. L. Weeks, chairman. Plastering, Robert E. Lee, president Contracting Plasterers of San Louis; masonry, R. M. Gillespie, president Mason Contractors' Association of United States and Canada.

The Fresno County Grand Jury, in submitting the annual report to the County Supervisors, recommends adoption of a county building program on the "unit system" and the establishment of a prison road camp for the construction of new highways and maintenance of the present road system.

THE OBSERVER

WHAT HE HEARS AND SEES ON HIS ROUNDS

California ranked second among the states in building for the month of February. New York, with 44 cities, reports a total of \$29,786,682. California, with 70 cities, reports a total of \$13,430,715. February, 1930, building activities in the 12 leading states follow:

State	No. of Cities	Vol. P'mts
New York	44	\$29,786,682
California	70	13,430,715
Illinois	48	8,495,254
Ohio	25	8,116,546
Wisconsin	20	5,460,502
Pennsylvania	25	5,421,035
Texas	18	5,302,343
Michigan	20	5,246,310
New Jersey	37	4,914,517
Washington	15	4,840,755
Massachusetts	23	4,018,527
Maryland	5	2,874,694

After hearing complaint of California Portland Cement Company and Riverside Cement Company against Southern Pacific Company, The Atchison, Topeka and Santa Fe Railway Company, Los Angeles & Salt Lake Railroad Company and Pacific Electric Railway Company, that the rates maintained by defendant carriers for the transportation of cement in carloads from Colton and Crestmore to main and branch line points on the defendants' lines, north as far as Santa Barbara, south as far as National City and to points south of Monolith, are preferential in favor of Monolith, Oro Grande, and Victorville, the State Railroad Commission has ordered defendant carriers to place in effect a schedule of rates calculated to remove such discrimination.

This inspiring quotation, so characteristic of the spirit of engineering, is inscribed on the medal which has been struck to commemorate the Fiftieth Anniversary of The American Society of Mechanical Engineers. The obverse shows the engineers, symbolized by a man of powerful physique, gazing intently past some typical measuring instruments, indicative of this fundamental function of technique, into the future, the plans for which are shown as being already within his grasp. On the block on which the figure leans is the commemorative inscription and the picture of the Archimedeum challenge which is the chief feature of the seal of the A. S. M. E.: "Give me where to stand and I will move the world." The reverse of the medal symbolizes the past and present of engineering achievement illuminated by the lamp of knowledge which rests upon engineering science.

Specifications covering materials and workmanship, and representing certain standards of finished work are to be submitted to a certification committee of the Oregon Building Congress. The board of directors has decided to actively work on the plan. Any organized group or craft within the construction industry may present these specifications to the certification committee who in turn, if approval is passed, will submit them to the board of directors. Upon approval of the latter standards set forth in the specifications shall be known as certified construction for that group or craft.

By a single vote the Senate on March 21 decided to retain the duties imposed by the House on building bricks—the vote was 35 to 36. Bricks formerly on the free list were placed on the dutiable list by the House at a rate of \$1.25 a thousand on common building brick, and 5 per cent, but not less than \$1.50, on vitrified or ornamented brick.

The Dutch Lumber Association will purchase only from exporters who have a regular agent in that country. If exporters do not have a regular agent or if they use more than one agent, they can sell only to non-members of the lumber union. This piece of information, which should be of interest to American exporters of lumber to Holland, was received recently by the lumber division of the Department of Commerce, from Consul Carol H. Foster, of Rotterdam. The Dutch Lumber Association is composed of softwood and hardwood importers, dealers in cabinet woods catering to the furniture trade, sawmill operators, retailers, dealers in native woods, lumber merchants in Rotterdam and vicinity, and lumber agents. Its object is to attend to matters of general interest to the Dutch lumber industry and trade. The association acts in an advisory capacity to its members in questions pertaining to labor, economic matters, and law.

National Lumber Manufacturers' Association of Washington, D. C., has prepared a concise presentation of the various factors which make wood a successful flooring medium. The 30-page booklet gives a brief description of wood floor construction, touching on the essential details, with a section on the different available woods for floors. Tables are included to show the commercial grades and sizes of flooring lumber in several popular woods. Short sections follow on laying and finishing the wood floor.

Prospects for a revival of the building industry within the next few months are held bright by Chas. G. Johnson, California state treasurer. "The present depression," says Johnson, "is merely temporary and within the near future I predict a spirited revival in the sales of real estate and the construction of buildings. The American public is well aware of the profits to be made in real estate and building and within the next few months money now being held back again will be flowing in its normal channels."

Attorney General U. S. Webb has advised George M. Stout, secretary-member of the California State Veterans' Welfare Board, that it is legal for the board to purchase the equity in a veteran home with a view to making a new sales contract with another approved veteran. The question arose in the case of a veteran who had acquired a \$1,000 equity in a \$4,500 home purchased from the board. He desired to sell and another approved veteran was willing to buy the home at the original price.

Knots in lumber do not seriously affect the stiffness of long timber columns. This is shown in the results of tests on 12-in. by 12-in. by 24-ft. structural timbers made at the Forest Products Laboratory, maintained by the United States Forest Service at Madison, Wis. A simple formula for computing accurately the strength of wooden columns such as are commonly used in buildings, bridges, and other structures has been worked out by the Forest Products Laboratory, where its application was demonstrated in tests on timbers provided by the National Lumber Manufacturers' Association. Application of the formula by engineers and architects, laboratory officials say, will eliminate the use of needlessly high factors of safety in column design with the accompanying use of timbers larger than necessary. The result of this more economical use of structural timber will be reflected in lower costs of wooden construction to the builder and consumer, in opening markets for low-grade material, and in checking the waste of forest products.

The Los Angeles Building and Safety Commission states that the blank for the architect's name on applications for building permits cannot be filled in unless the name used is that of a certified architect or licensed engineer under the state act. This statement appears in red ink on the application blanks being used by the building department.

The American Federation of Labor reports that in the building trades 43 per cent of union workers are out of work. This is 30 per cent more than a year ago and 10 per cent more than in 1928. According to a recent survey, reports from both employers and unions in New York City indicate that unemployment here amounts to 40 or 50 per cent of the 179,000 union membership.

New orders of fabricated structural steel in February, as reported to the Department of Commerce by the principal manufacturers, were 73 per cent of capacity as compared with orders of 63 per cent of capacity in January, and 69 per cent a year ago. Shipments of fabricated-structural steel in January represent 76 per cent of the capacity of firms reporting this item as against 61 per cent in January, and 62 per cent a year ago.

Calaveras Cement Company, at a recent meeting of the board of directors, declared the regular quarterly dividend in the amount of \$1.75 a share on the company's outstanding 7 per cent cumulative preferred stock. The dividend is payable April 15 to stockholders of record March 31, 1930.

Solano County Supervisors have started proceedings for the construction of a \$150,000 sewer system to serve the northern and eastern outskirts of the city of Vallejo.

Construction will be started at once on a modern office and shop building in East Nineteenth St., Eakersfield, for the Sumner Plumbing Company. The company, operating in the Kern County field for the past ten years, was prompted to provide the new and larger quarters due to increased business.

Proceedings have been started by the State Highway Commission for the elimination of the San Juan Grade on the Coast Highway. Construction involved will require an expenditure of between \$300,000 and \$1,000,000.

ALONG THE LINE

Robert P. Coleman has been appointed manager of the Glasson-Hoffman Lumber Co., of San Diego.

Jean Vincenz, Fresno engineer, has filed application with the Fresno City Commission seeking appointment to the office of city engineer.

L. F. Barzelotti, for the past seventeen years city manager of Lodi, died in Stockton March 16, following a heart attack.

G. A. Elliott, formerly general manager and chief engineer of the Spring Valley Water Co., will open offices for general practice and consultation in engineering in San Francisco.

John Hastie, founder and head of the Sound Construction & Engineering Co. of Seattle, died in Los Angeles March 16, following a protracted illness.

J. M. Landram has been appointed Southern California representative of the Donovan Lumber Co. For the last six years he was connected with the Coos Bay Lumber Co. in this territory.

Blaine Noice has been appointed a member of the Los Angeles Building & Safety Commission. Mr. Noice is a structural engineer and was formerly connected with the city building department, engaged in checking plans.

C. E. Grunsky, consulting engineer of San Francisco, and recently elected president of the American Engineering Council, has been appointed consulting engineer for the City Planning Commission of the Greater City of Shanghai, China.

Kerner Incinerator Co., Milwaukee, Wis., has issued an eight page illustrated bulletin describing the estate-type Kernerator, used for disposal of wastes in country estates, schools and similar installations. Copies will be furnished on request.

J. Allen Hall, secretary of the Fresno Irrigation District, has been elected president of the Fresno Engineers' Club. A. Segel, Fresno civil engineer, was named vice-president; R. D. Lohely was re-elected treasurer. Directors are: G. J. Grunland, L. R. Duncan, C. H. Weeks and H. H. Wheaton.

George Washington Smith, 51, architect of Santa Barbara, died in that city March 16 following a year of ill health. He was a member of the American Institute of Architects and the American Art Alliance and was known particularly for his plans on residential construction.

Commending Frank E. Bonner, executive secretary of the Federal Power Commission, whose method of administration were investigated recently by the Senate Interstate Commerce Committee, the San Francisco section of the American Society of Civil Engineers unanimously endorsed resolutions of confidence in Bonner as an engineer and as a very conscientious public official. Copies of the resolution were sent to President Hoover; Ray Lyman Wilbur, Secretary of the Interior; Patrick J. Hurley, Secretary of War, and Arthur M. Hyde, Secretary of Agriculture.

HERE — THERE — EVERYWHERE

San Joaquin county supervisors have authorized preparation of an ordinance creating the office of county electrical inspector. The duties of the inspector will be to protect farmers against poor electrical wiring.

E. M. Einstein has been named by the Fresno county Chamber of Commerce chairman of a committee to investigate present accommodations for county administration offices with a view to recommending a building program.

The "Standard Electrical Ordinance," as recommended by the Pacific Coast Building Officials Conference at its 1929 annual meeting in Portland, Oregon, is now ready for distribution, and may be procured from headquarters at the Conference in the Heartwell Bldg., Long Beach, Calif.

Sponsored by the Oregon Chapter, American Institute of Architects, the extension class of the University of Oregon in architectural design is meeting twice a week in the Oregon Building, Portland. Class is opened at 7 P. M. The instructor in charge of the class is A. Glenn Stanton, associated with Morris H. Whitehouse, Portland architect.

"Building material prices have remained fairly stable during the past month," (February), says the monthly report of S. W. Straus and Company. "Common brick has shown the greatest weakness, average delivered prices dropping a few cents per thousand, and under last month and over 50 cents below 1929. Mill price rises in cement have been reported, chiefly in the Mid-West, which accounts for an increase of six cents in average mill prices. Steel and lumber prices remain about the same as January."

BAKERSFIELD BUILDERS ELECTS OFFICERS

A. J. Hendricks has been elected president of the Bakersfield Builders' Exchange, W. M. Fisher, vice-president and George E. Wilson, treasurer. L. W. Dennen was re-elected secretary.

Directors elected are: V. A. Young, H. C. Evans, Edward Norris, W. M. Fisher, George E. Wilson, W. T. Drury, A. J. Hendricks, C. W. Rodgers, P. J. Stevens, E. A. Felling and Huston Evans.

Headquarters of the exchange are located at 1694 Nineteenth St., Bakersfield.

SEEKS PERMIT TO CONSTRUCT LUMBER LINE RAILROAD

The Washington-Oregon Electric Railway Company, a subsidiary of the Spokane, Portland & Seattle Railway Company, has asked the Interstate Commerce Commission for authority to construct a 30 mile extension in the Willamette Valley, beginning at Eugene and extending thru Oak Hill Pass to Hadleyville and from there to Lorence and on to the Slu-slaw River.

A ten mile branch will extend from Hadleyville to Panther. The new construction will serve an extensive area of fir timber land with an estimated stand of six billion board feet. The territory is without rail service at present.

TRADE LITERATURE

Petroleum Heat & Power Co. of California, with headquarters in San Francisco, has opened a factory branch at 12 Third Ave., San Mateo. H. S. Frazier is in charge.

Otto J. Nickel and Robert H. Ruble have opened quarters at 2411 Belmont Ave., Fresno, and will engage in the electrical business, operating under the name of Nickel Electric Shop.

The Renton, Wash., plant of Gladding and McBean will produce all brick required in the construction of the new King County Hospital to be erected in Seattle. The structure will cost \$2,500,000.

San Jose Heating and Ventilating Co., heating contractors and consulting engineers, announces the opening of offices at 14 Gummer Arcade Building, 123 S 3rd St., San Jose, under the management of W. K. Nottingham.

Enterprise Iron Works, operated by W. J. Patterson and H. E. Richardson has opened quarters at 950 56th St., Oakland, and will engage in the manufacture and fabrication of structural steel and specialize on small buildings such as service stations.

Jason C. McCune, connected with the trade extension and statistical departments of the West Coast Lumber Association at Seattle since 1927, has been assigned to Southern California territory with headquarters at 910 Architects' Bldg., Los Angeles.

Rio Linda Lumber Co., of Rio Linda, Sacramento county, has been incorporated. The company is capitalized at \$50,000. G. H. Clark is manager. Other officials of the new concern are Stanley Feder and W. S. Bayless of Berkeley, and R. D. Carmiencke of San Francisco.

E. R. De Graf, for many years associated with the paint department of Paraffine Companies, Inc., as manager, has resigned to become vice-president and general manager of the Southern Asbestos & Magnesia Corporation with headquarters in Los Angeles. He is succeeded in San Francisco by L. K. Bishop.

Layrite Floors Corporation, designers, manufacturers and distributors of "hardwood floors of character," announce the opening of new and larger quarters at 1463 Third street, Oakland. The company was formerly located at Fifth and Grove streets. Increased business in the East Bay section necessitated the move. The Layrite Floors Corp. holds a membership in the Oakland Builders' Exchange and the Hardwood Floor Contractors' Association.

Citizens of Fallon, Nevada, rather than accept the increase rates of the Nevada Valley Power Company, contemplate the construction of municipal power plant to cost \$110,000.

The Supervising Architect of the U. S. Treasury Department is said to have voiced his approval of using local stone and other materials in the proposed new \$1,500,000 post office to be erected in Oakland. Plans for the structure are now being prepared.

TRADE NOTES

Architects, engineers and contractors will be interested in the 20-page catalogue of specifications covering uses and application of T. W. C. products, that is being distributed by The White Company of Baltimore, Maryland. The catalogue gives a general outline of the practical uses of a few of the preservative products manufactured by The White Company, including dampproofing and waterproofing products, painting products, floor hardeners and floor preservatives.

A monthly magazine of interest to the building trade entitled "The Pug Mill" is being published by the Acme Brick Company of Fort Worth, Texas. This 8-page magazine contains valuable and interesting material on face brick, including cost tabulations and comparisons.

The Westinghouse Electric & Mfg. Company, East Pittsburgh, Pa., announces a new booklet entitled "Stop Waste" published as a contribution to the continuous campaign for the elimination of waste in American industry carried on in connection with the movement sponsored by the American Society of Mechanical Engineers with the cooperation of the American Management Association. The booklet presents some of the methods used by Westinghouse Electric in conducting a campaign for waste elimination and prevention, containing, in addition to the text, photographs of exhibits that have been used in the shops to demonstrate how waste can be reduced. Shown on the last page of the sixteen page publication are the savings effected by several nationally known companies by their participation in the campaign against waste. This book can be obtained from the Westinghouse Electric & Manufacturing Co. by requesting Special Publication 1840-A.

PACIFIC COAST AGGREGATES IN FIRST REPORT

Pacific Coast Aggregates, Inc., which commenced operations last September as a consolidation of the principal rock and gravel companies of Central California, reports net income for 1929, after all charges except depreciation and depletion and amortization of bond discount, of \$318,702.70, which is three and seven-tenths times interest on first mortgage bonds. After this deduction there remained a balance equal to six and six-tenths times interest requirements on its debentures.

Balance sheet as of December 31, 1929, shows current assets of \$1,829,163.04, from which \$31,123.67 was deducted as a credit to the depletion fund, leaving total current assets of \$1,798,039.37, of which \$731,263.43 is in cash or on deposit or has been loaned on liquid securities. Current liabilities amount to only \$556,925.59, leaving net current assets of \$1,271,113.78, during plants were operating continuously and seven intermittently, while fifteen distributing plants were operating all or part of the time. Three distributing plants have been leased to other dealers on short-term leases. Production up to January 1, 1930, was approximately 1,141,000 tons of rock, sand and gravel, approximately 70 per cent of this being rock and gravel. Total tonnage sold was 1,228,600 tons, the amount over producing coming from outside purchases and stocks turned over by predecessor companies.

Total sales of building material to January 1 was \$786,900; the total sales of fuel \$105,400. Orders for rock, sand and gravel booked, but not shipped, to January 1 was 777,000 ton*.

MEXICAN HIGHWAY COMMISSION MEETS NEXT MONTH

A delegation of more than 125 highway engineers and road building executives will journey to Mexico City in April to attend the third highway congress of the Mexican national highway commission, it was announced in Washington.

Mal. Frederic A. Reimer, president, and Charles M. Upham, engineer-director of the American Road Builders' Association, will be joined by the Association's executive committee in forming a party to leave Washington April 15 in special cars direct to the Mexican capital. This group will be joined at Chicago, St. Louis and way points by several score members. They will travel by way of San Antonio and Laredo, Texas, and Monterrey, Mexico. Reduced railroad fares will be in effect from all points in the United States to Mexico City and returning.

Arriving, the visitors will face a busy week with the congress and its attendant exposition of road building machinery and materials sharing the program with entertainment features in which the United States delegates will be honor guests.

They will be received by Mexico's president, Senior Ortiz Rubio and his cabinet and attend a rodeo and other open air events. Side trips to many points of romantic and historic interest have been arranged.

Many American manufacturers will send machinery and pictorial exhibits for the exposition which will be staged in the huge national stadium. The enthusiasm throughout Latin America for road building is exemplified in Mexico, where highway systems now under way will reach all parts of the nation.

The congress expects to form a permanent committee to coordinate the road building activities of all the Mexican states with the federal program.

ESSENTIALS OF ARCHITECTURE

The three essentials of great architecture are proportion, dignity and refinement, said Norman Shaw, the famous English architect.

Whether it be the peerless grace of the Taj Mahal, the combined mass and delicacy of Fontainebleau, the Gothic poetry of Milan, the Grecian purity of St. George's Hall, Liverpool, the stately Capitol at Washington, or one of our modern business buildings, by these three qualities—proportion, dignity and refinement, we may praise architecture of buildings.

JOSEF JACOBBERGER, PORTLAND ARCHITECT, PASSES

Josef Jacobberger, a member of the firm of Jacobberger & Smith, architects of Portland, Ore., died in that city March 18, as the result of a heart attack.

Mr. Jacobberger was 62 years of age. Born in Alsace-Lorraine, he came to this country when he was two years old, living in Omaha, Nebraska, during his earlier school days. After he reached his twentieth birthday, the architect left his home to start work in various cities located in the Middle West. He was in New York during part of this time and also in Minneapolis. He went to Portland in the 90's.

ARCO COMPANY WILL ERECT PLANT IN LOS ANGELES

The Arco Company of Cleveland, has selected Los Angeles as the location for its new paint plant to serve the Western, Latin American and Oriental trade.

A survey of Western and export business conditions made by S. D. Wise, president of the company, and S. D. Weil, vice-president, was responsible for the decision to construct a West Coast plant.

The rapid industrial growth of California with the greatly increased volume and variety of manufactured products being made in the West, prompted the directors of the Arco Company to locate a plant on the Coast to take care of this increased volume.

The plant will consist of three brick buildings, with metal trim and concrete floor construction, totaling 16,500 feet of floor space. The factory buildings will include a paint manufacturing plant, 100 by 100 feet, a lacquer plant, 50 by 100 feet, and a varnish plant, 30 by 60 feet. The new plant's output will include the company's complete line of paints, lacquers, varnishes and enamels.

The new factory will be known as the Arco Company Limited of California, and will be under the general direction of Howard Wise. Howard Raeney will be general sales manager and E. B. Hagar, who has been manager of the San Francisco branch will be made district manager, with headquarters in Los Angeles. In addition to the Los Angeles plant the Arco Company operates factories in Cleveland, Ohio, and in Toronto, Ontario, Canada.

RUSSIAN LUMBER EXPORTS TO ENGLAND EXAGGERATED

Exports of sawed lumber from Russian ports to the United Kingdom during the 1930 navigation period will not exceed 1,287,000,000 board feet, according to a report from James Somerville, Jr., Trade Commissioner at London, to the Lumber Division of the Department of Commerce. This is a reduction of almost 200,000,000 board feet from the original estimate made by Russian authorities.

Even 1,287,000,000 board feet (which is almost 200,000,000 board feet in excess of Russian lumber exports to England in 1929) will not be realized, predicts a British lumber journal, and ascribes four reasons for its prediction: First, Russian resources were strained to get out 1,089,000,000 board feet in 1929; second, the unlikelihood of a recurrence of the open shipping season, which alone made possible the fulfillment of the 1929 program; third, it is understood that the Russians made use last year of a large quantity of logs which in the ordinary way would have been cut into lumber in 1930; fourth, the unusually mild winter of 1929-30 which has greatly retarded logging operations. Of interest in this connection also, is the report of the Russian Republic that the program for timber procurements up to January 10 was only slightly more than one-half filled for firewood and oriented for lumber.

Polish lumber products were almost completely eliminated from the British market in 1929 by Russian lumber, which was much lower in price, according to a report from Charles H. Heisler, Consul at Warsaw, Poland. That much of the Russian lumber exported to the Hull district in England during 1929, was of inferior quality and discolored, was reported by A. J. McConico, Consul at Hull.

STUDY OF ECONOMIC HEIGHT OF SKYSCRAPER IN BOOK FORM

"The Skyscraper—a study of its economic height," by W. C. Clark and S. L. Kingston, published by the American Institute of Steel Construction, New York. Price \$2.00 postpaid.

The authors of this volume are recognized authorities in their respective fields. They headed up a special committee of experts authorized by the organization of steel constructors of North America to make an investigation into the economics of tall buildings. The material in this volume of more than 160 pages was drawn from the data collected by that committee. It presents a fascinating discussion of the problem and in offering a solution reproduces the tables, charts and calculations made by the experts employed.

The work of presenting the findings was left largely to Mr. Clark, whose style is lucid and entertaining. As economist and now as Vice President of S. W. Straus & Co., Mr. Clark has had intimate acquaintance with skyscraper construction and management. He writes with his whole interest in the matter.

Not alone have the economic phases of building been analyzed, charted and diagrammed, but the authors have seen fit to include in their discussion, many of the contributing phases of the subject. Substituting congestion, health of occupants, air and light, merger of properties, all have a bearing upon the question and these matters have not been overlooked. Their handling in this volume will be provocative of much constructive thinking.

TWALTS SCHEDULED TO HEAD ROCK PRODUCTS CORP.

Appointment of Ford J. Twalts, executive vice-president of Consolidated Steel Corporation since the organization of that company in January of last year, and previously a partner in the building firm of Scofield-Twalts Company, as general manager pro tem of Consolidated Rock Products Company of Los Angeles with his election to president scheduled for the next directors' meeting is announced.

The announcement followed decision of George A. Rogers, former head of Union Rock Co., until its merger into Consolidated Rock, and for the past six months general manager of the past six months general manager of the latter organization, to resign to devote his entire attention to his own varied business interests.

MEXICAN BUILDING PROJECT AID IN MATERIALS DEMAND

Mexico City is undergoing one of the most important building expansions in its history, which is expected to produce a much increased demand for construction materials, according to a report from the consul general, William Dawson, according to an announcement by the U. S. Department of Commerce.

This is particularly true in regard to the new residential districts which have been opened up. There has always been a certain percentage of the population whose standard of living has been high, and to these are now added the constantly growing middle class.

Imports of sheathing and building papers from the United States during the last four years have averaged 450 short tons annually, the largest shipments having been made in 1929, when they reached a total of 524 tons, valued at \$36,682.

In addition \$13,747 square feet of insulating and wall board valued at \$35,572 were imported compared with 529,275 square feet valued at \$21,761 in 1928.

PACIFIC COAST HARDWOOD FLOOR DEALERS ELECT

C. M. Cooper of Los Angeles was re-elected president of the Pacific Coast Hardwood Floor Dealers' Association at the annual convention held in Del Monte. B. E. Bryan, Oakland, was elected vice-president and G. C. Gearhart, Los Angeles, secretary.

Directors elected were: E. E. Hill, Portland; Roger Sand's, Seattle; H. W. Swafford, Los Angeles; C. H. White, San Francisco; J. E. Higgins, San Francisco; F. J. Connolly, Los Angeles; Jerry Sullivan Jr., San Diego; George H. Brown, Oakland, and Bryan and Gearhart.

MERITS OF RIGID CONDUIT TOLD IN BOOKLET

Appreciating the difficulties often experienced by architects, engineers, electrical contractors, and builders in puzzling out the numerous variations in electrical codes and ordinances governing the protection of wiring systems in the buildings, the Rigid Conduit Section of the National Electrical Manufacturers Association sets forth in a new booklet the merits of rigid conduit as the means of providing maximum protection for all wiring systems and as the only type of raceway which is not limited in use by any restrictive requirements and regulations.

"Safeguarding Wiring Systems for Buildings" opens with a brief history of the origin and development of rigid conduit. Description follows of its value for protecting electrical conductors during construction operations from damage of other trades, principally carelessly driven nails, corrosive acids or fumes, blocking of raceways, and direct mechanical injury, as well as its continuance of thorough protection for the wires during the life of the building.

The next two chapters are devoted to the adaptability of rigid conduit in residences, farm, office, commercial and public buildings; and the relative cost of wiring systems. The last page outlines a brief, effective specification for rigid conduit in any type of structure.

Copies of this booklet may be had without cost upon request to George H. Sicard, Secretary of the Rigid Conduit Section, 603 Gas & Electric Bldg., Utica, New York.

WOOD UTILIZATION BODY TO MEET MAY 2

The National Committee on Wood Utilization of the Department of Commerce will hold its annual meeting on May 2 in the Department of Commerce Bldg., Washington, D. C.

Secretary of Commerce R. P. Lamont, the Committee's chairman, will deliver the opening address, says an announcement by Axel H. Oxholm, the director of the Committee.

While the general subject for discussion at this meeting will be the projects of the Committee, special attention will be devoted to its activities in the building and construction field.

The Committee is composed of 20 members representing more than 80 trade associations interested in intelligent utilization of wood.

GLADDING, McBEAN AUTHORIZED TO ISSUE STOCK

Gladding, McBean & Co. is authorized by the State Corporation Commission to issue 4450 and 31-50 shares of common stock to stockholders of record March 20.

The authorization is for the regular semi-annual 2 per cent stock dividend of the company, which will transfer from surplus to capital \$28.83 for each share issued, or a total of \$128,832. The issue is made under condition that the aggregate book value of the stock issued shall not exceed the accumulated surplus profits of the company.

The company also declared the regular quarterly cash dividend of 75 cents, payable April 1 to stock of record March 20.

WELDING WIRE RESEARCH

Facts concerning wire research that every welder should know. Tells why ordinary wire will not do for welding, and the effects of impurities on the finished weld. A complete discussion on testing welded plate specimens, shows why the testing procedure should be considered before judging the results from tests on such specimens. Facts concerning the use of a proper flame and a proper welding current are given in detail. The book also shows how to test welding wire by the flame test. Copies of Welding Wire Research may be obtained by addressing the Page Steel & Wire Company, 230 Park Ave., New York, N. Y.

STATE PRISON SITE IN SO. CALIFORNIA HITS SNAG

Lyman M. King, state director of finance, and a member of the site selection committee for the new prison for first offenders between the ages of 18 and 24, declares that he will oppose the Bouquet canyon site, in Los Angeles County, near Saugus, favored by the legislative advisory committee, unless the city of Los Angeles guarantees an adequate water supply.

The 1926 legislature appropriated \$375,000 to be used for the purchase of a suitable site in southern California for the new junior prison.

King was questioned after it was apparent the reports of the technical and legislative committees differed widely.

Acquisition of the metal lath division of the Youngstown Pressed Steel Company, Warren, Ohio, is announced by the United States Gypsum Company. Something more than a year ago the United States Gypsum Company entered the metal lath field, and growth of the business has made necessary increased production and distribution facilities. That part of the Youngstown Pressed Steel Company's business acquired will continue under the same sales and operating personnel as the Youngstown Pressed Steel Metal Lath Division of the United States Gypsum Company. Only the metal lath division was acquired. Other divisions of the company will be operated by the Youngstown Pressed Steel Company as heretofore. Metal lath products manufactured by the Milwaukee Corrugating Company and sold by the United States Gypsum Company under its Red Top Brand will be actively continued.

Their service embraces the purchase and sale of products of all kinds for the account of their clients and representation in any other capacity that may be desired.

D-3442, — Representation. Portland Ore. Firm interested in representing San Francisco manufacturers on brokerage basis in northern territory.

BRITISH REDUCING LUMBER IMPORTS

Fears of increased taxation in the forthcoming government budget and increasing unemployment have combined to make British lumber buyers cautious, according to a cable March 20 from Donald Renshaw, commercial attache in London, it is announced by the U. S. Department of Commerce.

January business in American hardwoods, says this report, showed little improvement, even in the face of less heavy importations. Douglas fir imports decreased and the demand was only fair. There was a limited inquiry for pitch pine and forward business in this species was difficult to arrange.

Plywood purchases for forward delivery have been disappointing, and there is a continued absence of demand. Prices for Douglas fir plywood remain steady.

Engineering News Section

BRIDGES

CORONADO, San Diego Co., Cal.—The city council has adopted a resolution approving a state franchise granted to the McClintic-Marshall Co. to construct a bridge between Coronado and San Diego. The proposed bridge will be 135 ft. in height above high water and carry two pedestrian lanes with an auto highway 24 ft. wide. Cost, about \$3,000,000. Chester A. Smith is the company's attorney. San Diego representative is A. F. Healy and the district manager at Los Angeles, E. F. Gohl. A United States permit has not yet been secured.

PLUMAS COUNTY, Cal.—Until April 16, 2 P. M., bids will be received by State Highway Commission to construct a reinforced concrete girder bridge over the fork of the Feather River at Chester, consisting of three 35-ft. spans on concrete pile bents. See call for bids under official proposal section in this issue.

- " 2 5 K. W., 110 Volt Winton Generator sets, gasoline engine driven.

Bidders may make offers for one or more items but must state price offered for each item. No lump sum bids will be considered.

All equipment may be inspected at the Division of Highways yards at Eureka, California, from 8:30 A. M. to 4:30 P. M. on any working day, except the following, which may be inspected at Highway yards at Elk Valley:

CHC 9 Holst, Willamette-Yarder, 4 drum steam.

Deliveries will be made as soon as approval of sale is obtained from the Department of Finance.

RAILROADS

SPOKANE, Wash. — Washington-Oregon Electric Railway Co., a subsidiary of the Spokane, Portland and Seattle Railway Co., seeks authorization of Interstate Commerce Commission to construct a 30-mile extension in the Willamette Valley, beginning at Eugene and extending through Oak Hill Pass to Hadleyville and from there to Lorence and on to the Siuslaw River. A 10-mile branch will extend from Hadleyville to Panther. The new construction will serve an extensive area of fir timber land with an estimated stand of six billion board feet. The territory is without railroad service at present.

WALNUT CREEK, Contra Costa Co., Cal.—R. F. Easley, Artloach, awarded contract by Sacramento Short Line of Sacramento Northern Electric Railroad Co. to widen roadbed between Walnut Creek, Contra Costa County, and Sacramento.

FIRE ALARM SYSTEMS

LINCOLN, Placer Co., Cal.—Seagraves Co., San Francisco, at \$6000 awarded contract by city trustees to furnish auxiliary pump type fire engine.

OAKLAND, Cal.—Auto Call Co., 320 Market St., San Francisco, at \$1,695.90 submitted low bid to City Port Commission to furnish and deliver electric equipment for fire alarm system at Municipal Airport. Other bids, all taken under advisement, were: Holtzer-Cabot Electric Co., \$1,950; Gamewell Co., \$2,167.50; American District Tel. Co., \$2,465.

FIRE EQUIPMENT

SAN FRANCISCO—City Engineer M. M. O'Shaughnessy recommends widening of Army St., as a cross-city arterial to link up all Peninsula traffic lanes. The project would cost \$1,000,000 and would involve making the thoroughfare 100 ft. wide from the Bayshore Highway to Valencia St. It is recommended that the San Francisco Supervisors provide \$250,000 each year from state funds received from the gas tax and auto registration receipts, to finance such construction.

RESERVOIRS AND DAMS

SAN DIEGO, Cal.—Gist & Bell, 148 El Dorado St., Arcadia, sub. low bid to city council March 17 at \$61,489 for construction necessary to enlarge the Morena dam and spillway to provide an increased reservoir capacity of approximately 1,000,000 gallons additional. Other bids were: Monarch & Breen, Inc., \$66,515; Miracle Const. Co., \$71,202.60; Butterfield Const. Co., \$76,228.

PIPE LINES, WELLS, ETC.

EUREKA, Humboldt Co., Cal.—W. S. Selvage, Eureka, at \$770 for 70 ft. depth, 35 inch dia. awarded contract by city council to drill well at Hawthorne St. and Broadway for municipal water department. Aune Machinery Co., Eureka, only other bidder at \$1400.

SEWERS AND SEWAGE DISPOSAL PLANTS

PINOLE, Contra Costa Co., Cal.—Town trustees contemplate construction of a storm sewer to run from Pinole Park along Fernandez Ave. to Pinole Creek. Surveys are being made.

VALLEJO, Solano Co., Cal.—County Surveyor P. A. Steiger completes plans for proposed sewer system to serve northern and eastern outskirts of the city of Vallejo. The project is estimated to cost \$150,000.

MISCELLANEOUS CONSTRUCTION

OAKLAND, Cal.—Following awards of contract made by East Bay Municipal Utility District:

50,000 gallons of grade "E" hot asphalt delivered as required f. o. b. trucks at heating plant located at any point within the East Bay Utility district, to Heafey-Moore, 344 High St., Oakland, \$3875.

2500 tons size ¾ inch to 1½ inch crushed rock, delivered as required f. o. b. corporation yard at 22nd and Adeline Sts., Oakland, to Hutchinson Co., 1450 Harrison St., Oakland, \$1000.

750 tons of size ¾ inch to 1½ inch crushed rock, delivered as required f. o. b. trucks at bins located at any

point within the East Bay Municipal Utility district, to Hutchinson Co., 1450 Harrison St., Oakland, \$1125.

1000 tons of "birds eye" screenings delivered as required to corporation yard at 22nd and Adeline Sts., Oakland, Makin & Kennedy, Inc., 101 4th St., Oakland, \$1850.

3000 tons of "birds eye" screenings delivered as required f. o. b. trucks at bins located at any point within the East Bay Municipal Utility district, to Makin & Kennedy, Inc., 101 4th St., Oakland, \$450.

5000 concrete meter boxes and covers delivered as required to corporation yard, 22nd and Adeline Sts., Oakland, to Art Concrete Works, 24th and Adeline Sts., Oakland, \$3500.

LOS ANGELES, Cal.—H. W. Rohl & Co., Roosevelt Bldg., Los Angeles, at \$652,738 submitted low bid to Board of Public Works to construct three tunnels and appurtenant work in connection with the Figueroa St. Extension, in accordance with plans prepared by Merrill Butler, chief bridge engineer, City Hall. The work involves construction of three concrete and tile lined tunnels through Elysian Park, the tunnels to be approximately 46.5 ft. in width by 23 ft. high, of semi-circular shape, of an aggregate length of 996 ft. There will be one 5 ft. walk with 1½ ft. curb on the opposite side. In addition to the tunnels, the job will include storm drain estimated at about \$30,000, retaining wall, and necessary walls and cement concrete paving.

WATER WORKS

WATSONVILLE, Santa Cruz Co., Cal.—Grant Miner, Jr., 505 Emerson St., Palo Alto, awarded contract by city council at \$116,924 to construct a slow sand filter plant and appurtenances, reservoir lining and cover and other water works improvements, the project comprising the following principal features:

Concrete slope and bottom, lining, concrete piers and wooden roof, together with certain piping, water measuring device and other improvements and at the two main distributing reservoirs at Freedom Village, approximately 2 miles west of north of the business district of Watsonville.

A slow sand filter plant having a nominal maximum capacity of 2.5 million gallons daily, embracing a sedimentation basin, 5 filter units, sand storage bin, filtered water basin, 50,000-gallon storage tank, head house, tool and storage houses, together with all piping and appurtenances, and in the vicinity of Corralitos Village, approximately 7 miles west of north of the business district.

The following approximate quantities are involved in the above improvements: 5700 cu. yds. of net excavation for structures; 2550 cu. yds. of concrete, mostly reinforced; 212,500 ft. b.m., of lumber in roofs and elsewhere; 6000 lin. ft. of water and drain pipe ranging from 1 inch to 20 inches in size and of various materials. In addition to the above there will be grading and considerable other work of a miscellaneous nature.

SAN FRANCISCO—Until April 15, 10 A. M., Schedule No. 928-30-236, bids will be received by Quartermaster Supply Officer, General Depot, Fort Mason, to furnish and deliver c. i. soil pipe and fittings, including 470 bends, quarter, straight hub, 270 2-in. and 200 4-in.-150 close, 150 nipples; 950 square head plugs; 2531 malleable iron pipe fittings; 1300 ft. soil pipe, 4-in. in 5 ft. lengths of which 300 ft. will be single and 1000 ft. double hub; 3200 ft. 4-in. wrought

iron pipe, welded; 220 brass or bronze body valves, 80 $\frac{1}{2}$ -in., 34 $\frac{3}{4}$ -in., 6 3-in., and 100 Globe 1-in., for 211 lbs. S.W.P. Specifications and further information obtainable from above.

SANTA BARBARA, Cal.—Until 1:30 P. M., April 2, bids will be received by the city clerk for all labor and material (except pump, motor and starter which will be furnished by the city) for constructing a salt water pipe line and pumping system for Los Banos Del Mar pool, located at West Cabrillo Blvd. and Castillo St. The work involves 947 ft. of 6-in. welded iron pipe, with valves, fittings, suction hose, buoy, and pump foundations. Certified check or bond, 10% E. B. Brown, city engineer.

SAN FRANCISCO—Until March 31, 3 P. M., bids will be received by Leonard S. Leavy, city purchasing agent, 270 City Hall, to furnish:

10,000 ft. 6-inch cast iron (Class 150) centrifugally cast, bell and spigot pipe (made in U. S. A.) in either 12 or 16 ft. lengths, f. o. b. docks, San Francisco.

Specifications and further information obtainable from above.

SAN FRANCISCO—Until March 31, 3 P. M., bids will be received by Leonard S. Leavy, city purchasing agent, to furnish:

Standard weight galvanized steel pipe, (made in the U. S. A.), in random lengths, threaded and coupled, to be ordered for Mill shipment, f. o. b., 639 Bryant St., San Francisco, sizes as follows:
500 ft. $\frac{1}{2}$ -inch.
20,000 ft. $\frac{3}{4}$ -inch.
1,000 ft. 1-inch.
2,500 ft. $1\frac{1}{2}$ -inch.
20,000 ft. 2-inch.

Specifications and further information obtainable from city purchasing agent.

ALHAMBRA, Calif.—Until April 1, bids will be received by the city commission for approximately 400 tons of cast iron pipe and 25 tons of fittings. The pipe is to be used for high pressure mains on Alhambra Road, T. B. Downer is the water superintendent.

EUREKA, Humboldt Co., Cal.—Until April 1, 5 P. M., bids will be received by John Griffith, city superintendent of public works, 524 D St., Eureka, to furnish one deep well turbine pump with nominal capacity of 350 G. P. M. against a total head of 85 feet. Pump shall consist of a pumping element with a motor to be operated on a 440-volt, 3-phase, 60-cycle A. C. and at a speed not to exceed 1500 revolutions per minute; a pumping unit consisting of one or more impellers of the enclosed type, each operating in a separate case or bowl; a combination discharge column consisting of an outer housing, an inner housing and a drive shaft with suitable bearings, and a galvanized cornucopia strainer. Bids to be f. o. b. Eureka. Certified check 10% payable to city clerk required with bid.

TULARE, Tulare Co., Cal.—Bids will be asked shortly by Municipal Board of Public Utilities for water main extensions and sinking well in west side of city.

SAN FRANCISCO—National Cast Iron Pipe Co., Balboa Bldg., San Francisco, awarded contract by Quartermaster Supply Officer, Fort Mason, to furnish: item 1, 6000 ft. pipe, water 10-in.; 2, 1 reducer, 12 to 10 in.; 3, 1 Y branch. Item 1, \$1.19 ft.; 2, \$1.35

3, \$23.88; f. o. b. Manila. Other bids were:

American Cast Iron Pipe Co., 808 Balboa Bldg., item 1, \$1.23 ft. f. o. b. Manila, 76c Birmingham, 97.4c Ft. Mason; 2, \$16 Manila, \$14 Birmingham, \$15.35 Ft. Mason; 3, \$26.45 Manila, \$23.50 Birmingham, \$25.50 Ft. Mason. United States Pipe & Foundry Co., 307 Monadnock Bldg., item 1, \$1.196 ft.; 2, \$16, 3, 27.45 f. o. b. Manila, or item 1, \$1.078; 2, \$14.70; 3, \$25.50, Ft. Mason.

SAN JUAN CAPISTRANO, Orange Co., Cal.—W. K. Hilyard, engineer, Santa Ana, preparing plans for 250,000 gal. concrete reservoir and installation of water mains and fire hydrants for Orange County Water Dist. No. 4; estimated cost, \$36,000.

WHITTIER, Los Angeles Co., Cal.—City sets April 14 as date to vote bonds of \$30,000 to finance extensions and improvements to water system.

STREETS AND HIGHWAYS

YUBA COUNTY, Cal.—As previously reported, bids will be received Apr. 16 by State Highway Commission to grade and pave with concrete, 0.9-mil. through Wheatland. Project involves: clearing and grubbing, 9300 cu. yds. rdwy. excav. without class; 29,500 sta. yds. overhaul; 160 cu. yds. struc. excav.; 10,800 sq. yds. subgrade for pave.; 2065 cu. yds. class A Portland cem. conc. (pave.); 43 cu. yds. class A Port. cem. conc. (struct.); 54,000 lbs. bar reinf. steel (pave. and struc.); 600 cu. yds. pit run gravel (borders and street connections); 55 tons untreated crushed gravel or stone surf. (borders and street conn.); 124 lin. ft. 12-in., 46 lin. ft. 18-in. and 44 lin. ft. 24-in. corr. metal pipe; 115 cu. yds. removing and disposing of conc. in existing pavement and struc.; 6 mi. moving and resetting ppty. fences; 4 mi. new hog-tight pty. fence; 51 sta. finish roadway; 18 each, monuments, complete, in place. State will furnish corr. metal pipe.

FRESNO, Fresno Co., Cal.—Until April 3, 10:30 A. M., bids will be received by H. S. Foster, city clerk, (103-D) to construct 6-in. vit. clay pipe sewer in alley in Roeing Addition, including 3 cement conc. manholes with c. i. covers; 4-in. on 6-in. wyes. 1911 Act. Bond Act 1915. Awards have not been made on any of the above products, and are help up pending results of tests from the state laboratory.

CLAUSSEN COMPANY WILL OPEN NEW EAST BAY PLANT

Formal opening of the warehouse and sales offices of the C. G. Claussen and Company, Inc., at 1650 Thirtieth-second street, Oakland, for the sale and distribution of iron and steel products, pipe, valves, fittings, engineering and marine supplies, in the East Bay District, will be held April 1st, it is announced by C. A. Wall, one of the resident managers of the new branch.

The new warehouse and offices were established in Oakland to better serve East Bay customers and to further develop the large market that exists in that section. From the Oakland plant distribution will be made not only to the East Bay district but to both Northern and Central valley sections.

C. A. Wall and C. C. Beatie will be in charge of the Oakland branch as resident managers. C. A. Claussen and Company, incorporated, is owned and controlled by C. G. Claussen, W. G. Gilmore, C. A. Wall and C. C. Beatie, all of whom have been associated in the steel and iron business in the bay district for many years.

The new Oakland plant covers approximately 30,000 square feet and is equipped with an overhead traveling crane and indoor spur track to facilitate the handling of the heavy mate-

rial. Cutting equipment has been installed and the bins and storage racks have been so arranged that the stock is readily accessible.

Among items that will be carried in stock are steel bars and bands, steel angles, channels, I beams, tees, cold rolled shafting, sheared and universal mill plates, checkered steel floor plates black, galvanized and blue annealed steel sheets, bars for reinforcing of concrete and special steels of all kinds. There will also be standard black and galvanized pipe, hydraulic pipe, irrigation and oil well casing, malleable iron, cast iron and brass fittings of all kinds and brass and iron body valves. The stock will also include marine supplies such as bolts, nuts, rivets, screws, files, hack saw blades, wrenches, Manila rope and cordage, cotton waste and wool waste.

FERGUSON COMPANY ANNOUNCES NEW DIVISION

Officials of The H. K. Ferguson Company, engineers and builders, Cleveland, Ohio, announce a new division in their organization which will broaden their activities in the commercial building field, handling the design and construction of banks, office buildings and other commercial structures.

Walter J. Aring, who for six years has been in charge of development and maintenance of all property owned and controlled by The Union Trust Company of Cleveland, has resigned his position with the bank to head the new division.

Mr. Aring's wide experience in construction and in economic study of real estate development has earned him wide recognition as a consultant in the layout and design of investment property. He has served on commissions of the Building Owners and Managers Association and has been called into consultation by many banking business connections of The Union Trust Company during the consideration of important building plans.

Harold K. Ferguson, president of The H. K. Ferguson Company, in commenting on his firm's decision to enter the commercial building field, stated, "We already have the architectural, engineering and building organization necessary for this type of work. We have felt a demand among investors and building organizations for the same type of service which the larger industrial units of the country have accepted as the economical way to handle their construction work."

BRITISH LUMBER BUYERS CAUTIOUS IN FEBRUARY

Fears of increased taxation in the forthcoming government budget and increasing unemployment have combined to make British lumber buyers cautious, according to a cable from Donald Renshaw, commercial attache in London, to the Lumber Division of the Department of Commerce.

January business in American hardwoods, says this report showed little improvement, even in the face of less heavy importations. Douglas fir imports decreased considerably during January as compared with the previous month, and the demand was only fair. There was a limited inquiry for pitch pine and forward business in this species was difficult to arrange.

Plywood purchases for forward delivery have been disappointing in volume, and there is a continued absence of demand for this product. Prices for Douglas fir plywood remain steady and a satisfactory volume of business is reported.

OFFICIAL PROPOSALS

STATE OF CALIFORNIA

DEPARTMENT OF PUBLIC WORKS

DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be re-
ceived at the office of the State High-
way Engineer, Public Works Build-
ing, Sacramento, California, until 2
o'clock P. M. on April 16, 1930, at
which time they will be publicly
opened and read, for construction in
accordance with the specifications
thereof, to which special reference is
made, of portions of State Highway,
as follows:

Plumas County, a reinforced con-
crete girder bridge across the North
Fork of Feather River at Chester
(H-Plu-29-A), consisting of three 35-
foot spans on concrete pile bents.
Yuba County, through Wheatland
(H-Yub-3-A), about nine-tenths
(.9) mile in length, to be graded and
paved with Portland cement concrete.

Los Angeles County, between the
westerly boundary and Santa Monica
(VII-LA-60-A,B), about twenty-six
and five-tenths (26.5) miles in length,
heavy fuel oil to be furnished and ap-
plied to the shoulders.

San Diego and Imperial Counties,
between La Mesa and El Cajon (S.
D-12-B), about two and seven-tenths
(2.7) miles in length; between Flinn
Springs and Viejas Valley (S.D-12-C,
D), about eleven and three-tenths
(11.3) miles in length; between Pine
Valley Creek and Kitchen Creek (S.
D-12-D,E,F), about seven and nine-
tenths (7.9) miles in length; between
Jacumba and Myers Creek (S.D,Imp-
12-G,H,A), about thirteen and five-
tenths (13.5) miles in length; a total of
about thirty-five and four-tenths
(35.4) miles in length, heavy fuel oil
to be furnished and applied to the
shoulders.

Calaveras County, a reinforced
concrete girder bridge across Calaver-
itas Creek 3 miles south of San An-
dreas (X-Cal-65-B), consisting of one
60-foot span on concrete piers and
six 30-foot spans on concrete bents
and abutments with rubble masonry
wing walls.

Proposal forms will be issued to
only those Contractors who have
furnished verified statement of ex-
perience and financial condition in
accordance with the provisions of
Chapter 644, Statutes 1929, and whose
statements so furnished are satisfac-
tory to the Department of Public
Works. Bids will not be accepted
from a Contractor to whom a proposal
form has not been issued by the De-
partment of Public Works.

Plans may be seen and forms of pro-
posals, bonds, contract and specifica-
tions may be obtained at the said
office, and they may be seen at the
offices of the District Engineers at
Los Angeles and San Francisco, and
at the office of the District Engineer
of the district in which the work is
situated. The District Engineers' of-

fices are located at Eureka, Redding,
Sacramento, San Francisco, San Luis
Obispo, Fresno, Los Angeles, San
Bernardino and Bishop.

A representative from the district
office will be available to accompany
prospective bidders for an inspection
of the work herein contemplated and
Contractors are urged to investigate
the location, character and quantity of
work to be done, with a representative
of the Division of Highways. It is re-
quested that arrangements for joint
field inspection be made as far in ad-
vance as possible. Detailed information
concerning the proposed work
may be obtained from the district
office.

No bid will be received unless it is
made on a blank form furnished by the
State Highway Engineer. The special
attention of prospective bidders is
called to the "Proposal Requirements
and Conditions" annexed to the blank
form of proposal, for full directions
as to bidding, etc.

The Department of Public Works re-
serves the right to reject any or all
bids or to accept the bid deemed for
the best interests of the State.
DEPARTMENT OF PUBLIC WORKS,
DIVISION OF HIGHWAYS,

C. H. PURCELL,

State Highway Engineer.

Dated March 19, 1930.

(March 24-31; April 7-14)

NATIONAL DIESEL ENGINE MEET JUNE 12 TO 14

The Third National meeting of the
Oil and Gas Power Division of The
American Society of Mechanical En-
gineers will be held at Pennsylvania
State College on June 12 to 14.

Julius Kuttner, in charge of the
technical program, announces that
there will be fifteen papers presented
in five sessions.

An exposition of Diesel engine ac-
cessories will be held as at the two
previous meetings.

A "Pittsburg" Auto-
matic Water Heater
installed in the Home
indicates high quality
throughout.

Recommended and speci-
fied by all the leading ar-
chitects, plumbers and
builders.

Consider the high merit
of the Pittsburg coupled
with "Pittsburg Perfect
Service."

"Hot water quick as a
wink."

Pittsburg Water Heater Co.

Makers of "Pittsburg Automatic"—"Bungalow Automatic"
Storage Systems and "Lyon" Tank Water Heaters.

MARSHALL AND STEARNS MERGES WITH ROME CO.

Marshall and Stearns Company, originators of the wall bed, a building feature that has made possible the popular and efficient apartment building of today, on April 1 consolidated with the Rome Company, Inc., nationally known manufacturers of De Luxe bedsprings and other sleeping equipment.

The Marshall & Stearns Company will operate as a division of the Rome Company with the management continuing under the direction of H. B. Stearns, founder of the company and N. B. Douglass, creative genius of the organization.

No change is to be made in the personnel or merchandising policy of the company.

The San Francisco factory, which becomes the seventh of the Rome Co. plants in the United States, will continue manufacturing wall beds.

H. B. Stearns states that this consolidation of the resources and experience of two veteran and allied organizations will result in a wall bed of greater merit and value to the building industry. The rigid standard of construction and the patented features of Rome bedsprings will now be combined with the perfected mechanical features developed during the 35 years they have been manufacturing wall beds.

S. F. SEEKS BETTER TRADE RELATIONS IN SAN JOAQUIN VALLEY

To build better trade relations for San Francisco, more than one hundred prominent business men are expected to participate in the San Francisco Chamber of Commerce Trade Excursion into the San Joaquin Valley leaving May 4 and returning on the evening of May 8. The special train of the market building party will visit thirty-two valley cities, making over night stops at Bakersfield, Fresno and Stockton.

The primary purpose and slogan of this excursion is to impress upon the minds of the business men in the communities to be visited the fact that 'San Francisco is the Market Center of the Pacific Coast.' Chairman Heribert Eloesser of the Domestic Trade Committee, states, "Although we expect to increase the business of San Francisco as the result of the trip, it will not be an order taking expedition since no merchandise will be sold en route."

According to present plans, group meetings will be held with the business people of the cities where overnight stops will be made. Prominent speakers will tell of the San Francisco Chamber's activities planned to directly effect the welfare and progress of the San Joaquin Valley. Other speakers will discuss modern trends in merchandising, the San Francisco market, and its relation to the in-

terests of the merchants involved. Leaders of the communities to be visited will outline their projects in which the San Francisco commerce body may be helpful.

Similar talks will be made in the other communities to be called upon, augmented by personal calls upon retailers. Individual excursionists and committees plan to become better acquainted with the merchants in each community, their places of business, and to learn to their business and community problems which San Francisco may assist in solving.

"The San Joaquin Valley Trade Excursion is a co-operative undertaking," Eloesser continued, "designed to maintain present friendly business relationships with valley merchants now buying from San Francisco and to develop new business with those who are now buying elsewhere. For that reason we urge that every San Francisco business executive, desiring to increase his trade, with this growing market, to plan to accompany the party. Reservations can now be made at the Chamber of Commerce Domestic Trade Bureau."

\$3,502,312 IS SAN FRANCISCO BUILDING EXPENDITURE DURING MONTH OF MARCH

Building construction undertaken in San Francisco during the month of March, 1930, involved an expenditure of \$3,502,312, according to figures compiled by John B. Leonard, superintendent of the Bureau of Building Inspection of the Department of Public Works. During the month 584 permits were issued as compared with 610 for the corresponding period in 1929 when the valuation was estimated at \$2,701,111.

March expenditures exceed the combined valuations of January and February of this year, in January figures totaling \$1,431,983 when 610 permits were granted and in February with a total of \$1,144,062 with 495 permits granted.

The figures of the past month include a \$410,000 addition to the Southern Pacific Hospital at Baker and Fell streets and \$1,127,388 for additional buildings at the U. S. Marine Hospital in the Presidio.

The following is a segregated report of the March activities as compiled by the Bureau of Building Inspection:

Class	No. of Permits	Est. Cost
A	1	\$ 410,000
B	3	580,000
C	7	213,000
Frames	142	695,075
Alterations	429	216,849
State work	1	260,000
Govt. Bldg.	1	1,127,388
Total	584	\$3,502,312

PUBLIC SAFETY MEET SCHEDULED FOR OAKLAND

To take stock of California's traffic toll and make an earnest endeavor to stem the tide of traffic accidents, all agencies in the state concerned with the problem of making streets and highways safer will be represented in a state-wide public safety convention in Oakland, April 24 and 25. The meeting will be held under the auspices of the California Committee on Public Safety which represents all groups interested in traffic conditions, including state, county and city enforcement officials. The call for the meeting was issued by State Senator Arthur H. Breed, chairman of the California Committee on Public Safety.

Governor C. C. Young, who has officially sanctioned the work of the committee and urged all citizens to cooperate in its program, will head the list of speakers. Over five hundred delegates are expected to attend, representing official, civic and private corporation agencies engaged in the constant campaign against traffic carelessness and recklessness.

Among the speakers will be Senator Breed; Ramsey Probasco, president East Bay Safety Council; E. B. Meek, director, State Department of Public Works; Eugene Biscailuz, superintendent, California Highway Patrol; C. H. Purcell, chief engineer, California Highway Commission; A. G. Mott, chief engineer, State Railroad Commission; C. C. Cottrell, manager, Highways Bureau, California State Automobile Association, and Ralph W. Robinson, executive secretary, San Francisco Traffic Survey Committee.

The aim of the convention will be the ambitious one of reducing the unnecessarily large toll of human lives, to say nothing of the economic waste, traced to traffic accidents. The need of such a state-wide cooperative move is indicated by a study of traffic accident figures.

PASADENA AWARDED MILLWORK INSTITUTE MEETING

Selection of Pasadena as the next convention city and a banquet and entertainment program at The Californian concluded the one-day tri-annual convention of leaders of the Millwork Institute of California at Fresno March 28.

The institute urged co-operation of architects in connection with a plan to induce the use of more lumber in building work. Standard specifications for the use of millwork will be sent to architects about April 15th.

Other topics under discussion included organization plans, accredited standards for the millwork industry, the millwork dollar for 1930 and results of contacting architects. President Arthur W. Bernhauer of Fresno, presided.

STATE'S BUILDING PRACTICE TOLD BY ARCHITECTURAL CHIEF

By J. W. Dutton, General Superintendent, California State Division of Architecture, in U. S. Construction Magazine.

The evolution of a construction project is very often quite interesting. The man with the money finds himself in need of a building. He looks about for his architect and, when he finds one to his liking, he lays his desires before him, giving him all the information he can think of, how much he expects to spend, what sort of a building he wants, and the type of architecture he favors, and the type of construction he thinks is best for the use he proposes to give it. The architect then proceeds to design the building, and after various degrees of modification or elaboration he is successful in selling the owner a design which it is shown by the estimate can be built within the funds available.

This being settled upon and approved, the architect gets out complete working drawings and specifications and the job is put out for bids and finally a contract is let for its construction.

The Next Step

Then follows usually the selection of a satisfactory superintendent of construction to represent the architect and owner and the work goes merrily forward. Unless otherwise agreed upon, the responsibility of the architect continues throughout the entire progress of the work and on to its satisfactory completion.

With the State department of public works, division of architecture, the general scheme is very much the same. Instead, however, of the business being arranged by a private owner and a private architect, it is done on the one side by the State architect and his designing force and estimators, and on the other side by the executive head of the institution, under the guidance and direction of the head of the department under which the particular institution comes, such as the department of institutions, department of education, or the State board of prison directors.

In many cases, due to the similarity of requirements and the general kept on all of the construction carried on by the division of architecture, and the familiarity of all parties concerned with the latest approved plan layouts, etc., the preliminary arrangements can be decided upon without undue loss of time. However, occasionally a project comes up calling for design of a building for some exceptionally special function on which the division has no first-hand information available. Considerable research is obviously then required in order that no detail necessary to the successful and practical use of the building is omitted.

Familiarity With Job

Very naturally, when a set of finished drawings is gotten out for a job, comprising complete architectural and engineering drawings and details, including mechanical and electrical layouts and details, and the specification writer has completed his work, the office force, particularly those in charge of the various sections, is pretty thoroughly familiar with the project.

The job then goes out for bids and contract. It is then that the field force gets its first look at what has taken months, possibly, to devise. Within a few short weeks at most, the job is started and the field superintendent is expected to have acquired a pretty thorough knowledge of what is on those plans and in the specifications and be able to protect the State against errors or omissions such

as are so easily possible during the progress of a job.

Thus, attached to the field force of any construction organization, there is a degree of importance and responsibility which is not always fully realized or appreciated.

In some minor cases, where the work is regular in character, the field superintendent needs no particular assistance from the office in addition to the plans and specification in order to carry out the job as called for, but in the case of major construction, there are peculiarities of requirement and design attached to practically every project turned out that call for unusual application of known principles and methods of construction. Quite often the actual success of the detail from the builder's standpoint, calls for further study and preparation or arrangement of earlier construction by the field force. On account of the often remote locality of the work there is difficulty in obtaining a detailed explanation of the scheme from the designer and it is possible that the job superintendent does not grasp the entire import of the matter and later finds that adequate provision has not been made in earlier work to make the best installation possible.

Limit Is Needed

It is fully realized that there must be a limit to what is known and detailed in a set of drawings and called for in the specifications and a lot must be left to the intelligence and experience of the field superintendent, but it is a wonderful help to him and an invaluable guide against error if his attention is called to the exceptional by a brief note on the drawing.

It is conceded by contractors generally that there is very little to guess at on drawings gotten out by the division of architecture and it is not often that a difference of interpretation arises between the superintendent and contractor. This happy (Continued on Page Three)

situation can only be brought about and maintained by advance knowledge and conclusion as to what is called for, and proper directions given before errors are made.

Where a field superintendent is already on the ground, in connection with other work, he is supplied with drawings and specifications of the forthcoming new project as early as possible before the contractor arrives to start the work. The field superintendent is instructed to apply any spare time he may have to a detailed study of these drawings and to make notes of any and all points on which he is not fully clear so that these may be explained to him in ample time. After the contractor has laid out his lines it is the duty of the field superintendent to personally check every measurements for correctness and see that each nail or saw cut is properly indicated on the batter boards before any construction is begun. He may then see that these points are properly guarded and preserved during their entire usefulness and that they are available for future checking of work.

Before a projected building is started in the designing room, a survey of the proposed site is made and where the soil bearing values are already known, test holes are dug adjacent to and within the lines of the foundation so that approximate footing depths can be determined.

When a site is selected on entirely new and unknown ground, the bearing value of the soil is determined by load tests prior to the design of the foundation footings.

Superintendent's Duty

During the excavating of footing trenches, etc., it is the express duty and responsibility of the field superintendent to carefully observe the nature and character of the formations encountered and the depths at which the proper bearing soil is found so that any necessary changes in the footing depths can be made by the structural designer which will effect a saving by change order to the contractor.

These observations also sometimes result in extra depth excavation requirements to reach proper bearing, and in such cases the result is an extra charge by the contractor. The amount of this saving or extra, as the case may be, is determined by a fixed unit price in the contractor's bid which covers the material and labor involved. This unit price is called for in anticipation of possible variations and due to the fact that in order to obtain comparable bids the bidders must have definite depths to figure on.

These variations are measured both by the field superintendent and the contractor and agreed upon before concrete is poured. The figures are reported to the main office, where the exact deduction or addition is calculated and settlement is made with the contractor accordingly.

An Important Function

One of the most important functions of our field superintendents at the start of a project is to see that the contractor proceeds early to arrange for delivery of concrete aggregates which he believes will pass the tests provided for in our specifications. Obviously this is necessary so that the contractor does not find himself without approved material when he is ready to pour footings.

Usually only small amounts of each size of aggregate are delivered, pending result of tests, representative samples of these being selected by the field superintendent and divided into two parts, one to be forwarded to the testing laboratory and the other retained by him for comparison and subsequent deliveries in case the test proves satisfactory and the material is approved for use.

Reinforcing steel is also subjected to rigid tests and must be approved by the laboratory before it can be used. This test is sometimes made at the vendor's warehouse by a testing engineer from the State's laboratory to avoid expense of shipping and delay in case of rejection, and especially in cases where bending and fabricating is to be done at the warehouse before shipping to the job.

This method is obviously advantageous to all parties concerned and invariably results in more accurate bending than is usually obtained where the work is done on the site with the use of portable hand tools only. Contractors generally throughout the State have come to realize that this phase of the work on State construction is rigidly inspected and that narrow variation limits are imposed, and as a result, a constantly increasing better class of workmanship is being obtained.

Simplicity Invited

Steel carefully bent to detail makes for simplicity in placing and saves labor.

bor cost in the field. Most experienced contractors prefer to sublet this branch of the work "furnished and installed" and naturally a better class of workmanship is obtained due to the skill and knowledge of specialists who install the work.

Many other materials which enter into the construction of the building from foundation to roof and finally on the finish, such as stucco and paint, require tests and written approval before they are allowed to be used. When it is realized that the state is in the business of designing and constructing buildings for permanent use at the various institutions, and never for sale, it will be readily understood why these rigid tests are made and the specified requirements insisted upon.

Carefully thought out layouts for all piping and fixtures, such as plumbing, steam, and electricity, are made by our mechanical section, and these often call for special methods of installation due to the unusual requirements of individual institutions.

That which is proper practice at a hospital for insane is not altogether a proper installation in a prison, and very naturally neither of these are suitable in administration buildings or residences. From observation and study reaching back over a period of many years, it has been possible to devise installations that meet practically every requirement and the various schemes are now pretty well standardized and satisfactory.

EQUIP HOME ELECTRICALLY IN ONE INSTALLMENT SALE

Purchase of all electrical appliances for the home under one long-term contract with very low down-payment is the latest effort of the electrical industry toward complete electrification of the home, a goal toward which all units in the field are strenuously striving, says the "Business Week."

First to adopt the plan is the British Columbia Electric Co., Vancouver. Says Edmund E. Walker, sales engineer of the company: "By spreading payments over a 3-year period, we make it possible for a customer to buy four or five appliances for about the same monthly payments as the regular terms on a washing machine or a range, and this plan meets our real competitors, the piano salesman, the furniture salesman, the furrier, and others striving for the consumer's dollar." Major appliances are considered to be: refrigerator, washing machine, range, dishwasher, ironer, and water heater. Average total cost of these five items comes to about \$360.

Further applications of the single-sale principle as advanced by electrical merchandising specialists include combination of utilities and electrical dealers in one city or territory in a cooperative buying agency to purchase in volume from manufacturers. Utility and dealer-salesmen would sell complete electrification to each home as requisition the appliances from a central warehouse. National financing houses would handle the paper for each sale on a 6% basis to make possible the installment plan. Finally, the cooperative organization would install and service the appliances as part of the "one-sale" plan. All sales agencies would sell on the same terms and the same sales aids such as advertising, display, and demonstration.

Industry leaders see in the plan a way to increase volume of appliance sales from 20% to 30%, reduce the first cost of appliances appreciably, attain mass production and volume purchasing, give terms of payment that will compete with other business, and relieve householders from piecemeal purchase of appliances, troubles with wiring, installation and servicing, and large financial outlay.

SUES STATE FOR \$330,260

An amended suit for \$330,260.89 has been filed in San Francisco against the state of California by F. Rolandi, contractor, for recovery of sums he expended in 1924 during construction of a bridge over the Klamath river near Requa.

Rolandi attempted to press the suit five years ago but because of faulty briefs and petitions was unable to get action, according to court attaches.

Rolandi claims that on June 19, 1924 the state highway commission awarded him the contract for the bridge. Specifications for the structure called for wooden sheet pilings for the coffer dam, he claims, while he advised pilings of sheet steel.

The commission refused his advice, he claims, and ordered him to follow specifications or lose the contract. As a result, he says, floods, water action and other conditions caused the wooden pilings to wash out and give way so many times that the commission finally consented to the use of steel.

But, Rolandi claims, the board insisted that he use an inner piling of wood with the result that his cost mounted to nearly twice the price the contract called for.

Rolandi was paid \$313,368.23, he said, while he actually spent \$643,629.12. He now seeks to recover the balance of the bridge's cost.

DATA ON MICRO-ORGANISMS IN ROCK IS SOUGHT

As the first progress report made since his original announcement of the discovery of living micro-organisms in rock millions of years old, Dr. Charles B. Lipman, professor of plant physiology at the University of California, has just announced that he is still checking his results and hopes to have a definite announcement to make by next summer.

He says, in a note just sent to "Science": "In September, 1928, I communicated to this journal a preliminary report on the discovery of living micro-organisms in certain pre-Cambrian rocks. These investigations have been continued and have involved painstaking and laborious checking of the technique employed. While the indications are still as given in the earlier paper, a final statement with respect to them must await the completion of a little further work. A final report should be ready next summer. Meanwhile conclusive evidence has been obtained to prove the existence of living micro-organisms in anthracite coal derived from mines in Wales and in Pennsylvania. The interpretation of these results does not accord with those of Schroeder, Galle, Potter and Lieske, who also worked with anthracite coal. I hope soon to furnish a report also on these investigations."

In his original announcement concerning the discovery of life in Pliocene rocks from the Mokelumne tunnel and pre-Cambrian rocks from Canada and the Grand Canyon of the Colorado, Professor Lipman said: "While some of the organisms which appeared in the culture are doubtless derived from the free air which had momentary access to the rock in the process of the technique employed, certain organisms were found which occur in every plate culture made with the rocks examined and which are of a strikingly different type from any which are usually found in plates made with soils or rocks. These organisms make a very sparse growth or media which support excellent growths of other organisms and seems to belong to the interior of the rocks studied."

MARBLE INDUSTRY TO HOLD PRACTICE CONFERENCE

The marble industry has been authorized to hold a trade practice conference with the Federal Trade Commission at a time and place to be announced later.

The meeting has been assigned to Commissioner Edgar A. McCulloch of the Commission, for supervision.

The industry includes producers, fabricators and installers of interior marble, the applicant group representing at least 80 per cent of the capacity for producing domestic marble and considerably more than half the capacity of the country for furnishing and installing marble.

Applicants have announced their intention of discussing, among others, the following subjects, with a view to drawing up rules of business practice: Inducing breach of contract; false and misleading names; price discrimination; bids; uniform cost finding system; uniform proposal contract form; reporting system on marble used annually, and credit system.

Producers, fabricators and installers of interior marble have plants in the following states: Alabama, Arkansas, California, Colorado, Connecticut; Delaware, District of Columbia, Georgia, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Nebraska, New Jersey, New York, North Carolina, Ohio, Oklahoma, Oregon, Pennsylvania, Tennessee, Texas, Utah, Vermont, Virginia, Washington, and Wisconsin.

DEMAND FOR DOUGLAS FIR AND AMERICAN HARDWOODS

A good demand for Douglas fir and American hardwoods is reported by Paul S. Guinn, acting Commercial Attaché at The Hague, Netherlands in a recent dispatch to the Lumber Division of The Department of Commerce.

The good demand for Douglas fir at the present time, says Mr. Guinn's report, is due to its increasing popularity as its merits become better known to the consumer and to the fact that stocks of this species are below normal. In the case of American hardwoods, the demand is normal and prices are firm.

Activities of the lumber-consuming industries in the Hague district are generally regarded as satisfactory except that the demand for shipbuilding lumber has been somewhat depressed, due probably to unreasonable arrivals of Scandinavian softwoods. This has had a generally depressing effect on the lumber market.

DEMAND FOR DOUGLAS FIR IN SCOTLAND IN 1929

The demand for Douglas fir in the Edinburgh, Scotland, district during 1929 was good, especially during the summer months, says a report from Consul Harold D. Finley to the lumber division of the Department of Commerce.

Severe weather in the early months of the year greatly reduced consumption of timber for house building, and this dullness in trade was noticeable even after the weather became favorable for building operations. As the summer advanced, however, home consumption became steady at a fairly satisfactory level.

The general outlook is regarded as more promising. Building trade prospects are said to be better than for two previous years. Mine prop orders are more plentiful, indicating an increased activity in mining. Shipbuilding orders also show an increase.

THE OBSERVER

WHAT HE HEARS AND SEES ON HIS ROUNDS

"Spend a little more money in advertising and do a lot more hard work," is the keynote of George Eastman's advice to American business for continued progress and prosperity in 1930.

Mr. Eastman, of kodak fame, patron of the arts and well known for his philanthropic activities, points to his own phenomenal business success as concrete evidence of the value of advertising. In a recent interview he declared that he is far from convinced that American industry is facing a serious depression.

"At the outset of one of the most abnormally dull seasons during the fifty years the Eastman Kodak Company has been in business, the question of retrenchment in advertising came up for discussion. Our decision was to spend more money and exert more energy. This was our subsequent policy thereafter when bad conditions threatened," he declared.

Although Mr. Eastman is not convinced that we are even now passing thru a period of serious recession, the fact that there may be any question about conditions prompts his company to again adopt the policy of stressing selling and advertising activity.

Just as advertising has played such a vital part in the expansion of the business of the Eastman Kodak Company, so we believe it to be a most powerful force in the building of our great American industries; in the wide diffusion and maintenance of our national prosperity.

A plumber has filed a suit against his landlord for injuries alleged to have been received on a plumbing fixture in his apartment. The plaintiff is Lewis Butler Hull, Jr., Berkeley. In a complaint on file in the superior court, he alleges that on March 27, last, he took hold of a faucet in the kitchen of his apartment, the faucet handle splintered and the porcelain of which it was made punctured his right hand. On the ground that Louis Saroni, proprietor of the apartment building was negligent in permitting such a faucet to be used, Hull asks \$15,977.50 damages.

An emphatic warning is issued by J. P. Collins, state director of professional and vocational standards to California contractors that licenses issued to co-partnerships cannot be used by individual members of such firms to enter into separate contracts. Collins has received complaints that in some cases three and four members of a co-partnership use one contractor's license. Such acts are a violation of the contractor's license act, Collins says.

Reiterating its policy of refusing to lay patented paving on which a royalty must be paid, the Fresno county supervisors postponed for a year the proposed paving of five miles of Mt. Whitney Avenue when a delegation of Riverside citizens appeared demanding use of a asphaltic concrete type instead of Bit-U-Muls as recommended by Chris P. Jensen, county surveyor.

Leonard P. Reaume of Detroit, president of the National Association of Real Estate Boards, in urging the necessity for new building methods which would decrease building costs, decries the fact that the construction of moderate priced homes has never advanced from the slow, made-by-hand process. "Building materials are still being made to fit the size of a man's hand," he explained. "They are transported to the building site and assembled in the course of two or three months by the most expensive methods of hand labor that the world has ever seen. If the local garage man were to buy the parts of an automobile and attempt to assemble them in his own garage and thus supply his customers, we should have a process which compares with the home building methods of today. There is no good reason why, if the problem is studied, we cannot develop a new technique in home building. More and more portions of buildings can be fabricated in factories so that a finished dwelling could be assembled in a few days, instead of a few months. There are those who object to such an idea on the ground that we should have monotonous and standardized houses, but we have those now to a great extent. The automobile industry probably makes more extensive use of mass production methods than any other commodity, yet it is possible for the buyer to choose between some six or seven hundred models made by approximately fifty different companies. There is a wide range of choice here, and the same could be true of fabricated dwellings. Moreover, fabricated inexpensive homes need not foreclose the possibility of individually designed homes for those who can afford them." Mr. Reaume expressed the hope that all the industries concerned in the building process would some day see fit to establish a research bureau whose purpose would be to study technical ways and means for reducing the cost of home building.

An industry that is typically American, the Steel Construction Industry, will be honored during the Westinghouse Salute to be broadcast Tuesday evening, April 22, at 10 o'clock Eastern Standard Time. During this program Charles N. Flitts, of Boston, president of the American Institute of Steel Construction, will talk. Prosperity, which is one of the dominant themes of the Salute series, will be especially emphasized in this program because of the fact that steel construction has so greatly aided America's progress. Because of the comparative youth of the industry the music selected by Cesare Sodero, director of the Westinghouse orchestra and chorus, will be principally of modern style. The program will be broadcast over a coast-to-coast NBC network which includes WJZ and the Westinghouse stations DKKA, WBZ, KYW and WBZA.

An \$182,000,000 contract for the second largest steel works in the world has been given to Arthur G. McKee & Co., Cleveland, by the Soviet Government. The \$182 millions does not include at \$55,000,000 341,500-kilowatt power plant to adjoin the steel works, the contract for which has not been let.

That California, and especially the northern section of the state, is rapidly becoming one of the steel centers of the United States is strikingly shown by the fact that steel, iron and allied products valued in excess of \$1,216,596,000 have been produced here since 1927.

Fourteen California steel works and rolling mills in 1929 gave employment to more than 5000 workers whose wages amounted to \$7,678,377. The total value of products produced by these plants was in excess of \$24,527,552, according to a recent survey made by the State Chamber of Commerce. The value of products produced by the steel, iron, and allied groups has been estimated at approximately at \$405,532,000 yearly since 1927.

The growth of steel works and rolling mills in California has been exceedingly rapid and the last two years have witnessed large expansions in northern California involving millions of dollars.

In 1899 there were only three establishments in California and they employed 555 workers. Each year with the exception of 1921 has shown a large increase in the number of steel workers and new establishments.

Iron, steel and allied manufacturers as a group gave employment to nearly 75,000 workers during 1929, which represents approximately 23 per cent of the wage earners employed in 10,000 manufacturing establishments in the state, a recent survey reveals.

Wages paid by the allied industries aggregated \$92,176,000 and it is believed that figures for 1930 will place earnings close to the \$100,000,000 mark.

Value of products for the 12 months period covered were \$405,532,000. With recent expansions in California by eastern steel groups during the last two years, wage and production figures will increase by leaps and bounds San Francisco industrialists declare.

Now that the street sweepers are styling themselves as "cleaning engineers" and patent medicine vendors wish to be known as "vital engineers," the time has come for nation-wide laws to designate who are engineers and who are not, the American Association believes.

Twenty-two states are without registration laws regulating engineers. H. A. Wagner, president of the Association, said in announcing a campaign to put the engineering profession on a parity with medicine and law.

Furthermore, Wagner said, questionable schools, many of the correspondence variety, are pouring "graduates" into the field without training or background and inflicting a hardship on both the public and the engineering profession.

These "thriving educational gangsters," as they are called by Wagner, are taking a monetary toll of \$85,000,000 a year from the "uneducated and gullible." Strict regulator laws will be asked in the 22 states which now have none and standardization in the 26 states which have regulations of one kind or another.

Wagner said there were about 100 such schools in existence, operating in New York, Milwaukee, St. Louis, Los Angeles, Pittsburgh, Kansas City, Minneapolis and Washington.

Santa Barbara Lumber & Mill Co. and other industries of the same nature operating at Santa Barbara, have filed a complaint with the Railroad Commission against Stearns Wharf Company, alleging that the wharfage rate of \$1.40 per 1000 feet of lumber, charged by defendant utility, is unreasonable and discriminatory, and asking the Railroad Commission to fix a rate of \$.75 per 1000 feet for such service.

A large increase in the quantity of lumber, especially Douglas fir, exported from the Pacific Coast to France, is reported by Consul General Mason Turner, of Paris, to the lumber division of the Department of Commerce. This development, says the report, is particularly noteworthy in view of the fact that exports of lumber from the Pacific Coast to France have, until recently, been extremely small. These imports are now apparently increasing, and the lumber from the Pacific Coast is to some degree replacing some of the cheaper woods heretofore received by France from north European countries. The increase in Pacific Coast lumber exports to France appears to be due to the fact that it is lower in price and can be obtained in better lengths than that from other markets, and particularly to the increase in price of French woods.

A slight decrease in unemployment for March—the first gain to be registered since August—was shown by figures made public by the American Federation of Labor, based on trade union reports to President William Green. Ten of twenty-four cities to report showed a decrease in unemployment, ten others reported increases and in four there was no change. The greatest improvement was shown in the figures of the seafaring trades, where unemployment decreased from 33 per cent in February to 27 per cent in March. Musicians' unions reported an increase in the number of men out of work from 28 per cent in February to 31 per cent in March. Building trades employed more men; printing and metal trades employed less.

Marking the extension of the Russian lumber market to Mexico, the first shipment of lumber from Russia was received at Vera Cruz recently, according to a report from Consul Leonard G. Dawson to the Lumber Division of the Department of Commerce. This shipment—300 tons in all—consisted of 33,482 pieces of Russian pine lumber and 1,014 cases of match sticks. A large part of it was forwarded to Mexico City, although 30,000 board feet are reported to have been sold in Vera Cruz. "This Russian lumber has been very favorably commented upon at Vera Cruz," Consul Dawson's report says. "Heretofore practically all lumber imported into Vera Cruz has come from the United States. It is reasonable to believe, therefore, that Russian lumber will offer strong competition to American lumber in the future."

The building trades are going to have a great year during 1930, according to Jas. Twohy, Portland, Ore., contractor. "Construction always responds to the economic law of building when workers are idle," Twohy says. "Labor is hardly cheaper, but men are more willing to work, increasing efficiency, and materials are generally more plentiful and easier to get. It looks like a pretty lively year."

New construction projects in Oregon and the Portland trade area involve a contemplated expenditure of \$68,750,000, the Portland Chamber of Commerce announces. This is substantially larger than the building figure for last year, \$47,414,000. One of the largest items in the list is the Great Northern railway's proposed southward extension from Klamath Falls into California, on which about \$13,000,000 will be spent.

HERE — THERE — EVERYWHERE

Former State Engineer Paul Bailey has been appointed chief engineer of the Tri-Counties Conservation Association, to have charge of the design and construction of the \$50,000 dam to be built by San Bernardino, Riverside and Orange counties at the mouth of the Upper Santa Ana Canyon. The dam will be about 550 feet long, of the wing type, and is planned to divert about 25,000 miners' inches of water each season to a conduit which will carry it to the debris cone, where it will be supplied to replenish the underground supply by percolation. The project will be financed by the conservation association, which comprises the water companies of the district and the three counties. Mr. Bailey is familiar with the project as former engineer of the Orange County Flood Control District.

The Plasterers' Union and the Hod Carriers' Union of Long Beach, according to "Organized Labor," have been working for the Plaster Contractors' Association by agreement under union conditions and wage scale of \$12 and \$9 per day respectively. On March 4 the Plaster Contractors' Association issued a notice to the unions, says: "Beginning Monday, March 10, the members of this association will pay as a wage \$9 for an eight-hour day to journeymen plasterers and \$6 per eight-hour day to members of Hod Carriers' Union."

Lieut. Col. Thomas M. Robins, division engineer for the U. S. War Department, with headquarters at San Francisco, is advertising for bids on approximately \$1,000,000 worth of improvements. The Stockton channel will claim the largest part of this sum, with \$450,000 to be used in dredging and improvements. A quarter of a million dollars will be spent dredging the Oakland harbor and another quarter million constructing a breakwater at Kahului Harbor, Hawaii.

Annual meeting of stockholders of the Holmes Lime & Cement Company will be held at 1 Division St., April 8, it is announced by Wm. J. Feary, secretary of the company.

Portland Chapter of the Master Painters' and Decorators' Association is considering the advisability of sponsoring the adoption in Portland, Ore., of a license law for painters, similar to that recently adopted in Tacoma. General expressions of opinion at the meeting were favorable to a licensing ordinance as a means of eliminating the fly-by-night and otherwise irresponsible painter.

The Federal Trade Commission reports that up to March 15 approximately fifty per cent of the members of the American Institute of Steel Construction have signed the trade practice rules of the structural steel industry. A strenuous campaign is now being made to obtain the remainder of the signatures before April 30. A meeting of the Board of Directors is to be called then to consider the proper policing and enforcement of the rules.

Specifications governing lathing and roofing in the city of Ventura are now being drafted by H. A. Johnson, city building inspector, and will be submitted to council for enactment into an ordinance.

ALONG THE LINE

J. E. Bonnell, for forty-two years operating as a general contractor in the Pacific Northwest. Died in Seattle, last week. He had been ill for about a month and died as the result of an operation.

Fred J. Klaus has been officially installed as city engineer of Sacramento, succeeding Bayliss Clark, resigned. Klaus was appointed to the office by City Manager Jas. S. Dean.

Edwin Duryea, 68, widely known civil engineer, died at his home in Palo Alto March 31. He was a native of New York and a graduate of the School of Engineering of Cornell. After the San Francisco fire he was a member of the committee of 40 on rehabilitation.

Professor David Weeks, of the University of California, Berkeley, has accepted appointment to membership on the university advisory committee of the educational board of the National Association of Real Estate Boards. This group includes 24 of the country's leading authorities in the field of real estate education who will act as consultants to the National Association in questions of educational policy.

A. Gideon has been appointed consulting engineer to the Metropolitan Water District of Manila for two years, with residence in the United States. Mr. Gideon has been in service in Manila for more than 25 years, as chief engineer of water supply and sewers, city engineer and for the last ten years manager and chief engineer of the water district. He will make his headquarters at Oakland, Calif.

Lynn A. Schloss has resigned as engineer in charge of construction of the flying field for the San Francisco Bay Airbase, Inc., at Alameda. He will be succeeded by R. U. St. John of Sacramento. St. John was formerly a district engineer at Sacramento for an oil corporation. Schloss will accept a position with an Eastern engineering concern.

H. G. Thielscher, of McClellan & Junkersfeld, Inc., New York, is acting as consulting engineer for the San Joaquin Light & Power Corporation, Fresno, Calif., in connection with the design of its 35,000-kw. steam plant now under construction.

The Long Bell Lumber Corporation and subsidiaries of Longview, Wash., report for 1929 net profits, including profits realized on the sale of capital assets, of \$1,659,333, equal to \$2.79 a share on the Class A stock. Net profits for 1928, including profits realized on the sale of capital assets, amounted to \$1,936,478, or \$3.25 a share.

Craft Saw Co., has established a temporary plant at 602 39th street, Oakland. The firm is now assembling patented builders' power saws which it plans to market under the trade name "Craft Saw." As yet none of these have been sold. W. G. Foster and A. Rorstrand are partners in the enterprise.

TRADE NOTES

C. E. McMullin, roofing contractor and president of the Fresno Builders' Exchange, will move from his present quarters at 1231 Broadway about April 15 to larger quarters at 1225 Broadway, Fresno. The new quarters will provide spacious display rooms in addition to offices and stock rooms.

Eugene P. Schaefer and Harry C. Herning will operate from 952 Folsom St., San Francisco, under the firm name of Coast Electric Supply Company.

R. G. Harris, formerly Pacific Coast manager of the General Cable Corp., with headquarters in San Francisco, has been appointed manager of the corporation's Denver office. Mr. Harris is in charge of the activities of all divisions of the General Cable Corp. in that territory. The title of Pacific Coast manager having been abolished, C. G. Gauntlett, Pacific Coast sales manager, has taken over Mr. Harris' duties, with no change in title.

Portable Power Tool Corp., of Warsaw, Indiana, manufacturers of portable saws, has established permanent offices and sales and service quarters at 964 Thirty-seventh St., Oakland, with N. M. Barnhart as regional manager.

Proceedings have been started by the city council of Richmond, Contra Costa County, for a combined storm and sanitary sewer system, estimated to cost \$1,250,000.

COMMITTEE APPOINTED TO DEVELOP PLASTERING SPECIFICATIONS

A sectional committee on specifications for plastering was organized February 24 under the joint sponsorship of the American Institute of Architects and the American Society for Testing Materials for the purpose of developing specifications for lime, gypsum and cement plastering under the rules of procedure of the American Standards Association.

Personnel of the committee includes representatives of the producers of plastic materials, of materials to which plaster are applied, of consumer interests and of those responsible for the execution of the work.

Officers were elected as follows: Chairman, A. C. Lynas, Dwight P. Robinson & Co., Inc., New York City; vice-chairman, Leroy E. Kern, American Institute of Architects, Washington, D. C.; secretary, Frank B. Stevens, Jr., Stevens Master Specifications, Inc., Chicago, Ill.

Four working committees were appointed to consider lime plastering, gypsum plastering, cement plastering and metal lath. In addition, there is to be a co-ordinating committee which will receive the reports of the other committees and incorporate these into complete specifications for plastering.

SEEKS RESERVOIR FUNDS

M. M. O'Shaughnessy, San Francisco city engineer, has requested the Board of Public Works to make \$2,000,000 available from the revenues of the Municipal Water Department over a three-year period to finance construction of the proposed Balboa Park reservoir in addition to \$75,000 from the same source to finance purchase of land for the Glen Park reservoir.

ROLANDI, BRIDGE CONTRACTOR, UNETHICAL BUSINESS PROCEDURE

The world has always known and felt in varying degrees the effects of the meannesses, trickeries and downright evils perpetrated upon the masses by those whose desires to gain their own ends lead them to the use of methods of despicable nature. Society has protected itself to the extent of invoking the law, but despite the penalties inflicted on those found guilty, there are those whose subtleties enable them to evade the means of protection.

Just as society is affected in this respect, so also has business found within its ranks the business criminal, who insists on operating in opposition to the "unwritten law." Here, too, he uses technicalities of interpretation to escape justice, and the honest business man is oftentimes left with little or no protection.

In the construction industry there is the type of man synonymous to the business criminal. He operates, apparently, as do his associates—that is, to outward appearances. But behind closed doors, he is cutting prices, peddling bids and carrying on numerous other nefarious practices, possibly to his own immediate benefit, but eventually to his loss and to the detriment of the construction industry.

The construction industry has reached the stage where it no longer is regarded as a haphazard business institution. It is more nearly, indeed, a profession. And what profession exists that has not its code of ethics, whereby the caliber of a member is judged with the result that stringent measures for the correction of laxities may be meted out as are needed?

While these exists that "unwritten law" in which all are included, there are many who regard it as too general to apply to their business, looking upon it, rather, as applicable to their social status in the community. A definite code of ethics recognized as framed particularly for the construction industry would, it is felt, have a pronounced effect upon the looser members. Though it may not entirely eliminate the undesirable, it would undoubtedly alleviate many of the present ills that work to the hardship of the honest member.—(Editorial in Seattle Journal of Commerce).

LUMBER ORDERS ARE BELOW PRODUCTION

Lumber orders were 15 per cent less, and shipments 6 per cent less, than production for the week ended March 22, it is indicated in reports to the National Lumber Manufacturers Association from 850 hardwood and softwood mills, which gave production as 367,666,000 feet. A week earlier 854 mills reported shipments 10 per cent less and orders 12 per cent less than production, which totaled 366,875,000 feet. Unfilled orders on hand at 492 softwood mills on March 22 were the equivalent of 20 days' production which may be compared with an equivalent of 22 days' reported by 503 mills a week earlier. As compared with last year, 472 identical softwood mills reported production 4 per cent below, shipments 10 per cent below and orders 24 per cent below figures for the same week last year for hardwoods, 209 identical mills gave production 11 per cent less, shipments 28 per cent less and orders 42 per cent under the volume for the week a year ago.

Lumber orders reported for the week ended March 22, 1930, by 609

softwood mills totaled 282,666,000 feet, or 13 per cent below the production of the same mills. Shipments as reported for the same week were 308,446,000 feet, or 4 per cent below production. Production was 322,943,000 feet.

Reports from 263 hardwood mills give new business at 31,761,000 feet, or 29 per cent below production. Shipments as reported for the same week were 37,447,000 feet, or 16 per cent below production. Production was 44,717,000 feet.

Reports from 492 softwood mills give unfilled orders of 966,241,000 feet, on March 22, 1930, or the equivalent of 20 days' production. This is based upon production of latest calendar year—300-day year—and may be compared with unfilled orders of 503 softwood mills on March 15, 1930, of 1,044,940,000 feet, the equivalent of 22 days' production.

N. Y. STRUCTURAL STEEL LAWS ARE AMENDED

Amendments to the building code of New York City recently adopted by the Board of Aldermen of that city provide for an increase in the allowable working stress for ordinary structural steel from 16,000 to 18,000 pounds a square inch. Permission was given to use special steels, such as nickel, silicon and high-carbon steel. A general increase in the allowable working stresses on steel used in reinforced concrete and on steel and concrete columns to conform with the increased stress allowance on structural steel was also granted by the amendments adopted.

Other amendments allowed for a decrease in the load for wind pressure from 30 to 20 pounds a square foot, with a requirement that all wind loads shall be carried in the structural frame. Other load reductions included are those for live loads for certain types of buildings, notably a reduction in such loads for office space from 60 to 50 pounds per square foot, and in various kinds of places of assembly a reduction from 100 to 60 and 55 pounds. A decrease of the minimum loads required for light factory buildings, stables and pleasure car garages was also included.

YOU ARE WELCOME

William H. George, president of the National Association of Builders' Exchanges, has forwarded to Daily Pacific Builder a copy of the following resolution, passed by the National Association, with regard to its annual convention held in this city February 10th to 13th inclusive:

"Resolved, that the thanks of the National Association of Builders' Exchanges be and is hereby tendered to the DAILY PACIFIC BUILDER for the able and impartial manner in which it handled the work of this convention."

CONSTRUCTION CONGRESS TO BE FORMED IN CHICAGO

A new endeavor to stimulate building operations in the Chicago area is being made in the formation of a "construction congress," which is to include among its members general contractors, architects, real estate men, bankers, investment brokers, building material supply dealers, engineers, and others interested in construction and its allied interests. E. M. Craig, executive secretary of the Building Construction Employers' Association, is promoting the new organization.

LOW COST GRADE SEPARATION STRUCTURES URGED IN REPORT

Low cost carefully planned structures for separation of traffic at railroad crossings or highway intersections are urged in a report of the grade crossings committee of the American Road Builders' Association. It is pointed out that many such structures that were built during the past decade are now inefficient for traffic needs. Some are too narrow, others have dangerous curves at approaches or over the structure. The committee has been at work for the past year on a study of low cost grade separations, believing that the cost alone has retarded the elimination program which on every hand is regarded as vital to traffic safety. Re-location of highways is favored in instances where it might be more economical and result in better alignment.

Chairman Morris Goodkind, bridge engineer of the New Jersey state highway commission, declares that danger to life is three and one-half times greater at grade crossings than on other parts of the highway system and recommends the construction of the maximum number of grade crossing eliminations from railroad, state, and local funds available.

Statistics cited by the committee show that densely populated areas have greater need of grade separations of intersecting highways as well as of railroads and highways at grade crossings.

In New York, in 1928, accidents at intersections were classified as follows:

	Total	Ft	N'n-Ft
Rural inter.....	634	27	607
Street inter.....	40,964	635	40,329
Railroad cross.....	208	101	107

During the first half of 1929, figures of the first two groups increased considerably over those for railroad crossings. In 1925, the total number of accidents at street intersections was 20,328 and at railroad crossings 148, so that in three years the former increased about 100% and the latter about 40%.

This higher rate of increase was thought to be due to the fact that elimination of railroad grade crossings has been going on at a faster rate than those of intersecting highways.

Elimination of both is necessary in the design of modern roads to increase their safety and capacity.

Out of a total of 675 motor vehicle fatalities in North Carolina in 1928, 54 deaths, or 8%, were caused by collision with railroad trains, while an equal number of fatalities occurred at street intersections and 25 others at rural intersections, according to William L. Craven, state bridge engineer.

C. B. McCullough, bridge engineer of Oregon, declares that in 99 cases out of a hundred where damages are sought for railroad crossing accidents, if the plaintiff has stopped, looked and listened as told by the standard warning sign he wouldn't have been on the crossing at the time of the accident, so that the very fact of the accident makes out a prima facie case against him.

"In spite of their rather impregnable legal position," he continues, "the railways of the United States have been very generous in their settlement of damage claims for grade crossing accidents and not only in this regard, but in the matter of eliminating grade crossing hazards upon their own motion, many of these companies have gone so far as to rather shame the highway group upon whose doorstep the problem really belongs."

The splendid progress made by Georgia in grade crossing eliminations on the state highways is revealed in a statement by Bridge Engineer Searcy E. Slack that the number of 751 grade crossings in 1918 was reduced to 415 by the end of last year. Of these eliminations, 297 were by relocation, 56 by bridges over the railroads, and 13 by underpasses.

Other than the good and sufficient reason of reducing fatalities at grade crossings, Chairman Goodkind declares that another distinct advantage gained by crossing eliminations is the facilitation of traffic.

"Just as the standing of a railroad in the minds of its patrons depends on the safety and efficiency of its service," says Goodkind, "so is the value of a highway measured by the same characteristics, and all efforts should be made to remove the hazards as quickly as possible."

Window glass is 10 to 20 per cent below last year.

Paint sales are lower, but manufacturers expect the usual improvement which places half their year's business in the second quarter.

The price index of building materials indicates unchanged prices for structural steel, common brick, hollow tile, sand, gravel and crushed stone with small increases for cement and lumber.

Lumber manufacture shows a decline of 13 per cent for the first ten weeks of the year, compared with last year, and shipments are 12 per cent below last year. The rate of shipments recently shows improvement. The lumber industry relies upon an enlarged building program and expects for the year a larger volume than in 1929 or 1928.

The iron and steel industry for the third week in March operated at 75 per cent against 94 per cent in last year's high activity. Indications are for an increase in production.

Structural steel orders are about 4 per cent under 1929. Rail mills are operating at capacity. Tinsplate mills at 85 per cent. Some line pipe business is in contemplation. Steel industry still feels a smaller automobile production. Increased structural steel orders are expected to sustain or perhaps increase present rate of activity.

Spring demand for electrical equipment has developed. Some large manufacturers report orders substantially ahead of last year's figure to date. Some branches report conditions moderately below last year's average. The export market is reported favorable. Payroll indices this February six per cent were larger than February, 1929.

JURY IS NAMED TO SELECT ARTISTIC BRIDGES

A jury of nationally known architects and engineers was announced today by the American Institute of Steel Construction to select the most artistic bridges built of steel during the past year. This will constitute the second annual award, the first being the Sixth Street Bridge in Pittsburgh which was judged to be the most beautiful bridge opened to traffic during 1928.

It is the intention of the Institute to make two awards this year. One decoration will go to that steel bridge costing in excess of \$200,000, and the other to the steel bridge costing under that amount. These will constitute the most beautiful long-span and the most beautiful short-span bridges opened to traffic during 1929. Judgments will be made from photographs now being submitted and the awards will be determined at a meeting of the Jury of Award to be scheduled in June next.

The jury named to select the prize consists of two engineers, two architects and a fifth to represent civic interests. They are: Stephen F. Voorhees, architect; Gustav Lindenthal, bridge engineer; Prof. Wm. H. Burr, consulting engineer; Cass Gilbert, architect; and Dr. Horace McFarland, president of the Pennsylvania Fine Arts Commission.

MARCH BUILDING IN FRESNO

Building permits issued in Fresno during the month of March called for improvements involving an expenditure of \$53,315 as compared with \$175,423 for the corresponding month in 1929. Building permits in Fresno for the past three months involve an expenditure of \$389,119 as compared to \$395,791 for the corresponding period in 1929.

CONDITIONS IN BUILDING INDUSTRY CITED IN SURVEY

Julius H. Barnes, chairman of the National Business Survey Conference, has issued the following summary of business conditions in the construction industry throughout the United States:

Upon the basis of progress already made this year, and more matured plans of the various fields of business, it is now possible to restate in larger totals earlier estimates of probable expenditures in 1930 for equipment and new construction. Utilities of all kinds contemplate such expenditures this year to an aggregate of \$3,250,000,000, as against \$2,863,000,000 last year.

Other private construction in all of its forms, it now seems probable, will reach at least as large as last year.

There are continued signs of improvement, except in residential building which still drags. Contracts awarded in the week ending March 14 totaled \$105,000,000, the highest weekly figure in eight weeks. February permits for additions, alterations and repairs in 279 cities show a decided

increase in numbers over January, but a smaller total value.

Awards for concrete pavements for January and February and for state and county roads exceed last year by \$2 per cent and are 40 per cent above 1928. Shipments of Portland cement this February were the largest of any February in the last four years.

The crushed stone industry, usually dormant until mid April, expects this year's business to prove 10 per cent above normal and above last year. Shipments of stone, sand and gravel are increasing slowly.

Common brick has had a very dull three months.

The slate industry finds orders light and prices lower, but expects better conditions last half of the year.

Time for construction purposes indicates 40 per cent below normal, while for agricultural and chemical work it is 10 to 15 per cent over last year. Manufacturers expect improvement with the construction season.

Plate glass manufacturers report conditions quiet, but improving.

VARIED MIXTURES USED BY MISSION FATHERS FOR BRICK

Brickmaking in the early days of California history apparently corresponded to the modern spring house-keeping, according to a study of adobe bricks just completed by Prof. George Hendry and Margaret Kelly, graduate student, at the University of California College of Agriculture.

The university representatives found, in dissolving adobe bricks from 12 Spanish missions and three old ranchos, that the mission fathers not only used straw and grass to bind the adobe together, but swept up the kitchen dooryard for that purpose, adding fruit pits, grape seeds, leather scraps, horse hair and bones.

Adobe Brick Analyzed

Professor Hendry analyzed adobe brick from the historic structures for the purpose of tracing the development of agriculture in the state, and dating the introduction of specific varieties of plants. Identifiable remains of certain plants, offering conclusive evidence of their presence in the state when the old buildings were constructed, rewarded the search. A report on this work is soon to be published by the Agricultural History Society of Washington, D. C.

Among interesting points brought out by Professor Hendry is one to the effect that adobe bricks are not made of soil technically known as adobe, but are made of almost all other soils with the exception of sand and clay. He says: "Although adobe was abundant at several mission sites, it was

not used in its pure state, but always mixed with sand to ameliorate its colloidal nature. An example of such an artificial mixture was found in the San Antonio de Padua, near Jolon, California."

Human Bones Found

He says further: "Human bones in great abundance were washed from the bricks at the San Vicente Mission. These were found chiefly in the buildings surrounding the great north court, and on the hillside to the north of the mission, where gopher activity had brought them to the surface. The year following the founding of this mission, 1781, a smallpox epidemic greatly decimated the Indian population and this no doubt accounts for the presence of so many human remains, in shallow graves, all about the mission site. Soil for later building operations were evidently taken from the earlier burial ground, and in this way the remains of the first converts have found their way into the walls of the holy edifice."

Concerning the plant specimens for which he was searching, Professor Hendry concludes: "Surveying the varied collection of plant specimens found, one might fancy that an early naturalist has foreseen the interest which posterity would attach to the wild flora and to the fruit and field crops of early California, and had patiently collected and preserved them in the enduring walls of the historic edifices."

GERMANS LEARN AMERICAN LUMBER MANUFACTURE VIA MOVIE

German consumers of American lumber are being effectively reached at the present time through a film sent to that country by the lumber division of the Department of Commerce, showing the operations connected with the logging and manufacture of lumber in the Pacific Northwest.

The showing of this film, which was placed at the disposal of the lumber division by the Long Bell Lumber Company, Longview, Washington, was arranged by Axel H. Oxholm, chief of the lumber division, with the Wood Utilization Committee of the German Government.

In Berlin the showing of this film was attended by an audience of industrialists, engineers, and building contractors. It was also shown at the Wood Utilization College at Rosenheim, and in various important cities on the Rhine. The latter action is one of the most important markets for American lumber in Germany.

So great is the interest in this film that requests have been received by the lumber division for its showing in neighboring countries. Although the film has now been in Germany six months, it is to remain there for a further period in order to satisfy the demand for its showing in sections in which it has not already appeared.

"This is a very effective method of reaching the ultimate consumer in foreign lands with the message of the proper use of American woods," said Mr. Oxholm, in commenting on the success of the film.

"Coincident with the showing of this film the lumber division, in co-operation with the National Committee of Wood Utilization, has issued a bulletin 'American Douglas Fir and Its Uses' which has been prepared from the standpoint of the foreign consumer, and which had already had wide distribution abroad."

CERTIFICATES ARE GRANTED TO THREE ARCHITECTS

Albert J. Evers, secretary of the State Board of Architectural Examiners, Northern District, report the granting of provisional certificates to practice architecture to Kenneth E. Fratis, 1732 Webster St., Oakland; Chas. G. Lundgren, 57 Clayton St., San Francisco; and Doy Early, 1421 Twenty-sixth St., Sacramento.

R. R. EXTENSION AUTHORIZED

The Interstate Commerce Commission has granted authorization to the Southern Pacific to extend its line for sixteen miles in Imperial County.

The extension will be effected through construction of six miles of new line between Sandia and Holtville and operation over ten miles of the Holtville Interurban Railroad between Holtville and El Centro.

This will enable the Southern Pacific to handle by a more direct route the transcontinental traffic of the Sandia branch which serves a highly developed agricultural region.

ARCHITECT LINDEN MOVES TO NEW QUARTERS

John V. Linden, architect, announces the removal of his offices from 30 Plaza Building, Oakland, to 701 Alameda Building, 604 Mission St., San Francisco. Telephone KEarny 4357.

STANDARD WIRING SPECIFICATIONS AVAILABLE AT ELECTRICAL BUREAU

Recently in these columns was published an article on the standard wiring specifications now being proposed by the National Electric Light Association.

It will no doubt be of interest to members of the building fraternity on the Pacific Coast that the decision of the national association to issue such specifications was the outgrowth of an activity initiated in California.

The following article concerning these specifications was prepared by Mr. Victor W. Hartley, executive secretary of the California Electrical Bureau with headquarters at 447 Sutter St., San Francisco.—Editor.

About two years ago a committee studying the conditions which made it impossible for many building owners to give their tenants the desired quantity and quality of illumination and necessitated expensive re-wiring installations to make this illumination possible decided that there was a very definite need for a set of wiring specifications, or rather a minimum standard below which no building should be wired if it was to properly serve the needs of its tenants.

After a year of study, survey, and consultation with architects, builders, electrical engineers and illuminating engineers such a minimum standard was prepared and after it had been approved by the State Industrial Accident Commission, Board of Fire Underwriters of the Pacific, and Electrical Inspectors Association, was published.

After the publication of these stand-

ards the question naturally arose as to how they could be made most accessible and of the greatest value to the building industry and it was decided to make them a part of the Red Seal Certified Wiring program which this organization has been promoting in residential construction for the past four years.

Under this plan any building which is to be wired according to these specifications becomes a matter of record with us and at the proper time is inspected by a representative of this organization to determine its conformance with the standards.

Upon report by the inspector of his approval of the job we issue to the owner a Red Seal Certificate as his evidence that the job complies with these established standards.

There is no charge for this service, the cost being borne by our organization which is maintained by, and at the expense of, the electrical industry to render this service free to those who apply for it.

These specifications are entirely non-commercial in that they impose no requirement as to whose material shall be used or who shall do the work, they are purely an adequacy standard.

A copy of these standards has been delivered to practically every architect registered with the State Board of Architecture and to such Builders as the Electrical Bureau has been able to establish contact with. Should any readers not already in possession of a copy desire to receive one for their files it will be forwarded upon request to the bureau headquarters in San Francisco.

Building News Section

APARTMENTS

Owner Taking Segregated Bids.
APARTMENTS Cost, \$85,000
OAKLAND, Alameda Co., Cal. No. 541 Merritt Ave. near Cleveland Street.
 Three-story and basement frame and stucco apartment building (15 2, 3 and 4-room apts.) garage to accommodate 18 cars.
 Owner—H. E. Buckland, 2065 Webster St., Oakland.
 Architect—Chester Treichel, American Bank Bldg., Oakland.
 Ground is to be broken next week.

Completing Plans.
APARTMENTS Cost, \$100,000
OAKLAND, Alameda Co., Cal. Athol Ave. near Lake Merritt.
 Three-story and basement frame and stucco apartments.
 Owner—William Richardson.
 Architect—John Easterly, Howden Bldg., Oakland.
 Bids will be taken April 2nd.

Construction Under Way.
APARTMENTS Cost, \$15,000
SAN FRANCISCO, SW Laguna and California Sts.
 Two-story and basement frame and stucco apartments.
 Owner and Builder—W. W. Chapin, Hunter-Dulin Bldg.
 Architect—E. E. Young, 2002 California Street.

Owner Taking Sub-Bids.
APARTMENTS Cost, \$65,000
OAKLAND, Alameda Co., Cal. 38th St. and Manila Ave.
 Three-story frame and stucco apartments (2, 3, 4 and 5-room apts.).
 Owner—N. E. Rockwell, 640 E-15th St., Oakland.
 Architect—Chester H. Treichel, American Bank Bldg., Oakland.
 Ground is to be broken next week.
 Will contain 18 apartments (54 rooms) and 11 reinforced concrete private garages.

Contract Awarded.
APARTMENTS Cost, \$75,000
BURLINGAME, San Mateo Co., Cal. El Camino Real.
 Three-story and basement frame and stucco apartments.
 Owner—Philip Webster, 2401 Fulton Ave., Berkeley.
 Architect—Edwards & Schary, 605 Market St., San Francisco.
 Contractor—Daly Bros., Burlingame.
 Architects are taking sub-bids.

Sub-Bids Being Taken.
APARTMENTS Cost, \$75,000
SAN FRANCISCO, Cervantes & Scott Streets.
 Three-story and basement frame and stucco apartments with tile roof (13 3, and 4-room apts.).
 Owner and Builder—Ben Lieberman, Scott and Pardo Sts., San Francisco.
 Architect—Irvine & Ebbets, Call Bldg., San Francisco.
 Will contain all modern conveniences, including steam heat, hot water system, etc.

Plans Being Prepared.
APARTMENTS Cost, \$50,000
ALO ALTO, San Mateo Co., Calif. Forest Ave.

Two-story part frame and concrete apartments.
 Owner—E. J. Cooksey, 538 S Humboldt, San Mateo.
 Plans by Chas. Schultz, Redwood City.

Contract Awarded.
APARTMENTS Cost, \$25,000
SAN FRANCISCO, NW 21st St. and Municipal R. R. Thoroughfare.
 Three-story and basement frame and stucco (9) apts.
 Owner—H. Tillman, 4344 Balboa St.
 Architect—F. W. Dakin, 625 Market.
 Contractor—A. R. Larsen, 4020 24th Street.

Preliminary Sketches Being Prepared
APARTMENTS Cost, \$75,000
OAKLAND, Alameda Co., Cal. 29th Street.
 Three-story apartments (2 and 3-room apts.) (type of construction undecided).

Owner—Withheld.
 Architect—Louis M. Upton and Geo. E. Ralph, 110 Sutter St., San Francisco.
 Will probably be either frame and stucco or Class C.

Plans Being Prepared.
APARTMENTS Cost, \$—
SAN FRANCISCO, Fourteenth and Rosemont Streets.
 Five-story and basement steel frame and concrete apartments.

ket St.

POWER PLANTS

GLENDALE, Los Angeles Co., Cal.

—Until 10 A. M., April 10, bids will

be received by Glendale city council

for following: (1) one outdoor trans-

former substation, 52x62-ft.; (2) one

60-cell, 240-ampere hour, sealed cell,

lead-acid storage battery complete;

(3) one single-tier rack for battery.

Bidders shall furnish drawings, spe-

cifications and delivery dates of ma-

terials. G. E. Chapman, city clerk.

LOS ANGELES, Cal.—Until 2 P. M.,

April 14, bids will be received by the

county supervisors for two 500 h. p.

water tube boilers for the power

house) at the General Hospital. Plans

are on file at the office of Miss Mame

B. Beatty, 303 Hall of Records.

OAKLAND, Calif.—Allis - Chalmers

Mfg. Co. Riata Bldg., San Francisco,

at \$5,925 awarded contract by East

Bay Municipal Utility District to fur-

nish and install transformer equip-

ment in district pumping plants.

LOS ANGELES, Calif.—Until 10 A.

M., April 10, bids will be received by

the city purchasing agent, Thomas

Oughton, 107 City Hall, for 40,000 ft.

lead covered cable under Spec. No.

2053. All bids previously received un-

der Spec. 2034 were rejected.

MODESTO, Stanislaus Co., Calif.—

Pacific Tel. & Tel. Co. will spend \$20,-

000 in the construction of an 11-mile

suburban line from Turlock to Stev-

inson colony. Will involve 354 poles

south of Turlock along Lander Ave.

to connect with present Stevenson Col-

ony system.

PUBLIC BUILDINGS. FIRE

HOUSES AND JAILS

Plans Being Completed.

JAIL, ETC. Cost, \$150,000

VENTURA, Ventura Co., Cal.

Three-story reinforced concrete jail

and offices.

Owner—County of Ventura.

Architect—Harold E. Burket, 455 E.

Main St., Ventura.

Site is now being excavated and

bids will be called for in April.

Plans Being Figured—Bids Close April 21, 11 A. M.
LIBRARY Cost, \$10,000
SAN JOSE, Santa Clara Co., Cal.
Almshouse Road (at County Almshouse).

One-story concrete library.
Owner—County of Santa Clara, Henry A. Pfister, County Clerk.
Architect—Chas. McKenzie, Bank of San Jose Bldg., San Jose.
Certified check 10% payable to clerk required with bid. Plans on file in office of clerk and obtainable from the architect.

Completing Plans.
COURTHOUSE Cost, \$300,000
BISBEE, Arizona.
Four-story fireproof courthouse and jail with copper roof.
Owner—County of Cochise.
Architect—Roy Place, 79 N. Stone Ave., Tucson, Arizona.

Call for bids for the construction of the building will not be issued until litigation, questioning the legality of erecting the building in Bisbee, has been settled.

RIVERSIDE, Cal.—Riverside county supervisors rejected all bids received on March 24 for addition to county courthouse in Riverside and will probably set date for receiving new bids April 7. Specifications will be modified, but no changes made to plans. Probable changes include the elimination of steel window frames, substituting oak interior trim for marble and the omission of ornamentation. It is possible that building will be constructed of reinforced concrete instead of structural steel. G. S. Wilson, architect, 3646 W 9th St., Riverside.

Planned.
CITY HALL Cost, \$1,100,000
BEVERLY HILLS, Los Angeles Co., Cal.
Santa Monica Blvd.
City Hall.
Owner—City of Beverly Hills.
Architect—Not Selected.
Election will be held shortly to vote bonds to finance construction.

BAKERSFIELD, Kern Co., Calif.—Proposal to install a cooling system in the Kern county courthouse has been abandoned by the county supervisors due to lack of funds. The system was estimated to cost \$30,000, including changes in the heating system. Funds, however, will probably be provided in the 1931 budget to finance the work.

Bids Opened—Contract Awarded.
ALTERATIONS Cont. Price, \$29,680
ARCATA, Humboldt Co., Cal.
Alterations and additions for city hall
Owner—City of Arcata.
Architect—Norman R. Coulter, 46 Kearny St., San Francisco.

OFFICIAL PROPOSALS

STATE OF CALIFORNIA

DEPARTMENT OF PUBLIC WORKS

DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the State Highway Engineer, Public Works Building, Sacramento, California, until 2 o'clock P. M. on April 23, 1930, at which time they will be publicly opened and read, for construction in accordance with the specifications therefor, to which special reference is made, of portions of State Highway, as follows:

Modoc County (11-25-25-C) two timber bridges, one across North Fork of Pit River about 3½ miles northeast of Alturas consisting of seven 19-foot spans with concrete deck on pile bents and the other across Shields Creek channel change about 4 miles northeast of Alturas consisting of three 19-foot spans with concrete deck on pile bents.

San Bernardino County, a bridge across Mojave River 3 miles north of Victorville (VII-SEB-31-D), consisting of one 270-foot through steel truss span, five 51-foot concrete girder spans and one 48-foot concrete girder span on concrete piers and bents.

Proposal forms will be issued to only those Contractors who have furnished verified statement of experience and financial condition in accordance with the provisions of Chapter 644, Statutes 1929, and whose statements so furnished are satisfactory to the Department of Public Works. Bids will not be accepted from a Contractor to whom a pro-

posals form has not been issued by the Department of Public Works.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the said office, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, and at the office of the District Engineer of the district in which the work is situated. The District Engineers' offices are located at Eureka, Redding, Sacramento, San Francisco, San Luis Obispo, Los Angeles, San Bernardino and Bishop.

A representative from the district office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Division of Highways. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the district office.

No bid will be received unless it is made on a blank form furnished by the State Highway Engineer. The special attention of prospective bidders is called to the "Proposal Requirements and Conditions" annexed to the blank form of proposal, for full directions as to bidding, etc.

The Department of Public Works reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.
DEPARTMENT OF PUBLIC WORKS,
DIVISION OF HIGHWAYS.

C. H. PURCELL,

State Highway Engineer.

Dated March 26, 1930.

AMERICAN FIRM LANDS DAM CONTRACT IN ABYSSINIA

Arrangements have been finally completed for the construction and financing of a \$20,000,000 dam across

the Blue Nile near Lake Tsana, in Abyssinia, by J. G. White & Co. of New York City. Actual construction will be done by the J. G. White Engineering Corp., a subsidiary. The dam will be built to control the flow of the Blue Nile, the waters of which are intensively used for irrigation in Egypt. Bonds issued to defray the cost of construction will be amortized by water rents to be made by the Sudan government. Ownership of the dam, however, will rest in the Abyssinian government.

WESTERN METAL CONGRESS TO MEET IN S. F. NEXT YEAR

The second biennial National Western Metal Congress and Exposition will be held in the Civic Auditorium at San Francisco, the week of February 16, 1931, W. H. Eisenman, secretary of the American Society for Steel Treating, announces.

A general committee of four, headed by Ivan L. Johnson, superintendent of the Best Steel Casting Co., Oakland, has been formed to handle the local arrangements. The other members are Frank B. Drake, President of the Johnson Gear Co., Berkeley; Myron Bird, Vice-President, California Saw Works, San Francisco, and R. S. Hirst, Hull-Scott Motor Car Co., Berkeley.

Western sections of twelve national societies will co-operate with the American Society for Steel Treating in arranging the technical programs and organizing the exhibition. Floor plans of the auditorium are now in preparation and when completed will be mailed to exhibitors by Mr. Eisenman.

The first National Western Metal Congress and Exposition was held at the Shrine Auditorium, Los Angeles, in January, 1920. At that time a total of 176 companies exhibited. It is believed that the 1931 show will be even larger.

A "Pittsburg" Automatic Water Heater installed in the Home indicates high quality throughout.

Recommended and specified by all the leading architects, plumbers and builders.

Consider the high merit of the Pittsburg coupled with "Pittsburg Perfect Service."

"Hot water quick as a wink."

Pittsburg Water Heater Co.

Makers of "Pittsburg Automatic"—"Bungalow Automatic" Storage Systems and "Lyon" Tank Water Heaters.

MAJOR GROUPS IN INDUSTRY WILL ORGANIZE

Preliminary steps in the formation of a body representing the major groups of the construction industry—engineers, architects and contractors—to co-operate in the support of the California registration laws and to promote harmonious relations between the various branches of the industry, were taken at a meeting held at the Engineers' Club, Los Angeles, last week.

James F. Collins, director of the State Department of Professional and Vocational Standards, was present by invitation and expressed his ideas as to how such an organization might be helpful to the industry in promoting arbitration in the settlement of disputes arising both in the ordinary line of business and also in matters affecting relationships between the various groups. He believed the different groups would be benefited by the registration laws only to the extent to which they gave their support to them.

A temporary organization was formed with Porter H. Albright as chairman and Mariabelle Sutherland, secretary of the American Association of Engineers, as secretary. A committee consisting of A. F. Barnard of the American Society of Civil Engineers, Harold Crowell of the Associated General Contractors and Porter H. Albright, representing the American Association of Engineers, was appointed to prepare a tentative plan of organization to be presented to the associations in the different groups as a basis of procedure. With the approval of these organizations, delegates selected by them will perfect plans for the new organization.

The following associations will be asked to co-operate in forming the new organization: Los Angeles Section, American Society of Civil Engineers; Southern California Chapter, American Institute of Architects; Southern California Chapter, Associated General Contractors; Los Angeles Chapter, American Association of Engineers; State Association of California Architects and Los Angeles Builders' Exchange.

Present at the meeting were: A. F. Barnard, W. H. Code, Harold Crowell, Porter H. Albright, F. E. Trask, Hector Callahan, W. C. Hogeboom, Jas. F. Collins and Mariabelle Sutherland.

URGES CODE REVISIONS

A critical examination of building codes and municipal ordinances, presuming to regulate the design and construction of schools, factories and other buildings with respect to the natural lighting in them, to the end that unreasonable restrictions be eliminated, is advocated by H. H. Higbie, professor of electrical engineering, University of Michigan.

TARIFF ON BUILDING BRICK IS NOW ASSURED

A tariff on building brick is practically assured by the passage of the Tariff Bill in the Senate, says the monthly digest of the Common Brick Manufacturers' Association of America. In both the House and the Senate Bills brick has been removed from the free list, where it has been since 1922, and is granted a duty of \$1.25 per thousand. While in the industry this is not considered adequate protection, it will be helpful in curbing the invasion of cheap European brick and will stimulate the industry along the Atlantic Seaboard. It is conceded that this small duty will not affect the price of brick in any part of the United States and its benefit will mainly accrue to the manufacturers on the Hudson River, who supply the vast Greater New York market. This is one of the largest brick producing centers in the world and the market there has been seriously demoralized by the importation of brick from Belgium.

The passage of the Tariff Bill is the best news of the month in the brick industry. Construction volume has gone progressively lower with each month since last October. With money available, the settlement of the Tariff question, it is believed, is about all that is needed to stimulate building. With this important legislation out of the way and Congress adjourned and politics off the first page of the country's newspapers, business will go ahead according to many leaders in the construction industry.

The movement of common brick from the yards during the thirty days ending March 1st showed a slight improvement over the preceding month. Approximately 16% of the total stocks were moved in the thirty-day period, whereas the shipments for the month preceding represented about 8½% of the stocks on hand. In February of 1929, the relation of the shipments to the stocks on hand was approximately 13%.

NELSON PURCHASES BUSINESS OF M. I. BERNARD COMPANY

Chris Nelson Company, Inc. of Oakland, has purchased the retail paint and wall paper business of M. I. Bernard & Company at 2318 Shattuck Avenue, Berkeley. The Chris Nelson Company already maintains two stores in Oakland, one at 2259 East Fourteenth street and another at 9435 East Fourteenth street. The concern handles a complete line of paints and wall paper on a retail and wholesale basis.

The Bernard store has been established in Berkeley for many years under the ownership of M. I. Bernard and will continue to serve that section and northern Alameda county as heretofore.

FRESNO ARCHITECTS DISSOLVE PARTNERSHIP

Dissolution of the partnership of Felchin, Shaw & Franklin, architects with offices in the T. W. Patterson Building, Fresno, and removal of Raymond R. Shaw to Los Angeles is announced by Charles H. Franklin, who will continue his practice in the same office.

Shaw has taken up his residence in Hollywood and is associated with George Hales, Los Angeles architect and builder. Felchin has retired from active work as an architect to devote his time to other business interests.

Franklin became associated with Felchin as an architect in 1912 and Shaw joined the firm in 1919. The firm handled some of the largest building construction jobs in Fresno, including the Pacific-Southwest Bank, Radin & Kamp and the San Joaquin Light & Power Corporation buildings.

5-DAY WEEK SCHEDULE IN NAPA YET UNSETTLED

An agreement on the adoption of the five-day week in Napa county was not reached at the recent conference of committees of the Napa County Builders' Exchange and the Napa Building Trades' Council.

Representatives of the union locals were not prepared to enter into a written agreement that a wage increase would not be sought on the start of the shorter working week. The matter was continued until it could be brought before the several locals.

The carpenters' local had brought up the proposal for the shorter week in the interest of the unemployment situation and when the plan was taken before the contractors, the suggestion was made that it extend to all building trades.

While no wage increase was asked by the carpenters, it was understood that the union painters had acted to obtain a nine dollar wage in Napa. The Builders' Exchange believes that a wage boost is not justified for at least another year in view of business conditions.

Another meeting of the committees will be held in two weeks and at that time announcement of the action taken by the workmen's organizations will be made.

A SAFETY RECORD

Twenty-one large buildings erected in Los Angeles and representing 270 stories were completed recently without fatal or permanent injury to workmen. This bit of information is taken from the annual report of the California Department of Industrial Relations, in charge of safety work. Industrial deaths in California in 1929 were 629 compared with 723 in 1928.

STOCK MARKET CRASH AIDING HOME BUILDING, SURVEY REVEALS

If you've repressed the desire for home ownership, waiting on better times, the National Association of Real Estate Boards has good news for you.

The better times have come—in the home buying and building field—particularly in the home buying field.

It is cheaper to buy homes now in nine different sections, stretching from Long Island to California, than it was a year ago. It is cheaper to build homes everywhere than it was last April. And real estate can be purchased now at more favorable prices and on better terms than twelve months ago.

The ill-wind of the recent stock market crash has blown some good in that it has made thousands of homes available at purchase prices that will never be equalled again; and the recent business depression has made labor eager to undertake home construction on terms favorable to the individual builder, say the authorities quoted by the realty association.

It May Not Be Long

Some basic material prices are down, due principally to the cessation of buying, but there is no telling how long such markets will continue. At present lumber is at prices that are "humiliating to the industry," common brick is lower than it was at this time a year ago, glass is cheaper, and plumbing and heating equipment is at about the same level as it was last April.

National associations, representing the above industries, report to the real estate association that the lower material prices are due to keen competition brought about by plants of all kinds carrying large stocks of materials. These plants have continued to manufacture even in the face of restricted retail buying.

"The mills must run," declares Dr. Wilson Compton, Secretary-Manager of the National Lumber Manufacturers Association, "and it is cheaper to run part time at least than to shut down during the present restriction of demand."

Homes already built are cheaper now than in April 1929 in Boston, throughout Long Island, Atlanta, Cleveland, Denver, Kansas City, Los Angeles, Dallas, Chicago, and throughout the suburban area surrounding Chicago, covering three counties. The real estate association asked for reports from the presidents of the real estate boards in these cities which pretty well cover the country.

Never Again As Cheap

Speaking for the "entire construction industry," Oscar W. Rosenthal, Chicago, Vice-President of the Building Trades Employers Association, Vice-President of the National Building Industries Bureau, President of the General Contractors Association of Chicago, and President of the Illinois Builders League, says:

"It will never again be as cheap to build homes as it is now. There is plenty of labor. Skilled workmen are walking the streets throughout the country. And labor is very efficient which results in lowered construction

costs. Prices of materials are down."

Lumber which is used on a considerable scale in practically every type of residential building, from cottage to big apartment structures, is not only lower in cost than a year ago, it is down right cheap, according to Dr. Compton.

Indeed it is far too cheap. From the standpoint of the industry, laments the lumber manufacturer's representative. "Lumber at the mills is far too cheap," he says. "The industry cannot maintain economic health or regain it with such prices, but the mills must run, the workers must eat, and be paid, and it is cheaper to run part time at least than to shut down during the present restriction of demand."

He Hopes It Won't Last

But prospective home builders who would like to purchase lumber at this low price level had better do so at once, for "We do not believe that the present situation will last long," says Dr. Compton. "A good volume of buying will soon restore prices. Consequently the more the sales, the merrier, even at prices that are humiliating."

"It is our experience during previous periods comparable to this one that in times when business is not at high pressure, workers are keener and workmanship better. And inasmuch as all materials that are used in house building are cheaper at wholesale, and should be cheaper at retail, the present time is one, which from the point of view of economy of labor and excellence of work, is the time to build."

Price competition in the construction field has made the price of glass a "trifle" cheaper now than it was a year ago, reports the National Glass Distributors Association. Glass for a home, especially when fine plate glass is used, is a considerable item.

The Plumbing and Heating Industries Bureau, reporting the prices of plumbing and heating equipment as about the same as last year, attribute the fact that there has been no upward trend in these prices to the abundant supply of labor available everywhere.

Common Brick, Down

The general level of common brick prices is lower now than it was a year ago. This is a matter of supply and demand, according to Ralph Stoddard, Secretary-Manager of the Common Brick Manufacturer's Association of America. The demand is considerably lower, due to cessation of home building operations, yet practically all brick plants are carrying large stocks.

Leonard P. Reaume, Detroit, President of the National Association of Real Estate Boards, reporting on real estate prices for the home builder, finds that "Homesteads can be purchased at the present time at more favorable prices and terms than at any previous time within the past few years."

"Prudent investors buy when market conditions are as at present and not when activity and prices are at their peak," says the Realtor's

president. "Anyone who purchases a well selected lot or home this Spring will be pleased with his investment."

Los Angeles Costs Lower

Harold G. Ferguson, president of the Los Angeles Realty Board, in reporting in connection with the survey of the National Association of Real Estate Board, said:

"The most favorable conditions are at hand. Costs of materials, costs of labor, costs of financing, and costs of street improvements are far below what may be expected at a future period. A house costing \$5500 in 1926 can be constructed here now for \$4200. And this same house would have cost \$6000 in 1923 when the great building move was sweeping over the community. The availability of labor adds to the favorable aspects. It has been demonstrated that labor is more effective at times like these than in periods of boom activity when less experienced help is assigned the jobs ordinarily handled by seasoned tradesmen. Tradesmen are now competing for work with the result that they are more attentive to their tasks."

U. S. SECOND IN LUMBER EXPORTS TO SOUTH AFRICA

Lumber imports into Capetown, Africa, during January totaled 19,095 tons as compared with 7,896 tons in January, 1929, and 9,500 tons in December, 1929. These figures are taken from a report of Duwayne G. Clark Assistant Trade Commissioner at Johannesburg to the Lumber Division Department of Commerce.

January imports to this port, Mr. Clark states, were the largest for any one month during the last three years. Heavy arrivals from North European sources swelled the January receipts. A sharp recession is expected in February lumber arrivals. Shipments of American lumber into Capetown during January were second only to those from Northern European countries. Imports of lumber at Durban, Port Elizabeth, East London, and Lourenço Marques, were also quite heavy during January.

The depression in the furniture industry in South Africa continues, Mr. Clark reports, and none of the factories are working at full capacity. The Durban woodworking union is agitating for a higher duty on foreign-made doors, windows, etc., but to date the Government has paid scant heed to these representations. There were no imports of box shooks during January, the requirements for the delectable fruit trade having been filled. Renewed activity in this trade is expected in April, when the shipment of citrus fruit begin.

LOW BID NOT ALWAYS THE BEST BID

"It is not necessary to accept the lowest bid. It may be well worth while to pay a little more to a contractor who is dependable and who has a reputation of good construction work to live up to," so says President Herbert Hoover. This coincides with that section of the Code of Ethics of the San Francisco Builders' Exchange which says: "Work should be given to the lowest responsible bidder."

COURTS ARE ONLY PLACE TO DETERMINE VALIDITY OF LIENS

By HARRY C. WESTOVER, Attorney-at-Law

This is the seventh of a series of articles on the California Mechanics' Lien Law, prepared by Harry C. Westover, attorney-at-law, of Santa Ana. Other articles will be published in these columns from time to time.—Editor.

The filing of the contract and bond and the filing of a notice of non-responsibility by the owner upon the property effected does not preclude the filing of a lien. Every person who furnishes labor and/or materials upon any building, work, or structure, may file a lien. The question is not whether the claimants may file liens but whether, when such liens are filed, the courts are the only place where it can be determined whether the liens have been filed by claimants. Section 1187 of the C.C.P. provides that every person claiming a benefit of the lien law "may file a record with the County Recorder in the County in which the property is situated, a statement of the claim of lien containing a statement of his demand after deducting all just debts and off-sets." The claim of lien must state "the name of the owner or reputed owner, if known, a general statement of the kind of work done or materials furnished, the name of the person by whom he was employed or to whom he furnished the materials and a description of the property sought to be charged with a lien sufficient for identification."

The mere furnishing of labor or materials does not create a lien. In order to create a lien the claim of lien must be filed with the County Recorder, and until the claim is perfected by filing it with the County Recorder the lien is a mere inchoate right which the mechanic or material man may perfect or not at his pleasure and which until perfected has no existence.

Mechanics' liens are entirely of statutory creation and the statutes must be looked to, both for the right to the lien and to the mode by which it can be enforced. The right to a Mechanics' Lien depends upon compliance with the statute, and in order that a lien may arise and be in force the claimant must strictly or at least substantially observe compliance with the provisions of the statute. It is necessary to take any step other than those required in the statute. A party desiring to hold and enforce a lien upon the property of one who did not employ him must bring his case squarely within the terms of the statute.

There is no definite form provided for Mechanics' Liens. It is only necessary that the following things be stated and they may be stated in any order the claimant so desires.

- (1). There must be a demand of the amount due the claimant after deducting all charges, credits or offsets.
- (2). The name of the owner or reputed owner must be given if known, the name of the owner or reputed owner is not known by the claimant, the claimant can state that he does not know the name of the owner or reputed owner or he can give the name of the owner or the reputed owner, as John Doe.
- (3). A general statement of the kind of work done or materials furnished must be made by the claimant.
- (4). The claimant must also state the name of the person by whom he was employed or to whom he fur-

nished the materials.

(5). A description of the property sought to be charged sufficient for identification must be given.

(6). The claim must be signed by the claimant and verified by the oath of the claimant or of some other person.

Anyone desiring to file a valid Mechanics' Lien must give the information as set forth in the six above requirements. It is not necessary that the claim of lien shall state or show any of the following:

- (1). The completion of the building.
- (2). The date of completion.
- (3). The filing of the claim within thirty, sixty or ninety days after the completion of the building.
- (4). The names of the members of the firm where the claim is made by a partnership.
- (5). The relation existing between owner and the employer of the lien claimant.
- (6). Knowledge by the owner of the doing of the work.
- (7). Facts showing performance or other facts necessary to complete cause of action.
- (8). Implication made by law, such as (a) reasonable value of services; (b) implied promises to pay.

Information concerning the completion of the buildings or work, of a co-partnership, the relation between the owner and the claimant, knowledge on the part of the owner, performance and reasonable value of services and promise to pay is purely a question of fact and evidence. The fact that the lien has not been filed within the statutory time is a defense against the enforcement of the lien and has nothing to do with the right to file the claim. There is considerable difference between the right to file the claim of lien and the right to have the lien enforced. Invalid claim of liens are filed constantly. The court determines whether the lien is valid; that is, whether it was filed in time and whether the work and labor performed or the materials furnished can be charged against the building.

A claim of lien must substantially conform with the statute and must fully and correctly state those things the statute has made essential to the creation of the lien. The statutory requirement that the notice of lien shall contain certain specified statements means that the statements must be substantially correct and in accordance with the facts. It is not necessary that the precise words of the statute be used, if there are other and substantially equivalent expressions. While substantial compliance with the statute is required the statute will not be given such a narrow or technical construction so as to frustrate, impede and destroy the right of lien claimants. *Castagneto vs. Coppertown Mining Co.*, 146 Cal. 329. The persons for whose benefit the lien law was enacted are not presumed to be versed in accuracy of expression and the claims made by them are to be constructed more to substance than to form, in view to the purpose of the record and statement, namely, to inform the owner.

The purpose of the lien is to give information to interested parties as to whom the lien claimant is, the kind of labor and/or materials for which the lien is claimed and the other information required so that the owners of the property or other interested parties may have such information in order that such owners or other interested parties may investigate and determine whether or not

the lien claimant has a valid cause for a lien. When a lien is filed in the County Recorder's office then all parties have constructed notice of the contents of the lien and of all information contained therein. Consequently it is necessary and essential that the information required to be given by the statute, be contained in all liens filed by lien claimant.

PROPOSED UNIFORM LIEN ACT AGREEMENT REACHED

The unanimous agreement on the draft of the proposed uniform lien act which has been reached by the Standard State Mechanics' Lien Act Committee of the Department of Commerce is greeted with satisfaction by organized contractors, according to E. J. Harding, Assistant General Manager of the Associated General Contractors of America.

"The lien act committee, appointed in 1924 by Herbert Hoover as Secretary of Commerce, faced a task which many in the construction industry deemed impossible of accomplishment," Mr. Harding states. "The representatives of the various groups involved in the industry were asked with their conflicting views and economic interests to develop a draft of a lien law which would be equitable, practical and beneficial alike to the workman, owner, material man, direct contractor, sub-contractor, and financial firm."

"That five years were required to arrive at unanimous agreement is not surprising. That such agreement was reached at all is an encouraging indication that the construction industry is developing in its thinking to that stage where a genuine industrial consciousness can direct it."

The proposed uniform law now backed with the unanimous approval of the Department of Commerce committee will be required to secure the approval of the Conference of Commissioners on Uniform Laws before being presented to the various state legislatures as a measure to replace existing statutes.

The divergence of lien law statutes now existing and the inequity of many of the provisions in such laws has long been a sore spot in construction. Owners have been inequitably held to dual payment in many states under existing statutes, unsound credit conditions have been fostered, and many unethical practices have developed because of the patchwork legislation concerning lien rights. It was due to representations of this situation that Secretary of Commerce Hoover originally appointed the committee to draft an act which would better serve the purposes of such legislation.

PACIFIC COAST HARDWOOD DEALERS ELECT OFFICERS

Pacific Coast Hardwood Dealers Association, meeting at Del Monte March 21 and 22, voted to co-operate with the retail lumber yards and with the Milwork Institute to promote the sale of hardwoods.

Roger Sands, Elrich-Harrison Co., Seattle, was elected president; C. H. White, White Brothers, San Francisco, vice-president and Norman Savers, J. Fyfe Smith Co., Ltd., Vancouver, B. C., secretary-treasurer for the coming year. Directors: J. Fyfe Smith; C. E. Hall, Portland, Ore.; George H. Brown, Oakland; C. R. Traenzer, Los Angeles; W. T. White, San Francisco and Jerry Sullivan Jr., San Diego.

Victoria, B. C., was chosen as the convention city for 1931.

THE OBSERVER

WHAT HE HEARS AND SEES ON HIS ROUNDS

Business is getting better and your saying so will help to improve conditions that much faster.

Drown that frown with a smile—say that business is good—then go out and look for that business.

We should all be optimists, for optimism is more than half the joy of living.

I certainly feel sorry for the chap who can see nothing but clouds—always seeking clouds where others always seen sunshine.

If it appears cloudy to you glimpse at the silver lining that is behind every cloud.

The storm is passing over. Our sails are up, there is clear water ahead and a straight course where the trade winds of better business will carry our craft to the port of Prosperity.

Chart your course and give the "Ahead" signal.

We must stop talking about poor business; we must even stop thinking of poor business, for one can actually create a real condition by talking, and of course, thinking a thing always precedes talking it.

So, if we think the right way, we will not only talk right but we will act right, and before we know it everybody else will be doing it.

Let us THINK—Let us TALK—Let us ACT—BUSINESS IS GOOD.

Adoption of the five-day week in American industry and business is held out by William F. Green, president of the American Federation of Labor, as a panacea for unemployment and business depression. Green also urges maintenance of wage levels as a means of preventing recurring periods of idleness and business stagnation.

Yosemite Lumber Company will start operations at Merced Falls and in the logging camps of that district this month. More than 1800 men will be employed before the first of May, according to H. W. Mathew, manager of the company. With an anticipated improvement in the lumber market, Mathew predicts that this year more than 60,000,000 board feet of timber will be cut. Its value is estimated at \$3,000,000.

Los Angeles will make an official effort to learn the practicability of establishing airplane landing fields on roofs of downtown buildings. A committee of experts has been commissioned to study the problem. Among the points to be investigated will be the effect of irregular building heights on air currents. The committee is composed of Roscoe Turner, transcontinental flier; Major John Jeffers of the California National Guard, and Lieutenant E. B. Rorer of the United States navy.

E. C. Fisher Planing Mill at Oroville, Calif., was destroyed by fire April 1. The loss is estimated at \$10,000. Reconstruction will be started at once.

The iron and steel industries and allied manufacturers are one of the most important group of manufacturing establishments in California. This is revealed in a survey just completed by the Research Department of the California State Chamber of Commerce. The 1623 establishments, according to the report, employed 60,491 wage earners, or 23 per cent of the 262,816 wage earners employed in the 10,066 manufacturing establishments of the state.

Wages paid by the iron and steel and allied establishments aggregated \$92,176,000, value of products amounted to \$405,532,000, and value added by manufacturer, \$196,485,000. These figures represent 21.4 per cent, 15.6 per cent, and 18 per cent, respectively, of the aggregate for all California manufacturing establishments.

When compared with 1925, the number of wage earners in the iron and steel, and allied group, during 1927, increased 2.9 per cent, wages 3.7 per cent, value of products 1.7 per cent, and value added by manufacture 5.6 per cent.

The number of employees in 182 iron and steel, and allied manufacturing establishments, compiled from records of the State Bureau of Labor Statistics, averaged 40,042 in 1925, 41,353 in 1927, 40,340 in 1928 and 47,367 in 1929.

The 60,491 wage earners in 1623 establishments during 1927, as reported by the Bureau of Census, were about 46 per cent greater than the number of employees in the 182 establishments. The percentage was the same for 1925. Increasing the figures of the State Bureau of Labor Statistics 46 per cent, the estimated number of wage earners employed in the iron and steel and allied manufactures of the state was approximately 59,000 for 1928 and 70,000 for 1929.

Total imports of iron and steel products to California ports during 1923 aggregated 224,891,000 pounds, valued at \$4,356,418, as compared with 326,668,000 pounds imported during 1928, valued at \$5,715,083. The percentage decrease in physical volume, from 1928 to 1929 was 31.2 and in value 23.8.

Approximately 57 per cent of the value of the State's 1929 total volume entered the Los Angeles Customs District. The total volume aggregated 129,049,000 pounds, valued at \$2,897,337. The decreases in volume and value from 1928 to 1929 amounted to 32.5 per cent and 24 per cent, respectively.

The value of iron and steel imports to the San Francisco Customs District last year totaled \$1,459,681 or 23.5 per cent less than in 1928. The volume aggregated 95,842,000 pounds, as compared with 135,506,000 for 1928, a decrease of 29.3 per cent.

Receipts of intercoastal shipments of iron and steel products at the San Francisco Customs District for the calendar year 1928 totaled 523,683 tons. During the fiscal year July 1, 1928, to June 30, 1929, the intercoastal tonnage into the Los Angeles Customs District aggregated 996,124 tons.

HERE — THERE — EVERYWHERE

Recent wage increase demands by Carpenters and brick carriers, building and common laborers has precipitated the formation of an organization embracing all general and sub-contractors in Great Falls, Montana, with the Great Falls Builders' Exchange as a nucleus.

The Orange County Merchant Plumbers' Association with headquarters at Santa Ana has obtained the services of Al. W. Greewe to put of salesmanship classes for merchant plumbers, journeymen plumbers an office departments of plumbing concerns.

Seventeenth annual meeting of the National Foreign Trade Council will be held in Los Angeles May 21-23. San Francisco registration headquarters are located at the Foreign Trade Department of the Chamber of Commerce.

A group of members of the San Francisco Chapter, American Association of Engineers, were guests of Walter B. Hogan, city manager of Stockton, April 5 on an inspection trip to the Calaveras flood contrivance. The party was accompanied by Fred H. Tibbets, San Francisco consulting engineer.

Manteca, Calif., city trustees contemplate adoption of an ordinance covering plumbing work in connection with natural gas installations. A committee has been appointed to prepare such an ordinance.

DANIELS. STOCKTON BUILDER PASSES

Wesley Daniels, 70, retired Stockton contractor, died in the Sutte Hospital, Sacramento, April 4, following an illness of several weeks.

Daniels was born near Hamilton Ontario, Canada. In 1889 he came to California, later moving from Los Angeles to Stockton, where he had resided since that time.

Daniels was a partner in the firm of Daniels & Green when it was formed in 1908, associated with H. P. Green. In 1924 he retired from the contracting business, his interests being acquired by T. D. Lewis. Daniels engaged in carpenter and millwright work in Canada, Davenport, Iowa, and Peoria, Ill., before going to Stockton.

STEEL TERMS DEFINED

Bascule, bent-eye, bulldozer, cantilever, club dolly, extrados, gantry, gill goose-neck, gusset, hicky, jig, jumper, locus, lure, outhaul, pickling, plumb puddle, purline, rabling, scribe, snip spandrel, strut, toggle, are among the more than 20,000 terms familiar to the steel constructor which are defined in the second edition of the "Fact Book now being issued by the American Institute of Steel Construction. The first edition of this volume was issued just a year ago. The revised edition includes many of the important fact regarding steel construction never before assembled for ready reference.

A directory of the steel constructors of North America, the statistical growth of the industry, bibliography, motion pictures, stereopticon slide and innumerable other handy fact have been included.

MODELING WORK UNDERTAKEN ON INSTALLMENT PLAN

Home Modernizing Company is the name of a new business concern in Los Angeles. It was formed to specialize in the remodeling, refitting and redecorating of all types of structures. A plan for financing such work has been arranged by the company which will allow the owner from 20 months in which to pay for

Study of the situation and experience has indicated to the promoters of the new company that there is a considerable volume of modernizing work which would be done if the burden could be distributed over period to provide easy payments. At present the company is interested in securing contractors and builders nearby towns to co-operate with in a home modernizing campaign. It will take care of the financing and it distribute among them all prospects coming from their respective communities, it is stated.

BUDGET PLANS FOR GROWING CITIES OUTLINED

"Growing cities must look forward to spending more money per capita each year," according to a study of some Problems of Fiscal Control in cities," just completed by Dr. John

Pfiffner of the School of Citizenship and Public Administration of the University of Southern California.

"The larger the city, the more it costs to run it per capita. This is a demonstrated fact which cannot be overlooked," continues the report. Nevertheless, it is the duty of those responsible for the fiscal management of a given municipality to hold per capita expenditures down to a reasonable per capita figure. A city cannot afford all worthy ventures any more than can an individual.

"Every city, regardless of size, could have some means of securing, ranging, and presenting in graphical form the data showing the exact condition and trend of municipal finance. In order to secure these facts and present them in the proper relation to each other it is necessary that there be technically trained persons in the department of finance whose duty it is to make investigations relative to budget needs and make independent recommendations.

"After the budget has been adopted by every head of a spending service could be required to set up a work program to be approved by the department of finance. This work program should aim to carry on departmental efforts within the appropriations, so that the policy determined by the governing body may be carried out without undue or unnecessary modification. Sometimes the financial program determined by the budget making body does not meet the personal ambitions or desires of the department head. He should, however, operate instead of precipitating financial difficulties by not adjusting his operations to the plan outlined.

"Adequate financial planning cannot be carried into effect unless the members are willing to acknowledge their position as laymen taking temporary control of the city's affairs," Dr. Pfiffner's report states. "As laymen they should defer to the advice of the permanent officials of the city.

The city council has two functions to perform in its relation to fiscal con-

trol. The first is to determine the financial policy. It does this when it adopts the appropriation ordinance and levies the taxes. The second is to assure itself that expenditures have been made in accordance with its wishes. This is accomplished by the independent audit or 'post-audit.' This task should be performed by either a firm of outside accountants or a permanent auditing officer responsible only to the council."

Professor Pfiffner is to head a section on budgets in the third annual Institute of Public Administration to be held at the University of Southern California, April 14-19, with public officials and municipal personnel attending. Other sections will deal with special assessments, water supply, planning and zoning, taxation, recreation and parks, and airport management.

N. Y. FACT-FINDING COMMITTEE NAMES SECRETARY

The Advisory Board and Fact-Finding Committee of the New York Building Congress announces the appointment of William E. Taylor as executive secretary. Taylor has been engaged in various branches of the building industry for about 25 years and for the past three years has held the office of executive secretary of the Heating and Piping Contractors' New York City Association.

With this appointment the committee is rapidly bringing its plans for a permanent organization into effect. At the present time the committee is composed of Robert D. Kohn, president of the New York Building Congress, chairman; S. F. Voorhees, R. H. Shreve, H. C. Meyer, Jr., O. H. Cheney, Alexander M. Bing and D. Everett Wald.

Among the chief features of the plan of operation for this committee are the following: That trade and labor disputes affecting the entire industry will be referred to the Fact-Finding Committee for an expression of opinion, with majority and minority report, if necessary; that public opinion will be relied upon to bring about the compliance with the opinions rendered; and that reliance on force for the settlement of disputes is to be eliminated.

FOUR-MINUTE LUMBER TALK TO BE BROADCASTED

Axes swinging in the forest, the whirling and whining of spinning saws, the pounding of hammers as spike nails bite into hardwood; these and other visions will be conjured up by the Westinghouse Salute to the Lumber Industry, Tuesday evening April 15th, at 10 o'clock, Eastern Standard Time.

E. L. Carpenter, President of the National Lumber Manufacturers Association, will contribute to the program with a four-minute talk on the Lumber Industry. The voice of the Interludes will sing praises of the accomplishments of those engaged in the industry.

The desired illusion will be aided by the musical score which has been prepared by Cesare Sodero and which will be played and sung by the Westinghouse orchestra and chorus.

The Westinghouse Salute is broadcast each Tuesday evening over a coast-to-coast network of the N.B.C. by stations including WJZ, and the Westinghouse group, KDKA, WBZ, WBXA and KYW.

Contracts have been let by the Caldwor Paint Company for the erection of a new factory and warehouse at 14th Ave. and E 14th St., Oakland.

MAPS RECORD PROGRESS OF U. S. HIGHWAY IMPROVEMENT

Revised progress maps of the improvement of the Federal-aid highway system issued recently by the Bureau of Public Roads, U. S. Department of Agriculture, show not only the condition of that system in each State but show also the system of United States Highways designated by numbers corresponding to the numerals displayed on the shield-shaped route markers now erected in practically all States.

Since October 20, 1928, when the bureau first announced the issuance of these progress maps, it has revised the maps for 23 States: Alabama, California, Connecticut, Massachusetts and Rhode Island, Florida, Georgia, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maine, Michigan, Mississippi, Missouri, Nebraska, New Hampshire and Vermont, New Jersey, North Carolina, Ohio, South Carolina, South Dakota, Tennessee, Texas and West Virginia.

These maps are in no sense touring maps, but they will be of value to the motorist planning a trip over the Federal-aid system or over the U. S. Highway System. Symbols indicate the type of surface on all parts of the system, and show whether the improvements were made with or without the assistance of the Federal Government. On the back of the California maps, the last to be made, is an index of counties, of the larger cities and of approximate populations of more important cities.

The maps are drawn to a uniform scale; sheets are of uniform size, and are so bound that they may be punched and placed in a loose-leaf atlas. The number of sheets for each State ranges from one to six. A few of the smaller and adjacent States are grouped on one map, such as Maryland and Delaware; Massachusetts, Rhode Island and Connecticut; and New Hampshire and Vermont. Maps may be purchased from the Superintendent of Documents, Government Printing Office, Washington, D. C., at 10 cents a sheet. There are 112 sheets for the 48 States.

CONDEMNED BUILDINGS TO GO IN BOSTON

Removal of 1600 condemned buildings this year throughout the city of Boston has been ordered by Mayor Curley in a communication to the city building department. The order is a part of an attempt to reduce the number of fire traps in the city. Owners who fail to obey the order will be called upon to pay the city for razing the structures.

SACRAMENTO ARCHITECT IN NEW QUARTERS

Harry J. Devine, Sacramento architect, is now occupying new and larger quarters at Suite 1400, California State Life Building, Sacramento. Mr. Devine, formerly connected with the office of Dean & Dean of Sacramento, has been practicing architecture for himself for the past two years.

Monterey city council is considering the adoption of a building code similar to that in effect in Santa Barbara. The code is now being studied by the individual members of the council and will come up for official adoption within the next few weeks.

TRADE NOTES

Acme Partition Company of Oakland, manufacturers of rolling doors, reports the shipment of a vertical partition to be installed in a school at Madison, Wis. The partition measures 90 feet wide by 22 feet high. The moving section weighs one and one-half ton. "Despite the great weight the partition can be operated with ease," says W. C. Grant, sales manager for the company.

Construction has been started on a \$15,000 shop building for the New England Sheet Metal Works at San Benito Street and Broadway, Fresno. The new quarters will provide offices and display rooms in addition to shop departments. The plant is operated by A. H. Yazajian.

Modern Plumbing Co. of Bakersfield, has been incorporated with capital stock of \$20,000. Directors are H. C. Shaw and Alvin O. Smith of Bakersfield and R. W. Shaw of San Francisco.

Frank Carr of Lagunitas, Marin county, has purchased the old Podini lumber yard and mill at Lagunitas and will operate under the firm name of Lagunitas Lumber Company.

H. E. Casey Company of San Mateo will start construction immediately on a \$60,000 plant at Peninsular Ave. and Woodside Way. The new plant will provide warehouse and office quarters and rock, sand and gravel bunkers. The man building will be 60 by 100 feet.

A. H. Rasmussen, engaged in commercial art work in Fresno for the past twenty years, has joined the staff of the Schultz Paint & Wall Paper Company, 1909 Fresno Street, Fresno.

Little River Redwood Co. of Madera, has purchased a site 50 by 150 ft. adjoining the present plant in F St., Madera, and will erect a modern planing mill.

ALONG THE LINE

C. C. Kennedy, San Francisco engineer, has been requested by the city trustees of Yreka to resign his position as city engineer. It is proposed to appoint a local man to the office.

William J. Monahan of Los Angeles, works manager of the Pacific production department, United States Gypsum Company, died March 23 of heart disease. He was 50 years of age. Monahan had been connected with the United States Gypsum Company for 35 years.

Thomas Addison, 76, formerly general manager of the Pacific Division for the General Electric Company, died at his home in Oakland, last Wednesday. Addison retired from active business some years ago. He is survived by two daughters, Mrs. Edna L. Keyes and Mrs. Mary A. Mitchell.

MARCH BUILDING ON PACIFIC COAST SHOWS DECIDED DECREASE

Building construction undertaken on the Pacific Coast for the month of March, 1930, involved an expenditure of \$26,852,538 as compared with \$35,416,192 for the corresponding month in 1929. All states report a slackening in activities with the exception of Oregon which reports a total of \$2,043,937 for March 1930, as compared with \$1,942,000 for the month of March, 1929. California rolled up a total of \$20,037,174 as compared with \$29,722,318 for the same month in 1929.

Following are the official March, 1930, statistics as compiled from reports of building department executives in the cities comprised in the Pacific Coast area:

CALIFORNIA

City	No.	March, 1930		March, 1929	
			Cost		\$
Alameda	63		\$ 138,845		\$ 80,722
Alhambra	61		222,000		241,089
Bakersfield	80		101,821		89,160
Berkeley	126		411,536		265,237
Beverly Hills	97		507,000		1,152,625
Burbank	26		41,123		167,440
Burlingame	16		160,666		118,425
Carmel	8		6,400		14,500
Chula Vista	9		6,575		31,005
Colton	7		13,900		11,200
Compton	25		41,560		200,953
Coronado	14		11,870		24,975
Culver City			99,835		73,450
Emeryville	3		4,500		204,315
Eureka	41		82,270		39,125
Fresno	111		85,197		193,963
Fullerton	24		80,490		61,615
Glendale	128		327,810		648,695
Hayward	7		97,540		40,620
Huntington Park	57		274,630		423,900
Inglewood	25		52,835		42,600
Long Beach	553		1,178,850		3,947,600
Los Angeles	2,764		7,045,931		10,696,375
Lynwood	38		82,593		84,250
Modesto	47		60,425		118,843
Monrovia	29		47,600		30,340
Montebello	19		53,380		38,860
Monterey	37		36,400		44,261
National City	16		14,775		18,630
Oakland	359		1,132,083		1,896,240
Oceanside	9		9,075		75,500
Ontario	24		48,015		89,495
Orange	10		36,200		10,000
Pacific Grove	17		21,170		8,730
Palo Alto	68		111,830		123,910
Palos Verdes Estates	3		35,200		48,000
Pasadena	339		328,115		665,163
Petaluma	6		32,975		16,775
Piedmont	10		32,476		81,293
Pomona	71		84,730		113,915
Redlands	17		21,583		62,950
Redwood City	30		60,675		80,236
Richmond	52		56,095		21,595
Riverside	46		133,384		234,520
Sacramento	129		311,044		356,976
Salinas	46		74,337		267,073
San Bernardino	60		98,520		338,170
San Diego	387		483,960		891,952
San Francisco	584		3,502,312		2,701,111
San Gabriel	17		57,875		64,065
San Jose	75		243,095		334,505
San Leandro	24		85,160		207,900
San Marino	21		214,434		119,765
San Mateo	33		176,550		175,694
San Rafael	12		81,630		59,530
Santa Ana	87		157,605		119,725

SUB'S SUIT AGAINST BOND OF CONTRACTOR NOT SAME AS LIEN

Section 1190 of the California Mechanics' lien law requiring suit to be commenced within 90 days after lien is filed does not apply in a suit brought by a subcontractor to recover on a contractor's bond, according to an opinion handed down by the Second District Court of Appeals, Division 1, in the case of R. J. Luke, subcontractor, vs. the Southern Surety Company, Section 1190 has reference only to liens on real property and not to a suit on a contractor's bond.

It was further held by the court that the public works act of 1919 does not require laborers and materialmen to file any claim of lien in the office of the county recorder; also that requirement of a bond for filing of a verified statement with the board of a public corporation, by whom a contract was awarded was impossible of performance on private work, and no act can be required as a substitute for the impossible.

The plaintiff, Luke, signed an agreement with H. H. Hinds, general contractor, to do the painting, decorating and papering on a six-story hotel building at Seventh St. and Gladys Ave., Los Angeles. After completing the work Luke collected \$4451 from the general contractor. Claiming that \$3227 was still owing him, he later brought suit for the amount against the bond which the general contractor had given. This was furnished by the Southern Surety Company.

A demurrer was filed by the surety company in which it was claimed Luke had not filed his claim with the county recorder, as required by law and set out in the bond; that no verified statement of the claim had been filed with the owner of the property involved, and that suit had not been started within 90 days after filing the lien, as required by the mechanics' lien law. This demurrer was sustained by the superior court, but it was overruled by the appellate court, which remanded the case to the superior court for trial.

In its comment on the case the appellate court said the legal difficulties of the case arose because the bond was in the form that is usually written on public works contracts, while the work involved in the case at issue was private. Provisions for collection on such a bond, the court said, are based on the public works act of 1919. This act requires laborers and materialmen to file their claims with board or other officials of the public body for whom the work was performed, and to commence suit within 90 days after the lien is filed.

The opinion of the appellate court, delivered by Justice Elliott Craig, joined by Justice Conroy and Justice Houser, disposes of the three points of the demurrer as follows:

"As to point one (1) of the demurrer, we have read the public works act and find no requirement therein for filing or recording any claim of mechanic's lien in the office of the county recorder. The mechanic's lien laws do not require the recording of any claim or mechanic's lien in requisite to suit on the bond. (Fraters v. Southwestern etc., Co., 200 Cal. 688, 254 Pac. 1907).

"As to point two (2), the requirement of a bond as to filing a verified statement with the board (supervisors etc.) of a public corporation by which the contract was awarded was impossible of performance for the reason that this is a private work. Respondent contends that such claim should have been filed with the owner, but we cannot agree with this contention. No act was required as substitute for the impossible as regards such filing of a verified claim.

"As to point three (3), section 1190 of the Code of Civil Procedure, requiring suit to be commenced within 90 days after the filing of the lien, has no application in this case. The section has reference to liens of mechanics, etc., on real property, and not to a suit on a contractor's bond."

DOWN TOWN ASSOCIATION PROTESTS USE OF FOREIGN STEEL ON STATE PROJECT

Pursuing its campaign to increase the volume of payrolls in the bay district, the Down Town Association's Business Development Department has ascertained that steel imported from Germany is to be used in construction of additions to the State Building in the Civic Center.

B. C. Brown, chairman of the Down Town Association's Business Development Department, has forwarded a communication to B. B. Meek, state director of public works, "in the hope that the state department of public works will use its influence to have rectified a contract which is at variance with President Hoover's program urging that all Federal and state building projects be immediately started and carried on with a view to providing employment for American workmen."

The communication is published herewith:

"One of the units of the San Francisco Down Town Association is a Business Development Department, whose object is to develop local industries and thereby increase local payrolls. During the last eight months this Department has been particularly interested in promoting the building industry in San Francisco and advocating its use of locally-manufactured materials, thereby helping to relieve the existing unemployment situation.

"Very much to our surprise, we are informed that reinforcing steel to be used in the construction of two additions to the State Building in San Francisco is being imported from Germany, and we transmit this information to you with hope that the Department you head will use its influence to have rectified a contract which is at variance with President Hoover's program urging that all Federal and State Building projects be immediately started and carried on with a view to providing employment for American workmen.

"Whatever aid your Department gives us in this matter will be duly appreciated."

FEDERAL AID HIGHWAYS FOR CALIFORNIA

California's federal aid highway fund will be increased from \$5,000,000 to more than \$8,000,000 a year, under increased federal allocations embodied in the Dowell bill, passed by the senate and sent to the president for signature. The president is expected to sign it at once. The measure provides for a yearly increase of \$50,000,000 in federal aid highway appropriations, of which California will receive more than \$1,500,000. The state is now allocated \$2,455,345 annually in federal funds. The Dowell bill increase would bring the amount to \$4,153,992, while the state's contribution at an equal amount, would raise the total from \$4,990,690 to \$8,317,984 annually for road construction work on the federal aid highway systems in the state.

California's share in the yearly increase is exceeded only by five states—Illinois, \$2,000,000; New York, close to \$2,500,000; Ohio, \$1,800,000; Pennsylvania, more than \$2,000,000; and Texas, \$3,000,000.

In addition to the increase provided in the Dowell bill, California is slated for an increase of \$600,000 for the next two fiscal years under the Colton-Oddie bill pending in the house and senate. This measure will increase funds for constructing approach, tie-in, and national forest roads.

APARTMENTS

Plans Being Prepared—
Contract Awarded.

APARTMENTS Cost, \$50,000
SAN MATEO, San Mateo Co., Calif.
Three-story and basement frame and
and stucco apts. (13 3-room apts.)
Owner—Name Withheld.
Architect—Earl Cavasso, 235 3rd Ave.,
San Mateo.
Contractor—Sierra Const. Co., 235 3rd
Ave., San Mateo.

Contract Awarded.
APARTMENTS Cost, \$50,000
STOCKTON, San Joaquin Co., Cal.
NE Hunter and Rose Sts.
Three-story pressed brick apartments
(13 rooms).
Owner—Mr. Marems, % L. Lewkowicz
Stockton.
Architect—Withheld.
Contractor—L. S. Peletz, 1660 W.
Acacia Ave., Stockton.
Present building on site to be razed.
Construction will start about May 1.

Sub-Figures Being Taken.
APARTMENTS Cost, \$40,000
OAKLAND, Alameda Co., Cal. No.
1615 Sixth Avenue.
Three-story frame and stucco apart-
ments (24 2 and 3-room apts.)
concrete and steel frame garage
(24 cars).
Owner and Builder—W. C. Watkin,
100 Echo Ave., Oakland.
Architect—L. F. Hyde, 372 Hanover
St., Oakland.

Segregated Bids Being Taken.
APARTMENTS Cost, \$175,000
SAN FRANCISCO. NE Buena Vista
Ave. and Waller St.
Six-story class C basement and sub-
basement apartments (36 2- and 3-
room apts. and one 10-room apt.)
Owner—Sunacal Investment Co.
Architect—Albert H. Larsen, 447 Sut-
ter Street.

Specifications Being Written.
ALTERATIONS Cost, \$40,000
SAN FRANCISCO. NW Bush St. and
Polk St.
Alter present apartments.
Owner—Estate of Louis Freidman.
Architect—S. Helman, 605 Market St.
Work involves painting, electric wir-
ing, plumbing, frigidaire. Bids will
be called for in one week.

Ornamental and Miscellaneous Iron
Contracts Awarded.
APARTMENTS Cont. Price, \$16,522
SAN JOSE, Santa Clara Co., Cal.
First and Oak Sts.
Two-story reinforced concrete and
frame apartments and stores (4
3-room apts. and 2 stores).
Owner—Mike Sasa, San Jose.
Architect—Charles McKenzie, Bank of
San Jose Bldg., San Jose.
Contractor—Joseph Santi, San Jose.

PLUMBING INSPECTORS CITE AIMS OF ASSOCIATION

A letter was recently sent out by the Plumbing Inspectors Association of California, addressed to the City Council of every California city, advising them of the existence of the organization, explaining the object and necessity for it, and asking the city fathers to encourage and assist their inspectors of plumbing to become members. Among the objects of the association as outlined are the following:

To advance the latest methods of sanitary plumbing.

To establish fundamental facts, and with these facts as a basis, make rules to govern pipe sizes and all phases of plumbing installations.

To create an educational division for the furnishing of all necessary data on the sanitary installation of plumbing, to all cities throughout the state.

To maintain a testing laboratory for the testing of material and appliances.

To promote harmony and co-operation between owner, builder, craftsman and officials.

To accomplish a uniformity in the application of the laws and ordinances.

To promulgate the mutual benefit of the members.

ASPHALT INSTITUTE ELECTS

The newly organized Asphalt Institute, which succeeded The Asphalt Association on January 1, last, has elected the following officers for the fiscal year 1930: Leroy M. Law, St. Louis, Mo., president; W. H. Kershaw, New York, N. Y., vice-president; C. W. Baylies, Philadelphia, Pa., vice-president; B. L. Boye, New York, N. Y., secretary, and Fisher Jones, New York, N. Y., treasurer. J. S. Helm of New York is chairman of the Executive Committee and J. E. Penningbacker, also of New York, is managing director.

On or about April 15, the Institute will move to the new Crystal Building, 250 E 43rd St., and 801 2nd Ave., New York, where it has leased for five years, the entire 18th floor. Larger general offices, and a new and larger laboratory will be installed in these quarters with F. C. Field, assistant chemical engineer, in charge. The entire research division will be under the supervision and direction of the Institute's chemical engineer, Prevost Hubbard, formerly chief of research for the United States Bureau of Roads.

Engineering News Section

- (6) 6 tons asphalt road oil;
- (7) 1 lot, misc. items of work.

CHICO, Butte Co., Cal.—Until May 6, bids will be received by city council to widen Broadway bridge over Little Chico Creek involving removal of old r. v. trestle west of the bridge and widening by 19 ft. 5 ft. of which will be for sidewalk. Concrete construction. Estimated cost \$1800. Plans obtainable from Martin C. Polk, city engineer.

ROSEVILLE, Placer Co., Cal.—J. M. Adams, Roseville, at \$70 awarded contract by city council to construct steel bridge over Dry Creek in city limits. Andre Lezenich, Roseville, only other bidder at \$199.80.

STOCKTON, San Joaquin Co., Calif.—City Manager Walter B. Hogan is completing estimates of cost for a subway at Charter Way for presentation to the city council. It is expected the state will aid in financing the project with the city of Stockton providing funds for its share of the cost from the gas tax. Preliminary estimates place the cost at \$200,000, of which the Western Pacific and Southern Pacific railroads would pay one half the total cost.

MARTINEZ, Contra Costa Co., Cal.—C. H. Gildersleeve, Napa, at \$2532.75 awarded contract by county supervisors to construct reinforced concrete culvert under Buchanan Road, 2 miles south of Pittsburg. Complete list of bids follow

C. H. Gildersleeve	\$2532
V. A. Kaurenberg	2738
J. H. Fitzmaurice	2509
Geo. French, Jr.	2824
Delta Dredging Co.	3062
Walter Todd	3157
R. F. Page	3188
V. Divillo	3666

PALO ALTO, Santa Clara Co., Cal.—City Engineer J. F. Byxbee Jr., will confer with Santa Clara and San

Mateo County Supervisors seeking financial aid to finance widening of Middlefield road bridge connecting San Mateo and Santa Clara Counties at Palo Alto.

BERKELEY, Alameda Co., Calif.—City Engineer Harry Goodridge preparing plans for culvert under Contra Costa Ave.; estimated cost \$3000.

SAN FRANCISCO—Dyer Bros., 17th and Kansas Sts., awarded contract by Southern Pacific Railroad to furnish approximately 150 tons of structural steel required in the construction of a viaduct over Steiner Creek in the valley section of the Coast Division.

DREDGING, HARBOR WORKS & EXCAVATIONS

HEALDSBURG, Sonoma Co., Cal.—City Council proposes to rent steam shovel to widen slough flowing through Healdsburg and out at the southwest corner of the city. Archer B. Stuart is city engineer.

IRRIGATION PROJECTS

TURLOCK, Stanislaus Co., Calif.—Turlock Irrigation District rejects bids for improvements in Imp. Dist. No. 36 and new bids will be asked, to be opened about April 27.

NYSSA, Ore.—Following awards of contract have been made by U. S. Bureau of Reclamation in connection with the concrete-lined tunnels, roads and distributing system of the Owyhee project in Oregon and Idaho:

T. E. Connolly, 461 Market St., San Francisco, on a bid of \$982,566 contract for the upper half of tunnel No. 1.

J. F. Shea Co., Hewry Bldg., Portland, the lower half of tunnel No. 1 on a bid of \$1,025,208, and for upper half of tunnel No. 5 on a bid of \$606,970.

S. S. McGoffin Co., North Vancouver B. C., for other half of tunnel No. 5 on a bid of \$530,684.

The work consists of the construction of a 14-ft. by 0-in. diameter tunnel, 18,722 ft. long, and a 9 ft. by 4 in. diameter tunnel, 33,307 ft. long; or a 16 ft. by 7 in. diameter tunnel 18,722 ft. long, and a 9 ft. by 3 in. diameter tunnel 21,320 ft. long, and appurtenant roads and structures. The principal items and the maximum quantities involved are as follows: 280,000 cu. yds. of all classes of tunnel excavation; 114,000 cu. yds. of all classes of excavation other than tunnel excavation; 23,000 sta. cu. yds. of overhaul; 74,000 cu. yds. conc. in tunnel lining; 1600 cu. ft. of pressure grouting; laying 600 lin. ft. of 12-in. and 18-in. corr. metal pipe; constructing 53,000 lin. ft. of tunnel and outlet closed drains; furnishing and erecting 330 M. ft. b. m. timbering in tunnels; furnishing and erecting 209,000 lbs. struct. steel in tunnels.

STREET LIGHTING SYSTEMS

TURLOCK, Stanislaus Co., Cal.—Until April 28, 2 P. M., bids will be received by Anna Sorensen, Secretary, Turlock Irrigation District, for construction in Improvement District No. 56, as follows:

Schedule No. 1

Section No. 1. Approximately 60,658 square feet of 2-inch thick concrete canal lining.

Section No. 2. Approximately 67,924 square feet of 8-inch thick concrete canal lining.

Section No. 3. Approximately 41,694 square feet of 2-inch thick concrete canal lining including the raising and repairing of approximately 356 lin. ft. of old lining and flume.

Schedule No. 2

Approximately 9 concrete structures a total of 16.33 cubic yards of concrete.

Certified check 5% payable to district required with bid. Plans on file in office of secretary and obtainable from R. V. Melkie, chief engineer of the district.

CHICO, Butte Co., Cal.—City council is conferring with Pacific Gas & Electric Co. regarding installation of electrolier system in the Esplanade. The cost is estimated at \$13,728. Martin Polk is city engineer.

GUSTINE, Merced Co., Calif.—City Engineer A. E. Cowell completes specifications for electrolier system in the business section. The cost is estimated at \$5,000.

BAKERSFIELD, Kern Co., Calif.—Until April 21, 8 P. M., bids will be received by V. Van Ripper, city clerk, to install 72 electrolier standards with underground system in 17th Street, K St. and Union, and L St. bet. 17th and 19th Sts. Union metal standards. Design No. 1891, 1911 Act. The cost is estimated at \$15,598. Project involves 72 standards; 7,922.58 ft. 1-in. conduit; 574 ft. 1½-in. conduit; 8,452.58 ft. cable; 2 test coils. Plans on file in office of city clerk and obtainable from J. Holfelder, city engineer.

MACHINERY AND EQUIPMENT

FETALUMA, Sonoma Co., Cal.—Following bids taken under advisement by Board of Education to furnish and deliver chassis for school busses:

Sanderson Motor Co., for two busses on Ford bodies, complete, net after allowance on two busses to be turned in, \$4416.30.

Sparks Motor Service, for Studebaker chassis, after allowance of \$250 each for the old busses, \$6372.

Moreland, 35-passenger, after allowance of \$410 each for old busses, per unit, \$2306.

Moreland, 42-passenger, after allowance of \$490 each for old busses, per unit, \$2531.

Mack, after allowance of \$75 and \$160 for old busses, per unit, \$2691.

Reo, after allowance of \$400 for two old busses, net price for two chassis, \$4395.50.

White, after allowance of \$200 each on old busses, net for one small chassis, \$2630.

For larger chassis, net \$4130. International, after allowance of \$439 each for old busses, net price for two chassis, \$4622.

G. M. C., after allowance of \$200 for old busses, two chassis, \$4280.

Lowden Motor Coach Co., for 42-passenger body, \$1375.
 California Motor Coach Co., for 42-passenger body, \$1375.
 Albright Co. for 42-passenger body, \$1750.
 Eagle Body Mfg. Co., 35 passenger body, \$1340; 42-passenger body, \$1375.

LONG BEACH, Cal.—Until 2:30 P. M., April 15, bids will be received by the city manager for furnishing and delivering 1, o.b. 14th St. and Ori-zaba Ave., one loader so constructed as to be readily attachable to any operated by a Best "Thirty" tractor. Special specifications No. C-476. G. L. Buck, city manager.

SAN FRANCISCO.—Until April 15, 2 P. M., bids will be received by U. S. Forest Service, Ferry Bldg., to furnish and deliver one 12-ft. blade grader and three 8-ft. blade graders. Specifications obtainable from above office.

SAN FRANCISCO.—Until April 14, 2 P. M., bids will be received by U. S. Forest Service, Ferry Bldg., to furnish and deliver one $\frac{3}{4}$ -ton heavy duty and nine light duty trucks.

SAN FRANCISCO.—Until April 16, 2:30 P. M., bids will be received by S. J. Hester, Secretary, Board of Public Works, to furnish and deliver automobile busses, under Contract No. 164, Municipal Railway System. Estimated cost \$24,000. Certified check 10% payable to the clerk of the Board of Supervisors required with bid. Specifications obtainable from the Bureau of Engineering, 3rd Floor, City Hall.

HAWTHORNE, Nevada.—Until April 22, 10 A. M., bids will be received by the Bureau of Supplies and Accounts, Navy Department, Washington, D. C., to furnish locomotive crane to the Naval Ammunition Depot at Hawthorne, Nevada. Specifications obtainable from above office and on file in Navy Purchasing Office, 100 Harrison St., San Francisco.

RAILROADS

MARE ISLAND, Cal.—Bids will be asked shortly by the Bureau of Yards and Docks, Navy Department, Washington, D. C., under Specification No. 6104, to erect six reinforced concrete shell houses and a railroad extension at the Mare Island Navy Yard Ammunition Depot. Plans obtainable from above office on deposit of \$10, returnable.

SAN FRANCISCO.—City Bureau of Engineering has completed surveys to extend L Street line of the Municipal Railway to the Fleishacker Pool. Provides for turning the line at Forty-seventh Ave. and Taraval St. and extending it southward to Sloat Blvd. where it will make a loop around the block. M. M. O'Shaughnessy, city engineer.

FIRE ALARM SYSTEMS

MONTEREY, Monterey Co., Cal.—Until April 15, bids will be received by Clyde A. Doresey, city clerk, to install traffic signals at intersection of Franklin and Alvarado Sts., estimated cost \$1,750. Plans on file in office of clerk.

VALLEJO, Solano Co., Cal.—Bids will be asked at once by Al E. Edgumbe, city clerk, to furnish and deliver one motor fire engine; estimated cost \$14,000. Will consist of a 750-gal. quadruple service truck with booster

tank equipment and hose body. Specifications and further information obtainable from clerk.

MISCELLANEOUS SUPPLIES AND MATERIALS

CHICO, Butte Co., Cal.—Until April 15, 8:15 P. M., bids will be received by H. H. Hume, city clerk, to furnish and deliver 100,000 gallons of road oil. Certified check 10% required with bid. Specifications obtainable from Martin Polk, City engineer.

FRESNO Fresno Co., Cal.—Fresno Builders' Supply Co., Fresno, at 64c ft. for pipe, \$52 each for manholes, awarded contract by city council (102-D) to construct 6-in. vit. clay pipe sewer in alley in Roeding Addition, including three cement concrete manholes with c. i. covers; 4-in. on 6-in. wyes.

TULARE, Tulare Co., Calif.—Until April 17, 4:30 P. M., bids will be received by R. M. Berryhill, city manager, for drilling, lining, perforating and testing well for municipal water supply. Specifications obtainable from secretary of the Board of Public Utilities on deposit of \$5, returnable.

SANTA ROSA, Sonoma Co., Cal.—Until April 15, 5 P. M., bids will be received by Ney L. Donovan, city clerk, to furnish and deliver gasoline and oil for period of one year, gasoline to be delivered in bulk to points designated by city engineer. Further information obtainable from city clerk.

RESERVOIRS AND DAMS

SACRAMENTO, Calif.—Until April 14, 11 A. M., under Circular Proposal No. 30-334, Specifications No. 1809, bids will be received by U. S. Engineer Office, California Fruit Bldg., for the construction of inspection tunnels at site of proposed Kennett dam, also for necessary timbering of same near the town of Kennett. Each tunnel will be 400 ft. long, one to three in number. Further information obtainable from above.

To Be Done By Day's Work By Owners.

RESERVOIR Cost, \$10,000
 OAKLAND, Alameda Co., Cal. Foot of Fruitvale Ave.
 Concrete reservoir.
 Owner—Southern Pacific R. R. Co., 65 Market St., San Francisco.
 Plans by Eng. Dept. of Owner.

PIPE LINES, WELLS, ETC.

PAJO ALTO, Santa Clara Co., Cal.—Until April 26, 10 A. M., bids will be received by Supervising Superintendent of Construction, U. S. Veterans' Hospital, Palo Alto, to furnish and install complete gas mains to boiler house and gas burners in boilers at the U. S. Veterans' Hospital at Palo Alto. Bond of 50% of the contract price will be required of the successful bidder. Partial payments will be made monthly covering approximately 90% of the completed work. Plans obtainable from Supervising Superintendent of Construction at the hospital.

SEWERS AND SEWAGE DISPOSAL PLANTS

SAN FRANCISCO.—Until April 23, 2:30 P. M., bids will be received by S. J. Hester, secretary, Board of Public Works, to construct Section B of the Fillmore St. Sewer, involving in the main 3,000 ft. 6-ft. 9-in. circular reinf. conc. sewer in Tenth and Fell Sts. from Harrison St. to Van Ness

Ave.; estimated cost \$103,000. Plans obtainable from Bureau of Engineering, 3rd floor, City Hall, on deposit of \$10, returnable.

SEBASTOPOL, Sonoma Co., Cal.—A. Fred Anderson, 1093 Longridge Road, Oakland, at (a) \$21,540.47 for vitrified pipe and (b) \$21,260.97 for cement pipe, submitted low bid to city trustees to construct sewage disposal plant. Complete list of bids, all taken under advisement until April 11, follows:

A. F. Anderson (a) \$21,540; (b) \$21,260
 Diamond Construction Co., \$21,350
 Harry Thorsen, Napa (a) \$21,745; (b) \$21,725.
 MacDonald & Maggoria, Sausalito (a) \$22,760; (b) \$22,220.
 A. T. Howe, Santa Rosa (a) \$22,863; (b) \$22,516
 Oakland Construction Co., \$22,930
 P. L. Burr, San Francisco, \$23,985

SANGER, Fresno Co., Cal.—Bids will be asked shortly by city trustees to construct 3335 ft. of sewers in various sections of the city; estimated cost \$1500.

PACIFIC GROVE, Monterey Co., Cal.—City Council cancels proceedings under Resolution of Intention No. (3149) to install ornamental street lighting system in Central Ave., bet. First St. and Fountain Ave. and Fountain Ave., bet. Ocean View Ave. and Lighthouse Ave., involving 46 single light Union Metal Manufacturing Co.'s electroliters No. 807 together with underground system. Bids for this work were to have been opened April 14. The bids received were returned unopened.

SAN FRANCISCO.—Until April 23, 2:30 P. M., bids will be received by S. J. Hester, secretary, Board of Public Works, to construct Geary street and 23rd avenue sewer from 27th Ave. and Geary St. to 23rd Ave. and Lake St.; estimated cost \$61,000. Project involves in the main 4,000 ft. 4x6-ft. to 2x3-ft. reinf. conc. sewers. Plans obtainable from Bureau of Engineering, 3rd floor, City Hall.

SAN MATEO, San Mateo Co., Calif.—City council has started proceedings to construct Beresford Park sewers; estimated cost \$60,000. It is expected that a call for bids will be issued about April 21.

FRESNO Fresno Co., Cal.—Oakland Sewer Const. Co., 354 Hobart Street, Oakland, at \$10,741.57 submitted low bid to county supervisors to construct sewer connecting Fresno County General Hospital with city sewer system, involving: 826 ft. 12-in. and 394 ft. 6-in. sewer pipe and 15 manholes. All bids, as follows, taken under advisement:

Oakland Sewer Const. Co., Oakland \$10,741
 Fresno Builders' Supply Co., Fresno 11,030
 Oakland Const. Co., Oakland 11,323
 DeGolyer & Bruce, Oakland 13,349

BERKLEY, Alameda Co., Cal.—City Engineer Harry Goodridge preparing plans for sewer in Durant Ave., estimated cost \$6000 and a unit of storm sewer in Keith Ave. from Spruce St. to Cragmont Ave., estimated cost \$10,000.

MISCELLANEOUS CONSTRUCTION

LOS ANGELES, Cal.—H. W. Rohl & Co., 806 Roosevelt Bldg., Los Angeles, at \$652,738.50 (using waterproof cement) awarded contract by Board

of Public Works to construct three tunnels and appurtenant work in connection with the Figueroa street extension will be tie lined, approximately 46.5 ft. in width by 28 ft. high of semi-circular shape, of a aggregate length of 996 ft.

WATER WORKS

SOUTH GATE, Los Angeles Co., Cal.—Until 8 P. M., April 15, bids will be received by the city council for the following:

(1) Furnishing and installing a deep well turbine pump, electric motor, etc., in 12-in. well, located at southwest corner of Ardmore Ave. and Otis St. Certain existing equipment must be purchased by bidder.

(2) Furnishing and installing a deep well turbine pump, electric motor, etc., in 12-in. well on west side of Kaufman Ave., south of Southern Ave. Certain existing equipment must be purchased by bidder.

Edward M. Lynch, 1101 Central Bldg., Los Angeles, is the engineer.

SOUTH GATE, Cal.—Chicago Bridge & Iron Works, Rialto Bldg., San Francisco, awarded contract by the city council at \$12,850 to furnish and erect a steel tower and tank having a capacity of 150,000 gallons.

TURLOCK, Stanislaus Co., Calif.—American Cast Iron Pipe Co., Balboa Bldg., San Francisco, at \$1,000.60, awarded contract by city council to furnish and deliver 500 ft. 6-in. c. i. pipe at \$307 and 800-ft. 8-in. c. i. pipe at \$693.60; delivery in 50 days.

EUREKA, Humboldt Co., Calif.—Fairbanks-Morse Co., Spear and Harrison Sts., San Francisco, at \$969 awarded contract by city council to furnish one deep well turbine pump with nominal capacity of 350 G. P. M. against a total head of 85 ft. Pump shall consist of a pumping element with a motor to be operated on a 440-volt, 3-phase, 60-cycle A. C. and at a speed not to exceed 1800 revolutions per minute; a pumping unit consisting of one or more impellers of the enclosed type, each operating in a separate case or bowl; a combination discharge column consisting of an outer housing, an inner housing and a drive shaft with suitable bearings, and a galvanized coucnopia strainer. Complete list of bids follows:

Pomona Pump Co.	\$826.00
Peerless Pump Co.	\$934.50
Layne and Bowler	\$934.50
Pelton Company	\$968.55
Fairbanks-Morse Co.	\$969.00
Byron Jackson Co.	\$989.00

SANGER, Fresno Co., Cal.—Bids will be asked shortly by city trustees to construct extensions to water system; estimated cost \$700.

LONG BEACH, Calif.—May 13 has been tentatively set as date for the proposed \$4,450,000 water bond election.

MOUNTAIN VIEW, Santa Clara Co., Cal.—Until April 16, 8 P. M., bids will be received by B. L. Hays, City Clerk, to furnish and install one deep turbine pumping plant. Specifications on file in office of clerk and obtainable on request without charge.

TULARE, Tulare Co., Cal.—Bids will be asked at once by city board of public utilities to construct extensions to water system, drill well and install pump and motor.

SACRAMENTO, Cal.—City Manager James S. Dean will recommend to city commission a bond issue for improve-

ments to municipal water system. Recommendations will include:

1. Calling of a bond election to secure funds to put the filtration plant in shape to handle water demands. Although the city water commission, in its last report, estimated \$688,000 would be required, Dean believes this figure can be cut appreciably.

2. Construction of a new, shallow-type sedimentation basin with a capacity of 70,000 gallons of water daily. This type basin is being extensively used in the east and middle-west with excellent results and its cost is far less than that of the deep-type basin now at the filtration plant.

3. Repairing of present crippled sedimentation basin so that it can be used as a "stand-by" or used on summer days when peak consumption is reached.

4. Addition of extra pumps so that water pressure in city mains can be maintained at sufficient pressure to comply with requirements of the board of fire underwriters.

ALHAMBRA, Los Angeles Co., Cal.—Bids for furnishing cast iron pipe to the City of Alhambra were opened by the City Commission April 1. Bids were taken on:

- (1) 243 ft. 14-in. pipe;
- (2) 1416 ft. 18-in. pipe;
- (3) 2376 ft. 16-in. pipe;
- (4) 1296 ft. 12-in. pipe;
- (5) 1440 ft. 10-in. pipe;
- (6) Fittings, approx. 16½ tons.

Bids which were referred to T. C. Downer, city water supt., were:

American Cast Iron Pipe Co.—(1) \$5.65, (2) \$3.515, (3) \$2.92, (4) \$1.92, (5) \$1.45, (6) \$120 ton. Pipe to be cement lined.

U. S. Pipe & Foundry Co.—Cement lined pipe: (1) \$548.90 per C ft., (2) \$341.20 per C ft., (3) \$323.30 per C ft., (4) \$183.60 per C ft., (5) \$138.50 per ft. Bitumastic lined: (1) \$555.90, (2) \$345.70, (3) \$287.10, (4) \$187, (5) \$141.10.

National Cast Iron Pipe Co.—Cement lined: (1) \$565, (2) \$364, (3) \$303, (4) \$202, (5) \$157, (6) \$108.

Reliable Iron Foundry—Bid on fittings itemized.

PASADENA, Los Angeles Co., Cal.—C. G. Claussen Co., 225 Folsom St., San Francisco, awarded contract by city directors at \$40,742.46 for 7680 ft. 24-in. Class C cast iron water pipe.

U. S. Cast Iron Pipe & Foundry Co. was awarded contract for 20,000 ft. 6-in. Class B pipe at \$12,000, and 10,000 ft. 12-in. Class B pipe at \$15,700.

Reliable Iron Foundry awarded contract for 33 tons of class D fittings at \$2805.

UPLAND, San Bernardino Co., Cal.—American Cast Iron Pipe Co. was awarded contract by the city council April 3, at \$45.6c ft. for 1000 ft. 4-in. cast iron pipe (250-lb. pressure) for the water department. Other bids were: Grinnell Co., 43c (class C, 215 lbs.); National Cast Iron Pipe Co., 46.5c (250-lb. pressure); U. S. Pipe & Foundry, 45.9c ft. (250-lb. pressure).

SANTA CLARA, Santa Clara Co., Cal.—American Cast Iron Pipe Co., Balboa Bldg., San Francisco, at \$1241.40 (immediate delivery) awarded contract by city trustees to furnish and deliver 2000 ft. 6-inch cast iron bell and spigot pipe. A. W. W. A., together with various fittings. Complete bid listing follows:

- National C. I. Pipe Co.
- American C. I. Pipe Co.
- Grinnell Co.
- Pacific States C. I. Pipe Co.
- U. S. Pipe & Foundry Co.

Contract awarded on the basis of "immediate delivery."

TULARE, Tulare Co., Calif.—Until April 17, 4:30 P. M., bids will be received by R. M. Berryhill, city manager to construct 3,700-ft. 6-in. and 8-in. water mains. Specifications obtainable from secretary of the Board of Public Utilities on deposit of \$5, returnable.

OAKLAND, Cal.—General Engineering & Drydock Co., Foot of 5th Ave., Oakland, at \$2215 submitted low bid to City Port Commission, for cast steel casing for 20-inch derrick pump. Complete bid listing, all bidders of Oakland, follows:

General Eng. & Drydock Co. \$2215
Moore Drydock Co. 2397
Pacific Coast Engineering Co. 2900

Taken under advisement.

SAN FRANCISCO—Board of Fire Commissioners seeks \$1,081,907 appropriation in next fiscal year budget to finance extensions to the high pressure water system.

PLAYGROUNDS & PARKS

SANTA ANA, Orange Co., Cal.—The county supervisors have under consideration a \$700,000 bond issue for the county's share in the proposed state park along the coast between Huntington Beach and Newport Beach.

SAN FRANCISCO—Until April 16, 12 noon, bids will be received by B. F. Lamb, Secretary, Park Commission, Park Lodge, Golden Gate Park, to resurface eight tennis courts in Golden Gate Park with not less than 1-inch standard bitumen. Certified check 10% payable to Board of Park Commissioners required with bid. Bond of 50% of contract price required of the successful bidder.

HEALDSBURG, Sonoma Co., Cal.—City Engineer Archer B. Stuart has completed plans for tennis court to be constructed on American Legion property in Center street. Construction of a playground and clubhouse is also contemplated.

REDDING, Shasta Co., Cal.—City Engineer Carl F. Mau preparing estimates of cost for draining, filling and fencing property in west Redding which Mark Firih proposes to offer city for use as a municipal playground.

BAKERSFIELD, Kern Co., Calif.—Dean and Stroble, Bakersfield, at \$2,765 awarded contract by city council to construct three tennis courts in Jastro Park. Weitzel & Larsen, Bakersfield, only other bidders, at \$2,954.

STREETS AND HIGHWAYS

SANTA CRUZ, Santa Cruz Co., Cal.—Until April 23, 3 P. M., bids will be received by H. E. Miller, county clerk to improve Section 1 of the Eureka Canyon Road, East Corralitos Road (approach to bridge), Section IV Green Valley road and Section I of the Carlton road, all in the Pajaro Road District. Certified check 10% required with bid. Plans obtainable from County Surveyor Lloyd Bowman on deposit of \$5, returnable.

TUOLUMNE & MARIPOSA COUNTIES, Cal.—Ed Hillard, Sacramento, submitted low bid to the district engineer, state highway department, Sacramento, at \$11,584.60 for highway work in Tuolumne and Mariposa counties, between Stevens Bar Bridge and Yosemite National Park, 42.9 miles. light fuel oil to be furnished and applied as dust layer.

HOLLISTER, San Benito Co., Cal.—City Engineer A. M. McCray completes specifications to pave 6 streets and 4 alleys with 5-in. concrete on a 4-in. gravel base at a cost of \$81,000. Streets to be improved are: South St. from San Benito St. to the eastern boundary of the city, five blocks. East St. from 3rd to Hawkins, 6 blocks. Hawkins St. from San Benito to Sally, 2 blocks. Third St. from San Benito to East, 1 block. Fifth St. from San Benito to Line, 2 blocks. Line St. from 4th to 5th, 1 block. Hawkins alley from Monterey to East, 2 blocks. Briggs alley from Monterey to East, 2 blocks. Wentz alley from Monterey to East, 2 blocks. Browns alley from Monterey to East, 2 blocks.

SANTA CRUZ, Santa Cruz Co., Cal.—Until April 23, 2:30 P. M., bids will be received by H. E. Miller, county clerk, to construct Section 2 of the Mount Hermon road in San Lorenzo Road District. Certified check 10% required with bid. Plans obtainable from County Surveyor Lloyd Bowman on deposit of \$5, returnable.

OAKLAND, Cal.—Lee J. Immel, 1035 Evelyn Ave., Berkeley, at \$5746 awarded contract by county supervisors to oil 6 miles of Vineyard road. Complete list of bids follows:
Lee J. Immel.....\$5746
Castle & Lee, San Leandro..... 5852
M. J. Bevanda, Stockton..... 6052
C. W. Wood, Stockton..... 6290

OAKLAND, Cal.—Lee J. Immel, 1035 Evelyn Ave., Berkeley, at \$9813.90 awarded contract by county supervisors to oil 6 1/4 miles of Vineyard Rd. Complete list of bids follows:
L. J. Immel, Berkeley.....\$ 9813
Castle & Lee, San Leandro..... 9871
M. J. Bevanda, Stockton..... 10,051
C. W. Wood, Stockton..... 9,748

REDWOOD CITY, San Mateo Co., Cal.—City council starts proceedings to improve Minnie and George streets and Maple St., from Main to Lathrop Sts., including a short stretch of Lathrop street; Chestnut St., bet. Stambaugh and Heller Sts., and Lexington Ave., bet. Iris St. and Oak Ave.

SAN MATEO, San Mateo Co., Cal.—Until April 21, bids will be received by city council to widen North B St. to a uniform width of 70 ft. between Baldwin Ave. and Tilton St. Plans on file in the office of city clerk.

SAN FRANCISCO—E. J. Treacy, Cal. Bldg., at \$4,322 submitted low bid to Board of Public Works to construct artificial stone sidewalks around Alia Plaza.

SAN FRANCISCO—Meyer Rosenberg, 12 Oak Grove Ave., at \$55,859 submitted low bid to Board of Public Works to improve Corbett Ave. bet. Clayton and 24th Sts., involving grading; conc. retaining walls; vit. clay pipe sewers; asph. conc. pave., etc. Next two low bidders were: Fay Imp. Co., Phelan Bldg., \$56,466; California Const. Co., Standard Oil Bldg., \$57,317.

SAN FRANCISCO—Until April 16, 12 noon, bids will be received by B. P. Lamb, Secretary, Park Commission, Park Lodge, Golden Gate Park, to resurface eight tennis courts in Golden Gate Park with not less than 1-inch standard bitumen. Certified check 10% payable to Board of Park Commissioners required with bid. Bond of 50% of contract price required of the successful bidder.

SAN JOSE, Santa Clara Co., Cal.—Until May 5, 11 A. M., bids will be received by Henry A. Pfister, county clerk, to improve Union Avenue in Supervisor District No. 5, and improve Silver Creek road in Supervisor District No. 2. Plans obtainable from County Surveyor Robert Chandler.

OFFICIAL PROPOSALS

DEPARTMENT OF PUBLIC WORKS

DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the State Highway Engineer, Public Works Building, Sacramento, California, until 2 o'clock P. M., on April 30, 1930, at which time they will be publicly opened and read, for construction in accordance with the specifications

therefor, to which special reference is made, of portions of State Highway, as follows:

Culosa County, between Williams and Maxwell (III-Col-7-B,C), about eight and three-tenths (8.3) miles in length, to be graded.

Culosa County, between Bear Creek and five miles west of Williams (III-Col-15-D-E), about twelve and seven-tenths (12.7) miles in length to be graded

Monterey County, a timber bridge across Alcer Creek (V-Non-56-A), consisting of sixteen 18-foot spans on frame bents with concrete pedestals.

San Diego County, between San Onofre and San Clemente (VII-SD-2-D), about nine-tenths (0.9) mile in length, to be graded and paved with Portland cement concrete.

Proposal forms will be issued to only those Contractors who have furnished verified statement of experience and financial condition in accordance with the provisions of Chapter 644, Statutes 1929, and whose statements so furnished are satisfactory to the Department of Public Works. Bids will not be accepted from a Contractor to whom a proposal form has not been issued by the Department of Public Works.

Plans may be seen and forms of proposal, bonds, contract and specifications may be obtained at the said office, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, and at the office of the District Engineer of the district in which the work is situated. The District Engineers' offices are located at Eureka, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the district office will be available to accompany prospective bidders for an inspection of the work herein contemplated and Contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Division of Highways. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the district office.

No bid will be received unless it is made on a blank form furnished by the State Highway Engineer. The special attention of prospective bidders is called to the "Proposal Requirements and Conditions" annexed to the blank form of proposal, for full directions as to bidding, etc.

The Department of Public Works reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.
DEPARTMENT OF PUBLIC WORKS,
DIVISION OF HIGHWAYS.

C. H. PURCELL,
State Highway Engineer.

Dated April 2, 1930.

LEGAL NOTICE

STATEMENT OF OWNERSHIP, MANAGEMENT, CIRCULATION, ETC., REQUIRED BY THE ACT OF CONGRESS OF AUGUST 24, 1912.

OF BUILDING & ENGINEERING NEWS, published weekly at San Francisco, California, for April 1, 1930, State of California, City and County of San Francisco, ss.

Before me, a Notary Public in and for the state and county aforesaid, personally appeared J. I. Stark and R. J. Rath, who, having been duly sworn according to law, depose and

SAYS that they are the owners of the BUILDING & ENGINEERING NEWS, and that the following is, to the best of their knowledge and belief, a true statement of the ownership, management (and if a daily paper, the circulation), etc., of the aforesaid publication for the date shown in the above caption, required by the Act of August 24, 1912, embodied in Section 411, Postal Laws and Regulations, printed on the reverse of this form, to wit:

1. That the names and addresses of the publisher, editor, managing editor, and business managers are:
 Publisher, Stark-Rath Printing & Publishing Co., 547 Mission St., San Francisco.
 Editor, J. P. Farrell, 1258 39th Ave., San Francisco.

Managing Editor, J. P. Farrell, 1258 39th Ave., San Francisco.
 Business Managers, R. J. Rath, 786 51st Ave., San Francisco, and J. I. Stark, 778 30th Ave., San Francisco.

2. That the owners are:
 R. J. Rath, 786 31st Ave., San Francisco.

J. I. Stark, 778 30th Ave., San Francisco.

A. R. Miller, 869 Trestle Glen Road, Oakland.

3. That the known bondholders, mortgagees, and other security holders owning or holding 1 per cent or more of total amount of bonds, mortgages, or securities are: none.

4. That the two paragraphs next above giving the names of the owners, stockholders, and security holders, if any, contain not only the list of stockholders and security holders as they appear upon the books of the company but also, in cases where the stockholder or security holder appears upon the books of the company as trustee or in any other fiduciary relation, the name of the person or corporation for whom such trustee is acting, is given; also that the said two paragraphs contain statements embracing affiant's full knowledge and belief as to the circumstances and conditions under which stockholders and security holders who do not appear upon the books of the company as trustees, hold stock and securities in a capacity other than that of a bona fide owner; and this affiant has no reason to believe that any other person, association, or corporation has any interest direct or indirect in the said stock, bonds, or other securities than as so stated by them.

STARK-RATH PTG. & PUB. CO., Publishers.

R. J. RATH, Secretary.
 Sworn to and subscribed before me this 31st day of March, 1930.

(SEAL) CHALMER MUNDAY,
 Notary Public in and for the City and County of San Francisco, State of California.

(My commission expires Oct 25, 1933)

STREETS AND HIGHWAYS

 Hanrahan Co., San Francisco 76,085

Bids taken under advisement, pending outcome of an injunction against the work filed by property owners.

CHICO, Butte Co., Cal.—Until April 15, 8:15 P. M., bids will be received by H. H. Hume, city clerk, to furnish and deliver 100,000 gallons of road oil. Certified check 10% required with bid. Specifications obtainable from Martin Polk, City engineer.

BUSINESS OPPORTUNITIES

SAN FRANCISCO.—Names and addresses of the individuals or firms concerned in these opportunities will be furnished on request to the Business Opportunity Department of Daily Pacific Builder, 545-547 Mission Street. Phore KEarny 1252.

D-3433—Sales Connection. Dayton, Ohio. Partner, handling sales, in substantial manufacturing concern at Dayton, Ohio, wants sales connection for other lines to sell in Ohio and Indiana. Already has excellent connections with best department stores. About two-thirds time available.

D-3434—Agency. Sausalito, Calif. Party interested in contacting eastern firm to represent as Pacific Coast representative. Desires exclusive agency.

D-3436—Distributor or manufacturers' Agent. Seattle, Wash. Firm anxious to secure distributor for combustion chamber and valve lubricator prefeasible leading hardware and automobile distributing companies.

D-3437—Wallpaper Removing Machine. South Bend, Ind. Manufacturers of a wallpaper removing machine are interested in securing manufacturers' agent or jobber in this territory to handle their machine.

D-3439—Distributor. Detroit, Mich. Company seeking to obtain a distributor in San Francisco for mechanical device for opening garage doors.

D-3440—Electrical Condensers. New York City. Manufacturers of electrical condensers used as part of radiators, electric motors used for interference elimination and power factor correction is interested in securing adequate sales representation in San Francisco.

19091—Hop Harvesting Machinery. Brussels, Belgium. Organization is seeking information regarding manufacturers of labor-saving machinery used in California in harvesting hop.

19092—Western Hemlock. San Francisco, Calif. A firm in the Netherlands is interested in making a connection with an exporter of western hemlock who is not already represented in the Dutch market.

19097—Laboratory Glassware. Schmiedefeld, Germany. Manufacturer of thermometers and laboratory glassware wishes representative.

19098—Machinery. Wiehe, Germany. Manufacturer of special machinery for making carbon paper and typewriter ribbons wishes connections.

20000—Distributor. New York, New York. Importer of a trademarked bathing preparation is seeking a man or woman to act as sole distributor in San Francisco.

20009—Crockery. San Juan, Porto Rico. Party wants to import Japanese & Chinese crockery, especially plates, cups and saucers, from local dealers in crockery.

20014—Representation. San Francisco, Calif. Party who is returning to the Orient in a few weeks wishes to communicate with firms that are interested in establishing their lines in the Oriental market. He is especially interested in chemicals, paints, glass and building hardware.

A "Pittsburg" Automatic Water Heater installed in the Home indicates high quality throughout.

Recommended and specified by all the leading architects, plumbers and builders.

Consider the high merit of the Pittsburg coupled with "Pittsburg Perfect Service."

"Hot water quick as a wink."

Pittsburg Water Heater Co.

Makers of "Pittsburg Automatic"—"Bungalow Automatic" Storage Systems and "Lyon" Tank Water Heaters.

Of The NEW
Daily Pacific Builder

The only daily construction newspaper affording complete coverage of the construction activities in Central and Northern California, featuring work contemplated, bids wanted, bids opened, contracts awarded, sub-bids wanted and sub-contracts let on all types of building construction, bridges, dams and harbor works, irrigation projects; machinery and equipment; water works and supplies business opportunities, building permits, building contracts, mechanics' liens, acceptances, etc., etc.

Keep informed on construction developments in Central and Northern California and the major projects in Southern California, the states of Oregon, Washington, Nevada and Arizona.

The new DAILY PACIFIC BUILDER will afford a service that serves—both in Quality and Quantity. You, as a member of the construction fraternity, should not be without it.

Subscription price \$1.50 per month, or \$15.00 a year, payable in advance.

APPROACH PLANS FOR G. G. BRIDGE APPROVED

Plans for approaches to the proposed Golden Gate bridge have been approved by the directors of the Golden Gate Bridge and Highway District. There will be two approaches to the bridge on the San Francisco side. They will be directly through the Presidio. One will connect with the Park-Presidio boulevard at Lake street; the other will connect with the Marina boulevard at Lyon street.

A series of underpasses and overpasses will be provided at all crossings in the Presidio.

On the Marin side one approach will travel 7390 feet through the Fort Baker reservation, following close to the crest of the hills and connecting with the Redwood highway about three miles north of Sausalito.

The second approach will follow along the present Fort Baker road from Sausalito. The laterals will be 60 feet wide with 8 foot shoulders.

The plans and specifications for these approaches must be submitted to the War Department for approval because they pass through military reservations. Joseph B. Strauss, chief engineer, is in Washington, D. C., and will present the plans to the War Department next week.

Strauss will also request permission to erect a toll house or toll houses and parking plazas at the ends of the bridge.

A request that an approach be constructed to connect with the Shore Line highway at Sausalito Beach, involving a 9½-mile roadway and costing \$750,000, was taken under advisement.

A committee consisting of Supervisor Fred Suhr of San Francisco and Casper Gardner, A. H. Upton and J. B. Platt, all of Marin county, requested this approach.

The directors appropriated "up to \$1000" for "a destination and point of origin" traffic survey to be made of trans-gate commuters by the State Railroad Commission.

PACIFIC COAST GETS N. E. L. A. INDUSTRIAL HEATING SCHOOL

Arrangements have been completed for holding the 1930 National Electric Light Association Industrial Heating School on the Pacific Coast this year rather than in Detroit or some other Eastern city, according to Electrical West. Because the N. E. L. A. convention will be held in San Francisco it will be possible to recruit a staff of instructors and lecturers for conducting the school from those who will come to the Pacific Coast to attend the convention.

The school will be held in two sections, the first in Los Angeles from June 2-11, inclusive, and the second in San Francisco on June 12 and 13. One of the features of the school will be a series of inspection trips to plants in this section where industrial heating installations have been made.

STOCKTON TO BUILD \$1,500,000 POWER PLANT

W. B. Hogan, city manager of Stockton, has filed application with the State Department of Public Works, Division of Water Rights, seeking a permit to divert water and develop power from the Calaveras River in Calaveras County for municipal purposes.

A plant costing \$1,500,000 and including a concrete dam, 1450 feet long and 144 feet high is contemplated. The proposed plant will develop 2550 horsepower, which is to be used for municipal light and power purposes. Two hundred cubic feet of water per second would be diverted from the river directly without storage and in addition a reservoir with a capacity of 65,500-acre feet would be constructed with a capacity of 163,000 acre feet. Work on the dam, which is part of a flood control project, was started last July and is to be completed within five years.

For a municipal water supply the city asks a permit to take fifty cubic feet per second from the river which will be carried through a forty-two inch pipe line 100,000 feet long to the city for distribution. Estimated quantities of water to be used by the city range from 18,000,000 gallons per day this year to 61,600,000 gallons per day in 1960.

Architects' Association To Publish Contract Documents

Publication of contract documents applicable to the state of California are assured by action taken at the semi-annual meeting of the executive board, Northern and Southern Sections, State Association of California Architects, held last week in Los Angeles.

The special committee composed of Lester W. Hurd, Edwin Bergstrom and Myron Hunt reported that an agreement had been made between the State Association of California Architects and the American Institute of Architects, whereby the latter would undertake to publish a set of contract documents applicable to the state of California. The agreement between the State Association and the Institute was approved by the board. An attorney will be employed and arrangements will be made at once to commence the preparation of these documents which, it is felt, will be of valuable assistance to the architects and building contractors profession of this state.

The chairmen of the various standing committees reported that the activities assigned to their respective committees were being carried out and they all hoped to have a very complete report ready for the convention to be held in Del Monte, October 10 and 11.

WALL PAPER INDUSTRY STAGING A COMEBACK

The wallpaper industry, already showing an annual business volume of well over \$250 millions, is developing a very definite upward trend, according to The Business Week.

Orders for 23,161,000 more rolls were received during the 6 months ending March 1 than in the corresponding period of the previous year, and production increased 10,761,000 rolls. A slight increase in price was obtained. This favorable showing is largely credited to the use of a certification of quality label adopted by the Wallpaper Association of the United States and printed on the back of each roll. Legally approved in August, 1929, the label has already been adopted by all but three or four manufacturers.

Attention of the consumer has been attracted to the new range of modernized wallpaper patterns by the judicious use of an advertising appropriation of \$250,000, and an additional \$100,000 for educational purposes.

"The vogue of the painted wall put the American industry far behind the industries of France and Great Britain, both in volume and in artistic merit," said E. D. Belknap, executive vice-president of the Wallpaper Association. "We're staging a comeback. We're putting style and quality into the product. The new guarantee label has restored confidence. To some extent, the evils of the trade, as much as the painted walls, hurt the industry. Lack of new designs, poor quality of paper stock, colors that faded, hurt the industry. Since August 4, 1929, it has cost the industry hundreds of thousands of dollars to replace the fadeable patterns with permanent colors, but fully 90% of the wallpapers now pass the test and obtain the right to use the new label.

"At the start, dealers refused to carry the papers guaranteed for two years on the wall. They wanted quick replacement merchandise, consequently they lost their public. Now, however, most of them are glad to pay a slight increase for the better quality papers, with no increase to the consumer. Between smarter patterns and guaranteed colors, the dealer is regaining his public."

Patterns specially designed to match architecture are a feature of the new wallpaper campaign.

Promotion plans of the industry include advertisements in half a dozen popular magazines, a tour of the country by cooperative field agents, who will spread educational propaganda among dealers, architects, and decorators.

A certificate of the increase of capital stock of the Homer T. Hayward Lumber Company has been filed at Santa Cruz. The increase will be from \$250,000 to \$500,000, divided into 5000 shares. The assent was given by the stockholders, Homer T. Hayward, Mrs. Maud A. Hayward, Arthur C. Hayward, C. H. Griffen, Jr., and Mrs. C.

MAKE CONSTRUCTION ALLURING TO YOUTH SEEKING START IN LIFE

Seven general contractors at the convention of the California State Builders' Exchange at Long Beach said they had no mechanics in their employ under 30 years of age. One contractor estimated the average age of skilled workers in the building trades at 55 years. These statements may represent an extreme of the situation in the building crafts, but they indicate the seriousness of the problem with which the construction industry will sooner or later have to cope. The building trades evidently are no longer attractive to the average youth. Most boys with a mechanical bent want to be electricians or automobile mechanics. Too many aspire to white collar jobs, the contractors complain.

What can be done to make the building trades more alluring to ambitious youth? That is a question that must be taken up and considered seriously at no distant day. Machinery has solved the labor problem in some industries. But there are many things which cannot be done by machines, even though they may appear to operate with almost human intelligence; and this is particularly true in the construction industry. Human understanding and judgment are essential as well as mechanical skill. Welding a trowel, a hammer or saw may appear to be simple task. But without brains to direct their use, these may be made implements of waste or destruction as well as construction.

At one time the apprenticeship system served to keep the ranks of all skilled trades filled. The trade was handed down from father to son and the apprentice was content to receive the cost of his keep. But boys are no longer satisfied with meager wages that apprentices formerly received and contractors are loath to pay what they consider more than apprentice services are worth. Besides construction as a rule does not offer continuity of employment to the extent that prevails in some other industries, and it offers no sinecures.

The present is far more important to the average boy today than the future. What his father did is no precept for him. He sees what he thinks and believes to be shorter cuts to lucrative employment. And it is a common and not an unnatural failing for the father to wish his son a better lot than has fallen to him. So the youth is encouraged in his desire to seek another vocation and particularly one that promises quicker and more attractive rewards. But he generally finds that wherever his energies are directed his progress is measured by his ability to take advantage of his opportunities and that there is no primrose path to success.

Analyzing the problem of thinning ranks in the building trades it is difficult to absolve those engaged in the construction industry from a certain responsibility for it. Too many contractors lack the faith which they should have in their own business. They complain of their inability to get ahead. Too many are struggling to make a mere living in it, they are prone to say, and there are no opportunities within the range of their vision. The more they talk and think about it the worse it looks to them and they spread pessimism and gloom. Finally they are firmly convinced that if they had gone into some other business and worked half as hard and put in half as much time they would have been much better off, if, indeed,

The matter of training apprentices in the construction industry is a problem for consideration in every section of the country. In addition to institutions which charge a fee for preliminary training in the construction trades, many schools have been established in various parts of the United States by union labor organizations, by Builders' Exchanges and other associations having a direct connection with the construction industry.

The training of apprentices is a serious problem. A thorough system of training first class mechanics, undoubtedly, remains to be worked out.

What can be done to make the building trades more alluring to ambitious youth?

The problem is discussed by Southwest Builder and Contractor (Los Angeles) in the accompanying article.—Editor.

they had not made a real success.

If those engaged in the contracting business have no faith in it and are constantly harping on the difficulties which beset it and the lack of opportunities, how can they expect ambitious boys looking about for a start in life to think well of it? Why should a boy be asked to even consider a vocation in which there is no hope for him to progress? And why should he waste the days when he should be laying the foundation for better things to come without any immediate adequate compensation, to say nothing of the future?

As a matter of fact, there is no better or more honorable field of endeavor than construction. Everyone that lays a hand to it is contributing to the welfare of his fellowmen, adding to the wealth of his country and creating monuments to his industry and skill. Conditions in the construction industry are far from being ideal, or even what those most easily satisfied could wish them to be. But this industry has no monopoly on the ills that those engaged in it most complain of—irresponsible and dishonest competition, unfair treatment, price cutting and lack of opportunities. These ills belong to most, if not all, other industries in greater or less degree. And those engaged in any one of the other industries probably consider they are not as well off as those engaged in construction.

We sometimes wonder if contractors take their business as seriously as they should. It's an old, old gag that no one ever gets a contract except by making a mistake in his bid. But does the contractor really feel that way about it? Does he honestly believe his business is only a gamble, as he is so fond of saying? If he doesn't consider that his estimate is sometimes right when he gets a job and that his knowledge, experience and skill are important in his business, does he have the right mental attitude toward it?

When those engaged in construction begin to show a little more faith in their business, talk less of their individual troubles and make more of their opportunities—yes, and sacrifice a little more for the common weal—then they will be on their way to make construction alluring to the youth looking about to get a start in life. And right there is where the re-

sponsibility of contractors lies in meeting the problem of thinning ranks in the building trades. Vocational education and apprentice schools, no matter how good they may be, will avail little in the solution of the problem, unless the boy seeking a trade can be convinced that construction is at least on a par with other industries in its present and future opportunities.

EASTERN DIAMOND ADVISES ON G. G. BRIDGE PROJECT

Editorial in Engineering News-Record

Completion of test borings and other preliminaries for the proposed Golden Gate bridge has at last made available the data required for locating the piers and definitely estimating the cost of a structure having the unprecedented span of 4200 ft. Opposition from taxpayers who objected to the financing plan has been fought through the courts and finally decided by the federal Supreme Court in favor of proponents of the bridge. There remains the major problem of raising the money with which to build the bridge. Voters of the Bridge and Highway District—which includes six counties but places 85 per cent of the total assessment in San Francisco—are to be asked, probably late next summer, to approve a bond issue of \$30,000,000 for construction costs. Toll revenue from automobile traffic is expected to pay operating costs and refund the first cost. Engineers are interested quite as much in the financing program as in the technical phases of the project, and since their opinions have influence on popular voting in matters of this kind, it would be good strategy on the part of proponents of the Golden Gate bridge to find means of making sure that the project is presented in the right light to the local engineers. Two years ago an adverse attitude existed among San Francisco engineers, and such an attitude would not be helpful in a major bond issue campaign that requires a two-third vote. In its technical aspects the project is distinguished by proposing the first long-span bridge in proximity to an active earthquake rift. Its location is roughly parallel to and about six miles from the San Andreas fault, whose movement caused the destructive San Francisco earthquake of 1906. Such a condition obviously raises the most interesting question as to tower stiffening and as to the effect of a major shake on towers, cables and suspended structure. As to costs, men of excellent repute in the bridge-building field say that a suspension bridge can be built as planned within the over-all cost estimate of \$30,000,000, a surprisingly low figure. Larger sums are spent on many public projects with less argument and litigation than have attended this one. Hence detail questions of cost are less important now than diplomacy and the cultivation of the right public attitude toward the project.

Painters' Union of Hanford, Calif., comprising 25 members, has voted to adopt the five-day week schedule. The short week will go into effect at once and will not involve any increase in wages.

400,000 HOMES ANNUALLY HELD OF U. S. SAYS CONFERENCE CHIEF

Need of more and better homes, 400,000 of which will have to be built annually if we are to keep pace with population growth and the present standard of living, is stressed in a discussion of construction as "the balance wheel of industry," by Edward Eyre Hunt, secretary of the President's Conference on Unemployment, in a summary of recent economic changes in the United States which has just been issued under the title "An Audit of America."

In the four years before we entered the World War there was an average construction of 209 square feet per person added to the population," observes Mr. Hunt. "The post-war boom not only wiped out any shortage created by the war but raised the average to nearly 221 square feet. The next two years showed a low construction record, but beginning with 1923, persistent upward movement began, and by the end of 1927 the average residential construction per person added to the population was more than 236 square feet."

"The volume of construction during the war and immediately afterward apparently was not seriously below normal requirements."

"If we take 1916 as showing neither a deficiency or a surplus, the accumu-

lation above normal requirements reached 1,411,000,000 square feet of floor area in 1927, enough at the present rate of 220 square feet per person, to accommodate a surplus in population of about 6,400,000. But that does not mean an oversupply since much of the old type of housing has become obsolete and standards are constantly advancing."

Mr. Hunt's summary is based on the facts contained in a report and survey issued last spring in which the need of 400,000 additional homes annually, and the demand for better homes were emphasized. The desire of families to live in more satisfactory surroundings was found to be the force behind the large home-building program.

The survey was conducted by the National Bureau of Economic Research and dealt with the whole economic situation in the United States during the post-war period. In his summary, Mr. Hunt refers to the National Bureau's survey as "a description of the levels on which the American people live." The survey with an interpretive report was made public by the Commerce Department. Economic changes of which President Hoover was chairman when he was Secretary of Commerce.

ESSENTIAL POINTS ARE CITED FOR WIDENING HOME OWNERSHIP

The establishment of the first committee ever to represent and act for all groups included in the nation's building industries will be an important result of the recent Chicago meeting of the National Building Survey Conference. A resolution passed at the conference authorized the appointment of a small committee of key men in the building industries who will take under consideration the naming of a larger committee, whose membership will constitute a true cross-section representative of all of the many interests which go to make up the building industry. This committee will have the power to act on the various matters brought before the National Building Survey Conference.

Out of the conference likewise came a clearly defined statement of the four major problems which must be solved to facilitate home ownership for the man of moderate means.

Backs Prudent New Building and Modernizing

The conference went on record as backing prudent new building and modernizing and as encouraging the release of money for mortgage investments.

The four points essential to the widening of home ownership, as brought before the meeting by the National Association of Real Estate Boards, were cited by Julius Barnes, chairman of the United States Chamber of Commerce and of the National Business Survey Conference, as eminently practical suggestions toward the successful progress of the nationwide movement to promote construction, now being advocated by President Hoover.

These suggestions, included in the address made by Leonard P. Reaume, Detroit, president of the National Association of Real Estate Boards, constituted a plea that the country's leaders in the construction and building industries should approach in a laboratory and research spirit the following four problems which face build-

ing and allied interests in this country today: (1) taxation; (2) the economic cost of land; (3) financial costs for homes, and (4) some method of economic standardization of building processes.

"At present 80 to 90 per cent of the local tax burden is borne by real property. Probably about 20 per cent of the expenditures of local governments are of direct benefit to real estate. This situation penalizes the home owner."

Suggests Changes in Junior Financing Laws

As a way of lowering the buyer's costs of home financing, Reaume stated that help might be looked for from the removal of certain restrictive laws which now exist in many states with respect to junior financing. Reaume announced that the United States Department of Commerce, recognizing this situation, has stated its willingness to start, with the National Association of Real Estate Boards, an investigation of such laws and how they could be changed in order to facilitate the flow of capital into the junior financing field.

E. J. Russell, St. Louis, a director of the American Institute of Architects, told the conference delegates that architects for the past two months have been feeling a renewed building activity which will soon express itself in terms of building permits. Lower cost levels prevailing in building materials account for this recent activity, according to Russell, who predicted that the building plans for which architects are making preliminary sketches will materialize and reflect on the building industry in all its branches within seven or eight months. Speaking as a representative of the country's architects, Russell reported that plans now in progress include all class of structures.

Hale Tells of Building and Loan Activities

Ernest Hale, Boston, president of the United States League of Building

and Loan Associations, outlined for the conference the activities of building and loan associations throughout the country. Hale brought out the fact that one-seventh of the population of the United States are now housed in structures financed through building and loan associations.

Fenton B. Turck Jr., New York City, chairman of the National Building Survey Conference, presided at the Chicago meeting. Turck reported a rapid flow of funds back into the real estate mortgage field. "This trend has been particularly noticeable in the last two weeks," he said. "Savings banks now have money flowing back into them. We are experiencing a return of interest rates to the classic six per cent. On March 21, \$200,000,000 was withdrawn from the call money market in New York by a group of small city bankers. This is an indication of the return of money to local centers."

Dr. Hugh Baker, head of the department of trade associations of the United States Chamber of Commerce, addressed the conference on the necessity for organized effort on the part of the building industries.

In speaking of the work which the conference committee representing building industries will be able to accomplish, Julius Barnes expressed his belief that results could be far reaching. "Such a committee can work toward again making home ownership the prime interest in the life of the man of average means, so that this interest will be placed before short lived luxuries in expenditures of income," Mr. Barnes said. "The purpose of your committee should be a unified direction of all industries concerned in the whole business of building."

S. F. MAN NAMED MEMBER OF IRRIGATION AID BOARD

Charles E. McLean, San Francisco banker, has been named a member of an irrigation-reclamation financing commission appointed by Governor C. C. Young. The committee is expected to help stabilize irrigation and reclamation projects affecting the Sacramento, San Joaquin and Imperial valleys. The board will report to the next legislature.

Others named are: Will C. Wood, state bank superintendent; Attorney General U. S. Webb and State Engineer Edward Hyatt, Jr., all members of the irrigation bonds certification committee; Charles L. Childers, for many years attorney for the Imperial irrigation district; W. P. Jeffries, Los Angeles broker, and Fred W. Kiesel, Sacramento banker.

Arco Co., Cleveland, Ohio, will build at Los Angeles, three brick buildings totaling 16,500 sq. ft. of floor space to house a paint manufacturing plant, a lacquer plant and varnish plant. The new factory will be known as the Arco Company Ltd., of California, and will be under the general direction of Howard Wise. Howard Raeney will be general sales manager, and E. B. Hagar, who has been manager of the San Francisco branch, will be made district manager with headquarters in Los Angeles.

Construction that will involve an expenditure of \$4,500,000 will be undertaken at the Trona, San Bernardino county plant of the American Potash and Chemical Corp., according to word from Philadelphia, headquarters of that concern. The contract for construction is said to have been awarded to the United Engineers and Constructors, Inc., of Philadelphia. The Trona plant is located just over the line from Kern in San Bernardino county.

THE OBSERVER

WHAT HE HEARS AND SEES ON HIS ROUNDS

"During 1930 the building and loan associations of the country will be of tremendous assistance in bringing about more stabilized financial conditions, due to the conservative manner in which they are handling the savings of more than 12,000,000 of the citizens of the United States, for the people of this country are turning again to the old investment standards and are giving more consideration and thought to the essentials of safety and availability of their funds and the worthwhileness of the interest return," says J. M. Abbott, president of the California Building-Loan League.

"The first essential, that of safety of the money saved or invested, is of greatest importance, and the record of building and loan associations of the country is notable in this regard. The percentage of loss to the total resources of 1928, the last available figures, being .0071 per cent, an infinitesimal amount in comparison with the total resources of over \$8,000,000 entrusted to these institutions. The second essential, that of availability of money invested, has always been an outstanding feature of this type of investment, while the third essential of a worth while interest rate is a continuing inducement for people to save and invest in these associations.

"The security of the associations, their investments being based to a great extent on mortgage loans, is one of the best to be found anywhere and the borrower on such security has an exceptional form of mortgage, in that he is sure of the permanence of his loan, subject to his ability to meet the small amortization payments, making this form of home financing mortgage the most attractive to be found and of very real help in acquiring a home.

"With over 90 per cent of their total resources invested in mortgage loans on dwelling properties, the building and loan associations of the United States will continue to be of great assistance in furnishing funds to those seeking to build or buy homes of their own, and the attractiveness for the investment of funds of the shares of these associations will continue to draw more and more funds to these institutions as the great benefits of this form of saving and investment and home owning plan becomes better known."

The rapid progress being made in the establishment of local credit bureaus as part of the plan of the Associated General Contractors of America for the stabilization of credit in the construction industry will be a major subject for discussion at the executive board meeting of that organization in Washington, April 28. The loose credit practices that have hitherto prevailed are held by contractors to be largely responsible for the occasional rendering of inadequate construction service to owners and for the enforcement of double payments from owners under existing lien laws.

Frozen, uncollectable and past due accounts that have resulted from loose credit policies are estimated by the contractors' association to run well over \$200,000,000 annually and are considered to be one of the factors contributing to unsatisfactory conditions in both the construction industry and in general business.

The move of general contractors to stabilize credit is said to be receiving the enthusiastic support of organized building supply dealers, subcontractors, surety companies, financial institutions and other groups and is represented as being the first time in history that a group of buyers has proposed that more stringent credit terms be established.

In carrying out the plan contractors and supply houses join together in establishing standard credit terms. Regular monthly reports are submitted to a local credit bureau by all selling groups and delinquent accounts are consolidated and made available to all supply dealers connected with the bureau.

Among the cities reported as having most recently adopted this procedure in an effort to correct unsatisfactory conditions in construction, are: Milwaukee, Wis., Chicago, Ill., Grand Rapids, Mich., and Cincinnati, Ohio. Altogether some 45 cities are engaged in launching the credit stabilization plan which is expected to be effective throughout the country within another year.

The building industry in New Jersey is at a standstill as a result of an "uncontrolled epidemic" of cheap construction, C. V. R. Bogert of Hackensack, president of the New Jersey Chapter of the American Institute of Architects, declares in a statement urging the enactment of a law practically limiting the practice of architecture to registered architects.

Proposed legislation now pending in the New Jersey Assembly provides for the seal of a registered architect on all plans and specifications, excepting those for buildings or alterations costing \$5,000 or less, and structures directly connected with engineering work such as waterworks, power, heating, and sewage disposal plants. In referring to building conditions, C. V. R. Bogert says:

"The present conditions prove that building is a technical science and the public should be protected against its manipulation by unscrupulous persons. It is only natural that the building industry should now be retarded by the refusal of financial institutions to loan sufficient funds to allow building operations to be undertaken.

"Their confidence in this form of investment has been shattered. The only hope of restoring confidence and putting this important industry on a sound and lasting basis is to insist on proper plans and specifications for every building operation."

The general business outlook, according to the latest report of the Sieberling Research Corporation of Berkeley, is more promising for the western and southern districts of the United States than for most other sections. The studies of this service

have revealed that the business recession in many parts of the West and South was under way some months before it appeared in the industrial and manufacturing centers. The opinion is expressed that in those areas where the bottom has now been reached the outlook favors gradual recovery to a normal condition. Particularly is this true in the Twelfth Federal Reserve Dist., which includes California.

HERE — THERE — EVERYWHERE

Approximately 6000 students have been enrolled and are now taking the correspondence course in General Illumination being conducted by the Westinghouse Lighting Institute, Grand Central Palace, New York City, which has been made available without cost, to those interested in lighting.

Formation of the San Jose Contractors' Association to foster a movement to have all building done by home contractors, is announced by W. L. Howe, executive secretary of the Santa Clara County Builders' Exchange. A direct appeal is made to merchants to give preference to local contractors.

Validity of the city ordinances of Oceanside requiring contractors and subcontractors to take out a license and post a bond of \$1000 was upheld by the superior court of San Diego which sustained the building inspector of Oceanside in refusing to issue a building permit to E. L. Forney, who declined to comply with the license law.

New officers of the Los Angeles Hood Club are R. S. Osgood, Wheeler-Osgood Co., president; C. S. Estes, Los Angeles Wholesale Lumber Association, vice-president; J. E. Martin, California Lumber Merchant, secretary-treasurer. Carl D. Shufelt of the E. K. Wood Lumber Co. is the new vicegerent snark of Los Angeles district.

Highly satisfactory results have been obtained by the Paraffine Companies, Inc., in financing home owners in the matter of repairs, according to R. S. Shainwald, president of the company. This financing is done through the Residential Finance Company, a subsidiary conceived by Shainwald and his associated three years ago. The plan recently has been copied by eastern industrial corporations.

Plumbers of San Leandro seek revision of existing ordinances to place plumbing requirements on the same standards as are now in effect in larger cities. Requested changes include examinations for both master and journeyman plumbers, rigid gas inspection service and uniform regulations governing bonding of all contract jobs.

The Plumbing and Heating Industries Bureau with headquarters at Chicago, is assembling building code and plumbing code data on the principal cities of the United States for local governments interested in formulating new codes or revising existing ones. The uniform code of the Pacific Coast Building Officials' Conference will be used in connection with the work.

E. H. Galpin has been elected secretary-manager of the Industrial Association of Santa Clara County. Galpin succeeds the late W. A. Edwards as association executive. For six years he was manager of the Tilden Lumber & Mill Company, and for the last two years has been secretary of the Peninsula Lumbermen's Club with headquarters in Palo Alto. The Industrial Association of Santa Clara county was formed eight years ago for the purpose of promoting the American plan in industry.

TRADE NOTES

Floyd Helvie, formerly a member of the firm of Helvie & Hughes, has been appointed manager of the roofing and tile departments of the Bush Roofing Company at San Jose.

Little River Redwood Lumber Co. of Madera, has acquired a site at Chowchilla, Madera county, and will operate a branch yard. The site is 150 by 300-feet and is served by the Southern Pacific Railroad.

Oakland offices of the Redwood Manufacturing Company have been moved from 950 Aileen street to the ground floor of the Builders' Exchange Building, 354 Hobart Street.

Jos. E. Stevens Company, retail and wholesale dealers in paints, varnishes, lacquers and brushes, is occupying new and larger quarters at 2115 Broadway, Oakland. The concern was formerly located at 2031 Broadway.

J. W. Rice, said to represent manufacturing interests of Cleveland, Ohio, has purchased from the Pacific Alloy & Steel Company, a tract of 55 acres at Bay Point, Contra Costa County, and will establish a plant for the manufacture of porcelain and tile.

Pan Pacific Piling and Construction Company, operating a concrete pile manufacturing plant in Richmond, proposes to enter the concrete pipe field. The Richmond plant would supply the Northern California district while a plant in Los Angeles would serve the Southern section.

Roy M. Butcher of San Jose and Clarence A. Rylander of San Francisco have purchased the electrical business of Wagner Bros. at 53 South Second St., San Jose, and will operate under the name of Mission Electric Company. The new owners will carry a complete electrical line.

John Paglierio, former executive of the San Pablo Pottery Company and now operating the Technical Porcelain Works in Albany, Alameda County, announces plans to erect an industrial and domestic tile manufacturing plant in El Cerrito, Contra Costa County. A site with a 75 ft. frontage has been purchased for the plant which will represent an expenditure of \$20,000 including equipment.

G. W. Williams Co., Ltd., of Burlingame, has been organized with a capital set-up of 10,000 preferred and 10,000 common shares, all of no par value, to conduct a contracting and building business. The company has been authorized by the corporation commission to issue 5016 common shares to George W. Williams, president, in exchange for the business and assets; 2000 preferred and 2000 common shares at \$25 to the public and 1000 common shares for conversion when offered for preferred in the ratio of two preferred for one of common.

Building permits issued in March in 583 leading cities of the country showed a gain of 46 per cent over February, S. W. Straus & Co. reports. March permits totaled \$187,270,891 in value, and February \$128,043,217. The normal seasonal increase from February to March is 37 per cent.

ALONG THE LINE

Truscon Steel Company, Youngstown, Ohio, announces the appointment of Oscar W. Loew as a vice-president of the company.

The body of Charles A. Wagner, 39, San Francisco civil engineer, was found in a canyon in San Mateo county last Tuesday with a shot through his temple and revolver clutched in one hand. It is said he worried over financial difficulties. His wife and three children survive.

Claude M. Thompson, 48, partner in the firm of Thompson Brothers, paying contractors of Fresno and Santa Cruz, died at the Merritt Hospital in Oakland April 10. Thompson had been in failing health for the past year and discontinued active work last January. He was a native of Fresno.

Jason C. McCune, for the last three years connected with the trade extension and statistical departments of the West Coast Lumber Association at Seattle, is now attached to the Los Angeles office, 910 Architects' Bldg., and will assist lumber dealers in the south in promoting wider markets for use of west coast woods.

W. A. Pickering, president of the Pickering Lumber Company, operating plants in Tuolumne County and other sections of the United States, died in Kansas City April 15. Death was due to an internal hemorrhage.

Among Pickering's vast holdings are the plants in Tuolumne County, Altura and McDowell, in the northern part of the state, in Pickering, La., and Kansas City.

Members of the Fresno city council, due to a tie vote, are unable to select a city engineer to fill the vacancy caused by the resignation of A. M. Jensen, who entered private practice in San Francisco. C. C. Van Valkenburgh, Jr., and Jean L. Vincenz are the engineers seeking the position which brought about the tie vote.

Olof Anderson and Edgar C. Smith, the latter a deputy county surveyor, also seek appointment to the position.

Skyscrapers have become economic necessities in the cities of North America. Their growth and development constitutes an important part of the "Fact Book" just being issued by the American Institute of Steel Construction. In this volume, which represents an enlargement and modification of the report issued last year for the first time, will be found the most authentic list of tall buildings ever assembled. They include all the important buildings in all of the larger cities of the continent. Area, volume, and all the other important dimensions as well as height, are included in the survey of skyscrapers. The "Fact Book" also includes a directory of the steel constructors of North America, statistical record of the industry, bibliography, motion pictures, stereopticon slides and innumerable other handy facts of interest.

The American Institute of Architects announces the award of the Le Grun scholarship for 1930 to Joseph B. Wertz, of Durham, N. C. First honorable mention went to Richard J. Pearce, of Seattle, Washington.

Kawneer and Zouri

Complete Consolidation

Through an exchange of stock, based upon average earnings of each company during the past five years, an affiliation has been consummated between the Kawneer Company, of Niles, Michigan, and the Zouri Drawn Metals Company, of Chicago Heights, Illinois, it is announced by Charles M. Boynton, vice-president of the Kawneer Manufacturing Company of California, with headquarters at Berkeley.

No additional financing is contemplated as a result of this affiliation since neither company has any funded indebtedness. After giving effect to the affiliation, the capital structure will be solely represented by non par value stock of the Kawneer Company.

The combined resources will permit greater research in design and engineering with consequent improvement in marketing and production facilities.

There are no changes contemplated in the management or policies of either company. The Zouri Company will retain its own identity and continue to operate its plant in Chicago Heights, Illinois, and Mr. Lowell Chapin as President of the Zouri Company will be in charge. In addition the Messrs. Lowell and Henry Chapin will become directors of the Kawneer Company. The Kawneer Company will be represented on the board of the Zouri Company.

Business connections with either company will experience no disturbance in their contractual relations.

Unfilled Steel Orders

Show Increase in March

Unfilled tonnage orders of the United States Steel Corporation on March 31 showed an increase of 90,905 tons over the February 28 total.

Unfilled orders at the end of last month aggregated 4,570,653 tons against 4,479,748 on February 28, and 4,467,710 on January 31. The total for March 31, 1929, was 4,410,718 tons.

This moderate increase in tonnage was a pleasing surprise to Wall street, for in view of the rather slack demand in the earlier part of March little change had been expected and most forecasts indicated that slight decline was likely.

The steel corporation's back log of unfilled orders is now the largest since February of 1926. The total of 4,410,718 tons at the end of March, 1929, set a new high record for last year.

The present high tonnage, however, is due in a large measure to curtailed operations. The company's current operations are around 80 per cent of rated capacity, against 93 per cent at this time last year.

Rates on carload shipments of cement from Monolith, Cal., to Nevada and Utah points were called unreasonable and discriminatory by witnesses testifying last Wednesday in Los Angeles before Interstate Commerce Commission Examiner Witter. The hearing is on the application of the Monolith Portland Cement Company, which seeks relief from existing rates. Witnesses for the company asserted that rates of the Santa Fe, Southern Pacific and Los Angeles & Salt Lake railways, from Monolith into Utah and Nevada, are higher than similar carload rates of the same roads from Los Angeles and Colton.

PERFORMANCE RECORDS OF CONTRACTORS BEING LISTED

The encouraging manner in which public officials, architects, engineers, banks, manufacturers, dealers and surety companies throughout the country are co-operating with organized contractors in the effort to list the performance records of every contractor in the United States will be featured at the forthcoming Executive Board Meeting of the Associated General Contractors of America at Washington, D. C., April 28.

Through the efforts of the contractor's association and organized surety companies the Bureau of Contract Information, Inc., was formed last August in Washington, D. C., to investigate and establish the facts about the performance of contractors. The wholehearted co-operation which the other groups in the industry have given in this program is revealed by a recent study of the work of the bureau.

To date 2500 performance records and statements of contracts on hand have been secured from as many contractors throughout the United States. The investigation of the performance records of contracting concerns by the Bureau of Contract Information, Inc., is based upon the individual contracts performed rather than on a general investigation which would permit the omission from the record of such contracts as might develop derogatory information.

It has been found that from 40 to 50 verification inquiries must be made in checking up each performance record. To date more than 75,000 such inquiries have been mailed concerning 1897 of the first contracting concerns on which data has been secured.

From this number of verification inquiries, data has already been received from public officials, engineers and architects concerning 17,934 construction projects. Financial institutions have reported concerning 5371 projects. Manufacturers and distributors of materials and equipment have reported on their experiences with the contractors on 15,392 projects and surety companies have replied to 5572 inquiries although appealed to more recently.

Through such co-operative effort the construction industry aims to definitely establish and make available the facts concerning the degree of responsibility of all contractors in the country. This move is seen as a most important step in the program of the Associated General Contractors of America for the elimination of the conditions which have hitherto encouraged irresponsibility in construction.

CALIFORNIA ART TILE TO EXPAND ACTIVITIES

Coinciding with completion of the first quarter's business, California Art Tile Corporation has announced the resumption of active service with the company of J. W. Hislop, veteran clay-craft engineer and designer, who will bring out under the company's trade name a full new line of quarry, or floor tile. Production will commence at an early date.

At the present time, S. R. Coffee, sales manager, is in the East arranging for greater facilities for distribution of the company's products in the Middle West and in the southern States. Substantial orders are reported from the Southern California, Arizona and Northern Mexico districts, where a new distributor has been ap-

STEEL MANUFACTURERS WILL UNDERTAKE ADVERTISING

A merger of trade associations, representing more than 80 per cent of the hot and cold rolled sheet and strip production of the country and embracing 32 individual contributors, will undertake a new, broad advertising and trade extension program under the name of the Trade Research Division of the National Association of Flat Rolled Steel Manufacturers. The merger includes the National Association of Sheet and Tin Plate Manufacturers, the Hot Rolled Strip Steel Institute and the Cold Rolled Strip Steel Institute.

While the actual merger of these associations took place more than a year ago, it was not until January of this year that the trade extension work, heretofore conducted only by the sheet manufacturers, was broadened to include both hot and cold rolled strips.

More than 5,000 different products, ranging from carpet tacks, spectacle cases and tips on shoe laces, to household furniture, Pullman cars and standardized buildings are made of hot and cold rolled sheets and strips. It is this portion of the steel industry, with its wide and complex popular appeal, that is now engaged in a nation-wide educational effort, planned to make the public favorably conscious of the part flat rolled steel plays in present-day life; how civilization, as we know it, would be impossible without steel; and how this same civilization can be improved by a still wider use and new applications of what has been termed "the Universal Metal."

MAINTAIN BUSINESS PRESTIGE BY NOT CUTTING RATES

The most interesting part about price maintenance which provides a profit sufficient to keep up your interest in your business, is that such sales are as easily made as those at cut prices, where profits are sacrificed. Naturally when you purchase a bill of goods, you price them with the thought in mind that a certain sum will be realized on your investment. This is the only way you can stay in business. If you cut prices later on to secure an order, you are really fooling only yourself, and undermining your business prestige. Put a fair margin of profit on your merchandise, set the price and stick to it. When a sale is made you will also establish a reputation for good business ethics. A fair margin of profit is your due and there isn't a prospective customer in your community who begrudges you that profit. If you cut prices once; you will have to cut again and again. Prices need only to be right to get the business.—(Western Canada Contractor).

CONTRACTS FOR 16-MILE PIPE LINE ARE AWARDED

The California-Hawaiian Sugar Refining Corporation has let three contracts in connection with the 16-mile pipe line from the Suscol wells south of Napa to the Crockett refinery. It is expected the work will be completed within 175 days.

The pipe contract has been let to the United States Pipe & Foundry Company and involves 80,000 feet of 20-inch cast iron pipe totaling 6400 tons.

James Currie of Burlingame has been awarded the contract to lay the pipe, exclusive of two 15-inch lines to be placed by Duncanson-Harrelson Company of San Francisco. The latter lines will be suspended from the Carquinez Straits bridge.

CEMENT MILL PRODUCTION SHOWS IMPROVEMENT

American portland cement mills show some improvement during the past month in the ratio of operations to capacity as indicated by the figures for 12 month's period ending March 31. According to statistics released by the Bureau of Mines of the Department of Commerce the ratio of operations to capacity for the last 12 month's period was 66.1 per cent. The ratio for the 12 month's period ending February 28 was 65.6 per cent. However, the ratio percentage for the 12 month's period ending March 31, 1929 was 70.9 per cent.

During the month 11,225,000 barrels were produced, 8,846,000 barrels were shipped, and stocks on hand at the end of the month were 30,563,000 barrels. Production in March 1930 was 12.6 per cent more and shipments 12.5 per cent less than March, 1929. Stocks at the mills were 2.8 per cent more than a year ago.

SOUTHWEST ENGINEERING CAPITAL IS INCREASED

Stockholders of the Southwestern Engineering Corp., Los Angeles, have approved an increase in its capitalization from \$2,000,000 to \$3,500,000, through an increase in the \$25 par value common stock from \$1,000,000 to \$2,500,000. While there was no change in the amount of the preferred stock, of which there are 40,000 shares of \$52 par, stockholders authorized a reduction from 8 to 6 per cent in the rate, and the offering of one-fourth share of common stock to equalize the difference. The preferred also was made convertible into common stock at the rate of one share of preferred for one of common to April 30, and two shares of preferred for one of common thereafter.

HOME TOWN CONTRACTS AIM OF PORTLAND CITY COUNCIL

Hereafter specifications for public work in Portland, Ore., will carry the declaration that the bidders must be residents of the state, that a bid must be employed on the work on which the bid is submitted, and the bidder must designate whether he proposes to use domestic or foreign cement.

...City Commissioner Barbur declares that a study of charter provisions and the state laws shows that the council has the right to make such designations, in order to protect home industry. Under these provisions there is a differential of 5 per cent allowable for the use of home products in determining which is the "best" bid. One result of this determination to change specifications was made apparent, when George C. Arenz, low bidder to improve Hawthorne avenue from East Water to E. 55th Street, told Commissioner Barbur that he would use Oregon cement on this job. The cost of this work will be \$109,000.

RULE STANDARD COLOR FOR ALL BALTIMORE FILLING STATIONS

Gasoline filling stations in Baltimore, Md., must be uniform in color, as well as design, it has been ruled by the Board of Estimates. This ruling followed a complaint from City Solicitor A. Walter Kraus that the new stations being constructed were too garish in color. The board has for some time required the plans for filling stations to be passed by Charles F. Goob, Chief Engineer of Baltimore.

NEED FOR WIDER HIGHWAYS DOES NOT EXIST AT THE PRESENT TIME

Promiscuous building of super-highways is shown to be ill-advised in a summary of traffic statistics dealing with highway planning issued by the American Road Builders' Association.

Instead, the association finds need of greater activity over the entire network of the nation's roads, with all construction preceded by a careful survey of the present traffic facilities and its future requirements.

Regional planning is urged for all centers of traffic density. Such planning would indicate whether present roadways should be reconstructed to great width, or whether the construction of more arterial highways over new routes would be most advisable.

Over the majority of state and country highway mileage, a two-lane surface, of 20-foot width, is thought to offer adequate provision for traffic of the next ten or fifteen years. A right-of-way of 100 feet is favored and this would permit of eventual widening of the traveled way.

The summary was made from a nation-wide survey of rural and metropolitan traffic areas, traffic origins and concentration, roadway widths and rights-of-way and light and heavy vehicle traffic.

It was found that the necessity does not exist at the present time for the construction of systems of wide highways throughout the country. Except in comparatively small areas, such volumes of traffic do not now exist and will not during the next fifteen or twenty years, at least.

In a state as a whole there is no necessity, therefore, of planning an ultimate right-of-way in excess of 100 feet or a roadway surface width in excess of 40 feet whether a single or dual strip pavement is involved. On the great majority of the mileage, for a long period of years, even these widths will not be required.

This statement is based on the existing traffic and predicted future traffic on the state and county highways of Wisconsin, the northeastern section of Illinois, Ohio, Pennsylvania, Maryland, Virginia, Connecticut,

cut, Vermont, New Hampshire and Maine. The highways in these areas form a cross section of the highway and traffic conditions in all states.

Four years ago in Ohio there were approximately 11,000 miles in the state highway system of which only 131 miles were carrying more than 2500 vehicles per day, including passenger cars, motor trucks and motor busses. The same relative conditions are found in other areas.

The proportionate mileage carrying a volume of traffic requiring extraordinary pavement widths and design is limited to comparatively small areas, around the larger cities.

If the traffic trends based upon the last twelve years are any indication of the future growth it can be safely said that on the bulk of the state and county highway mileage, during the next ten or fifteen years construction can be largely confined to the provision of two-lane surfaces.

A two-lane surface, twenty feet wide, will carry 8000 vehicles a day at a speed of thirty miles an hour. These figures take into consideration the normal amount of motor truck and motor bus traffic and are based upon actual research studies dealing with traffic volume, traffic speed, and pavement width.

Pavement widths are thought of in terms of traffic lanes with general agreement on the 10-foot lane as standard. Odd numbers of lanes are falling into disfavor.

Reasonable standards of width of rights-of-way are considered as follows:

Local roads, two lanes for traffic, plus parking, 66 to 86 feet; primary and secondary trunk lines in well-settled communities, four lanes, plus parking, 100 feet; primary highways, six lanes, plus parking 120 feet; superhighways with provision for high-speed motor traffic separated from local traffic, ten lanes and four parking strips, 200 feet; special snow-belt trunk highways, two lanes, with provision for permanent snow fence and protective planting within the right-of-way, 150 feet to 300 feet.

maintain a high level of activity in the construction industry but also in the allied lines of industry and commerce that are in turn stimulated by construction operations, and thereby serve as a stimulus to the permanent building program of the country as well as to help relieve unemployment at the present time. The ultimate social and community values of such a national building program should also prove of greatest significance to the country at large."

In giving out this letter, Mr. Craig announced that a national conference for the purpose of furthering this program is being called under the auspices of the American Construction Council to be held in New York City on April 25, 1930.

The American Construction Council was organized at a meeting held in Washington in 1922, at which President Hoover, then Secretary of Commerce, was the principal speaker. It is interested nationally in all phases of construction activity that are affected with a public interest, such as stabilization of employment in the building trades and allied lines, the relation of investment to construction including safeguards for the building investing public, the relation of taxation to construction, promotion of home ownership and home improvements including household equipment, better building both as to equipment, standards of construction and proper finance methods, and local group cooperation. It is also interested in the development of rural highways and especially their coordination with rural electrification.

ELEVATORS AID TRAFFIC IN BAHIA

Two high speed American elevators have solved the problem of commuters in the Brazilian city of Bahia, according to the U. S. Department of Commerce.

Bahia is a "two level" city, and the task of daily transporting thousands of commuters between the two levels constitute a real problem.

It was solved by installing two huge American elevators with a capacity of 27 persons each and operating at a speed of 700 feet a minute. As a result 4000 persons an hour can be carried the 195 feet between the two levels of the city.

AMERICANS LEAD IN CONTRACTS WITH SOVIET RUSSIA

America still has the edge over other countries in the number of contracts with the soviet government for technical aid and supervision in Russia's industrial campaign.

Official figures show that American engineering firms have captured 89 out of 97 contracts awarded by the soviet government during the past year. Germany follows with 35 contracts. France has 10 and Sweden 8. No less than 1350 foreign engineers and specialists, mostly American and German, hold individual contracts with the soviet government.

SURFACE COMBUSTION COMPANY OPENS S. F. BRANCH

The Surface Combustion Company, manufacturers of special and rated industrial furnaces and heating equipment, with factory and headquarters in Toledo, Ohio, and The Webster Engineering Company, a division of the Surface Combustion Company, and manufacturers of fuel heaters with factory and headquarters in Tulsa, Oklahoma, have established branch offices in San Francisco at 447 Sutter Street. S. T. McAdam, Jr., is district manager in charge of distribution.

ELIMINATION OF DISTRICT SLUMS IS AIM OF CONSTRUCTION COUNCIL

Governor Franklin D. Roosevelt of New York expressed his interest and approval of plans to inaugurate a national campaign for the elimination of slum districts in all cities of the United States which is being undertaken by the American Construction Council. It is announced in a letter made public today. (Governor Roosevelt was the original president of the American Construction Council which is a nation-wide organization of men prominent in all branches of the construction industry of the country, and is now its Honorary President).

The letter which was addressed to E. M. Craig of Chicago, the active president of the Council, is as follows:

"I am greatly interested in the proposal, growing out of my recent remarks before the New York Board of Trade, as conveyed to me through the Executive of the American Construction Council, Mr. Dwight L. Hooper, for a nation-wide survey of slum conditions in the larger and medium sized cities of the country and the formulating of definite plans for the elimination of such undesirable housing districts.

"This field undoubtedly furnishes one of the greatest reservoirs of future building activity for the country inasmuch as the rebuilding of slum districts comprises, broadly speaking, a great area of potential building and engineering construction that has as yet hardly been touched. The American Construction Council with the cooperation of such bodies as the American Institute of Architects, engineering societies, representative financing organizations engaged in building financing, city planning experts and local building groups in the various large cities such as the local building congresses and builders' exchanges, as well as labor, should, it seems to me, because of its national scope and impartial nature, be in a position to render a great service to the country. By focusing upon this problem the intelligent cooperation of all branches of the construction industry both locally and nationally in a great quasi-public business undertaking, noteworthy benefits should be derived.

"A comprehensive program along these lines should not only help to

M., April 28, bids will be received by County Supervisors for improvements in Morgan Park at Baldwin Park, including stone-tile and brick bath house with tile roof; concrete swimming pool fully equipped with ladders, fencing, spring board, etc.; filtration plant, piping, gas and water supply; water dispersion system; water heater and laundry equipment; irrigation system; street and walk improvements; lawns and shrubbery; roque, horseshoe and tennis courts; ornamental lighting systems; wading pool. Cost, \$66,765.15.

RED BLUFF, Tehama Co., Calif.—City votes bonds of \$4,500 at recent election to finance airport development.

SAN FRANCISCO—Immediate construction of the new baseball park to replace "Recreation Park" at 15th and Valencia Sts. will be started within the next 30 days by the San Francisco Baseball Club. The new park will be located at 15th and Potrero Ave. and will involve the expenditure of \$1,000,000. The main grand stand will be of class A construction, reinforced concrete and steel. With the purchase of the Potrero Ave. property some years ago, directors of the club announced that the contract for construction would be let to Lindgren-Swinerton, Inc., 225 Bush St., San Francisco. Construction, however, was deferred. Definite announcement will be made by the club within the next two weeks.

KINGSBURG, Fresno Co., Cal.—Roy and Chas. Foster Neon Sign Co., of Exeter, Calif., at \$350 awarded contract by city council to erect highway sign at entrance to city.

Completing Plans.
ALTERATIONS Cost, \$5500
SAN FRANCISCO, No. 2051 Market Street.

Remodel exterior of undertaking parlors.
Owner—McAvoy, O'Hara & Co., Prem. Architect—W. H. Crinn, 438 Pine St., San Francisco.
Bids will be taken in one week.

Plans Being Completed.
PLUNGE Cost, \$100,000
OAKLAND, Alameda Co., Cal. Vicinity of Technical High School. Reinforced concrete plunge (60x160 ft.) (concrete and steel building.) Owner—California Plunge Corp. (A. L. Walters, General Manager).

Plans by L. R. McWethy.
Contractor—L. R. McWethy, 337 17th St., Oakland.

It is expected to start construction in three weeks.

A nursery for accommodation of children, restaurant, spacious plunge and laundry are other features.

Preliminary Plans Being Prepared
Contract Awarded.

GRANDSTAND, ETC. Cost, \$1,250,000
SAN FRANCISCO, Fifteenth St. and Potrero Avenue.
Baseball Park, class A steel and concrete grandstand, 1000 ft. long.
Owner—San Francisco Baseball Club, Fifteenth and Valencia Sts., San Francisco.

Engineer—H. J. Brunner, Sharon Bldg., San Francisco.
Contractor—Lindgren-Swinerton, Inc., 225 Bush St., San Francisco.

Plans Being Figured—Bids Close April 27.
BATH HOUSE Cost, \$12,000
SACRAMENTO, Sacramento Co., Cal. Robbins Farm Center, Sutter Basin.

One-story frame bath house.
Owner—Robbins Farm Center.
Architect—Dean & Dean, California State Life Bldg., Sacramento.

HIGHWAY MACHINERY MANUFACTURERS TO EXHIBIT PRODUCTS

Delegates from fifty-six countries will have an opportunity to study the best products of American highway machinery manufacturers at an international road exhibition to be held in Washington, Oct. 7-10.

The exhibition will be held by the American Road Builders' Association simultaneously with the sixth international road congress.

Inasmuch as the United States produces for domestic use and export more road building machinery and equipment than any other nation, foreign delegations will welcome this opportunity to learn what is new in the industry.

The congress program will give much space to the progressive ideas and methods of American engineers. Oddly enough, this nation, which leads the world in improved roads, is entertaining the international road congress this year for the first time.

The exposition will be held in Washington Auditorium. Outdoor space nearby will also be used for exhibits and a demonstration of road building machines under working conditions will be staged.

In addition to an estimated 400 American manufacturers who will have equipment in the exhibit, the manufacturers from all other countries are urged to send exhibits, so that both the exposition and the congress may be truly representative.

Exhibits from outside the United States will be shipped and returned in bond, thus avoiding duty fees. Invitations to participate are being transmitted to all countries through the foreign service of State Department and the Department of Commerce. The bureau of public roads will have an educational exhibit, representing the United States government.

NEW OAKLAND PLUMBING LAW PASSED TO PRINT

After long delays and many inspections from public officials and gas company furnace dealers' officials, the new plumbing ordinance was passed to print last Monday by the Oakland city council.

The ordinance is said to meet the requirements of the gas and electric company and of the fire department primarily. In summarized form, Colbourn transmitted its main provisions to the council, as follows:

Section 2-c exempts certain experimental, scientific and industrial appliances from changes.

Sec. 15 provides charge of 25c each when more than four appliances installed, instead of 50c each appliance installed.

Sec. 21 provides that appliances must have American Gas Association's approval and be set up, complying with Bureau of Standard's specifications.

Sec. 25½ provides copper tubing may be used to replace small pipes shut-off valves be installed before the appliance.

Sec. 23 provides water heaters may be re-installed in bathroom where they were installed prior to this ordinance.

Sec. 30 provides appliances in room used for sleeping purposes must be vented and rigidly connected to outlet.

Sec. 34 specifies requirements for installation of conversion burners and provides testing to determine whether old furnaces require change of heat runs of pipe. Vents not required for 4-gallon water heaters in barber shops if shops are properly vented.

Sec. 36 provides for use of cement or asbestos compound gas flue pipe.

Sec. 39½, pressing machine moved from place to place may be installed with copper tubing. Appliances in commercial kitchens may be vented into kitchen ventilating system.

Sec. 40 permits use of terra cotta and cement flues.

Sec. 43 provides for fittings of gas flues.

Sec. 45 provides that bends, or set-offs, in the shall be of one piece, and not in excess of 30 degrees.

In 1929, a total of 385 railroad grade crossings were eliminated on the Federal-aid highway system, according to a report just issued by the Bureau of Public Roads of the U. S. Department of Agriculture. Forty-eight crossings were eliminated by the construction of grade-separating bridges carrying the highway over or under the railroad; and 337 by relocation of the highway to avoid the railroad. Since 1917, the records of the bureau show, a total of 4676 grade crossings have been weeded out of the system—905 by grade separations and 3681 by relocations.

The outlook for the European lumber market is still uncertain, according to a report from Osborn S. Watson, Commercial Attaché, to the Lumber Division of the Department of Commerce. Several factors—notably the depression in Germany, England's action in taking only picked specifications, and the uncertainty concerning Russian lumber operations—have had an influence on the situation. It is reported that Russia has sold approximately 277,000,000 board feet direct to individual foreign buyers from first open water stocks, but it is believed that country will not be able to execute more than 70 per cent of its announced lumber program for 1930. This opinion is borne out by a report of the Supreme Economic Council of the Soviet Union, which states that "while production of lumber and firewood showed a substantial increase during the first half of February, the program was still far from fulfilled." According to the data of the Council, only 54.1 per cent of the Russia program for lumber and 69.1 per cent for firewood had been obtained up to February 10, 1930.

The Crane Creek Lumber Company, operating in the government timber in the Sugar Hill section, east of Willow Ranch, Modoc County, is running its sawmill with two shifts on a daily cut of 150,000 board feet of lumber.

The Fandango Company has also commenced double-shift operations.

Engineering News Section

BRIDGES

SAN LUIS OBISPO, San Luis Obispo Co., Cal.—Bids will be asked shortly by the city council to construct a bridge at the entrance to the San Luis Obispo high school grounds, over San Luis Obispo Creek at Marsh and Ido Sts. Estimated cost \$10,000. Leon Moore, city engineer.

STOCKTON, San Joaquin Co., Cal.—Until May 5, 11 A. M., bids will be received by Eugene D. Graham, county clerk, to construct pile trestle bridges across the Boulton (McDonald Island) Road and about five miles northwest of Holt, over a drainage canal on the Atherton road on King Island about 1½ mile west of King Island Bridge and across drainage canal on Newell road and about ½ mile east of Terminous. Certified check 10% payable to Chairman of the Board of Supervisors required with bid. Plans obtainable from County Surveyor Julius Manthey.

OROVILLE, Butte Co., Cal.—Until May 6, 2 P. M., bids will be received by C. F. Belding, county clerk, to construct bridge over Chico Creek on proposed route of Chico Canyon road. Plans obtainable from J. A. Baumgarner, county engineer.

SAN RAFAEL, Marin Co., Cal.—Until April 28, 1 P. M., bids will be received by Rob E. Graham, county clerk, to construct a reinforced concrete bridge at Dolciville on the Marshall-Petaluma road in Road District No. 5. Project involves:

- 104 cu. yds. Class A Portland Cement concrete in place;
- 9200 lbs. reinforcing steel in place;
- 1200 cu. yds. backfill.

Plans obtainable from Rodney Messner, County Surveyor, Courthouse, San Rafael.

SAN RAFAEL, Marin Co., Cal.—Until April 28, 11 A. M., bids will be received by Rob E. Graham, county clerk, to construct a reinforced concrete bridge at Moraga Ranch on the Chileno Valley Road in Road District No. 5. Projects involves:

- 53 cu. yds. Class "A" Portland cement concrete in place;
- 6300 lbs. reinforcing steel in place;

Plans obtainable from County Surveyor Rodney Messner, Courthouse, San Rafael.

REDWOOD CITY, San Mateo Co., Cal.—City votes bonds of \$7000 to finance construction of drainage culverts. C. L. Dimmitt, city engineer.

REDWOOD CITY, San Mateo Co., Cal.—City votes bonds of \$15,000 to finance construction of fifteen small bridges within the city limits. C. L. Dimmitt, city engineer.

SAN JOSE, Santa Clara Co., Cal.—Until April 25, 5 P. M., bids will be received by C. B. Goodwin, city manager, to construct two reinforced concrete bridges, one across Guadalupe river at Park Ave. and another across Los Gatos creek at Park Ave. Separate bids will be considered for each structure. Alternative bids will be considered for both bridges. Certified

check 10% payable to city required with bid. Plans obtainable from City Engineer Wm. Fopp on deposit of \$10, of which \$5 is returnable.

CAJALVERAS COUNTY, Cal.—Following three low bids received April 16 by State Highway Commission to construct a reinforced concrete girder bridge over Calaveritas Creek, three miles south of San Andreas, consisting of one 60-ft. span on concrete piers and six 30-ft. spans on concrete bents and abutments with rubble masonry wing walls:

Geo. J. Ulrich Const. Co., Modesto	\$18,037
George G. Wood, Fresno	15,826
Bodenhamer Const. Co., San Diego	19,689

PLUMAS COUNTY, Cal.—Following three low bids received April 16 by State Highway Commission to construct a reinforced concrete girder bridge over the fork of the Feather river at Chester, consisting of three 35-ft. spans on concrete pile bents:

A. T. Howe, Santa Rosa	\$10,990
R. B. McKenzie, Red Bluff	12,968
M. E. McGowan, San Francisco	14,624

SANTA ANA, Orange Co., Cal.—The state railroad commission has authorized the city of Santa Ana, Orange County, to construct Fourth St. at a separated grade under the track of the Southern Pacific and Santa Fe Railroad. The cost, estimated by commission engineers at about \$150,000, will be borne 90% by the city, 7½% by the Atchison, Topeka & Santa Fe and the remainder by the Southern Pacific.

VISALIA, Tulare Co., Cal.—Until May 5, 2 P. M., bids will be received by Gladys Stewart, County Clerk, to construct reinforced concrete bridge over Tule River (Bridge No. 57), involving 558.61 cu. yds. Class A concrete including excavation; 1024 lin. ft. concrete piles.

Materials will be furnished by county, f. o. b. Porterville.

Certified check 5% payable to Chairman of Bd of Sups. required with bid. Plans obtainable from County Surveyor T. W. Switzer.

REDWOOD CITY, San Mateo Co., Cal.—County Surveyor Geo. A. Kneese preparing plans to widen bridge over Alpine Creek at entrance to County Memorial Park, to 30 feet.

DREDGING, HARBOR WORKS & EXCAVATIONS

OAKLAND, Cal.—Until April 21, 4:30 P. M., bids will be received by G. B. Hegardt, secretary, City Port Commission, 424 Oakland Bank Bldg., for re-dredging (clam-shell) at oil wharf in Outer Harbor. Certified check 10% required with bid. Specifications obtainable from secretary on deposit of \$5, returnable.

IRRIGATION PROJECTS

CALIFORNIA—Following applications were filed during the month of March with the State Department of Public Works, Division of Water

Rights, for permits to appropriate water:

Application 6578 (Trinity Co.) New River Mining Co., % H. W. Hall, Box M. Corona, Calif., 40 c. f. s. from Quimby Creek tributary to New River, for mining purposes. Est. cost, \$10,000.

App. 6579 (Yolo Co.) Lars Jorgensen, Hobart Bldg., San Francisco, for 200 c. f. s. 100,000 ac. ft. per annum from Putah, Pope, Capell, Elicura Creeks tributary to Sacramento River, for domestic and industrial purposes. Est. cost \$3,900,000.

App. 6580 (Trinity Co.) R. E. Robards, Burnt Ranch, Calif., 2 c. f. s. from Jan. 1st to Dec. 31st from Dixie Creek tributary to New River, for mining and domestic purposes (½ acre domestic irrigation).

App. 6581 (Sutter Co.) C. Fred Holmes and R. E. Hughes, 41 Palm Ave., Woodland, 10 c. f. s. from East Dredge Cut of Sutter By-Pass tributary to Sacramento River, for recreational purposes.

App. 6582 (Sutter Co.) C. Fred Holmes and R. E. Hughes, 42.26 c. f. s. from East Dredge Cut of Sutter By-Pass tributary to Sacramento River, for irrigation purposes. Est. cost, \$15,000.

App. 6583 (Sacramento Co.) A. L. White, Sacramento, Calif., for 2.5 c. f. s. from March 1st to Oct. 15th of each season from Sacramento River, for irrigation purposes (80 acres). Est. cost, \$2000.

App. 6584 (Los Angeles Co.) John J. Johnson, Sunland, Calif., 0.25 c. f. s. from Jan. 1st to Dec. 31st from unnamed spring tributary to Los Angeles River Watershed, for domestic and irrigation purposes (83 acres). Est. cost, \$1500.

App. 6585 (Mono Co.) Ralph B. Lloyd Los Angeles, 100,000 ac. ft. per annum from East and West Walker River and Adobe Valley, for power purposes.

App. 6586 (Mono Co.) Ralph B. Lloyd, 100,000 ac. ft. per annum from East and West Walker River and Adobe Valley, for irrigation and domestic purposes on 50,000 acres.

App. 6587 (Contra Costa Co.) Henry R. Vail, % E. H. Frazier, 422½ D St., Marysville, 37 c. f. s. from Old River, Dredger Cut and Italian Slough tributary to San Joaquin River, for irrigation purposes. Est. cost, \$10,000.

App. 6588 (San Joaquin Co.) American Trust Co., 464 California St., San Francisco, 6 c. f. s. from Stanislaus tributary to San Joaquin River, for irrigation purposes. Est. cost, \$2500.

App. 6589 (Ventura Co.) Julius Olender, 1812 Tulare St., Fresno, for .04 c. f. s. from unnamed spring tributary to In Piru Cr. Watershed, for mining and domestic purposes. Est. cost, \$100.

App. 6590 (Plumas Co.) Telluric Mining & Smelting Co., Seattle, Wash., for .10 c. f. s. from Jan. 1st to Dec. 31st from unnamed rivulet tributary to (In Indian Creek Drainage Area), for mining purposes. Est. cost, \$200.

App. 6591 (Mendocino Co.) Hale Burger, Yorkville, Calif., 50 ac. ft. per annum from Rancheria Creek tributary to Navarro River, for irrigation and domestic purposes (10 ac.). Est. cost, \$1000.

App. 6592 (San Bernardino Co.) John M. Willoughby, 846 N. Hudson Ave., Los Angeles, $\frac{1}{2}$ c. f. s. from unnamed spring tributary to Mojave Desert, for domestic and irrigation purposes (40 acres). Est. cost \$600.

App. 6593 (Sutter Co.) Estate of California E. Hale, $\frac{1}{2}$ John E. Hale, Marysville, 1.75 c. f. s. from Feather River tributary to Sacramento River, for irrigation purposes. Est. cost, \$4200.

App. 6594 (Mendocino Co.) Snow Mountain Water & Power Co., San Francisco, 50 c. f. s. 14,500 ac. ft. per annum, from South Eel River tributary to Eel River, for irrigation purposes on 4905.9 acres. Est. cost, \$2,000,000.

App. 6595 (Kern Co.) Geo. O. H. Buchner, $\frac{1}{2}$ Walter C. Hintze, 1051 Subway Terminal Bldg., Los Angeles, 1 c. f. s. Jan. 1st to Dec. 31st of each season from well tributary to South Fork Rag Gulch, for mining and domestic purposes. Est. cost, \$15,000.

App. 6596 (Trinity Co.) A. M. Knapp, Weaverville, Calif., 30 c. f. s. from Big French Creek tributary to Trinity River, for mining purposes. Est. cost \$20,000.

App. 6597 (Nevada Co.) South Yuba Co. Ltd., $\frac{1}{2}$ W. E. Plank, Washington, Nevada Co., Calif., 40 c. f. s. from Scotchman Creek tributary to South Fork of Yuba River, for mining purposes. Est. cost, \$2200.

App. 6598 (Trinity Co.) Anton Weber, Trinity Alps, for 0.75 c. f. s. from Elk Gulch tributary to Stuarts Fork of Trinity River, for irrigation purposes (60 acres).

App. 6599 (Inyo Co.) J. F. Chrysler and E. H. Cook, Lone Pine, Calif., for 1 c. f. s. March 1st to Nov. 30th of each season from Carroll Creek tributary to Owens Lake, for irrigation and recreational purposes (20 acres). Est. cost, \$360.

App. 6600 (Sierra Co.) E. A. Humphreys, $\frac{1}{2}$ R. F. Taylor, Downieville, Calif., 25 c. f. s. from South Fork of North Fork of Yuba River tributary to Yuba River, for mining purposes. Est. cost, \$5000.

App. 6601 (Santa Clara Co.) G. T. Letcher, $\frac{1}{2}$ Louis Onela, First National Bank Bldg., San Jose, 45 ac. ft. per annum, from unnamed spring, for irrigation and domestic purposes.

App. 6602 (San Luis Obispo Co.) M. H. Stephens, San Luis Obispo, total 480 gallons per day from 2 springs tributary to Dry Creek, for stock-watering purposes. Est. cost \$400.

App. 6603 (Merced Co.) J. L. Firpo and John Careglio, $\frac{1}{2}$ Hugh K. Landram, Merced, 4 c. f. s. April 1st to Oct. 1st of each season from Merced River tributary to San Joaquin River, for irrigation purposes (329.7 acres). Est. cost, \$2200.

App. 6604 (Lake Co.) Martin Judge Jr. & Co., Crocker 1st National Bank Bldg., San Francisco, 250 c. f. s. 175,600 ac. ft. per annum, from North Fork Cache Creek tributary to Cache Creek for industrial and domestic purposes. Est. cost \$3,000,000.

App. 6605 (Lake Co.) Martin Judge Jr. & Co., 175,000 ac. ft. per annum, tributary to North Fork of Cache Creek, for irrigation purposes. Est. cost, \$1,000,000.

App. 6606 (San Mateo Co.) The Board of Trustees of the Leland Stanford Jr. University, A. F. Rath, Comptroller, Stanford University, Palo Alto, 10 c. f. s. 5300 ac. ft. per annum, from San Franciscoquito Creek, for domestic purposes. Est. cost, \$350,000.

App. 6607 (San Mateo Co.) The Board of Trustees of the Leland Stan-

ford Jr. University, 30 c. f. s. 5300 ac. ft. per annum, from San Franciscoquito Creek, for irrigation purposes. Est. cost \$350,000.

App. 6608 (Placer Co.) Bear River Water & Power Co., $\frac{1}{2}$ J. L. Rollins, Manager, Colfax, 111,020 ac. ft. per annum, from Bear River and its tributaries tributary to Feather River, for power purposes. (4250 H. P.) Est. cost, \$2,000,000.

App. 6609 (Del Norte Co.) Geo. C. Walton, Crescent City, 12 c. f. s. Jan. 1st to Dec. 31st from Rock Creek tributary to Smith River, for irrigation and domestic purposes. (1 $\frac{1}{2}$ acres). Est. cost, \$200.

App. 6610 (San Bernardino Co.) Alvin W. Bercaw, 917 W. 35th St., Los Angeles, 025 c. f. s. Jan. 1st to Dec. 31st, of each season, from 5 unnamed springs tributary to Mojave Desert, for irrigation and domestic purposes (50 acres). Est. cost, \$1500.

App. 6611 (San Diego Co.) Ocean-side Mutual Water Co., $\frac{1}{2}$ A. L. Sonderegger, 325 Central Bldg., Los Angeles, 1000 ac. ft. per annum from Calavera Creek tributary to Agua Hedionda Creek, for domestic and irrigation purposes.

App. 6612 (San Joaquin Co.) F. J. Dietrich and Geo. W. Leinster and Geo. A. Ditz, $\frac{1}{2}$ Neumiller & Ditz, 605 Bank of Italy Bldg., Stockton, 144 c. f. s. from Calaveras River tributary to San Joaquin, for irrigation purposes (15.46 acres).

App. 6613 (San Francisco Co.) L. F. Trumbull, 714 Sheldon Bldg., San Francisco, 200 gallons per day from unnamed spring tributary to Lower Echo Lake, for domestic purposes.

App. 6614 (Mono Co.) Lloyd Summers, Mammoth Lakes, .68 c. f. s. from Lake Mary tributary to Mammoth Creek-Owens River, for domestic purposes. Est. cost, \$4000.

TURLOCK, Stanislaus Co., Calif.—Alldrin and Anderson, Turlock, at \$2,749.25 awarded contract by Turlock Irrigation District for 32,344 sq. ft. concrete canal lining at 8 $\frac{1}{2}$ c. sq. ft. in District No. 3-A; also 20 ft. syphon at \$1.90 ft.

STREET LIGHTING SYSTEMS

SAN MATEO, San Mateo Co., Cal.—See "Streets and Highways," this issue. Bids wanted for electroliner system in connection with Aq. and Imp. District No. 1.

SAN MATEO, San Mateo Co., Cal.—City council petitioned to improve Fairfield, Arcadia, Barron, Fulta and Florin Aves. and all streets in San Mateo Villa Park, involving paving, sidewalks, sewers and installation of an ornamental street lighting system. Ten Years of Uniformly Satisfactory Experience in High

Class Pacific Coast Construction

FOR BRICK MORTAR, WHITE COAT, AND SAND FLOAT FINISH

Sold by Representative Dealers Everywhere

D-3443—Airplane Material. Los Angeles, Cal.—Concern interested in receiving bids on materials to be used in the manufacture of airplanes, either small, medium or large quantities.

D-3444—Food Truck. San Francisco, Calif. Distributors wanted for new, fast selling high class product. Exclusive territory to those who qualify. All cash business. Quick profits.

D-3445—Distributor. Oakland, Calif. Concern interested in securing small meritorious article, manufactured by San Francisco concern, to distribute on Pacific Coast.

D-3447 — Bedding Representative. Philadelphia, Pa. Concern interested in securing representation in San Francisco for white goods, bedding, etc.

D-3448—District Dealer. Los Angeles, Calif. Party who now has California distribution for oil, would like to secure representation in this city.

D-3450 — Veneer Representative. Louisville, Ken. Concern interested in securing individual or firm well acquainted with panel, furniture, fixture and interior trim trade, to represent them.

20017—Agency. Brussels, Belgium. Manufacturer of all kinds of velvet for upholstering floor coverings, table covers, etc., is seeking a local agent to work on a commission basis.

20018—Representation. New York City. Frenchman, who is to arrive in New York the latter part of this month, wishes to obtain the agency in France for a number of local manufacturers. References on file.

20021—Culverts. Casablanca, Morocco. Party handling agricultural machinery is inquiring for catalogues and prices of culverts.

20029—Mohair and Small Hardware. Hilo, P. I. General broker wants to buy green, granite and black mohair by pieces, sample on file. Also wishes to buy secondhand mohair from upholsterers. He is desirous of communicating with manufacturers of bolts, steel plates, carbon steel bars, screws, angles, rivets, nails, hose, etc.

20033—Pumps for California. San Francisco, Calif. Factory branch of a national manufacturer of pumps is interested in making connections for sales within countries contiguous to the Pacific. Handles a full line of low and high head small to largest capacities pumps, conventional centrifugal design and self-priming for food, chemical, and mining applications made in all metals, including stainless steel.

20035—Representation. San Francisco, Calif. Party wishes to communicate with firms that are interested in obtaining representation in the United Kingdom for California products. Available for interview.

20036—Representation of California Products. San Francisco, Cal. A business firm of high repute located in Bremen, Germany, is desirous of representing California products in Germany. Local reference.

SAN FRANCISCO—The San Francisco Chamber of Commerce is in possession of name of party who would like to represent any concern who wishes to develop sales on the Coast, and to whom a thorough knowledge of business conditions and physical conditions would be of value along the line of merchandise and product. Further information is obtainable from the Chamber of Commerce. Refer to Trade Tip D-3453.

A. P. Yaumeshef, 128 Iris St., Redwood City, Calif., wishes to represent

firm or established branch of firm in Redwood City or San Mateo and Santa Clara County.

E. K. Rice, Sales Promotion, Campbell Laboratories, Inc., 75 Hudson St., New York City, is seeking a good crew-manager for San Francisco and surrounding territory who would be interested in the distribution of a household and automobile necessity of genuine merit.

OFFICIAL PROPOSALS

STATE OF HIGHWAYS DEPARTMENT OF PUBLIC WORKS

DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the State Highway Engineer, Public Works Building, Sacramento, California, until 2 o'clock P. M. on May 7, 1930, at which time they will be publicly opened and read, for construction in accordance with the specifications therefor, to which special reference is made, of portions of State Highway, as follows:

Del Norte County, between Smith River and Patricks Creek (I-D-N-1-C & D), about fifteen and two-tenths (15.2) miles in length, to be surfaced with untreated crushed gravel or stone.

Humboldt County, at Scotia and between Fortuna and Lolo (I-Humb-1-E, G), about four and three-tenths (4.3) miles in length, to be graded and paved with Portland cement concrete.

San Joaquin County, between Lodi and 1/4 mile north of Mokelumne River (X-S-J-4-C), about seven-tenths (0.7) mile in length, to be graded and surfaced with untreated crushed gravel or stone.

Proposal forms will be issued to only those Contractors who have furnished verified statement of experience and financial condition in accordance with the provisions of Chapter 644, Statutes 1929, and whose statements so furnished are satisfactory to the Department of Public Works. Bids will not be accepted from a contractor to whom a proposal form has not been issued by the Department of Public Works.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the said office, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, and at the office of the District Engineer of the district in which the work is situated. The District Engineers' offices are located at Eureka, Redding, Sacramento, San Francisco, San Luis Obispo, Los Angeles, San Bernardino and Bishop.

A representative from the district office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Division of Highways. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the district office.

No bid will be received unless it is made on blank form furnished by the State Highway Engineer. The special attention of prospective bidders is called to the "Proposal Requirements and Conditions" annexed to the blank form of proposal, for full directions as to bidding, etc.

The Department of Public Works reserves the right to reject any or all

bids or to accept the bid deemed for the best interests of the State.

DEPARTMENT OF PUBLIC WORKS
DIVISION OF HIGHWAYS

C. H. PURCELL,

State Highway Engineer.

Dated April 9, 1930.

GERMANY DEMANDING AMERICAN DOUGLAS FIR

While the German market for American lumber during February exhibited a rather weak tendency, German buyers continued to demand Douglas fir in increasing quantities, according to a report from James T. Scott, Trade Commissioner at Hamburg, to the Lumber Division of the Department of Commerce.

The demand for foreign lumber, it is stated, "moved along rather narrow lines," and "smaller arrivals of certain lumber appeared to be adapting themselves to reduced consumption."

Although arrivals of American logs and hewn timber are said to have been smaller than during February of former years, this being particularly true of hickory, they were more than adequate.

Due to the unfavorable conditions in the building trade, mills are buying logs sparingly, and no improvement in the market for lumber is expected in the near future. Despite an unfavorable trend of activity in the furniture industry, imports of plywood are said to be gradually increasing. A reduction in sales is reported by the German plywood industry, which has petitioned the government for higher protective import tariffs.

A decline in activity in the box making industry is attributed in a small measure to imports from neighboring countries, which have an inflated currency. A merger of several cigar box producing concerns has quickened the demand for wood for this purpose. Unfavorable conditions are reported in the shipbuilding industry, formerly a very important consumer of lumber and wood products and a fair trend is reported in the carriage industry.

In general it may be said that conditions in the German woodworking industry are far from satisfactory, and due to poor consumption, competition in the various branches of trade is very acute and prices are consequently depressed.

The Permanent Committee on the simplification of varieties and sizes of Vitrified Paving Brick, meeting in Washington, D. C., on April 1, unanimously reaffirmed Simplified Practice Recommendation No. 1-29—Vitrified Paving Brick, without change, for another year. A survey made by the National Paving Brick Manufacturers' Association was used as a basis for discussion. This survey showed that the six recognized sizes of paving brick, as adopted last year, represented 87 per cent of the total shipments for 1929. No other sizes showed sufficient increase in production to warrant inclusion in the recognized list.

Net sales of the General Paint Corporation for 1929 amounted to \$7,006,468, as compared with \$5,799,725 in the previous year. The net income, however, was \$542,977 as against \$557,405, and the net profits applicable to dividends were \$508,348 in contrast to \$539,432 in 1928. Despite this small falling off, due to general business conditions, the company's outlook for 1930 is highly encouraging, according to the report released through E. H. Rolins & Sons.

A gradually improving trend in in-
dustry generally is noticeable at this
time, says the Financial and Industrial
Review. Commodity prices are stiffen-
ing more rapidly than had been pre-
dicted in trade circles a month or so
ago. In Dun's list of 52 wholesale
commodity price changes, 27 increased,
or approximately 50 per cent, com-
pared with a 30 per cent gain a week
ago and a 35 per cent increase during
the corresponding period of 1929.

There is a heavier demand for elec-
tric equipment and for farm imple-
ments, while new construction con-
tracts, let in the first quarter of the
year were approximately 46 per cent
ahead of 1929.

Lots of new financing is being ar-
ranged, especially in the nature of
bond issues, corporations generally
taking advantage of the low prevail-
ing price of money to obtain funds for
future development or else for the re-

tirement of higher priced obligations,
placed years ago at fancier interest
rates. Stock issues during March
showed an increase over February,
but nevertheless the aggregate of
stock floatations during the initial
three months of 1930 was 20 per cent
below a year ago. Over financing
through the sale of new stock was
actually one of the main contributory
causes of the stock market panic last
November. That lesson had a good
influence as now the proportion of
bond to stock financing is running
along the line of sound logic.

Mergers occupy the consideration of
those students whose eyes are in the
habit of first clamping themselves on
the financial pages.

The stock market seems to afford
aid and comfort to everyone except
the bears. As the destructive cliques in-
sist on fighting the tape they must pay
the penalty. Many of those bears who
were fortunate enough to have been
short of stock during the panic pe-
riod late last year, have since dis-
covered that Dame Fortune has the
ways of the weather in changing. The
profittaking sales which have been in
volume of late, have failed to check
the rising tendency of prices of stocks,
as Main Street is helping to absorb
the floating supply of shares on their
way up.

American lumber exports to the
Rotterdam, Netherlands district dur-
ing 1929 were composed chiefly of
Douglas fir and oak, a recent report
from Consul Carol H. Foster to the
Lumber Division of the Department
of Commerce discloses. These im-
ports totaling 86,829 metric tons were
valued at \$2,913,523. The 1929 exports
to this district were slightly less than
those of 1928, but sales were readily
made and are expected to continue
during 1930. Keen competition exists
among importers, who are entirely too
numerous in proportion to the volume
of trade, and thus reduce profits to a
minimum.

SOULE STEEL AND U. S. METAL PRODUCTS MERGE

United States Metal Products Company and Soule Steel Company, two firms that have worked side by side in the construction of many of the most important buildings of the Pacific Coast, have merged their complementary services into one organization; and will hereafter operate as Soule Steel Company. Both companies will continue with the same personnel as before, but will collaborate as a unit to provide a still larger measure of prompt and efficient service.

The Soule Steel Company today represents not only an exceptional grouping of technical experience, skill, and equipment, but an inter-weaving of friendly personal relationships the have grown and strengthened for over a quarter of a century in the development of Dreusike Bros. (1898), San Francisco Corncorn Works (1906), United States Metal Products Company (1913), Edw. L. Soule Co. (1905), American System of Reinforcing (1917), Concrete Engineering Co. of Calif. (1925), and Soule Steel Company (1927)—now all co-ordinated in one organization.

SAN JOAQUIN CEMENT COMPANY SUES PIPE CONCERN

Suit for \$13,468.37 has been filed in superior court at Modesto by the San Joaquin Cement Company, the members of which are Nettie H. Mayes, S. Y. Mayes, C. Balas and Mrs. C. Balas, against the United Concrete Pipe & Construction Company.

Five thousand dollars is sought for the alleged failure of the defendant concern to operate the concrete pipe plant at Herndon, \$5000 for loss of sales and profits, loss of good will to the plaintiff company through lack of endeavor to keep up that business in the territory, \$1000 for failure to equipment in proper condition. Plaintiffs are also seeking \$2468.37 for alleged loss through the non-payment of taxes, insurance and rental.

WESTERN IRRIGATION LEAGUE IS PROPOSED

Thomas E. Hill, secretary of the Washington Irrigation Congress, who recently suggested to reclamation leaders in eleven Western States that they organize to defend reclamation from eastern attacks, announces that an all-western league for that purpose would probably be formed during the last week of June in Salt Lake City. This conference he said, will probably precede the meeting of the National Association of Governors, to be held in Salt Lake City June 30.

March Building Greater Than In February, Says A.G.C.

The volume of construction performed during March 1930 increased 17 points over the February figure to Index Number 131, according to a statistical study just completed by the Associated General Contractors of America. This study, based on the shipments of construction materials, shows the volume of job activity in March this year to be 15 points higher than for March 1929.

The same study reveals that during the first two months of 1930, long term state and municipal bond issues averaged \$89,000,000 as compared with \$79,000,000 for the same months last year which, taken with the phenomenal increase in such bonds issued in December 1929, is considered a positive indication of an exceptionally large volume of engineering construction work to come.

For the first two months of 1930 the total number of square yards of concrete pavement awarded was 13,481,000 as compared with a total of 10,702,000 square yards in the same months of 1929. This increase of 26 per cent in paving work is expected to be maintained or bettered when the augmented highway programs made possible by the recent passage of larger federal aid appropriations for state highways begin to be felt.

E. J. Harding, assistant general manager of the Associated General Contractors, sees in these statistics evidence of the success of the program of President Hoover to stimulate construction insofar as highway and other engineering construction is concerned.

The building industry's problems are still acute, he points out, particularly in the field of residential construction which is still 50 per cent below normal. The improved financial condition of banks, insurance companies, building and loan associations and other agencies which finance building construction is expected to bring relief to this end of the construction industry before long.

In industrial and commercial building improvement has already set in. Mr. Harding claims, and, while still slightly below normal, both these branches should soon be operating above par. With engineering construction far above normal and with indications that other branches of the industry will rapidly improve, the latter part of 1930 is expected to be a busy one in the entire construction industry.

PLUMBING FIXTURE PRICES

March wholesale prices of standard plumbing fixtures for a six-room house, as collected by the U. S. Department of Commerce from reports of twelve representative manufacturers and wholesalers, were \$104.51 as compared with \$103.69 in February and \$93.51 in March, 1929.

INCREASE IN CONSTRUCTION PREDICTED BY A. E. DICKINSON

Upturns in virtually all types of building will be recorded during the present month, it is predicted by President A. E. Dickinson of the Indiana Limestone Company, as the result of a national building survey.

"By far the worst has been seen and it is still probable that 1930 will equal or surpass last year's total construction volume," he said.

"For the first quarter, America spent approximately \$1,190,000,000 on new construction. This is below the same period last year, but contemplated projects change the outlook. The building industry should be a sustaining force to general business by mid-summer.

"Commercial and industrial construction throughout the country has shown increases in value in recent weeks. Public utilities—electric light and power, manufactured gas, street railway, telephone and telegraph—plan to spend more than \$3,250,000,000 during 1930.

"Residential building is still below past records but the approach of mild weather has been a stimulating factor.

"In point of valuation of building permits in 20 leading cities, New York continues to be at the head of the list, with Los Angeles, Chicago, Seattle, Detroit, Cincinnati, Milwaukee, Philadelphia, Baltimore, Cleveland, Boston, San Francisco, Houston, Buffalo, Pittsburgh, Kansas City, Indianapolis, Atlanta, St. Louis and Dallas following in order named.

"Counting the gigantic public buildings program and the commercial, industrial and public utility activity instanced above, the building industry seems to be a fair backlog for business."

BUILDERS DISPUTE MAIL ORDER PRICES

Lumber dealers, contractors and building and loan association executives of Collinsville, Ill., refuse to be frightened by the recently announced small home building plans of Sears, Roebuck and Company, says the Business Week. They joined forces and are placing full-page advertisements in local papers stating that local agencies can build homes to Sears-Roebuck plans for 12% to 20% less than asked by the mail order house.

The local business men obtained detailed estimates on three Sears-Roebuck houses; then sat down to figure out what they would cost built and financed locally. They offer to save \$857 on a \$6,128 house; \$1,099 on a \$5,795 design; \$754 on a \$4,259 house; other savings in proportion. They maintain that financing charges of Sears-Roebuck are higher than necessary and stress in their advertising the advantages of employing home labor and materials and of dealing with local business men.

REMOVE BLINDFOLD BEFORE YOU BUILD SAYS CONSTRUCTION CHIEF

By Walter J. Aring of M. K. Ferguson
Co., engineers and builders, Cleve-
land, Ohio.

"I wish I knew as much about architecture and construction as I do about banking," declared a banker friend of mine, during a discussion of preliminary plans for a new bank and office building.

He had reached a point at which every investor arrives when he faces the job of constructing a building. He realized that in the spending of such a large sum of money there are many chances for errors in design or mistakes in judgment which may result in inefficiency or early obsolescence.

As a layman the promoter of a commercial building project must rely largely upon the counsel of others, but he knows that the real responsibility for the success of the enterprise is his own. He is eager to produce a sound result, but faces such a maze of unfamiliar problems that he hesitates to proceed.

His great need is for the counsel of an experienced man who knows the investor's problem and its solution, and is willing to take that problem as the starting place for the development of a building that accurately fits the need.

A bank or commercial building must be something more than a work of art or a monument to pride. It must pay its way and yield dividends. No matter how impressive a building may be, if it is not a good business investment, it is a monument to neglect of economic and engineering fundamentals that are vital to the success of the enterprise.

For over thirty years I have been engaged in the development of commercial property. As construction executive, owner's representative, architects' supervisor or consultant, I have had an opportunity to study buildings from every possible standpoint.

Some projects have proved unsuccessful; others have surpassed expectations of their owners. In the majority of cases the earning power of the property could have been increased had greater care been used in fitting it to the purpose for which it was intended.

There can be no greater satisfaction to one interested in construction enterprise than to know in advance that the success of a great building is assured. As it rises higher and higher there is a thrill in knowing that every added operation is bringing one nearer to the realization of a well-conceived plan. I know of no greater pleasure than to watch the steady influx of satisfied tenants as a great structure is made ready for their occupancy.

And yet there are many cases in which the building is finished before the owner gets accurate information about its earning power. When prospective tenants find flaws in the layout or object to prohibitive rent and go down the street to locate in another building, it dawns upon the owner that if he had planned the arrangement of floor space with scientific care he would have been saved a large amount of worry and loss.

A building that is built to rent must be designed primarily to suit the requirements of tenants. It must grow naturally out of the needs of the community for better facilities. What the investor requires is accurate knowledge of those needs. These

basic economic facts can readily be obtained by consultation with qualified specialists and can be checked with owners and managers of successful existing properties and with occupants. They can furnish facts and figures concerning their experience and outline what they consider ideal facilities for their business.

Thousands of dollars and much valuable time are thrown away in alteration work, much of which can be avoided by intelligent forethought. Worse than this is the loss to the tenant who pays well for space in an attractive building only to discover that his space is unsuited for his purpose.

Several years ago I was called to a city in Ohio to consult with a banker in regard to a twelve-story combined bank and office building which he planned to erect on a 32 foot lot. The drawings which were ready for bids, provided for a tower of modern set-back design. The first floor, which was to be devoted to banking use, was without columns. Beams and girders of enormous depth were required to support the upper floors. At each set-back a similar condition existed, because the columns for the upper floors were staggered above the lower columns. Space equivalent to the cubes for two entire floors was wasted by the excessive depth of steel members. Of course the total steel tonnage for the building was entirely out of proportion for the size of the structure.

The arrangement of the columns also prevented an advantageous location for elevators, stairways and service facilities, so that the available renting space was small in area and undesirable.

Of course all concerned were deeply disappointed to have their plans for a monumental tower building cut to pieces, but fortunately for the banker a monumental blunder was avoided.

A few months ago I was asked to go to a large middle western city to see the plans for a twenty-two story bank, office and medical building. It was to be located in a secondary business center which was at a considerable distance from the main center of the city.

No survey had been made to determine the number or character of tenants or the prevailing price of space in the locality. They had provided for a number of exclusive retail shops on the first floor without considering the fact that third-rate stores prevailed in the section. In their study of the office portion of the building they apparently failed to realize that business concerns of the type they hoped to attract object to the presence in the building of a large number of doctors and dentists. Sick and crippled patients in elevators and halls, and odors of anaesthetics and disinfectants are out of place in an office building.

Even the layout for the banking space was faulty, for the office building design had been emphasized in spite of the fact that the bank space was the most expensive and im-

portant part of the building. The elevators, stairs and service facilities for the upper floors were brought down through the center of the bank space so that the bank had to be laid out around them.

An analysis of the community resulted in the adoption of an entirely different scheme of layout and a decision to eliminate doctors and to build a ten-story building instead of one twenty-two stories in height. They decided in time that it is better to have a building of moderate size well filled with tenants that stay, than one that reaches far beyond the renting needs of the community.

When a tenant pays the price of space in an up-to-date office building, he has a right to expect that every foot he pays for will be usable. A study of local usage will reveal the accepted width between walls that is suitable for economical layout of offices. I am well acquainted with a large office building which is one of the landmarks of the city in which it is located, in which the floors are so planned that the distance between outside walls is fifty-eight feet. In some cases offices are as much as thirty-seven feet in depth, while the average is twenty-five feet. Every office has to pay a part of the cost of an extra five to fifteen foot strip that often is poorly lighted, and in the majority of cases is of no use. The investor also loses because he cannot charge for such space at the prevailing rate for useful space.

An add case has come to my attention of a banker who saw a building he like very much, and gave instructions to his architect to design one just like for him. So accurately were his instructions carried out that when he moved into his new two hundred thousand dollar bank he discovered that nearly every one of his printed forms would have to be scrapped because they did not fit the receptacles that had been prepared for them.

He also found to his dismay that the work space had no daylight although there could have been windows on two sides. Careful preliminary study of his business and of the plot conditions would have saved unnecessary embarrassment and expense.

Good architecture is vital to the success of a business property. The public has been educated to expect beauty and style in everything it uses, and revolts against the ugliness of a bare utilitarian building. But good architecture is not a veneer. Goodness must go through and through.

There needs to be a wider recognition of the fact that good architecture does not necessarily call for a display of garnish ornament. In fact a great deal of very bad architecture may be covered up by marble and gold-leaf. The real beauty of a building is the product of skill in the proportioning of mass, and judgment in the choice and combination of materials.

My cost records of building maintenance over a period of years have shown that it does not pay to lavish money on the outward appearance of a building and slight other very vital features. Good plumbing fixtures and non-corrosive piping are worth more than a few gargoyles. Durable floors

are a better investment than imported marble and gold chandeliers in the lobby.

The piping in a certain large building is corroding so rapidly that it will soon be a serious source of expense to the owner, and inconvenience to the tenants. It will be found that a little restraint in display and larger expenditure for features that figure more largely in the cost of maintaining the building, will result in added earnings over a period of years. The money that has to be spent for renewing features that too often are slighted can be spent to better advantage for the kind of attentive service that keeps tenants satisfied.

Much is being said nowadays about obsolescence. Most economists agree that, as in the case of the weather, there is very little we can do about it. But we can insist that our building shall embody the very latest improvements that modern science can offer.

The last five years has seen a greater advance in the development of elevators and elevator machinery than was made in all the previous years in which elevators had been used. A friend of mine who has charge of a building that was finished about twelve years ago, told me recently that an estimate has shown that it will cost about seventy-five thousand dollars to replace the old elevators in his building with equipment of advanced type, embodying multivolt control and floor leveling devices. It is difficult, and in many cases impossible, to avoid occurrences of this kind but they can be reduced to a minimum if the owner demands materials and equipment of the latest type throughout his structure.

Style, too, must be reckoned with in the planning of the modern building. The soaring lines and profound shadows of the modern tower have ushered in a new school of design that is sounder in many respects than the coddly facades that line many of our older streets. To ignore this new trend in design is to invite obsolescence. Even if a building is of the most advanced design from an economic and engineering standpoint, it still is at a disadvantage among its neighbors, if it does not conform with the modern note in style.

Happily there is ample evidence of increasing appreciation among investors and among those who have to do with building, for the economic values that govern earning power. Study of existing structures and publicity of the facts obtained are surely bringing about the development of sounder ideas and methods.

The typical commercial building of today represents a long advance from the building of ten years ago. Tomorrow will produce other marked betterments as we learn our lessons from the past and plan our buildings with closer understanding of the economic principles that govern success.

BUILDING FEE ORDINANCE IS PASSED AT PACIFIC GROVE

The Pacific Grove, Calif., city council has amended that section of the building ordinance regulating the payment of fees for building permits. Hereafter applicants will pay \$2 on the first \$1000, which is no change, but only \$1 on each succeeding thousand up to \$10,000, and 50 cents for every thousand over that. On \$5000 the permit would cost \$10 under the old rate. The new rate makes the cost \$6. The change, as explained by City Manager Edwin Dames, is to encourage more accurate valuations by those taking out building permits.

Frank H. Eichler, Credit Manager of the American Smelting and Refining Company (left) congratulating Andrew J. McGarry upon his appointment as Manager of the Construction Industries Credit Bureau.

Announcement is made by Frank H. Eichler of the appointment of Andrew J. McGarry as manager of the Construction Industries Credit Bureau of the San Francisco Association of Credit Men.

Eichler states that several months ago D. I. Bosschart, president of the association, appointed a special committee to investigate the needs of the construction industries of San Francisco for organization and co-operative regulation of credit operations. As a result of the activity of this committee, of which Eichler is chairman, the Construction Industries Credit

Bureau was formed, and McGarry selected as its head.

McGarry, who is well known among San Francisco and Oakland contractors and material dealers, comes to his new position following eleven years experience in the building industries credit field in the bay region.

Filling a long required need, the bureau will gather and disseminate credit information pertaining to all construction work in the bay region.

The activities of the bureau are divided into four general divisions including financial, manufacturing and producing, distributing and contracting.

PACIFIC CLAY PRODUCTS SEES INCREASED BUSINESS

Substantially increased business during the second quarter and for the remainder of the year is expected by officials of Pacific Clay Products Company in view of the extended program of municipal improvements announced as scheduled for most of the important Pacific Coast cities.

The company specializes in the manufacture of vitrified clay sewer-pipe as well as a line of fire and face brick.

During the present year the concern expects to reflect in its earning statements the full benefit of the work and expense of the past few years in bringing its various lines into production. Its earnings record would tend to bear this out, increasing from \$336,828 in 1928 to \$374,331 in 1929 and \$399,563 in 1929, with no preferred stock ahead of the common and a funded debt of only \$226,500.

OIL BURNER ASS'N ELECTS WALTER TANT PRESIDENT

Walter F. Tant, president of the Silent Automatic Corporation of Detroit, was elected president of the American Oil Burner Association at the 7th annual convention of the organization in Chicago, April 10.

Other officers elected were: Vice-presidents, H. Finnie, The Timken-Detroit Co., Detroit; W. J. Smith, Cleveland Steel Products Corp., Cleveland; W. C. McTarnahan, Petroleum Heat & Power Co., New York City; J. H. Hirsch, Automatic Burner Corp., Chicago; W. F. Schroeder, Schroeder & Curry, St. Louis, Mo.

The new executive committee includes: W. F. Tant, Silent Automatic Corp., Detroit; L. M. Fieschmann, May Oil Burner Corp., Baltimore; H. Finnie, The Timken-Detroit Co., Detroit; J. F. Griswold, Harding Bros., Inc., Chicago; Earl Marr, Marr Oil Heat Machine Corp., Minneapolis.

THE OBSERVER

WHAT HE HEARS AND SEES ON HIS ROUNDS

The following statement is issued by Julius H. Barnes, chairman of the National Business Survey Conference:

"Reports from many sources indicate that the emphasis laid upon repairs and betterments as a contributing factor in the stabilization of business has been effective. Permits issued for the purpose show a substantial growth. Since the early part of the year the average daily permits for additions, alterations and repairs, have increased 30 per cent. The stimulus given these activities has aided appreciably in relieving unemployment.

"The next logical step is the resumption of home building. For this, the Executive Committee of the National Building Survey Conference reports that conditions are now generally favorable. In most sections an ample supply of credit for this purpose is available at reasonable cost; and prices and terms for materials and equipment for such construction have become fairly well stabilized on a basis satisfactory to the purchaser.

"With favorable seasonal conditions also at hand it would appear that attention might now be directed with advantage to requirements for residential building. Industrial construction and replacement have been well sustained. Repairs and betterments have been accelerated. The resumption of prudent building activity in the residential field will aid materially in bringing employment back to normal."

Federal Department of Labor checks of employment conditions in Pacific coast states show a marked improvement, but there is a continued presence of an oversupply of labor. Conditions in California, Oregon and Washington are practically parallel. Industrial conditions call for more factory employes, but not enough to take up all available workers. Farm operations and vegetable canning has helped absorb the excess.

"The year 1930 promises to be a good one, equal or close to the high record of 1929 in the United States as a whole," says R. M. Alvord, manager of the General Electric Company, San Francisco. "The business of the year is starting slowly but is already showing signs of development and expansion. Competition will continue to be keen; the plant that is well equipped for most efficient production and has its sales operations well planned and executed may look forward to a very good, prosperous year."

Electrical Products Corporation of California first quarter net profit will exceed \$140,000 against \$95,671 in 1929, according to Paul D. Howse, president of Claude Neon Electrical Products, Ltd., of Delaware.

Thomas Irvine, nationally known lumberman, died at St. Paul, Minn., April 15. He was 88 years old, and was the last surviving member of the original coterie of lumbermen associated with the late Frederick Weyerhaeuser, Sr. He was best known for his connection with the Mississippi River Logging Company, organized in 1871, of which firm Weyerhaeuser was president.

The significance and scope of the certification plan, by which certain manufacturers have stated their willingness to guarantee compliance with nationally recognized specifications for commodities, are discussed in miscellaneous publication 205 of the U. S. Department of Commerce, Washington, D. C.

Safety advertising within industry is generally regarded as one of the most practical accident prevention measures, since it provides a medium whereby management may address supervisors and workmen repeatedly concerning the need for safe practices. No safety campaign can be entirely successful without cooperation from the "man on the job."

As the sixth in a series of industrial safety leaflets designed to present the principles governing successful accident prevention work and to describe effective methods of applying them, the Policyholders Service Bureau of the Metropolitan Life Insurance Company has just issued a publication entitled "Safety Advertising." This is based on a study of the field of safety engineering and outlines current methods of preparing and displaying safety advertising material as a means of keeping employees constantly informed of the importance of safe workmanship.

The publication discusses the principles, form, appeal, and media to be used in this type of publicity and is illustrated with photographs of effective bulletin board and blackboard displays. Industrial executives and others interested in this subject may secure copies of "Safety Advertising" by addressing the Bureau at 1 Madison Ave., New York City.

A new type of brick, which, tests show, will endure white heat for a longer period of time than the ordinary one made of clay soon will be turned out of native Del Norte rock in large quantities by Charles A. Look of Eureka, who is preparing to construct kilns and special apparatus capable of handling the huge ledges of an unidentified stone.

Recent experiments have shown that the new brick, of a rock and not a baked clay composition, will stand the maximum heat of furnaces for 11 months.

The rock from which the brick is cut has not been identified. It resembles tuft in that it is light and powdery and has the white color of talc in the natural state. Look owns the ledges of this rock covering 250

Planning committees of 12 counties, meeting at Atascadero, Calif., April 21, formed an association of planning commissions of California.

J. P. Wright, Santa Barbara, was elected president. Other officers selected were Merwin Rosson, Huntington Park; Carmel Martin, Monterey; and W. H. Jahant, Wasco, vice-presidents, and D. H. Craig, Atascadero, secretary-treasurer.

A meeting to draft a constitution will be held in Santa Maria on May 17, to be followed by another meeting in Santa Barbara on June 23.

HERE — THERE — EVERYWHERE

According to word from Berlin, the United Steel Works of Germany has dismissed 5000 employees due to sharp decline in orders.

Monterey city council has passed print a building ordinance similar to that now in effect at Santa Barbara with the exception of minor change to suit local conditions.

Grade-crossing elimination bond to the amount of \$30,000,000 have been authorized by the legislature and Governor of New York State. Of this amount \$13,500,000 will be used with in the city of Syracuse.

Recommendation favoring the merger idea were directed to be forwarded to lumber industry organization at the unofficial closed conference of 45 Eastern, Southern, California and Pacific Northwest lumber company executives, held at Del Monte last Wednesday. Desirability of developing mergers, particularly from the angles of operation and merchandising was pointed out by several speakers. The Del Monte meeting revealed that public demand for lumber is at present 15 per cent less than last year, with prospects pointing to a gradual resumption of residential building and other lumber uses.

A licensed architect having had a number of years experience, and a building contractor who had likewise had considerable experience in the erection of buildings in his state are qualified as competent expert witnesses as to the difference in value of a building erected by a contractor as a result of defective workmanship and use of inferior materials, even though the architect and contractor may not have knowledge of real estate values. This ruled the court in the case of Mahan vs. Springers (Wash.) 283 Pac. 667, when it was sought to disqualify M. C. Pherson, licensed architect, and a Mr. Smith, contractor, as expert witnesses.

Cooperating with the National Lumber Manufacturers Association, the National Committee on Wood Utilization of the U. S. Department of Commerce, has placed at the disposal of the Fact Finding Committee for Aeronautics an airplane hangar of wood construction erected on the Bureau of Standards lot in Washington, D. C. This hangar is provided with automatic sprinklers, and a test covering the fire risk will be made during the latter part of this month. Based on the result of this test, the Committee will develop a bulletin on wooden airplane hangar construction.

"BOB" LOHEAD PASSES

Robert Lohead, 75, Fresno county supervisor, formerly engaged in the planing mill business in Fresno, died in that city April 13. Lohead became closely associated with the union labor movement and in 1905 became the labor candidate for mayor of Fresno, but was defeated. In 1907 he with several others founded the Fresno Planing Mill Company, of which he was president until March 1916, when he was elected supervisor a position which he held until January of 1929.

TRADE NOTES

Lodi Hardware Co. has opened new and enlarged quarters at 27 South School St., Lodi.

Construction will be started shortly on a new plant for the Kinney Iron Works in Forty-ninth Street, Los Angeles.

R. A. Wittick announces removal of the Los Angeles offices of the Kalman Floor Company to the Petroleum Securities Building, Tenth and Flower Streets.

Truscon Steel Co., Youngstown, Ohio, has appointed Oscar W. Loew a vice-president of the company. Mr. Loew has been director of advertising and sales promotion during the past six years.

American Air Filter Co., Inc., Louisville, Ky., formed as a consolidation of the Midwest Manufacturing Co., the National Air Filter Co. and the Teed Air Filter Co., will hereafter function as one organization.

California Builders Supply Co. of Oakland, has been incorporated. Directors are: Kenneth J. Shipp, Arthur D. Williamson and J. V. Enderit, all of Oakland. The company is capitalized for \$25,000 and will engage in general building material business.

National Pole & Treating Co., Everett, Wash., will improve and expand its plant capacity from five to eight cars a day at a cost of \$70,000. Installations will include a new creosoting unit, including two treating tanks with capacity of three cars daily and a pipe line.

N. Max Dunning, of Chicago, a director, and LeRoy Kern, of Washington, secretary of the American Institute of Architects, will lead the discussions on building and construction, which will be a feature of the annual meeting of the National Committee on Wood Utilization, of the Department of Commerce in Washington, May 2. The principal object of this meeting will be to afford members the opportunity of voicing their opinions as to how the Committee can act in carrying out the various projects it now has under way. A main project of the Committee at the present time is one which has to do with the stocking of chemically treated wood by retail lumber yards. A. R. Joyce, representing the American Wood Preservers Association, will lead the round table on this subject, and A. W. Armstrong of Chicago, will outline what the Committee is doing on this and other projects such as fireproofing, hardening, softening, and other wood-treating processes.

The promotion of the use in the manufacturing field of small dimension stock, that is, stock cut to sizes which can be used by industry with a minimum of manufacture, is one of the Committee's principal activities. E. Colesworthy, of Worcester, Mass., representing the National Association of Purchasing Agents on the National Committee on Wood Utilization, and Chairman of the sub-committee on small dimension, will open the discussion of this subject.

ALONG THE LINE

H. N. Bishop, building inspector of Willow Glen, Santa Clara County, has resigned. Bishop is now fulfilling the duties of city engineer of Willow Glen and Sunnyvale.

David P. Bradley, general superintendent for the Hall-Johnson Company, paving contractors of Alhambra, died in Los Angeles April 16 after a brief illness of heart disease.

Frank J. Rossi, city engineer of Modesto, has been elected president of the Modesto Chapter, American Association of Engineers. He succeeds Marin Crews. Other officers are G. D. Macomber of Oakdale, vice-president, and H. C. Moore, secretary-treasurer.

Kenneth Smith, for the last two years secretary-manager of the Lumber Dealers' Association of Los Angeles has resigned, and upon his recommendation the office maintained by the association has been closed.

Warren C. Earle, former Pasadena city engineer, and T. C. Breitenstein, paving contractor, were convicted of four counts of grand theft April 17. The men, who were charged with defrauding the city of Pasadena of \$42,000, were remanded to jail and their \$20,000 bonds exonerated. They will appear tomorrow for sentence.

I. G. MacDuff, city building inspector of Tacoma, in addressing the city council of Hoquiam, Wash., urged adoption by that city of the uniform building code as prepared by the Pacific Coast Building Officials' Conference.

Richard Wright, manager of the Los Angeles office of Architect Carlton M. Winslow, died April 8 of heart disease. He was 45 years of age, had been in Mr. Winslow's employ for the last five years and was a member of the State Bar Association. His father, editor of the Boston Globe, and a daughter living in Los Angeles, survive.

WARPED LUMBER CAN BE STRAIGHTENED

The Atlantic Lumber Company, large manufacturers and wholesalers of hardwood lumber, Boston, Mass., tells in its "Log" the interesting process of dealing with warped lumber and pressing it out straight and flat. "One of the things our experiments in steam curing Sap Gum has taught us," the article runs, "is that wood is plastic at a high temperature in saturated air. Steam is, of course, saturated air, and crooked lumber can be straightened in the following manner in a dry kiln: Stack on kiln trucks with stacking strips six inches apart. Place a heavy weight on top of the piles or else put your crooked lumber only in the bottom of the piles and complete your stock with straight lumber which will serve as a weight to be in place in case you want to continue and kiln dry the entire lot. Next turn on live steam and bring the temperature by means of live steam only, to 190 degrees F. If the kiln is loaded this way at night, you can open the door the next morning and find no evidence of warped lumber."

TRADE LITERATURE

Small water turbines of the reaction, inward flow or vortex type, are described in a 16-page catalog issued by the De Laval Steam Turbine Co., Trenton, N. J.

Advantage of the Ferry mushroom pile, a concrete cast-in-place pile with spread footing, are outlined in an 8-page illustrated bulletin issued by the James Ferry Co., Inc., Atlantic City, N. J.

An unusually attractive 20-page booklet illustrated in color has been put out by the American Hoist & Derrick Co., St. Paul, Minn., describing its line of power shovels, cranes, hoists and derricks.

Standard specifications and safe loading tables for Macomber bar joints in tabular form have been issued in a revised edition by the Macomber Steel Co., Canton, Ohio. This company has also issued a 4-page folder describing accessories for use with the joints.

Condensed heating rates in tabular form covering the season 1929-1930, as charged by organizations distributing steam or hot water for district heating in the United States, are given in a pamphlet issued by the Ric-Wil Co., Cleveland, Ohio.

Final draft of the "Manual for Carpenters," a handbook which is being prepared jointly by the Federal Board for Vocational Education and the National Committee on Wood Utilization of the U. S. Department of Commerce, has been sent to the Government Printing Office. It will contain approximately 200 pages and more than 150 illustrations devoted to wood construction practices of value to carpenters and builders. The manuscript has already been approved by the practical carpenters consulted.

Advantages of the screw propeller or axial flow pump, largely used for land drainage and similar purposes, are outlined in an illustrated booklet issued by the Washington Iron Works, Seattle, Wash. This describes Gill pumps, designed on the axial flow principle and consisting essentially of a bladed screw rotor, resembling in some respect a ship's propeller, working between guide vanes and surrounded by a short cylindrical casing. A distinguishing feature of these pumps is that the flow of water through the machine is not altered in general direction and there is little change in axial speed.

UNPRECEDENTED BOOM SHOWN IN BUILDING

That the nation is in the midst of an almost unprecedented building boom is revealed by the Department of Labor.

Reports from 292 cities having a population of 25,000 or over show an increase of 50.6 per cent in the estimated expenditures for all building operations for which permits were issued in March, compared with permits issued in February.

The estimated cost of all building operations included in the March permits was \$164,165,206, compared with \$109,009,775 in February.

CORRECTION

The following communication from Geo. W. Williams is self-explanatory: "In your issue of Saturday, April 19, you have a news item about the G. W. Williams Company."

"In this news item you state that G. W. Williams Company, Ltd., has been authorized to issue 5016 shares of Common Stock to Geo. W. Williams."

"As a matter of fact, G. W. Williams Co., Ltd., was authorized to issue 5016 shares of Common Stock to G. W. Williams Company, and not to any particular individual."

"I wish to make this correction inasmuch as G. W. Williams Company is at present owned by three individuals, Geo. W. Williams, Frank F. Burrows, and K. Williams. These individuals will secure stock in the new company in proportion to their holdings in the old one."

WESTERN METAL CONGRESS COMMITTEEMEN NAMED

Plans for the 1931 Western Metal Congress and Exposition to be held in San Francisco the week of February 16, are rapidly progressing under the leadership of Ivan L. Johnson, Best Steel Casting Co., Oakland, chairman of the general committee appointed by W. H. Eisenman, secretary of the American Society for Steel Treating, to handle local arrangements for the Convention and show.

The following men have recently consented to head sub-committees: Howard S. Taylor, Leland Stanford University, is chairman of the program group; James V. Coulter, Earl M. Jorgensen Co., Oakland, leads the exhibit committee; John R. Gearhart, John R. Gearhart Co., Oakland, will arrange for plant inspections, entertainment will be planned by a committee serving under Harold E. Gray, Bethlehem Steel Co., San Francisco; registration and attendance will be handled respectively by George E. Batten and S. Craig Alexander, both of the Ludlum Steel Company's San Francisco office.

SAN JOSE ARCHITECTS SUE FOR UNPAID FEES

Wolfe & Higgins, San Jose architects, have filed suit in the superior court in that city against Victor M. Smith, wealthy official of the U. S. Shipping Board and a stockholder in the Dollar Steamship Company.

The suit is brought for a bill of \$1001 for professional services and interest for eight years, making a total of \$1608.

Smith, according to the complaint, commissioned the architects to prepare plans for a Japanese tea garden project at San Antonio Road and the highway east of Los Gatos. When the project "fell through," he failed to compensate the architects for their services.

OPENS BRANCH FACTORY

The Electro Therapy Products Corp., Ltd., a branch of Electrical Production Corporation, owners of "Claude Neon Lights," have recently opened a branch factory at 255 Golden Gate Avenue, San Francisco. The company specializes in medical lights only, manufacturing the Mercury Quartz lights for physicians and other doctors. Arthur F. Boles is district manager for northern California.

FEDERAL CONSTRUCTION NOT FOR OAKLAND ARCHITECTS

Oakland architects cannot be employed to expedite work on the new Oakland postoffice building.

Representative Albert E. Carter was so informed, by treasury department officials, according to a Universal Service report from Washington, D. C.

It was explained that to do so would interfere with work already under way by treasury departments architects.

At the same time the post office department announced that H. S. Roberts will visit Oakland soon to confer with Postmaster William Nat Friend on postal service arrangements in the new building.

CONTRACTORS' RESPONSIBLE FOR DAMAGE BY BLASTING

Irrespective of whether due care is used in handling explosives a contractor or other person responsible therefor is liable for damages resulting therefrom, even though such damage may result from vibration or concussion and not from chunks or masses of material projected through the air.

This is the ruling of the Appellate Court, Second District, Division I, in the case of Maude L. McKenna vs. Pacific Electric Railway Co., and Twoby Bros. Company (Civil No. 5655). The latter were contractors who built the Pacific Electric Tunnel in Los Angeles from the Hill St. station to First St. and Glendale Blvd. Plaintiff was owner of a house at Fourth and Boylston Sts., on a hill through which the bore was made. The house was close to the line of the tunnel which was 74 feet or more below the top of the hill. Damage to the property resulted from the vibrations caused by blasting in the tunnel.

In the superior court the railway company was released from responsibility but the plaintiff was awarded \$175 damages from Twoby Bros. Company. The judgment was appealed by the latter. The opinion of the appellate court, just published, discloses that defense set up the claim that no complaint of negligence was made and that it could not be held responsible for any damage except that it was the result of negligence. Various cases were cited in support of this contention. These involved damage by physical projectiles and missiles but the court held that it could see no reason for differentiating between responsibility for damage done by these and responsibility for damage done by vibration or concussion.

NEW PLANT PROPOSED

Graybar Electric Company contemplates the erection of a new plant in Los Angeles when leases on the present quarters expire. It is understood that the leases have several years to run. The building will be similar to the new Graybar plant in San Francisco.

San Francisco offices for Aurora Products, Inc., manufacturers of Neon signs, will probably be opened by May 1, it is announced by W. J. McGhee of Los Angeles, vice-president and general manager of the company, who is spending several days here making necessary arrangements.

1930 WILL PROVE TO BE A BANNER STREET PAVING YEAR

Official figures received from a majority of the eighty-eight cities in the United States having a population of 100,000 or more, in a census of city paving being taken by the Asphalt Institute, show that despite the industrial depression that existed last fall, the year 1929 witnessed the construction of approximately 45,000,000 sq. yds. or about 4400 miles of new city pavements of a higher type than waterbound macadam, an increase of about eleven per cent over 1927 and 1928.

The returns show also that a tremendous paved yardage is in prospect for 1930, most of the cities planning greatly expanded programs in accordance with the plan of President Hoover, the Department of Commerce, the municipalities and the construction industries to afford work for the unemployed and "make prosperity permanent." City paving, in the larger cities at least, according to indications, will be from fifteen to twenty per cent greater in 1930 than in 1929.

Returns from the paving census show that in sixty-three cities, or about seventy-five per cent of those having 100,000 population or more, a total of 32,491,938 sq. yds., or about 3200 miles, of new pavements of type higher than waterbound macadam were constructed in 1929. As asphalt streets constructed that year totaled 21,633,496 sq. yds. or approximately 2060 miles, while the other types higher than waterbound macadam amounted to 10,858,442 sq. yds. or approximately 1160 miles.

On this basis the eighty-eight cities in the United States having 100,000 or more population, constructed, in 1929, 35,290,000 sq. yds. of new streets, or roughly, 4400 miles of pavement, eighteen feet wide. In 1929, the eleven largest cities in the United States—Boston, New York, Buffalo, Philadelphia, Pittsburgh, Chicago, Detroit, Cleveland, St. Louis, Baltimore and Los Angeles, constructed a total of 18,222,608 sq. yds. or approximately 1700 miles of high-type pavement, of which 11,617,624 sq. yds., or 1050 miles were of asphalt and 6,604,984 sq. yds. or 650 miles, were of other types. In 1927 these same cities constructed a total of 13,027,958 sq. yds., or approximately 1200 miles, of new streets. Of this, a total of 9,121,525 sq. yds., or 900 miles, were of asphalt and 3,906,433 sq. yds., or 300 miles, were of other types.

For 1930 cities in the Middle Atlantic states will lay approximately twelve per cent more pavement than in 1929. Those in the East-South-Central states will increase their yardage by at least four per cent. Cities in the West-South-Central states will show an increased construction of about fifty-eight per cent. Construction in New England, South-Atlantic, East North-Central and Pacific Coast cities will but slightly exceed that of 1929 in some cases, and in others will equal the improvements last year.

OTIS ELEVATOR EARNINGS

First quarter earnings of the Otis Elevator Company amounted to \$1,759,443, equal to 8 cents a share or 2,000,000 no par common shares, compared with \$1,692,506, or 79 cents share, computed on the same share basis, earned during the same quarter of 1929.

Building News Section

APARTMENTS

Plans Being Figured By Selected List Of Contractors.
APARTMENTS Cost, Approx. \$50,000
SAN FRANCISCO. Haight & Steiner Streets.
 Five-story steel frame and concrete apartments.
 Owner—Mrs. L. Hagmaier, 222 Fillmore St., San Francisco.
 Architect—Bliss & Fawcett, Balboa Bldg., San Francisco.

Plans Being Completed.
APARTMENTS Cost, \$—
SAN FRANCISCO. Fourteenth and Rosemont Streets.
 Five-story and basement steel frame and concrete apartments.
 Owner and Builder—Henry W. Petersen, % Crocker Amazon Realty Co., 912 Geneva Ave.
 Architect—E. E. Young, 2002 California Street.
 Sub-bids will be taken in 2 weeks.

Sub-Bids Being Taken.
ALTERATIONS Cost, \$35,000
SAN FRANCISCO. No. 1579 Greenwich Street.
 Alterations and additions to (18) apartments.
 Owner—S. Schwalbe, Premises.
 Plans by E. K. Dobkowitz, 425 Montecrey Blvd., San Francisco.
 Contractor—Augustine & Certel, 1566 Church St., San Francisco.

Plans Being Prepared.
APARTMENTS Cost, \$300,000
OAKLAND. Alameda Co., Cal. Excelsior and Capelli Sts.
 Eight-story class A, B and C steel frame apts. (brick exterior, concrete and wood floors).
 Owner—Leonard Thomas, et al, 731 E 10th St., Oakland.
 Plans by Leonard Thomas, 731 E 10th St., Oakland.
 Plans will not be ready for at least six weeks.

Inclinator Contract Awarded.
APARTMENTS Cost, \$200,000
SAN FRANCISCO. SE O'Farrell and Franklin Sts.
 Six-story steel frame and reinforced concrete class C apartment building (42 2-and 3-room apts.).
 Owner and Builder—C. S. Hoffman, 1541 Howard St.
 Inclinator—Baldt-Falk and Co., 557 Market St. (Heinbach Twentieth Century).

As previously reported electric work awarded to Aetna Elec. Co., 1337 Webster St.; plumbing and heating to J. Gibbs Sons, 1706 Geary St.; structural steel to Golden Gate Iron Works, 1541 Howard St.; grading to G. Blanchini, 750 Silver Ave.

Sub-Bids Being Taken.
APARTMENTS Cost, \$650,000
SAN FRANCISCO. California St. and Joyce St.
 Eight-story Class A steel frame and reinforced concrete apartments (300 rooms).
 Owner and Builder—Marian Realty Co., 110 Sutter St., San Francisco.
 Architect—H. C. Baumann, 251 Kearny St., San Francisco

Plans Being Prepared—Contract Awarded.
APARTMENTS Cost, \$50,000

SAN FRANCISCO. S Jefferson St. 192 E Broderick St.
 Three-story and basement frame and stucco apartments (12 3 and 4-room apts)
 Owner—J. Fenech.
 Plans by D. E. Jaekle, Call Bldg., San Francisco.
 Contractor—Standard Bldg. Co., 1610 Harrison St., San Francisco.
 Elevator, oil burner, heating system and all other modern conveniences.
 Sub-bids will be taken within one week.

Sub-Contracts Awarded.
APARTMENTS Cost, \$40,000
SAN FRANCISCO. S Sacramento St. W Franklin St.
 Four-story and basement class C (16) apartments.
 Owner and Builder—L. D. Stoff, 26 Montgomery St.
 Architect—H. C. Baumann, 251 Kearny Street.
Structural Steel—Golden Gate Iron Works, 1541 Howard St.
Electric Work—Aetna Electric Co., 1337 Webster St.
Lumber—Pope & Talbot Lumber Co., Russ Bldg.
 Sub-bids are being taken on other portions of the work.

Sub-Bids To Be Taken In One Week.
APARTMENTS Cost, \$50,000
SAN MATEO. San Mateo Co., Cal.
 Three-story and basement frame and stucco apartments (18 3-room apts.)
 Owner—Withheld.
 Architect—Enri Cavasso, 235 3rd Ave., San Mateo.
 Contractor—Sierra Constr. Co., 235 Third Ave., San Mateo.

Sub-Figures Being Taken.
APARTMENTS Cost, \$150,000
OAKLAND. Alameda Co., Cal. Excelsior Blvd. near Beacon St.
 Six-story brick apartments.
 Owner and Builder—H. Danskanen, 570 Excelsior Blvd., Oakland.
 Architect—Clay M. Burrell, American Bank Bldg., Oakland.

BONDS

NORTH SACRAMENTO. Cal.—Election will be held May 7 in North Sacramento School District to vote bonds of \$25,000 to finance school improvements.

A Demonstration of the SKILSAW PORTABLE ELECTRIC HAND SAW

Will save your cutting problems.
 (Four Models, 1/2 to 1 h. p.)

**ELECTRIC HAMMERS
 ELECTRIC DRILLS
 GRINDERS, BUFFERS**

PETER H. NELSON

Labor Saving Portable Electric Tools.

1222 Mission St. Underhill
 San Francisco 1267

COLUSA. Colusa Co., Cal.—County supervisors sell at private sale the \$45,000 bond issue of the Grand Island Grammar School District for premium of \$1118; proceeds of the sale to finance erection of a new school.

SAN JOSE. Santa Clara Co., Calif.—Until May 5 bids will be received by county supervisors for purchase of \$45,000 bond issue of Franklin School District; proceeds of sale to finance erection of a new school building.

FRESNO. Fresno Co., Cal.—Election will be held May 15 in Bullard School District to vote bonds of \$30,000 to finance erection of a new school. Trustees of the district are: F. L. Alcorn, W. G. Mulholland and H. D. Bartlett. Swartz & Ryland, architects, Spazler Bldg., Monterey, 373 Main St., Salinas, and Brix Bldg., Fresno.

UPPER LAKE. Lake Co., Cal.—Election will be held April 26 in Upper Lake Union School District to vote bonds of \$35,000 to finance erection of a new school. Trustees of the district are: W. C. Hunter (clerk) G. C. Wayne and Taylor A. Day.

and Valerio Sts. Building committee will be appointed at once.

SPARKS, Nevada.—Catholic Church at F and 18th Sts., partially destroyed by fire April 20. The loss is estimated at \$6,000.

FACTORIES AND WAREHOUSES

Plans Being Figured.
ADDITION Cost, \$40,000
HAKERSFIELD, Kern Co., Cal.
Four-story concrete addition to warehouse.
Owner—G. H. Galbraith.
Architect—Chas. H. Biggar, Bank of Italy Bldg., Bakersfield.

Plans To Be Prepared.
DISTRIBUTING PLANT Cost, \$15,000
PITTSBURG, Contra Costa Co., Cal.
Distributing plant.
Owner—Gilmore Mid-State Oil Co., Los Angeles.
Architect—Eng. Dept. of Owner.
Similar plants will be constructed by the same corporation at San Jose, Hanford, Hollister and Modesto.

To Be Done By Day's Work By Owner.
FACTORY Cost, \$10,000
OAKLAND, Alameda Co., Cal. N. E. 11th St., S 32nd.
One-story concrete factory.
Owner—Standard Acetylene Gas Co., 671 61st St., Oakland.
Architect—Guy L. Brown, American Bank Bldg., Oakland.

Contract Awarded.
WAREHOUSE Cost, \$20,000
SAN MATEO, San Mateo Co., Cal.
San Mateo Drive and Peninsula Avenue.
One-story frame offices and warehouse.
Owner—San Mateo Feed & Fuel Co., 850 San Mateo Drive, San Mateo.
Architect—None.
Contractor—S. A. Wisnom, 140 S. Ellsworth St., San Mateo.

Preliminary Plans Being Prepared.
CREAMERY Cost, \$—
SAN FRANCISCO. 18th and York Sts. (137-6x200-ft.)
Two-story and basement class B concrete creamery (foundation laid for two additional stories to be added later).
Owner—Challenge Creamery & Butter Assn., 807 Montgomery St.
Architect—Dodge Riedy, Pacific Bldg.

Bids To Be Taken April 25.
CREAMERY Cost, \$15,000
SAN JOSE, Santa Clara Co., Cal. W. San Carlos and Locust Sts.
One-story reinforced concrete creamery.
Owner—Hester Dairy, San Jose.
Architect—Wolfe & Higgins, Realty Bldg., San Jose.

OAKLAND, Alameda Co., Cal.—Until May 5, 4:30 P. M., bids will be received by City of Oakland Port Commission for 24 steel rolling doors for the transit shed on Ninth Ave. Pier.

Plans Complete.
TRANSIT SHED Cost, \$—
OAKLAND, Alameda Co., Cal. Ninth Avenue Pier.
One-story reinforced concrete superstructure for transit shed (504x180 ft.; two 70-ft. trusses and one 40-ft. truss).
Owner—City of Oakland Port Commission, 424 Oakland Bank Bldg., Oakland.
Architect—Eng. Dept. of Owner.
Bids to be asked April 28th.

Plans Being Completed.
CREAMERY Cost, \$14,000
SAN MATEO, San Mateo Co., Cal.
Bayshore Highway.
Owner—Jersey Farm Creamery.
Plans by Enri Cavasso, 235 3rd Ave., San Mateo.
Bids will be taken in one week.

Contract Awarded.
DISTRIBUTING PLANT Cost, \$20,000
STOCKTON, San Joaquin Co., Cal.
Pacific Ave. adjacent to Western Pacific Railroad Spur.
One-story concrete distributing plant and offices.
Owner—Gilmore Oil Co., 1560 Lucerne St., Stockton.
Private Plans.
Contractor—George H. Murphy, 35 E. Harding Way, Stockton.

At a later date the company will construct or purchase a chain of service stations extending from Stockton to Hollister, San Benito County, in addition to distributing products to independent dealers throughout that region.

MIAMI, Arizona—Apache Vanadium Corp., J. G. Scarborough, president, expects to start work within three months on erection of 150-ton capacity mill near Radium.

Contract Awarded—Sub-Bids Being Taken.
CREAMERY Cost, \$30,000
SACRAMENTO, Sacramento Co., Cal. 21st and Q Sts.
One- and two-story brick creamery.
Owner—Home Milk Co.
Plans by Mr. Holdener.
Contractor—Holdener Const. Co., 2608 R St., Sacramento.

Contract Awarded—Sub-Bids Being Taken.
MFG. PLANT. Cost, \$125,000
SOUTH SAN FRANCISCO, San Mateo Co., Cal.
Part two-story and part six-story steel, brick and concrete manufacturing plant.
Owner—Pacific Bone, Coal & Fertilizer Company.
Engineers—Ellison & Russell, Pacific Bldg., San Francisco.
Contractor—Barrett & Hilp, 918 Harrison St., San Francisco

Contract Awarded—Sub-Bids Being Taken.
WAREHOUSE Cost, \$50,000
SUNNYVALE, Santa Clara Co., Cal.
One and two-story concrete warehouse.
Owner—Libby, McNeill & Libby, Merchants Exchange Bldg., S. F.
Architect—Eng. Dept. of Owner.
Contractor—Barrett & Hilp, 918 Harrison St., San Francisco.

Sub-Contract Awarded.
HANGAR Cost, \$100,000
ALAMEDA, Alameda Co., Cal. Alameda Airport.
Steel frame hangar (120x450 ft.)
Owner—Alameda Airport, Inc.
Private Plans.
Contractor—Lindgren & Swinerton, Inc., 225 Bush St., San Francisco.
Wood Piling—Healy-Tibbitts Constr. Company.
Structural Steel—Western Iron Wks. Siding—Capitol Art Metal Co.
Steel Sash and Glazing—Herrick Iron Works.

Plans Being Prepared.
WAREHOUSE Cost, \$60,000
SAN MATEO, San Mateo Co., Cal. Peninsula Avenue and Woodside Way.
Warehouse, rock, sand and gravel bunkers.

Owner—H. E. Casey Co. (H. E. Casey, Manager), San Mateo.
Architect—Eng. Dept. of Owner.

Plans Being Figured—Bids Close April 24th.
OFFICES, ETC. Cost, \$25,000
VALLEJO, Solano Co., Calif.
Offices, warehouse and tanks (corrugated iron and wood frame construction).
Owner—Standard Oil Co., 225 Bush St., San Francisco.
Plans by Eng. Dept. of Owner.

Plans Being Figured—Bids Close May 13, 2 P. M.
STATIONS Cost, \$—
LOS ANGELES COUNTY, Orange County and Ventura County on State Highway.
Three maintenance stations (comprising one-story cottage, garage, bunk house and oil house; frame construction).
Owner—State of California.
Architect—Geo. B. McDougall, State Architect, Public Works Building, Sacramento.
See call for bids under official proposal section in this issue.

GARAGES AND SERVICE STATIONS

Sub-Contracts Awarded.
STATION Cost, \$10,896
SACRAMENTO, Sacramento Co., Cal. Marione Vista (H Street Road).
Super-service station.
Owner—G. W. Bowen, 825 J St., Sacramento.
Architect—Harry Devine, California State Life Bldg., Sacramento.
Contractor—Cuth & Fox, 1516 27th St., Sacramento.
Lessee—Mr. Wallaner.
Concrete Work—Frank Harin, 1618 7th St., Sacramento.
Brick Work—Harry Jensen, 3733 Miller Way, Sacramento.
Lumber—Dolan Bldg. Material Co., 31st and P Sts., Sacramento.
Painting—George Harper, 34th and Fourth Ave., Sacramento.
Plumbing—North Sacramento Plumbing Co., North Sacramento.
Plastering—Wm. Low, 1009 J St., Sacramento.
Tile Work—Fisher Tile Co., 1214 J St., Sacramento.
Ornamental Iron—Palm Iron Works, 15th and S Sts., Sacramento.
Tile Roofing—Capitol Roofing Co., 2011 Q St., Sacramento.
Hardwood Floors—Johnson Floor Co., 42nd and 2nd Ave., Sacramento.
Mill Work—Burnett & Sons, 12th and North E Sts., Sacramento.
Glass and Glazing—W. P. Fuller Co., 1015 12th St., Sacramento.
Electric Wiring—J. W. Thomas, 3216 L St., Sacramento.
Electric Fixtures—Vogt & Co., 1106 J St., Sacramento.
Hardware—Murray & Low, 1009 J St., Sacramento.
Sheet Metal—Crouch Sheet Metal Corp.

Plans Being Revised.
WAREHOUSE Cost approx. \$200,000
PALO ALTO, Santa Clara Co., Cal.
Brick tire warehouse and super-service station.
Owner—Firestone Tire & Rubber Co.
Architect—Charles W. McCall, 1404 Franklin St.

All modern conveniences will be installed. New bids will be called for at later date.

Plans Being Prepared.
ALTERATIONS, ETC. Cost, \$—
SAN FRANCISCO. Stevenson Street between Second and Third Sts.
Alterations and addition to present garage (90x30 ft.)

Owner—M. A. Harris and Elmer B. Stone, Fifth and Brannan Sts., San Francisco.
 Engineer—H. J. Brunnier, Sharon Bldg., San Francisco.
